"Investor's Daily" says that DIAGNOSTEK, its "Stock of the Week," is unusual because, despite strong numbers, there is a sizable short position in the stock. "We can't figure the shorts out," says Diagnostek Chairman NUNZIO P. DeSANTIS. However, those betting on the stock's collapse may be giving up, according to GEORGE H. JAMES, managing director at LADENBURG, THALMANN & CO. He points out that volume has doubled, to an average of 186,000 shares daily, in the last seven weeks, possibly due to the covering of positions. The stock was up yesterday 3/8 to 16 1/4. ("Investor's Daily", 6/22)

The semiconductor stock group is featured in this morning's "Heard on the Street" column in "The Wall Street Journal." "I think we're about a year into a bull market [for semiconductor stocks] that will ultimately last three to five years," says analyst JAMES BARLAGE of SMITH BARNEY. "I think there's plenty more to go" in the semiconductor rally, says JILL HAUSER of the T. ROWE PRICE ASSOCIATES family of mutual funds. "They were ultra-depressed to start with." (WSJ, 6/22)

PRUDENTIAL-BACHE recommends stock in NCR CORP., saying earnings should average 12% annual growth in the next few years thanks to its business forms and services division. ("USA Today", 6/22)

COSTCO WHOLESALE CORP.'s numbers for their fiscal third quarter were "exceptionally good," according to SALOMON BROTHERS analyst JACK SEIBALD. Operating earnings were 25 cents per share, up from 15 cents for the same period last year. Seibald reports that Costco "saw meaningful improvement on the expense line due to benefits of operating leverage kicking in." ("Investor's Daily", 6/22)

McDONNEL DOUGLAS just had its credit rating downgraded and says it will have to cut $700 million in costs by early August, meaning layoffs of up to 15,000 white-collar workers. The stock fell 3 3/4 to 35 3/4 yesterday.

"I have been encouraging people to avoid the stock," says analyst HOWARD RUBEL at C.J. LAWRENCE, MORGAN GRENFELL. "Cash flow isn't running the right way and that's what really drives the stock price." ("USA Today", 6/22)

MICHAEL METZ at OPPENHEIMER & CO. lists 15 stocks to buy and 15 to sell in a "USA Today" feature this morning. His top three on the buy side are UPJOHN, ADOLPH COORS and BRITISH STEEL. Among those he says to sell are CIGNA, OHIO CASUALTY, HOUSEHOLD INTERNATIONAL, CHASE MANHATTAN, ROUSE CO, MARRIOTT CORP., GOLDEN NUGGET, TELE- COMMUNICATIONS INC, COMCAST, NORDSTROM, DILLARD DEPARTMENT STORES and NIKE. ("USA Today", 6/22)

CHASE MANHATTAN is in the "Company Spotlight" this morning in "USA Today" as an example of a bank stock undergoing hard times. The stock closed yesterday at 23 7/8, up 1/8 but still near its 52-week low of 23 1/2. It reached a high of 44 7/8 last year. Many analysts remain pessimistic about bank stocks in general, but MOODY's bank analyst MARA HILDERMAN says Chase "has done a very good and consistent job of increasing reserves and deceasing loans [to less- developed countries]. ("USA Today", 6/22)

There's been a rash of insider selling at specialty retailers and apparel makers over the last three months, reports DAN DORFMAN on CNN. Biggest insider sales: GAP, LIZ CLAIBORNE, COSTCO, LIMITED, NIKE, and QUICKSILVER. Dorfman says the selling comes just ahead of the important fall selling season and after three straight months of declining retail sales figures. (CNN "Business Morning", 6/22)

#90173m0002 06/22/1990 ~Market Consensus Surveys

FALLS CHURCH, VA (JUNE 22) MCS - A SAMPLING OF TODAY'S COMMENTARY COMPILED BY MARKET CONSENSUS SURVEYS, INC. IN TWO SECTIONS (1) STOCKS (2) MONEY & ECONOMY.

MONEY & CREDIT:

"Significant problems [in credit availability] cannot be ruled out in the period ahead," says FED CHAIRMAN ALAN GREENSPAN. However, he tells a Senate committee he sees no immediate danger of an economic threat because of tight credit and says. Moreover, he says bank regulators are not to blame and are merely cracking down on past lax lending practices. "Coming off such lax standards gives the impression that credit has been tightened " says Greenspan. "We haven't told bankers not to make loans," says COMPTROLLER OF THE CURRENCY ROBERT CLARKE. "We have reminded them to take care." ("USA Today", 6/22)

FDIC CHAIRMAN WILLIAM SEIDMAN was unable to make a scheduled hearing before the SENATE BUDGET COMMITTEE after being injured in a horseback

riding accident. PAUL FRITTS, the agency's head of supervision, read a statement on Seidman's behalf which denied the existence of a credit crunch. "There may be isolated instances across the country where credit-worthy borrowers with viable projects to finance are being denied credit," read the statement. "However, we have not seen any evidence that such credit denials are anything more than isolated instances." Many officials say the perceived crunch is merely the temporary fallout of lenders adjusting their lending practices following the S&L bailout. ("Investor's Daily", 6/22)

"There are a lot of people who would like to see interest rates lower and credit eased," says ALICE RIVLIN, former director of the CONGRESSIONAL BUDGET OFFICE and now an economist at BROOKINGS INSTITUTE. Responding to reports that higher risk borrowers were feeling an even greater crunch as a result of the S&L problems, Rivlin says: "Credit is credit. Everyone is dipping into the same pool. I don't see any way to ration credit favorably." ("The Christian Science Monitor", 6/21)

"Big inventories for unsold new houses through April have been rising, and office vacancies are rising," says PAUL KASRIEL of NORTHERN TRUST COMPANY. "There doesn't seem to be a big demand out there." Kasriel believes the Fed will ease after the FOMC meeting in July. ("The Christian Science Monitor", 6/21)

JOSEPH BATTIPAGLIA, associate director of research at GRUNTAL & CO., believes reports that an interest rate easing from the Federal Reserve is not in the offing. "While the economy continues in this limping fashion, we do have a persistent level of inflation," he notes. Moreover, he says the Treasury's need to finance government debt will help keep rates up. (CNBC "Market Wrap-Up", 6/21)

"The debate within the marketplace ... is to try to discern which way the economy is heading, to try to anticipate what the Federal Reserve will do next," says ROBERT HEISTERBERG of ALLIANCE CAPITAL. Yesterday's upward revision of first quarter GNP growth, from 1.3% to 1.9% took away "some of the expectation that a weak economy would produce an easing on the part of the Fed." (CNBC "Market Wrap-Up", 6/21)

WILLIAM SULLIVAN JR. of DEAN WITTER REYNOLDS says "definite support" for securities at roughly 8.50% "seems to underscore strong market sentiment that [interest] rates will be moving lower over time." (NYT, 6/22)

One government trader says he was a "bit confused" about yesterday's slight rise in Treasury securities prices after a four-day slide. "But on a fundamental basis," he continues, "the market is reasonably attractive. Yields are about 20 basis points higher now than they were late last week and people loved the market then. So even though we haven't seen much of it, evidently there is some buying going on." (NYT, 6/22)

BRIAN FABBRI, chief economist at MIDLAND MONTAGU SECURITIES, is among those who caution against reading too much into yesterday's modest bond rally. "Bond prices can move up and down almost on whim because of low volume," he says. Fabbri believes notes and bonds will remain stuck in tight trading bands at least until the release of the June employment report on July 6. (WSJ, 6/22)

THE ECONOMY:

"In contrast to a surface impression of an upward revision [in yesterday's GNP number] this really reflects a weaker economy than we had seen earlier " says JERRY JORDAN of FIRST INTERSTATE BANCORP in Los Angeles. "Weaker consumer spending and a bigger inventory overhang suggest the second quarter is not going to be as strong as thought." The first-quarter GNP figure was revised from 1.3% to 1.9%. (NYT, 6/22)

"We're still just slithering forward" on sluggish economic growth says economist WILLIAM DUNKELBERG, dean of TEMPLE UNIVERSITY's SCHOOL OF BUSINESS AND MANAGEMENT. ("USA Today", 6/22)

"To me, despite the big upward revision in the overall number the decline in consumption expenditures was an indication of economic weakness, not strength," says GARY SCHLOSSBERG of WELLS FARGO BANK in San Francisco. (NYT, 6/22)

Despite the surprisingly strong upward revision of first quarter GNP, DAVID JONES of AUBREY G. LANSTON still sees the United States on the brink of a recession by the end of the year. "In the current quarter, there is very strong evidence that consumer demand is falling." Jones says declining real estate values and the credit crunch are depressing consumers' spending plans. He worries that Fed easing, which he sees coming in the third quarter, will be too little and too late. "We're in a process that will inevitably turn downward going to come close to turning [the economy] around." (CNN "Business Morning", 6/22)

"What hasn't put us into a recession is the fact that we do have reasonably good business inventory balances," says JOSEPH BATTIPAGLIA, associate director of research at GRUNTAL & CO. He also says the "big picture" looks good, and that therefore, consumer confidence is high. (CNBC "Market Wrap-Up", 6/21)

"The Administration has based its budget assumptions on 2 to 2 1/2% GNP growth. Obviously, we're not getting that," says BILL SCHULTZ, senior economist at MIDLAND MONTAGU ECONOMICS. "In order to possibly move closer to that target, they need lower interest rates." He thinks that many of the Administration's statements about the economy have been posturing, trying to put pressure on the Fed to ease. (CNBC "Market Wrap-Up", 6/21)

The first quarter number really isn't the important statistic for the economy right now," says KIDDER, PEABODY economist SUSAN LAKATOS. "What people are more concerned about right now are the recent monthly statistics on unemployment and on spending, and those have been very weak ... suggesting that the economy has slowed down sharply from whatever growth we got in the first quarter, which wasn't too much to begin with." (CNBC "World Business", 6/22)

The upward revision for the first quarter numbers is merely borrowing against the rest of the year, according to CYNTHIA LATTA, senior financial economist at DRI/McGRAW HILL. She says lower consumer spending is "consistent with an economy that's likely to remain sluggish." ("Investor's Daily", 6/22)

IN WASHINGTON:

"Our citizens want to know why DONALD TRUMP got loans and they can't," says SEN. JOHN KERRY, (D. - Mass.). ("USA Today", 6/22)

The SUPREME COURT rules that states cannot bring federal antitrust suits on behalf of consumers charging energy producers with illegal price-fixing. (NYT, 6/22)

In a bold step unusual for a usually acquiescent society, Japan may openly oppose U.S. initiatives to encourage changes in the Japanese economic structure, including more spending on infrastructure, says FINANCE MINISTER RYUTARO HASHIMOTO. "We will never surrender to U.S. pressure," he says. The United States wants Japan to spend more money on improving its infrastructure, but the Japanese are unwilling to commit to the specific numbers demanded by U.S. negotiators. ("The Christian Science Monitor", 6/21)

"I never asked the senators to intervene with regulators," says former S&L owner CHARLES KEATING JR. "I asked them to get the regulators off my back." He was referring to the five senators he gave large contributions to during a time he was under the scrutiny

#90173p8761 06/22/1990 ~PR Newswire

BETHPAGE, N.Y. (JUNE 22) PR NEWSWIRE - Grumman Corporation (NYSE: GQ) today announced an early retirement incentive program for pension eligible employees. The program will provide a supplement to accrued pension benefits.

The program is part of an overall cost reduction plan underway at Grumman. There are approximately 6,000 employees eligible. It is completely

voluntary.

"In our redirection effort we have examined staffing requirements in every area of the company," says John O'Brien, Grumman chairman of the board and president. "When we looked at ways we could make the changes that must be made, offering retirement incentives seemed like the best and most compassionate answer."

Although Grumman Corporation is best known as a leading maker of military aircraft and aerospace systems, other businesses include integrated information processing systems, emergency vehicles, and aluminum truck bodies. The company employs 28,000 worldwide.

#90173p8763 06/22/1990 ~PR Newswire

ROCHESTER, NY (JUNE 22) PR NEWSWIRE - Curtice Burns Foods (AMEX: CBI) expects to report a decline in earnings for the fiscal year ending June 29 the company announced today.

Net earnings are expected to fall approximately 40 percent from the level of fiscal 1989's full year earnings, while sales are expected to increase approximately 10 percent.

"Two major factors cited as impacting our performance in the second and third quarters remain," said president and chief executive officer David J. McDonald. "They include (1) a short crop of canning and freezing vegetables in the Northeast which has sharply affected earnings in three major operations -- Comstock Michigan Fruit, Southern Frozen Foods, and Southland Frozen Foods; (2) lower sales in our meat snack business due to near record high beef prices; and (3) reduced sales of oat bran.

"Also impacting this year is the combined effect of the costs of a number of development activities, chiefly plant and administrative consolidation investments in four divisions which will produce significant cost reductions over time, as well as a number of aggressive marketing support actions with our strong regional brands. We expect these factors to cause the decline in this year's earnings from 1989 levels.

"This will be only the second time since 1980 that earnings have not advanced over the prior year," McDonald said. Looking ahead, he said that "By and large, these problems are short term in nature. We will continue to capitalize on our strenghts through strategies that have served us well: regional-brand market share dominance, synergistic acquisitions, and creative product line extensions. Given a return to normal crop conditions this year, with satisfactory earnings from our recent

acquisitions, and with the major portion of consolidation expense behind us, we anticipate a return to our historic rate of earnings in the coming fiscal year."

Curtice Burns Foods is a processor and marketer of regionally branded, private label and food service products throughout the United States and Canada. Sales in fiscal 1989 exceeded $900 million.

#90173p8767 06/22/1990 ~PR Newswire

BALTIMORE (JUNE 22) PR NEWSWIRE - Baltimore Gas and Electric Co. (NYSE: BGE), completing the final phase of the application process, today requested the Maryland Public Service Commission to issue a Certificate of Public Convenience to allow construction of two combined cycle generating units at the site of its Perryman Power Plant in Harford County.

Today's action completes the process designed to demonstrate the need for additional generating capacity at Perryman. A previous filing on Dec. 5, 1989, addressed all environmental and site-related aspects of the facility expansion.

BG&E said it plans to construct the new generating units in phases, beginning with four 150-megawatt combustion turbines that should be ready for service in the mid-1990s. These turbines will then be converted into two 400-megawatt combined cycle units, each consisting of two combustion turbines, two heat recovery steam generators and a steam turbine. The combined cycle units are currently planned for completion by the year 2000.

Costs for the combustion turbine phase will be an estimated $379 million while the two combined cycle conversions are projected to cost $293 million. All units will be able to burn either natural gas or oil.

"BG&E needs additional generating facilities in order to maintain reliable electric service to our customers, and the Perryman project represents the best alternative available for this purpose," said BG&E president of utility operations, Edward A. Crooke.

Crooke pointed out that the modular design of Perryman will allow the plant to be built in line with projected energy demand, accelerating or decelerating the construction timetable as needed.

Currently, BG&E has four 50-megawatt combustion turbines at Perryman. These are "peaking" units, used primarily during times of peak energy demand, such as very hot summer days.

The Perryman expansion is just a part of BG&E's plan to meet the area's growing demand for electricity in the 1990s. This plan also includes Brandon Shores Unit 2, a 640-megawatt coal unit in Anne Arundel County that will begin operation next spring; a load management program that includes the very successful Energy Manager; various conservation programs; and purchase agreements with other power producers including the BRESCO facility and neighboring utilities.

BOCA RATON, FL (JUNE 22) PR NEWSWIRE - Bio-Monitor Inc. (NASDAQ: BMON) announced today that it has agreed with MD America of Fort Lauderdale, Fla., to combine their Medical Depot Superstore franchise operations through an exchange of stock, subject to completion of a definitive agreement.

After the transaction, MD America shareholders will own 51 percent of the combined company.

MD America owns four franchises and franchise rights to 20 Medical Depot Superstores, and Bio-Monitor owns eight franchises and franchise rights to 31 Medical Depot Superstores. Most of the 63 combined franchises and rights are for locations in Florida, Arizona, Georgia, Pennsylvania, Ohio and the metropolitan Washington, D.C. area.

Bio-Monitor is currently operating one store in Margate, Fla., and MD America's first store will open in July in Deerfield Beach, Fla.

The management of MD America has substantial experience in marketing durable medical equipment, franchise operations and site selection. The board of directors of Bio-Monitor will be James Whidden and William Amzallag, current members, William Kramer and Jeffrey Cotter, the senior officers of MD America, and a fifth party to be selected. Kramer will become president of Bio-Monitor and Whidden will remain as chairman.

Bio-Monitor also announced the resignation of Ralph Leopold, a principal of Medical Depot, as a director and president of the company. Whidden will temporarily assume the duties of president, and a new director will be named to fill the vacancy after the consummation of the MD America transaction.

Leopold, a major shareholder and a director of the franchisor, Medical Depot, stated, "I am pleased, along with Medical Depot, to have

facilitated the combined operations of these two large franchisees of Medical Depot which should materially improve their ability to implement this unique idea, offering medical equipment and related medical supplies economically to the public."

With the July opening of the MD America store in Deerfield Beach, Medical Depot franchise stores opened in Florida will total four.

CHICAGO (JUNE 22) PR NEWSWIRE - The Quaker Oats Co. (NYSE: OAT) company today announced a reorganization of its largest business area -- U.S. Grocery Products. Philip A. Marineau, executive vice president - U.S. Grocery Products, said, "The changes provide more accountability to key managers through the further decentralization of the marketing research, human resources and financial functions. Additionally, a separate frozen foods division business will be created, and the logistics and sales operations will be realigned to provide a stronger customer service focus."

Some of the key personnel changes resulting from the reorganization are: David L. Bere, 37, currently vice president - Mini Meals, is being promoted to president - Golden Grain, headquartered in San Leandro, Calif.

Barbara R. Allen, 37, currently vice president - convenience foods marketing, is being promoted to president of a newly formed Frozen Foods division.

David J. Anderson, 40, currently vice president - finance and planning, is being promoted to senior vice president - finance and customer service,

U.S. Grocery Products.

Keith L. Robinson, 36, currently director - ready-to-eat cereals, is being promoted to vice president - marketing, Hot Cereals.

Lyle G. Hubbard, 39, currently director and general manager of Lite Snacks becomes vice president - marketing, Aunt Jemima Mixes and Syrup, Lite Snacks, Corn Goods and Granola Snacks.

John S. Breuer, 37, currently vice president - marketing, Grocery Specialties, will become Vice President - Marketing, Ready-to-Eat Cereals.

Margaret (Peggy) Dyer, 37, currently director - product management, Consumer Gatorade/New Beverages, is being promoted to vice president - marketing, Grocery Specialties.

Russell A. Young, 41, currently vice president - purchasing, has been named vice president - operations, replacing George J. Yapp, who will be taking early retirement after a 34-year career at Quaker.

Sherry J. Schaub, 49, currently vice president - operations, Golden Grain, will be replacing Russell Young as vice president - purchasing.

John R. Blair, 49,currently vice president - marketing information, is being named vice president - marketing services and new ventures.

All of the above changes become effective July 1, 1990.

#90173p8778 06/22/1990 ~PR Newswire

CHICAGO (JUNE 22) PR NEWSWIRE - William D. Smithburg, chairman and chief executive officer of The Quaker Oats Co. (NYSE: OAT), announced today that sales and earnings for the fiscal year ending June 30, 1990, are anticipated to be flat to slightly lower than last year. Earnings per share from continuing operations for fiscal 1989 were $2.88, and sales were $4.9 billion. These figures do not include results from Fisher-Price, which is now reported as a discontinued business following the Board's approval in principle, announced April 24, to spin-off Fisher-Price to Quaker's shareholders. Final results for fiscal 1990 will be reported in early August.

"Fiscal 1990 has been the most challenging year we've experienced in recent memory, following consistent record results throughout the 1980s," Smithburg said. "My principle mission is to resume the Company's progress towards our long-term financial objectives, and we are

aggressively taking steps to do that."

In one of those steps, announced in a separate press release today, Quaker reorganized its largest business, U.S. Grocery Products. The purpose of the changes, according to Philip A. Marineau, executive vice president-U.S. Grocery Products, is to provide more accountability to key managers through the further decentralization of the marketing research, human resources and financial functions of U.S. Grocery Products.

"This restructuring will emphasize the need to be more results oriented by aligning as many groups as possible to an undeviating focus on results by line of business," Marineau said. "It will also serve to enhance teamwork as we strive to deliver these results." Additionally, a separate Frozen Foods Division business will be created, combining the Aunt Jemima, Celeste and Mini-Meals groups, and the Logistics and Sales operations will be realigned to provide a stronger customer service focus, Marineau said. The announced reorganization becomes effective July 1, 1990.

Smithburg indicated that with the reorganization and continued decentralization of U.S. Grocery Products and the planned spin-off of Fisher-Price, there will be several hundred positions eliminated throughout the Quaker organization over the next year. Smithburg emphasized that the downsizing demonstrates "our fierce commitment to reducing costs and improving efficiency."

Smithburg also announced today that, following the scheduled retirement of President and Chief Operating Officer Frank J. Morgan in September 1990, he plans to assume the additional responsibilities of president and chief operating officer, in addition to chairman and chief executive officer. "This has been known by our board and senior management for some time, but I feel that it is now appropriate to publicly announce this decision, as we target our goals and direction at the outset of a new fiscal year."

CHICAGO (JUNE 22) PR NEWSWIRE - TSC, the Chicago-based computer systems consulting firm, today announced revenues of $50 million for fiscal year 1990 ended May 31. Revenues grew 233 percent over 1989, TSC's first year of business, during which the company generated $15 million in revenues.

"When we started our business, we had a singular goal," said Albert D. Beedie Jr., president of TSC. "We wanted to be the biggest and best systems integrator in the consulting industry. Now, after just two years, we are well on our way to reaching that goal."

Consultants News and Computer Systems News, two leading industry publications, recently ranked TSC among the top systems consultants in the country.

The company initiated contracts with more than 25 clients and grew to 350 employees during its first two years. TSC has offices in Dallas, New York City, and San Francisco in addition to its main office and corporate headquarters at 205 North Michigan Ave. in Chicago. TSC was formed in May 1988, by former operating committee members of Arthur Young's (now Ernst & Young) Midwest Region consulting practice.

TSC's manufacturing clients include GE, Northrop, General Dynamics, IBM, and Emerson Electronics. Among the company's consumer product clients are Ralston-Purina, Allied Van Lines, Encyclopaedia Britannica, Bear Creek (Harry & David) and the MasterCare division of Bridgestone/Firestone, Inc.

During the year, TSC established a financial services practice geared to serving the business needs of banks and other financial companies. That development has led to current projects at The First National Bank of Chicago, Fidelity Investments, and The Bankers Trust.

"By focusing solely on computer systems consulting, we've been able to rapidly apply new technology to solve the business problems of our clients " said Beedie. "Our remarkable growth is a direct result of the needs of the industry and the successes we've brought to our clients."

TSC will continue to grow faster than the overall consulting industry, according to Beedie. "I expect our revenues for 1991 to increase at least another 50 percent."

CONTACT: Mike Hassan of TSC, (312) 819-2250, or Sean Essex of Hill and Knowlton, (312) 565-1200, for TSC.

GERMANTOWN, MD (JUNE 22) PR NEWSWIRE - Fairchild Space & Defense Corp. has announced the promotion of Richard W. Sherman to vice president and general counsel.

The announcement was made by Richard E. Brackeen, chairman and chief executive officer. As general counsel, Sherman will be responsible for all legal and contractual matters of the corporation.

Sherman joined Fairchild Industries in 1984 as assistant general counsel and director of contracts. For nine years prior, he worked for the Department of the Navy specializing in government contracts practice. In August 1989, when Fairchild's space and defense operations were acquired by the Matra Group, Sherman joined the newly organized Fairchild Space & Defense Corp. as vice president-law and contracts.

Sherman graduated from the University of Pennsylvania, receiving a bachelor of science degree from the Wharton School (1968) and a juris doctor degree from the School of Law in 1972. In 1983 he earned a master's degree in the law of taxation from Georgetown University. Sherman is a member of the New Jersey Bar.

Fairchild Space & Defense Corp. is a U.S. space and defense electronics company headquartered in Germantown. The company, with a workforce of 2,000, has annual revenues of approximately $230 million. Fairchild is a member of the Matra Group, Paris, which is an internationally diversified company with annual revenues in excess of $3.6 billion and interests in aerospace, telecommunications and transportation.

MINNETONKA, MN (JUNE 22) PR NEWSWIRE - LecTec/NDM (NASDAQ: LECT) announced today that it has reached agreement with Marquette Electronics covering a licensing agreement for patented electromedical technology.

Marquette Electronics, headquartered in Milwaukee, has been licensed to produce and sell a line of disposable EKG (electrocardiogram) electrodes that utilize patented LecTec/NDM technology. Terms of the agreement were not disclosed.

Marquette is a medical equipment manufacturer of products for cardiac care. The company is a domestic market leader with an EKG system that employs disposable tab electrode technology developed by NDM engineers several years ago.

LecTec, a Minnetonka, Minn., disposable medical products company, pioneered and patented the first solid state conductive membranes for use in monitoring and diagnostic sensors. NDM (New Dimensions in Medicine), based in Dayton, Ohio, was acquired from Baxter Healthcare by LecTec in November 1989.

AUSTIN, TEXAS (JUNE 22) PR NEWSWIRE - Scientific Measurement Systems, Inc. (NASDAQ: SCMS) announced today the sale of a Model 101B+ Advanced Industrial X-Ray Tomographic System (CAT-SCAN) to the Swiss Federal Laboratories For Materials Testing and Research (EMPA) of Dubendorf, Switzerland. The sales price was not disclosed.

EMPA is the official materials testing organization of the Swiss federal government. SMS considers this contract to be particularly significant because it is the company's first European sale and because the Swiss Federal Laboratory is one of the most highly respected facilities of its kind in the world.

The main application for the system is the inspection of ceramics, composits, and other advanced materials. These materials have a wide range of industrial and scientific uses.

The Model 101B+ is a standard SMS product and is scheduled for December delivery. The SMS system will produce very high resolution results through the integration of a microfocus X-ray capability. As mentioned earlier, this is the first European sale for Scientific Measurement Systems and management looks to the European market as a major source of future business.

CONTACT: Dr. Larry Secrest, president and CEO, or George Edwards, vice president, 512-837-4712, both of Scientific Measurement Systems

WASHINGTON (JUNE 22) PR NEWSWIRE - United Express announced today that it is offering discounts ranging from 40 percent to 65 percent off standard coach fares on all of its 108 daily flights for the period July 1-7 and,

unlike many other airline discount fares, there are no advance purchase or overnight stay requirements.

United Express, which is operated by Sterling, Va.-based Atlantic Coast Airlines, is a division of WestAir Holding, Inc. (AMEX: WAH). Atlantic Coast Airlines/United Express currently serves 14 cities in six eastern states from its hub at Washington's Dulles International Airport.

"These unrestricted discount fares offered by United Express are intended to stimulate leisure travel during the extended Independence Day holiday period," said Angie Shermer, system manager of sales for Atlantic Coast Airlines. "Customers can qualify for the discount fares by traveling roundtrip any time during the seven-day period," said Shermer.

Shermer also stated that the low fares will be available on every Atlantic Coast Airlines/United Express flight during the first week of July, with more seats available at the low fares on off-peak flights.

Operating as United Express through marketing agreements with United Airlines, Atlantic Coast Airlines offers its customers many United benefits including Mileage Plus frequent flier credits on all flights, worldwide reservations, advance seat selection and boarding passes. For additional information and reservations for United Express flights, customers can call 800-241-6522.

Atlantic Coast Airlines/United Express is the newest division of WestAir Holding, Inc.

TOKYO (JUNE 22) PR NEWSWIRE - Nissan Motor Co., Ltd. announced that 36 Nissan dealers will begin sales and service operations in the German Democratic Republic Saturday, June 23, following the opening of the Autovision motor show in Leiptig today (June 22).

This motor show is the first full-scale event of its kind to be held in the GDR.

The new dealers have already concluded sales and service contracts with Nissan Motor Deutschland GmbH, the Nissan distributor in the Federal Republic of Germany.

Nissan Motor Deutschland has moved to establish Nissan dealers in the GDR to accommodate the service needs of Nissan vehicle owners from the West who have been traveling to the GDR in increasing numbers since the removal of travel restrictions.

The Nissan distributor plans to expand the number of Nissan dealers in the GDR to around 60 or 70 outlets by the end of this year and will continue to increase their number gradually in the future.

In conjunction with the launching of service and sales operations, Nissan Finanz GmbH and Nissan Leasing GmbH, two subsidiaries of Nissan Motor Deutschland, are also starting business activities in East Berlin.

Those two companies have set up their own offices in the Metropole Hotel in the GDR capital and will provide vehicle finance and leasing services to GDR customers to support the sales activities of the dealers.

The Nissan models handled by GDR dealers will include the Micra, Sunny and Bluebird passenger cars, the Nissan Patrol manufactured by Nissan Motor Iberica, S.A. of Spain, and Vanette and Urvan commercial vehicles. A total sales volume of 2,000 units is projected for this year and sales are expected to rise steadily in the coming years.

NEW HYDE PARK, NY (JUNE 22) PR NEWSWIRE - Designatronics Inc. (AMEX: DSG) today announced a tender offer to stockholders of odd lot holdings (from one share to 99 shares) of $1.50 above the closing price of the shares of stock on the American Stock Exchange as of July 31, 1990.

In a letter and transmittal form sent on June 22, 1990 to all Designatronics stockholders it was explained that payment will be made within five days after July 31, 1990.

In the letter Sol Schwartz, president of Designatronics, said: "The opportunity to exchange odd lot shareholdings for cash is free of brokerage commissions and state transfer taxes, which are payable by the company.

"Management has set aside a cash reserve out of its current funds of approximately $50,000.00 to cover the cost of acquiring the odd lot shares tendered by stockholders.

"The shares so tendered by stockholders will be canceled by the company. The tender offer transmittal form and stock certificate must be in possession of the company on or before 3:00 p.m. on July 31, 1990."

The company will not accept and shall not be obligated to accept any certificates which aggregate more than 100 shares for the purpose of creating a round lot of 100 shares and an odd lot of less than 100 shares to comply with the above tender offer.

The company will not accept and will not be obligated to accept any certificate which aggregates less than 100 shares purchased during the tender period by a share holder for the purpose of obtaining a premium offered by the company for such odd lot shares.

All odd lot stockholders have the absolute right to withdraw this tender offer prior to 3:00 p.m., July 31, 1990 by written communication to the company via telegraph, fax, or express mail.

Schwartz explains in the letter that the reason for the offer is to attempt to reduce the cost of servicing this odd lot category stockholder. In a detailed survey of "odd lot holdings" it was found that approximately 30 percent of all stockholders are holding less than 100 shares each and the aggregate of the shares in this category represents less than one percent of the total issued and outstanding shares.

SOUTH SAN FRANCISCO, CA (JUNE 22) PR NEWSWIRE - Lewis Galoob Toys Inc. (NYSE: GAL) announced today that it was adjourning until July 11, 1990 at 10 a.m. its Annual Meeting of Shareholders currently scheduled for June 29 1990 at 10 a.m.

Steven M. Klein, Galoob's executive vice president and general counsel, stated that on June 8, 1990, the United States District Court for the Northern District of California denied Nintendo of America Inc.'s application for a temporary restraining order relating to the distribution of Galoob's new "Game Genie" video game enhancer. The district court scheduled a hearing on Nintendo's application for a preliminary injunction for June 29, 1990.

Accordingly, Klein explained, Galoob concluded that it would be advisable to adjourn the Annual Meeting to enable management to participate in the preliminary injunction hearing to the extent necessary.

The adjourned meeting will be held at he Embassy Suites Hotel, 250 Gateway Blvd., South San Francisco. All proxies which are received by July 11, 1990 will be counted for purposes of voting at the July 11, 1990 Annual Meeting.

Lewis Galoob Toys designs, develops, markets and distributes a variety of quality toy products sold worldwide.

EDMONTON, CANADA (JUNE 22) PR NEWSWIRE - Gallery Resources Limited (Alberta Stock Exchange: GYR) is pleased to announce that production on the Hannandor Property is scheduled to start before June 30th, 1990. Phasing

into full production will occur in the following two to three week period.

In preparation, Gallery has purchased Caterpillar earth moving equipment with 70 percent financing by Finning. Other mining equipment purchased includes a trommel-screen-jig processing plant built and customized by R.M.S. Ross Corporation. All accessory equipment including the dozer trap, conveyors, pumps and electrical are in the final stages of installation.

The production site and camp are completed. The Lightning Creek bridge has been upgraded and the production plant capable of processing 500 yards per hour is now in the final stages of completion. A test plant that has operated is confirming the presence of economic grade values.

At a special meeting of shareholders held on May 10th the consolidation of shares on a one for five basis and a name change to Gallery Resources Limited was approved by a large majority.

Management expects that this restructuring in conjunction with the application for listing on the Vancouver Stock Exchange, will encourage investor support by both Canadian and international markets. Gallery has recently been listed in Standard & Poors' guide and granted 12G exemption status in the United States. Further news releases will follow in the near future.

#90173p8818 06/22/1990 ~PR Newswire

POMONA, CA (JUNE 22) PR NEWSWIRE - MMI Medical, Inc. (NASDAQ: MMIM), today reported results for the year and fourth quarter ended April 27, 1990.

Fiscal 1990 net income was $1,395,000 or 51 cents per share on sales of $38,057,000 compared with net income of $2,789,000 or $1.02 per share on sales of $38,032,000 in fiscal 1989.

Fourth quarter net income was $237,000 or nine cents per share on sales of $9,759,000 compared with net income of $778,000 or 28 cents per share on sales of $9,756,000 in the prior year's final quarter.

Results for the fiscal 1990 fourth quarter include a charge to net income of $87,000, or three cents per share, related to adjustments principally associated with the first quarter.

Dudley A. Rauch, chairman and chief executive officer, commented, "Although revenues and profits of our mobile imaging business were significantly

below last year's levels, we are encouraged by the continued growth and profitability of our maintenance operations.

"Additionally, our effective tax rate increased from 22 percent to 35 percent due to reduced utilization of investment tax credits. While we are hopeful that MMI Medical will have improved financial results in fiscal 1991, we expect only nominal first quarter profits."

MMI Medical provides hospitals, clinics and private physician offices with maintenance services for diagnostic imaging equipment and mobile computed tomography and cardiac catheterization services.

CHICAGO (JUNE 22) PR NEWSWIRE - A Philadelphia native has been named to a key post in Sears, Roebuck and Co.'s (NYSE: S) retail operations.

Mary Guthrie Conway, who has been Wilmington, Del., district manager of store operations for the past year, was appointed region manager of store operations for the ten-state Western Region based in Seattle. Her appointment is effective immediately.

In her new position, she will be responsible for more than 100 retail stores in Alaska, Washington, Oregon, northern California, northern Nevada Utah, Colorado, Idaho, Montana and Wyoming.

Mrs. Conway, 41, joined Sears in 1971 as a secretary in the company's Eastern Territory headquarters in Philadelphia. She later became a management trainee in Abington, Pa., merchandise manager in St. Davids, Pa., operating superintendent in North Wales and store manager in

Frackville and Reading, Pa.

She and her husband, Carl, have three children: Greg, 22, a student at Westchester University; Mary Beth Christman, 21, of Boyertown, Pa.; and Brett, 20, a student at Indiana (Pa.) University. Her father, Morton Guthrie, is a resident of Philadelphia.

DETROIT (JUNE 22) PR NEWSWIRE - English Cable Enterprises announced the successful completion of its cable television and telephone franchising efforts in the United Kingdom.

The awards of East Hertfordshire and North Bedfordshire bring the company's combined service area to approximately 400,000 homes. The areas to be served are contiguous and within 30 miles of London.

English Cable is predominantly owned by two U.S. cable operators, Columbia Management and Booth American Company.

The company is somewhat unique in British cable due to its commitment to independence and the obvious absence of a major U.S. telephone company as its partner.

Of the four franchises owned by the company, South Bedfordshire has commenced broadband service with construction activity progressing to plan. Having attained its objectives in franchising, the company will now focus on acquisitions in an effort to further expand its overall territory.

DETROIT (JUNE 22) PR NEWSWIRE - Booth American today announced it has entered into a definitive purchase agreement with American Cable TV Investors 3, a California limited partnership managed by United Artists, to purchase the assets of their cable television system serving areas of Avery and Watauga County, N.C., and areas of Carter County, Tenn. The acquired system serves at least 7,500 subscribers which are contiguous to existing Booth operations.

Booth American Company is a diversified electronic media company with headquarters in Detroit. The company operates two divisions in radio broadcasting and cable television including its wholly owned subsidiary Genesis Broadcasting, Inc., which is based in Dallas. The radio group operates 18 stations in the U.S. With this acquisition, its domestic cable television division will operate 10 systems serving approximately 140,000 subscribers in eight states.

In addition, the company is a major shareholder in English Cable Enterprises which is in the process of constructing broadband cable television and telephone service to a contiguous service area of approximately 400,000 homes in the counties of Bedfordshire and Hertfordshire within 30 miles of London, England.

ATLANTA (JUNE 22) PR NEWSWIRE - Cox Enterprises is offering for sale The Port Arthur News and its sister newspaper The Orange Leader.

David E. Easterly, president of the newspaper division of Cox, explained, "Sale of the two newspapers will permit Cox to focus attention and resources on its other Texas properties in Austin, Longview, Lufkin, Nacogdoches and Waco." He added, "Cox remains enthusiastic about the future of newspapers and the economic recovery of Texas."

Easterly pointed out that the sale also will enable the company to reduce some of the debt incurred by the 1985 merger of Cox Communications into

CEI.

The Port Arthur News is a morning daily newspaper with a circulation of 23,200 on weekdays and 24,900 on Sunday. The Orange Leader is published five evenings a week and Saturday morning with a daily circulation of 10,100 copies. Its Sunday morning edition has a circulation of 12,100 copies.

The company also operates Triangle Press, a commercial printing division, within the Port Arthur facility.

Lee Dirks & Associates, a newspaper merger-and-acquisition firm based in Birmingham, Mich. (313-646-4230), will assist in the process of selling the two newspapers. This process is expected to take several months.

#90173p8842 06/22/1990 ~PR Newswire

ATLANTA (JUNE 22) PR NEWSWIRE - Cox Newspapers, a division of Cox Enterprises, has acquired Buckler Broadcast Group Inc., a specialty broadcasting company headquartered in Atlanta.

A new company has been formed and the business has been named Cox In-Store Advertising. The announcement was made by David E. Easterly, president of Cox Newspapers, and James W. Buckler Jr., who will continue as president of the operation.

Easterly said: "Cox In-Store Advertising gives us our first entry into the important point-of-purchase advertising industry. Many companies are finding it to be very beneficial to reach consumers in the store, when

last minute brand selections often are made."

"The association with Cox provides us an opportunity to grow in ways not open to entrepreneurial ventures," commented Buckler, who formed Buckler Broadcast Group three-and-a-half years ago. "We want to expand our services to companies across the country interested in point-of-purchase advertising."

Buckler Broadcast Group has offered three primary services for offices and retail customers: "storecasting," or music-advertising packages for retail stores; environmental music; and data, or "electronic mail" transmission between store branches.

The "storecasting" service sounds like an FM radio station, but is delivered only to client stores. In each 60 minutes of music, ten minutes of advertising messages are broadcast from a variety of companies, including manufacturers such as Campbells, Quaker Oats, ConAgra, Carnation and McCormick whose products are sold in the store.

Research shows that 65 percent of the time, brand selection takes place when the shopper is in the store. The Atlanta company has contracts with several area supermarkets, including Kroger, A&P, FutureStore and Cub Food.

The environmental music division offers a wide variety of business music for offices and retail outlets, delivered via satellite, closed-circuit radio, or tapes.

In the fee-paid music business, Buckler Broadcast Group has been an exclusive AEI Music distributor for broadcast products in north Georgia and Atlanta, and also offers AEI Music tape exchange programs in the same territory. Current clients include fast food restaurants, landmark office towers, specialty retailers and professional offices in Atlanta.

ERIE, PA. (JUNE 22) PR NEWSWIRE - Zurn Industries Inc. (NYSE: ZRN), a leading designer and manufacturer of environmental waste-to-energy and water control products and systems, today announced the receipt of two contracts from the Metropolitan Water District (MWD) of Southern California for water control projects east of Los Angeles.

The two projects, worth over $65 million, are a vital link in MWD's expansion to provide water for the Los Angeles area.

Advanco Constructors, a Zurn subsidiary, will construct the Etiwanda Pipeline Feeder, requiring installation of over six miles of 12-foot-diameter, welded-steel pipe in sections of Rancho Cucamonga and Fontana, Calif. Included in the project are five tunnel crossings under existing roadways. The project is expected to take from July 1990 to March 1992.

The pipeline will deliver water to the second project awarded to Advanco, construction of the Etiwanda Control Facility. The 450 acre-foot domestic water reservoir and control facility will intercept and regulate water flow from the Etiwanda Feeder and distribute it to various water treatment and supply locations. Advanco will construct the powerhouse building, pressure control structure and outlet structure. Bypass, outlet and emergency-discharge conduits also will be constructed. The structural concrete work involves over 22,500 cubic yards of concrete. Advanco expects to begin excavation in June 1990 and complete the project by April 1992.

HOUSTON (JUNE 22) PR NEWSWIRE - Michael H. Grasley has been named president of Shell Chemical Company, a division of Shell Oil Company.

He succeeds Davis B. Richardson, who has taken a special assignment with Shell Oil coordinating corporate quality activities. Richardson will serve in this capacity until year-end, when he will assume another position with Shell.

Grasley has been vice president of polymers and catalysts since 1988. He joined Shell in 1963 as a research chemist in the company's Martinez, Calif., refinery. He was later transferred to the Emeryville, Calif., research center as a research chemist. After assignments in chemical planning and economics, and in manufacturing as environmental engineering manager at Shell's Deer Park, Texas, Manufacturing Complex, he moved to management positions in oil products and various chemical businesses. He was elected vice president, industrial chemicals, in 1985.

Grasley received a B.S. degree in chemistry from Ohio University, a M.S. degree in organic chemistry from the University of Kentucky and a Ph.D. degree from the University of Florida.

He is a director of Criterion Catalyst Company L.P., CRI Ventures Inc. and International Bio-Synthetics. He also is chairman of the board of Shell Polymers and Catalysts Enterprises Inc., a subsidiary of Shell Oil Company.

RANDOLPH, MASS. (JUNE 22) PR NEWSWIRE - Dunkin' Donuts announced today that it is teaming up with Pepsi, Parker Brothers and the Chrysler Corporation to field a promotion based on the popular Trivial Pursuit(R) board game. The promotion is unique in that every game card will win a prize as long as consumers answer a trivia question correctly. This is the largest promotion ever run by Dunkin' Donuts.

From June 24 to Aug. 4, consumers will receive a Trivial Pursuit scratch-off game card on every visit to a Dunkin' Donuts shop. Each card will have a trivia question and four answers. By scratching-off an oval beside their answer, consumers will uncover either a "yes" or "no," indicating whether they have answered correctly. The game will have six categories of questions: Personalities, Entertainment, In The News, That's Life, Sports and Leisure, and Wild Card. All of the questions will be based on events that took place in the 1980s.

Consumers will be able to redeem any correct game card for a free Pepsi at Dunkin' Donuts. They can also collect cards from different categories to win free donuts, a Trivial Pursuit-The 1980s Edition Master Game, or even a Plymouth Laser RS Turbo. To win a Plymouth Laser, consumers must collect correct cards from all six categories.

"We believe we have created a very exciting game promotion," said Sid

Feltenstein, senior vice president of marketing for Dunkin' Donuts. "It will be fun for consumers because it has many of the elements of the real Trivial Pursuit game. It is also one of very few game promotions where consumers can control whether they win. All they have to do is pick the correct answer and they win."

Pepsi, Parker Brothers and the Chrysler Corporation are joint contributors to the promotion. Pepsi is celebrating its fourth anniversary as Dunkin' Donuts' official soft drink. Parker Brothers markets Trivial Pursuit brand games. Trivial Pursuit-The 1980s Edition is one of the newest versions and ranked among the 10 best-selling games last year. Chrysler is showcasing its sporty Plymouth Laser RS Turbo, which was named to Car and Driver magazine's list of "Ten Best" cars for the second consecutive year.

Dunkin' Donuts is the world's largest donut shop chain. It has more than 2,050 shops in 17 countries.

PORTLAND, OR (JUNE 22) PR NEWSWIRE - Pointing to the deepening timber supply crisis as a result of the listing of the Northern Spotted Owl, forest products industry leaders today called for the adoption of a balanced solution that protects both the owl and the timber families in the Pacific Northwest, the American Forest Resource Alliance said today.

"Our worst nightmare will come true if federal decision makers do not respond to our distress signals," Bill Shields, American Forest Resource Alliance chairman, said.

"Fortunately, this is not the end of the process, but just the beginning. The Bush administration and Congress must step into this debate with both feet and fashion a long-term package that strikes a balance between the needs of the Northern Spotted Owl, and the certain layoffs of tens of thousands in Washington, Oregon and Northern California."

John Hampton, Northwest Forest Resources Council chairman, responded to the announcement by the U.S. Fish and Wildlife Service listing the Northern Spotted Owl as threatened under the provisions of the Endangered Species Act by petitioning the Bush administration and Congress to formally intervene.

"We are calling for the convening of the special cabinet level committee

to review the scientific, sociological and economic factors of this question," Hampton said.

Jim Geisinger, Northwest Forestry Association president, challenged the process and assumptions leading to the listing decision and announced the intention of the Northwest Forest Resources Council to file suit against the U.S. Fish and Wildlife Service questioning the legality of the decision.

"For months, we have asked the federal agencies to subject the conflicting scientific findings on the overall health of the Northern Spotted Owl to a formal adjudicatory hearing on the merits," Geisinger said. "But our requests have been met by silence. We unfortunately have no recourse but to make the same request of the judiciary. We feel very strongly about this matter and we are not going to allow a decision that adversely affects thousands of families to go forward unchallenged."

"Never in recorded history has there ever been a decision regarding wildlife protection that has threatened the livelihood of upwards of 50,000 people," Hampton said.

"We share the concern about the viability of the owl, but let's not throw out the baby with the bath water," he said. "Let's follow President Bush's lead and ensure that we not only protect the owl, but the families of the Pacific Northwest as well."

CHARLESTON, S.C. (JUNE 22) PR NEWSWIRE - Destination Wild Dunes (DWD), has entered into an agreement with Wild Dunes Associates (WDA) to manage the amenities at Wild Dunes, a 1,600-acre resort and residential community northeast of Charleston.

According to Noel D. Thorn, Chief Executive Officer of WDA, which owns and manages Wild Dunes, DWD will assume management of Wild Dunes' Links and Harbor golf courses; its tennis facilities; and the club operations, including the swimming pools.

DWD already operates the conference and rental business at Wild Dunes. DWD is an affiliated company of Destination Hotels & Resorts (DH&R), Inc., of Los Angeles. DH&R, a resort management company, manages The Gant Hotel in Aspen, Colo., and twelve other properties in the Colorado ski country; Shadow Mountain Resort and Racquet Club in Palm Desert, Calif.; and five properties on the Island of Maui in Hawaii.

Through affiliated entities, DH&R owns and operates the Doubletree Hotel in Denver.

Properties under DH&R's management total 2,000 condominiums and hotel rooms, plus resort amenities. Managed properties have an aggregate value of $450 million, according to DH&R President and Chief Executive Officer John B. Platt.

Platt said he is impressed by what Thorn and his staff have done at Wild Dunes and has great confidence in the people and the resort's future.

Thorn said these actions will allow WDA to focus its attention on real estate sales and property development.

DH&R is a wholly-owned subsidiary of Lowe Enterprises of Los Angeles. Lowe Enterprises is a privately-owned holding company. Through DH&R and its other wholly-owned subsidiaries, Lowe Enterprises offers a unique combination of diversified services including asset management, investment and development.

Lowe Enterprises' principal operating companies are Lowe Development Corporation, the principal development subsidiary; Lowe Associates, the firm's real estate investment and asset management business; and DH&R.

CHICAGO (JUNE 22) PR NEWSWIRE - Appointment of three executives to key posts in Sears Merchandise Group was announced today.

They are: -- Gary Ramsey, 47, named national merchandise manager of girls, boys and infants apparel, furniture and toys;

-- Sharon A. Scanlan, 42, national business manager of men's and children's apparel, succeeding Ramsey, and

-- Mary Conway, 41, region manager of store operations in the 10- state Western region based in Seattle, succeeding Scanlan.

In his new post, Ramsey succeeds Stephen R. Nadle, who resigned. He will direct the buying and merchandising of girls, boys and infants apparel, furniture and toys for most retail stores across the nation.

Before his appointment last year as national business manager of men's and children's apparel, Ramsey had been general manager of retail operations in the Houston region since 1987. He joined Sears in 1964 as a management trainee in Durham, N.C. He is a native of Monroe, N.C.

As national business manager of men's and children's apparel, Scanlan will be responsible for implementing the business group's plans, goals and directions in all Sears stores through region and district business managers. She had been Western region manager of store operations for the past year, and previously was Hawaii region manager. Scanlan joined Sears in 1970 as a management trainee in El Monte, Calif. She is a native of Lancaster, Wis.

Conway will be responsible for more than 100 retail stores in Alaska, Washington, Oregon, northern California, northern Nevada, Utah, Colorado, Idaho, Montana and Wyoming.

For the past year, she had been district manager of store operations for the Sears Wilmington, Del., district. She previously was store manager in Reading and Frackville, Pa. She is a native of Philadelphia.

CLEARWATER, FL (JUNE 22) PR NEWSWIRE - Fortune Savings Bank is offering customers a mortgage loan plan that charges no discount points, no application fee and no appraisal fee.

"Our research shows that the public has a decided interest in this type of loan," said Hugh Shaw, Fortune's executive vice president-retail lending. "We believe that it will appeal both to home buyers and to those who want to refinance their current home loans. The reduction of upfront closing fees can be very attractive to customers in either situation."

At closing of each loan, Fortune will charge customers for out-of-pocket expenses that are required for the mortgage transaction -- such as survey fees, title insurance and termite inspection. The bank also will collect a $45 credit report fee, $100 document preparation charge and $250 service fee.

Fortune bases rates for the mortgage, which has a fixed rate for a three-month introductory period and then adjusts monthly, on the Federal Home Loan Bank's 11th District Cost-of-Funds Index (COFI).

"Customers like the index because it is less volatile than the one-year U.S. Treasury index that many adjustable mortgages use as the basis for adjustment," Shaw said.

If the mortgage is paid off within the first three years, Fortune will charge a prepayment fee to recoup its other loan-origination costs, Shaw said. The fee is 1.5 percent of the loan's original balance.

For loans up to 80 percent of a home's appraised value, Fortune currently sets the initial rate at 8.95 percent; it has a lifetime cap of 13.25 percent.

Monthly payments are adjusted annually, and the borrower is offered the option of limiting any payment increase to 7.5 percent of the previous payment.

BETHPAGE, NY (JUNE 22) PR NEWSWIRE - Grumman Corporation (NYSE: GQ) announced today that it has acquired a ten-acre site at Clarksburg, W.Va., for a metals fabrication facility. The plant will manufacture sheet metal components and machined metal frames for electronic component assemblies.

A one-story, 50,000-square-foot building will be erected on the site adjacent to Benemdun Airport in Harrison County. Construction is to start in July 1990 and be complete by the end of this year.

The building will be ready of occupancy during the first quarter 1991. FCD

Corporation, Bridgeport, W. Va., is the builder. The facility's work force is estimated at 80, with 75 percent to be hired locally.

Each metal unit will be custom-built to house sophisticated electronic component systems used in testing commercial electronics during manufacture or for military aircraft ground support equipment that tests aircraft parts on board Navy carriers or at military bases.

The metal cabinets and racks range from suitcase-sized portable units to multiple-bays holding consoles. Manufacturing the units will include the use of numerically control equipment like a machining center and turret punch presses.

An adhesive bonding operation for bonding aluminum electronic enclosures will be part of the facility. All metalwork will be finished in Clarksburg then shipped to another Grumman facility where the electronic components will be installed in the units.

Grumman Corporation is best known as a leading maker of military aircraft and aerospace systems. Other businesses include integrated information processing systems, emergency vehicles and aluminum truck bodies. The company has headquarters at Bethpage, Long Island, N.Y., and employs 28,000 worldwide. Sales in 1989 were $3.56 billion.

MINNEAPOLIS (JUNE 22) PR NEWSWIRE - Super Valu Stores Inc. (NYSE: SVU) reported a modest earnings increase on record first-quarter sales at its annual stockholders meeting today in St. Paul, Minn.

Super Valu Chairman and Chief Executive Officer Mike Wright reported that first-quarter sales reached $3.44 billion, a 5.1-percent increase over the previous year. Earnings for the quarter, which ended June 16, 1990, were $41.35 million, the same as one year ago. Earnings per share for the quarter were 55 cents, the same as the previous year.

The company also announced a ten percent increase in its quarterly dividend to 16.5 cents, which represents the 17th consecutive annual increase.

Wright indicated that while the first quarter earnings figures were somewhat short of the company's expectations, the company had experienced progress in each of its lines of business and still expects to have another record year and to meet the year's earnings targets.

First-quarter sales in the company's retail support operations were

slightly ahead of plan, although earnings were affected by a credit write-off in the company's Billings, Mont., division.

Wright said that the company's support of its affiliated store owners has made them "America's most successful independent retailers" and that this year was on target to become their fifth consecutive year of increased sales and earnings.

Wright indicated that its corporate retail foods operations had performed ahead of plan in the first quarter and that he was particularly gratified by progress in the Denver and Chicago markets.

Wright indicated that ShopKo, the company's general merchandiser, had not performed up to expectation in the first quarter due to heavy promotion in its 98 ShopKo units and the start-up costs associated with its second Twin Valu supercenter in Euclid, Ohio.

Wright said that the second store, like the first which opened last year, had met with "exceptional customer response." He stated that the first Twin Valu store continues to exceed sales goals and that it should reach profitability during the second quarter.

Twin Valu combines the merchandising presentation of Super Valu's two most successful retailing concepts, Cub Foods and ShopKo, in one store. Twin Valu offers over 65,000 food and non-food items, at prices below those offered in free-standing stores.

DEARBORN, MI (JUNE 22) PR NEWSWIRE - Thomas A. Modrowski, 33, of Saline, Mich., has been named plant manager of the Double Eagle Steel Coating Co. (DESCO), a joint venture of the USS division of USX Corp. (NYSE: X) and Rouge Steel Co.

Modrowski has been manager of operations the last five years at DESCO, which processes electrogalvanized sheet steel for the automotive industry. He moves up to succeed Leonard H. Chuderewicz, who leaves after two years as DESCO plant manager to accept a position as president of USS-POSCO Industries, a steel processing company in Pittsburg, Calif.

Modrowski, a native of East Chicago, Ind., began his career in 1979 as a management trainee at the USS Gary (Ind.) Works after earning a degree in mathematics from Wabash College in Crawfordsville, Ind.

He progressed through various Gary Works sheet division supervisory posts before being named operations manager at DESCO in February 1985, as the venture was coming on stream.

"Tom Modrowski has done an outstanding job in helping DESCO's operations achieve their current competitive status and high level of acceptance among automotive customers," said Thomas C. Graham, president of USS. "The five years of operating experience and expertise at DESCO which he brings to the plant manager's post will benefit the partnership and its customers."

Carl L. Valdiserri, chairman and chief executive officer of Rouge Steel, said, "We are pleased with the appointment of Tom Modrowski as plant manager. He personifies the excellence in today's successful manager. He's customer driven, quality focused and people oriented. He's an excellent choice to lead Double Eagle into the 1990s."

DESCO receives steel coils from the USS Gary Works and from Rouge Steel and electrolytically applies zinc or iron-zinc alloy to the steel for superior corrosion resistance.

WASHINGTON (JUNE 22) PR NEWSWIRE - The Office of Thrift Supervision (OTS) today placed Southern Federal Bank for Savings, Gulfport, Miss., in receivership and chartered a new federal mutual institution to take its place.

The new institution, Southern Federal Savings Bank, will assume certain assets and liabilities of the old thrift, and will operate in conservatorship under the oversight of the Resolution Trust Corporation.

The receivership did not result in any interruption of Southern Savings' day-to-day operations. The institution and its six branches located in Gulfport, Pass Christian, D'Iberville and Gautier will remain open for business as usual. Holders of insured accounts are not affected by the action, which was taken by OTS to protect insured depositors and the interests of the thrift insurance fund. Deposits remain insured to the $100,000 legal limit.

OTS initiated the action because Southern Savings was operating in an unsafe and unsound condition in that it has negative tangible capital.

Southern Savings' insolvency is due primarily to the establishment of loan loss reserves, a direct result of failure to adequately identify and evaluate problem assets. The decline in asset quality was caused largely by a depressed local economy.

In addition, the institution relied heavily on expensive short-term borrowings rather than on local deposits for funding, which severely hindered its earnings capacity.

Southern Savings was a federally chartered stock institution, wholly owned by SFS Capital Corp., a holding company. Stockholders will retain no interest in the new institution.

As of Feb. 28, 1990, Southern Federal reported assets of $145.2 million, liabilities of $143.2 million and tangible capital of negative $6.04 million, for a tangible capital-to-assets ratio of negative 4.1 percent.

ST. LOUIS (JUNE 22) PR NEWSWIRE - Monsanto Company (NYSE: MTC) today announced that Grant W. Denison Jr. was elected by the board of directors as vice president, corporate planning. He replaces S. Allen Heininger, who is retiring.

In announcing the appointment, Monsanto Chairman and Chief Executive Officer Richard J. Mahoney said, "As Monsanto makes good on its current commitments, we also must be looking forward to what we will be in the next century. Mr. Denison will play a major role in those deliberations."

Denison joined Searle, a Monsanto subsidiary, in 1986 as corporate vice president, strategic and marketing planning. Prior to that he was with Pfizer Pharmaceuticals as vice president, planning and business development, and was with Squibb Medical Systems as vice president, international operations. In 1988 he was named corporate vice president

and president, U.S. operations, for Searle. In September of last year, he was named senior director of corporate planning at Monsanto.

HARRISBURG, PA (JUNE 22) PR NEWSWIRE - USAir Express officials today took delivery of the newest aircraft in the carrier's Central Pennsylvania fleet -- the Boeing deHavilland DASH-8.

Starting July 1, USAir Express -- operated by Pennsylvania Airlines of Middletown, Pa., a wholly owned subsidiary of USAir Group, Inc. (NYSE: U) -- will begin using this pressurized, 37-passenger, prop-jet aircraft on several Harrisburg-based USAir Express routes.

Pennsylvania Airlines officially took delivery of two of these $10 million aircraft today, and will receive six more between now and October 1991. The DASH-8 is the newest, most modern aircraft in the USAir Express fleet. These aircraft will supplement Pennsylvania Airlines' existing fleet, consisting of 13 19-passenger Beech 1900s and eight 36-passenger Shorts 360s.

"We are extremely pleased to introduce the Central Pennsylvania community to this high-tech aircraft, which will soon be flying local USAir Express travelers to a number of destinations," said William C. Clark, president and chief executive officer of Pennsylvania Airlines.

Among the cities initially scheduled to receive USAir Express DASH-8 flights operated by Pennsylvania Airlines are: Harrisburg, State College, Williamsport, Pittsburgh, and Philadelphia, Pa.; Baltimore; New York (JFK Airport); and Newport News, Va. Other cities will be added as aircraft deliveries and schedules are finalized.

The DASH-8 is a modern aircraft offering passengers the comfort of a "stand-up" cabin, overhead storage bins, two-by-two seating on both sides of a center aisle, a front galley, and a rear lavatory. Crew includes a captain, first officer and flight attendant.

A press conference/official delivery ceremony today at Harrisburg International Airport introduced the aircraft to community leaders and the media. Opening remarks were made by Clark, who moderated the program. Other featured speakers included: Gordon Linkon, vice president -- USAir Group, Inc., USAir Express Division; Ron Woodward, president, Boeing deHavilland; and Bradley L. Mallory, deputy secretary for aviation, Pennsylvania Department of Transportation.

Pennsylvania Airlines will lease the DASH-8 from USAir Leasing and Services, a wholly owned subsidiary of USAir Group, Inc.

#90173p8916 06/22/1990 ~PR Newswire

NEW YORK (JUNE 22) PR NEWSWIRE - The Eighth Annual PC EXPO announced today that attendance exceeded 65,000, a record crowd for the premier spring event for corporate volume buyers and resellers of computer products and services.

Show officials also reported that exhibitor re-sign for space in 1991 has exceeded expectations, resulting in PC EXPO expanding into two additional halls at the Javits Center in New York. More than 150,000 net square feet was sold, generating over $5 million in sales revenue in three days for next year's Ninth Annual PC EXPO in New York, June 25-27.

This year's attendance eclipsed the 1989 figure by more than 10 percent, and PC EXPO has more than 600 exhibitors, compared to 511 in 1989.

"Attendance at this year's show went beyond our expectations and sets the stage for PC EXPO'S continued growth in 1991," said Jim O'Rourke, vice president of sales. "PC EXPO is really living up to its billing as 'The Show of Choice' in the computer industry."

In addition to an increase in attendance and exhibitors, more than 200 new products were introduced at PC EXPO. Prominent companies such as WordPerfect, Apple Computer, Intel, Toshiba, Texas Instruments and IBM, launched their latest hardware and software at PC EXPO.

In related news, the shareholders of Blenheim Exhibitions Group PLC, a leading UK show organizer, unanimously approved a merger with H.A. Bruno, Inc., the producer of PC EXPO and the NetWorld shows. Effective immediately, H.A. Bruno, Inc., will change its name to Bruno Blenheim Inc. and continue its operations at 385 Sylvan Ave., Englewood Cliffs, N.J. 07632. The firm will be responsible for all Blenheim business in the U.S.

#90173p8917 06/22/1990 ~PR Newswire

BELIZE CITY (JUNE 22) PR NEWSWIRE - Coca-Cola Foods on June 13, completed

the donation of 42,000 acres of land in Belize to the Program for Belize. The land, which is in the Orange Walk District of northwestern Belize and consists primarily of tropical forest and wetlands, will become part of a conservation management area being assembled by the Program for Belize. The donation was executed by Refreshment Product Services Inc., the Coca-Cola Foods unit in Belize.

Belize, located south of Mexico on the Yucatan Peninsula in Central America, is working to develop its resources, while at the same time preserving and managing its natural areas. The land being assembled by the Program for Belize is in the northwest corner of the country, along its borders with Guatemala and Mexico.

The Program for Belize is a Belizean non-profit company formed in 1988 with significant support from international environmental organizations. Its goal has been to respond to the invitation of the government of Belize to participate directly in the effort to link development and conservation in ways that advance the objectives of both, while building the economy and helping Belizeans achieve a better standard of living.

"We are pleased to be able to make this contribution to the significant work being done by the Program for Belize," said Jonathan Parker, executive vice president, operations, Coca-Cola Foods. "This project serves as a model for all developing countries who seek to preserve the environment as they raise the standard of living for their citizens."

Coca-Cola Foods acquired the land in 1985 as part of a potential citrus project. That project was placed on indefinite hold in 1987. In addition to the donation to the Program for Belize, Coca-Cola Foods has donated 10,000 acres to the government of Belize for use by small villages for sustainable agriculture, and has signed contracts for the sale at its cost of approximately 90,000 acres to Belizeans.

Coca-Cola Foods is America's leading producer and marketer of fruit juices and juice drink products. Its primary brands include Minute Maid, Hi-C and Five Alive.

TOYOTA CITY, JAPAN (JUNE 22) PR NEWSWIRE - Toyota Motor Corporation (NASDAQ: TOYOY) announced today that it plans to invite about 50 of its North American suppliers to a three-day meeting this fall in Nagoya, Japan. The meeting is aimed at promoting closer ties between the company and its growing number of overseas auto parts suppliers.

Specifically, Toyota hopes to deepen mutual understanding among management through an exchange of views on technology development, quality improvement, and the study of actual manufacturing processes used by Toyota and its domestic suppliers. It also aims to promote a consensus on achieving customer satisfaction in Toyota automobile manufacturing. In addition, Toyota will hold separate meetings with each company to work on expanding business.

Toyota's first overseas suppliers' meeting is scheduled to be held in late October.

#90173p8933 06/22/1990 ~PR Newswire

FLINT, MICH. (JUNE 22) PR NEWSWIRE - Leadership in quality, cost, market responsiveness and customer satisfaction is the General Motors agenda for the 1990s, GM Executive Vice President Lloyd E. Reuss said here today.

Reuss, head of North American Automotive Operations, told his Flint Rotary Club audience GM is working hard to regain the ground it lost during the '80s.

"We've made quite a lot of progress in the four key areas of what we call our 'Framework for Greatness': being the best in quality, the lowest in cost, the fastest to market and the leader in total customer satisfaction, not only with the product itself, but with the entire sales, service and ownership experience," Reuss said.

He said GM is showing substantial improvement in quality. He noted that the latest J.D. Power and Associates Vehicle Dependability Index survey of four- to five-year owners of 1985-model automobiles showed that GM cars are significantly more dependable over time than those of the competition.

Cars coming out of GM assembly plants in 1988 had 54 percent fewer discrepancies than in 1985, and since 1986, GM passenger cars have had 35 percent fewer warranty repair events, he said. Furthermore, in the last five years, GM engine durability has gone up 45 percent; transmission reliability, up 50 percent; and electrical system dependability, up 60 percent, according to GM quality audits and owner surveys.

Reuss said GM has met and exceeded its 1987 corporate-wide plan to cut $10 billion from its costs by the end of 1990. "We've done so well that we moved the hurdle up, to $12.5-13 billion," he said. "And at the end of the first quarter of this year, our accumulated savings totaled $12.3

billion."

He said the GM vehicle groups are making good progress in their own cost-reduction objectives, noting that the Chevrolet-Pontiac-Canada Group has taken $1,200 out of its cost to manufacture each unit; Buick-Oldsmobile-Cadillac Group has taken more than $1,700 out; and Truck & Bus, over $700.

MINNEAPOLIS (JUNE 22) PR NEWSWIRE - At its annual meeting held today in Minneapolis, International Multifoods' (NYSE: IMC) shareholders reelected three board members and heard a report by Tony Luiso, chairman, president and chief executive officer, on the company's growth in the away-from-home-eating market.

Shareholders elected the following to three-year terms: James G. Fifield, president and chief executive officer, EMI Music Worldwide; O. E. Powers, chairman and chief executive officer, Nicolet Instrument Corporation; and Robert M. Price, retired chairman and chief executive officer, Control Data Corporation.

Shareholders also approved KPMG Peat Marwick as Multifoods' independent public accountants for the fiscal year ending Feb. 28, 1991. A shareholder proposal relating to the elimination of the classified board of directors was defeated.

Luiso, who assumed the post of chairman and chief executive officer a year ago, reported on the company's continuing expansion in the $230 billion foodservice market. In the first quarter of this year, he said, growth in the company's foodservice businesses contributed to the 24 percent increase in domestic operating earnings.

"We're in an excellent position today to serve this growing and evolving market," said Luiso. "We're a leading specialty distributor serving vending operators, pizza restaurants and bakers. We're also one of the largest manufacturers of food products designed especially for the away-from-home eating market."

Luiso said the company would be expanding its foodservice product line this year with frozen bakery products, new appetizers and pasta dishes, and new surimi seafoods.

"Though we built a new surimi seafood plant in Minnesota just three years ago," he added, "this business has grown so rapidly that we're already at

capacity." In April the company began a major addition which will triple production at the Motley, Minn., facility.

The company is also expanding foodservice manufacturing facilities in California and Texas, and will open two new vending distribution centers in the Midwest this year.

Luiso reported on the company's financial performance, which included a 15 percent increase in net earnings in the first quarter ended May 31, 1990. He also noted that the company had significantly strengthened its financial position since the fiscal year-end in February, reducing its debt by $65 million and its total debt to capitalization from 50 percent to 43 percent.

Minneapolis-based International Multifoods, with fiscal 1990 net sales of $2.1 billion, is a diversified food company with major operations in the United States, Canada and Venezuela.

VANCOUVER, BRITISH COLUMBIA (JUNE 22) PR NEWSWIRE - Royal Oak Resources Ltd. (Toronto: ROL) announced today that it has engaged BT Bank of Canada, the wholly owned Canadian subsidiary of Bankers Trust Company of New York, to act as its financial adviser in connection with Royal Oak's recently announced acquisition of the control shareholdings of the Pamour Group of Companies.

On June 18, 1990, Royal Oak Resources Ltd. announced that it had signed a letter agreement with the principal lenders to Giant Resources Limited of Australia to purchase Giant's 67.1 percent shareholding in Pamour Inc., its 16.7 percent direct shareholding in Giant Yellowknife Mines Limited, and its loan of approximately $15 million owing from Pamour Inc., secured by a pledge of Pamour's investment portfolio which includes an additional 41.7 percent of Giant Yellowknife Mines. The acquisition, which is subject to successful negotiation of an agreement of purchase and sale, regulatory approval and financing, is expected to close on or before Sept. 27, 1990, for a purchase price of Cdn. $33 million.

Royal Oak has engaged Bankers Trust subsidiary, BT Bank of Canada, as its exclusive financial adviser in the acquisition and financing of these assets. In this capacity, BT Bank of Canada will work closely with Royal Oak and will assist in the formulation of a structure and financing plan for the acquisition.

The assets being purchased from Giant Resources will allow Royal Oak to control approximately 200,000 ounces of annual gold production. The acquisition will also provide Royal Oak with control of Pamorex Minerals Inc., the exploration arm of the Pamour Group. Through Pamorex, Royal Oak will control an extensive collection of exploration properties, many of which are strategically located near Giant Yellowknife's existing operations in two of Canada's premier gold camps, Timmins, Ontario and Yellowknife, Northwest Territories.

Royal Oak has prepared a plan which will provides further significant cost reductions to those reported over the last two years at Giant Yellowknife's two mines. Giant Yellowknife's forward sale program, which, as of June 1, 1990, had 208,100 ounces of gold hedged at an average price of Cdn. $543 per ounce, will help insulate Giant Yellowknife from the current low gold prices while this financial turnaround is implemented.

CALGARY, ALBERTA (JUNE 22) PR NEWSWIRE - Nova Corporation of Alberta announces return on rate base for Alberta natural gas transmission operations has been increased by resolution of the corporation's board of directors from 11.83 per cent to 12.18 percent effective June 1, 1990. The increase recognizes changes in cost of capital used to finance gas transmission operations. The new rate increases after-tax return on common equity to 13.75 percent from existing 13.50 per cent.

The common equity component in total capitalization remains at 32 percent. Those and other principal rate-making decisions were developed in consultation with the corporation's customers and leading Alberta gas producers. The adjustment to return will increase net income by $2 million on an annual basis and the unit cost of transmission services by one-fifth of a cent per thousand cubic feet.

The same producers and customers have given Nova assurance that they consider the adjustment to rates, tolls and charges to be satisfactory.

Nova operates one of the largest and most efficient gas pipeline systems in North America. Gas throughput continues to run at record levels with portions of the system running at or near capacity. Over the next five years, capital spending is projected at about $2.6 billion for expansion of the system in response to increasing demand for service. In 1990, capital spending is expected to be between $650 million and $700 million. The division will employ approximately 2,300 people in 1990, up from 2,100 in 1989.

NOVA is a widely held, shareholder-owned company operating internationally from world headquarters in Calgary, Alberta Canada.

CHICAGO, (JUNE 22) PR NEWSWIRE - Boulevard Bancorp, Inc. (NASDAQ: BLVD) today announced it is increasing its provision for loan losses and is revising its net income expectations for the year.

The current action increases the loan loss provision to approximately $10.7 million for the second quarter from $1.9 million for the first quarter of 1990. The $8.8 million increase represents a charge against earnings of approximately $5.4 million, after income taxes, or 66 cents per share which will be taken in the second quarter.

In line with the move the company announced a revision in its earnings projections for the full year to $0.90 to $1.10 per share. Previously, the company had indicated its expectations that earnings would reach $1.80 to $2.00 per share for the year ending Dec. 31, 1990.

According to Richard T. Schroeder, chairman, president and chief executive officer, the increase in Boulevard Bancorp's loan loss provision for the second quarter of 1990 represents the recognition of collection problems on a few loans. "Unfortunately, a couple of these were large and obviously have a high impact," Schroeder said.

"While aggregate economic indices may not reflect a recession, and the fundamentals of middle market lending in Chicago remain strong, today's environment has increased the complexities of credit management," he said. "We have identified important steps to further strengthen credit evaluation and monitoring activities."

Schroeder noted that the second quarter loan loss provision is necessarily based on estimates and that he believes the assessments to be thorough and the provision to be quite adequate to cover any losses.

"It appears today that the loan loss provision will return to a more normal level in the second half of 1990. This should lead to higher earnings in the remaining six months as asset quality and expense ratios improve," Schroeder said.

Last month, the four-bank holding company announced a restructuring program that included:

-- A 10 percent work force reduction that will result in a one time charge to second quarter net income of approximately $650,000 or eight cents per share, but that should produce annualized cost savings of approximately $2.0 million to $2.5 million, after tax, or 25 cents to 30 cents per share.

-- A reorganization of commercial lending activities that have already improved management of credit risk through centralization of loan administration, including loan policies, documentation and risk ratings.

-- An extensive review of pricing policies and other opportunities such as loan securitizations, that should result in increased opportunities on the income side of the business.

Commenting on the restructuring plan, Schroeder said that he is pleased that it is progressing smoothly.

Schroeder further noted that he anticipates no change in the company's current 48 cents per share annual dividend. "The solid underlying fundamentals of the business, coupled with our strong capital base, give us confidence that improved financial results lie ahead."

As a continued vote of confidence, the board of directors has authorized the repurchase of up to 250,000 shares of common stock as a continuation of its stock repurchase program. The repurchase of shares will be accomplished from time to time through the open market or in private transactions.

The four-bank holding company also announced the promotion of Thomas D. Panos, vice president, to head Boulevard Bank's commercial department. He

succeeds Daniel T. Zapton, director and chairman of the executive committee of Boulevard Bank, who resigned earlier this week.

Boulevard Bancorp, Inc. is Chicago's seventh largest bank holding company with assets of $1.7 billion. Its principal subsidiaries include Boulevard Bank in Chicago, First National Bank of Des Plaines, National Security Bank of Chicago, Citizens National Bank of Downers Grove and Boulevard Technical Services. Its common stock is traded on NASDAQ's National Market System under symbol BLVD.

NEW YORK (JUNE 22) PR NEWSWIRE - Merrill Lynch & Co., Inc. (NYSE: MER), today announced the merger of two consumer markets business units that serve the corporate market.

Merrill Lynch Consumer Markets President and Chief Executive Officer John L. Steffens said the firm's Group Financial Services unit, which provides group employee services, including 401(k) retirement plans, to large corporations, has been combined with the firm's Business Financial Services unit, which provides a broad range of financing and investment services to small and mid-sized companies.

The combined business, which will be known as Business Financial Services, has annual revenues of approximately $550 million. The unit will be directed by J. Arthur Urciuoli, a senior vice president and 20-year Merrill Lynch veteran.

A member of the consumer markets executive committee and the Merrill Lynch & Co. operating committee, Urciuoli spent a decade in international corporate finance and served as president of Merrill Lynch International before developing the company's strategy for the small business market.

"This combination will strengthen our ability to provide group employees services to the largest U.S. corporations, probably the most important growth market in financial services today," said Steffens. "Saving for retirement and long-term health care is the number one need of the American family, and Merrill Lynch intends to be in the forefront of that market."

Under the direction of Urciuoli, Business Financial Services in the last five years has become one of the country's largest providers of financial services to privately owned U.S. businesses. Merrill Lynch provides working capital Management Account, equipment financing, specialized

financing, retirement plan administration, investment and portfolio management as well as business valuation and sales services.

Herbert S. Ruben, a senior vice president who has directed Group Financial Services since its inception in 1985, had previously indicated his desire to retire after 34 years of service with Merrill Lynch.

TOYOTA CITY (JUNE 22) PR NEWSWIRE - Toyota Motor Corporation (NASDAQ: TOYOY) announced plans today to provide support from July to a total of 64 technical schools together with its local distributors and dealers in the U.S., Great Britain, and Thailand as part of a new technical education program the company recently initiated. By next spring, Toyota hopes to expand the program to include some 120 technical schools located in 31 countries worldwide.

Support will include up-to-date training materials -- primarily related to electronics -- for students studying car service techniques, and the organization of training sessions. These sessions will be given to technical instructors of the schools to ensure that the teaching materials can be used as effectively as possible.

The Toyota Technical Education Program, or "TOYOTA-TEP," which was set up in April by Toyota, is designed to make it easier to attract, train, and keep local service personnel. Toyota expects that the program will help raise the level of automobile technical education and contribute to skill improvement among technicians in all the countries involved.

1. Details of Technical Support for Schools Outline of Training Materials to be Provided 1) Models

To facilitate the understanding of the basic theories of electricals and electromagnetism by using simple models.

a) Training model and manual for electrical circuitry

b) Teaching model and manual for electromagnetism 2) Parts

To facilitate the understanding of parts structure and mechanism

a) Most up-to-date and high-tech training materials and manual for engine and automatic transmission

b) Cutaway parts for electronic fuel injection and electrical parts

c) Cutaway parts for the transaxle 3) Training Manuals
To facilitate the understanding of structure and mechanism by using training manuals, overhead transparencies, and charts.
a) Training manuals on service techniques
b) Instructors's guides
c) Technical illustrations: perspective views of vehicles and illustrations of the engines and transmission 4) Tools
Provided to assist in the disassembly and reassembly of parts requiring special service tools
a) Tools necessary for practical training on parts Education for Technical Instructors at the Schools In order to ensure that the training materials are used effectively, Toyota and its local distributors and dealers will provide training on using the mentioned materials for the technical instructors at the recipient schools when necessary.

2. Schools Selected to Receive Technical Support A total of 64 schools have been selected to receive technical support. 1) U.S. -- 60 schools
-- San Juan Community College; Farmington, N.M.
-- Weber State College; Ogden, Utah
-- Gateway Community College; Phoenix, Ariz.
-- Texas State Technical Institute; Waco, Texas
-- American River College; Sacramento, Calif.
-- Monroe Community College; Rochester, N.Y.
-- Jackson Community College; Jackson, Mich.
-- Miami Lakes Technical Education Center; Miami
-- 52 other schools 2) U.K. - 2 schools
-- Multi Occupational Training and Education Centers in Livingston (Edinburgh) and High Ercall (Birmingham) 3) Thailand -- 2 schools
-- Patuman College; Bangkok
-- Samutpakan College; Bangkok 3. List of Related Countries and Regions The following is a list of countries and regions in which Toyota has planned to provide technical support, including the three countries mentioned above.

1) North America: United States, Canada 2) Europe: U.K., Germany, Finland, Belgium, France, Holland, Switzerland, Austria, Sweden, Norway, Denmark, Ireland, Spain, Italy 3) Asia and Oceania: Thailand, Taiwan, Indonesia, Philippines, Singapore, Hong Kong, Malaysia, Australia, New Zealand 4) Latin America: Venezuela, Puerto Rico, Bolivia 5) Africa: Kenya, the Canary Islands, South Africa

#90173p8971 06/22/1990 ~PR Newswire
WASHINGTON (JUNE 22) PR NEWSWIRE - "Bills to reduce global warming, such as S.324 introduced by Sen. Timothy Wirth (D-Colo.), are nothing more than federal power grabs to push population control measures," said Judie Brown president of American Life Lobby.

"There's absolutely no consensus among scientists that the earth is warming. But scare tactics such as S.324 create hysterical, mythical 'population explosion' hype for the all too eager media. Sadly, this dramatic effort, based upon shaky, improbable claims, always culminates in the promotion of anti-natalist legislative proposals. S.324 is but the most recent of such anti-life efforts."

Just last month, the Department of Agriculture's Agricultural Research Service, analyzing data collected for the U.S. Historical Climatology Network, announced that temperatures in the United States actually decreased by about a third of a degree between 1920 and 1984.

"The alleged global warming threat is just one more example of about 100 other alleged threats that the population alarmists have publicized in the past 20 years," Brown asserted. "In each case, the threat has been given massive media publicity and, upon investigation, been found false. These scare tactics enable elitist, pro-abortion organizations like Planned Parenthood, the World Bank, and the United Nations Fund for Population Activities to push for increased funding for contraceptive research, sterilization, and abortion, particularly in Third World countries," said Brown.

"What right does the United States have to impose its contraceptive and abortion ethic on Third World countries?" asked Brown. "Practices such as contraception and abortion are viewed as outrageous examples of Western imperialism and decadence by many Third World people. It is high time the federal government got out of the birth control business altogether. People are not the problem. They're the solution to our problems," concluded Brown.

TALLADEGA, AL (JUNE 22) PR NEWSWIRE - The International Business Machines Corp. (NYSE: IBM) has granted nearly $170,000 in computer hardware and software to the Alabama Institute for Deaf and Blind as part of AIDB's Opening Pathways to the World Campaign, AIDB and IBM officials announced today.

The computer technology will be used to create educational laboratories at the Alabama School for the Deaf, the Alabama School for the Blind, and the Helen Keller School of Alabama -- all units of AIDB. Annually, the institute serves some 1,200 to 1,500 children and adults in Talladega and outreach programs throughout Alabama. Speech-language therapy stations will be installed at ASD, HKS and the E.H. Gentry Technical Facility, AIDB's adult rehabilitation facility. Gentry will also receive a desktop publishing system to teach this new technology in the facility's graphic arts and business education trade areas.

The grant includes special adaptations which will make the computers more accessible to sensory impaired students. The speech-language therapy stations will feature SpeechViewer software which will enable deaf students to develop speaking skills. PC's in areas serving visually impaired students will feature ScreenViewer applications which feature voice output and large type display on the video screen.

"The IBM gift is a tremendous boost to AIDB's efforts to use technology to advance services to the sensory impaired citizens of Alabama," said Campaign Chairman John W. Woods. "We are excited and gratified by the company's generosity." Woods, a member of the AIDB Board of Trustees and a vice president of the AIDB Foundation, is chairman and chief executive officer of AmSouth Bancorporation. "AIDB plays an important role in the educational system of Alabama," said Mac McConnell, branch manager for IBM in Birmingham. "This technology will enhance the learning experiences of the AIDB students and we're pleased to provide the equipment."

The IBM gift is part of the Pathways Campaign emphasis on State of the Art Technology. Other Pathways goals include regional center facilities in Birmingham and Mobile, two independent living centers at the Talladega campuses, two endowed chairs for visiting scholars, a chapel endowment and the renovation of AIDB's infirmary into a comprehensive health care and applied research facility. The drive has a total goal of $4 million.

Since its inception in mid-1988, the campaign has received $3.5 million in pledges. The institute has until March 1991 to complete the campaign and claim a $400,000 challenge grant from The Kresge Foundation of Troy, Mich.

NEW YORK (JUNE 22) PR NEWSWIRE - The Global Government Plus Fund, Inc. (NYSE: GOV) today issued the following June monthly update:

Investment Adviser Commentary -- The Fund's Investment Adviser believes

current economic conditions favor global bond funds like The Global Government Plus Fund. Non-U.S. dollar bond markets appear to offer significant value based on their historical interest rate levels relative to the U.S.

-- The Investment Adviser also expects the U.S. dollar to continue to weaken primarily against European currencies, as indications suggest the Federal Reserve will eventually ease short-term rates.

-- U.S. dollar exposure has been decreased to 29.5 percent from 43.2 percent as of 4/30/90 largely in favor of European currencies expect to benefit from proposed German unification.

-- Due to U.S. dollar weakness earlier in the year, the Fund incurred substantial currency losses. These currency losses for tax purposes must be netted against interest income to determine taxable ordinary income available for distribution to shareholders. While current conditions appear to be improving, the Fund's board of directors will continue to review the Fund's quarterly dividend level.

Portfolio DataBank (As of 6/15/90):

-- Average Bond Quality: AAA/Government
-- Average Yield to Maturity: 9.2 percent
-- Average Maturity: 12.0 years

HIGH POINT, N.C. (JUNE 22) PR NEWSWIRE - LADD Furniture, Inc. (NASDAQ-NMS: LADF) vice chairman Richard R. Allen announced today that LADD has sold The Kittinger Company of Buffalo, NY to U.S.C. Industries for an undisclosed amount. U.S.C. Industries is a company formed by Mr. Michael Carlow to acquire Kittinger.

In making the announcement, Allen said, "We are pleased to have completed the sale of Kittinger to Mr. Carlow, a prominent Pittsburgh businessman. This transaction will mean the continuation of Kittinger and its manufacturing operations in Buffalo and Castile, NY." (In late February of this year, LADD had announced that it had been unable to find a buyer for Kittinger and was planning to close the company.)

Kittinger was acquired by LADD on July 7, 1989, as part of LADD's purchase of the former Maytag Furniture Group. The company has a well-known name and reputation among consumers for its ultra-premium quality traditional wood and upholstered furniture for the residential and executive office furniture markets.

Headquartered in High Point, NC, LADD is one of the largest U.S. residential furniture manufacturers, marketing its broad range of wood, upholstered and metal furniture to both residential and contract customers under the major brand names American Drew, American of Martinsville, Barclay, Brown Jordan, Clayton-Marcus, Daystrom, Design Horizons, Lea Industries and Pennsylvania House. LADD also owns and operates Lea Lumber & Plywood Co. and LADD Transportation, Inc., and its stock is traded on the over-the-counter National Market System under the NASDAQ symbol LADF.

NEW YORK (JUNE 22) PR NEWSWIRE - Lingering thunderstorms severely disrupted airlines operations of the New York area air traffic control system for two days this week, causing widespread flight cancellations and cascading departure delays across the country.

Aviation Week & Space Technology's senior transport editor James Ott reports that these disruptions capped a six-month period in which delays at LaGuardia and John F. Kennedy International Airports climbed more than 40 percent over those for the same period a year ago. Delays in New York are paralleling those of 1984, when the U.S. Transportation Department forced airlines to write new schedules and avoid clusters with more evenly distributed flights.

Airline and government officials offered contradictory answers to why the system did not function this week. Some solely blamed the weather, while one said the Federal Aviation Administration may have been overly cautious in response.

Aviation Week & Space Technology, published weekly by McGraw-Hill, is the leading journal for the worldwide aviation, aerospace and defense industries. The magazine's June 25 issue also spotlights these key developments:

-- Wind-shear Warning Systems Shut Down: Approximately 57 of the nation's 110 low-altitude wind-shear warnings systems were shut down for more than a week because of computer software problems, but all were restored to service by June 18.

The units, which provide low-altitude wind-shear warnings at most of the nation's heavily used civil airports, were shut down by the FAA on June 10 after the agency determined that the software in the units was capable of giving false warnings. Aviation Week Dallas bureau chief David Brown reports that the FAA's research center at Atlantic City, N.J., developed a

corrected software package for the units in little over a week to enable them to return to service. Airports affected included LaGuardia, New York JFK, Washington National and Washington Dulles, Baltimore, Pittsburgh and Boston.

-- Pilot Error Involved in Indian Airlines Crash: The crash of an Indian Airlines Airbus A320 transport in February occurred after its two-pilot crew improperly configured the aircraft landing, according to accident investigation data supplied to Airbus Industrie. European editor Jeffrey Lenorovitz reports that one of the crewmembers allegedly selected the aircraft's "idle open descent mode" during the final descent, meaning the aircraft's engines had been operating at idle thrust. The crew allegedly allowed the speed to decrease to 25 knots below the nominal approach speed and the effort to recover the aircraft from this condition came too late. Airbus Industrie managers maintain the A320 and its systems were not the cause of the accident, which killed 94 of the 146 people on board. Both pilots died in the crash.

CINCINNATI (June 22) PR Newswire - Jacor Communications, Inc. (NASDAQ: JCOR) announced that it has terminated its agreement to sell radio station WMYU (FM) (Knoxville, Tenn.) to The Dalton Group, Inc. as a result of Dalton's breach of its obligation to consummate the transaction in accordance with the terms of the agreement.

Dalton had agreed to pay a total consideration of approximately $11,600,000 in cash for this station. Jacor has filed suit in state court for a determination of the rights of the parties to the $500,000 deposit made by Dalton.

Jacor Communications, Inc., headquartered in Cincinnati, currently owns 13 radio stations, a cable television system, the Georgia Network, Eastman Radio, Inc., and Critical Mass Media, Inc. The company's stations are located in Cincinnati, Atlanta, Cleveland, Denver, Nashville, Knoxville, Jacksonville, and Tampa.

PITTSBURGH (JUNE 22) PR NEWSWIRE - The Pittsburgh & Lake Erie Railroad (P&LE) today announced that a temporary agreement has been reached with its 14 labor unions that assures uninterrupted continuation of rail service for at least the next two weeks.

Gordon E. Neuenschwander, P&LE president and CEO, stated, "I am very pleased with the agreement we have reached and sincerely appreciate the efforts and spirit of cooperation on the part of our unions and the RLEA."

Earlier this week P&LE announced that it would implement new work rules, reduce rates of pay and furlough a significant number of employees. A breakthrough developed on Wednesday when the labor unions requested a meeting with the railroad to attempt to reach new labor agreements for a restructured rail operation. The temporary agreement was reached during extensive negotiations between the railroad and the unions Thursday.

The temporary agreement permits P&LE to operate under the new work rules with substantially reduced employment levels and the railroad agreed to continue wage rates at their previous level. The parties also agreed to exert every reasonable effort during the next two weeks to reach definitive labor agreements for P&LE to restructure operations in an efficient and less costly manner. The standstill agreement could be extended beyond midnight Sunday, July 8, if the parties have not reached permanent agreements by that time.

Neuenschwander stated, "The unions now appear to be genuinely interested in working with the company to find a permanent, long-term solution which

would return the railroad to profitability and to making the jobs of those remaining more secure." He added, "I assure you that we will do all that we can to accomplish this goal and continue providing quality rail service within our operating territory."

RALEIGH, NC (JUNE 22) PR NEWSWIRE - Exide Electronics Group, Inc. (NASDAQ: XUPS) announced that on June 21, 1990, in a previously disclosed case entitled James Hendry d.b.a. Synergy Sales Engineering v. Exide Electronics Corporation (a subsidiary of Exide Electronics Group, Inc.), the United States District Court for the Northern District of California denied the Company's post-trial motions, including motions for a judgment notwithstanding the verdict, for a new trial, and for a modification or alteration of the judgment.

In addition, the plantiff's post-trial motion for award of attorney's fees also was denied. As previously disclosed, a jury awarded damages against the Company on April 17, 1990, of approximately $14.9 million in that case.

The Company intends to vigorously appeal the judgment and the denial of its postrial motions. In connection with the filing of the appeal, the District Court has extended its stay of execution until July 5, 1990. Prior to that date, the District Court will review the amount of the security required to be posted to further stay execution of the judgment until the outcome of the appeal is determined.

Exide Electronics, based in Raleigh, North Carolina, designs, manufactures markets and services a broad line of uninterruptible power supply ("UPS") products which protect computers and other sensitive electronic equipment against power loss and distortions. Exide Electronics is the largest dedicated developer and manufacturer of UPS products in the world, with a customer base that includes many Fortune 1000 companies.

SEATTLE (JUNE 22) PR NEWSWIRE - Univar Corp. (NYSE,PSE: UVX), North America's largest chemcial distributor, today announced a 21.9 percent increase in net earnings for the first quarter ended May 31 compared to the same quarter last year. The earnings gain was achieved in spite of

flat sales.

Net earnings for the quarter were $5,746,000, or 32 cents per share, on sales of $362,061,000 compared to earnings of $4,715,000, or 27 cents per share, on sales of $359,618,000 in the first quarter of the prior year. Much of the earnings gain reflects stronger margins and a decline in interest expense.

All share data reflect the effects of a two-for-one stock split paid November 4, 1989, as a 100 percent stock dividend to shareholders of record Oct. 16, 1989.

"We're very pleased with the quarter's results," said James W. Bernard, Univar President and Chief Executive Officer, "particularly in light of the increased costs incurred as a result of initial rollout of our new computer system and ongoing expenses related to safety, environmental stewardship and other programs."

Univar Corp., headquartered in Seattle, distributes chemicals to industry in North America through two operating subsidiaries, Van Waters & Rogers Inc. in the United States and Van Waters & Rogers Ltd. in Canada.

CALGARY, ALBERTA (JUNE 22) PR NEWSWIRE - Notice is hereby given that the board of directors of Nova Corporation of Alberta has declared the following quarterly dividend, payable on the 15th day of August, 1990, to shareholders of record at the close of business on the 9th day of August,

1990.

Preferred Shares 9 1/8 Percent Series, Dividend No. 22: Dividend on the outstanding 9 1/8 percent Cumulative Redeemable Fixed/Floating Rate First Preferred Shares for the period ending Aug. 15, 1990, will be in an amount per share equal to one-quarter of 70 percent of the average of the Prime Rate (as defined in the provisions attaching to the 9 1/8 percent Cumulative Redeemable Fixed/Floating Rate First Preferred Shares) in effect on each day during the three calendar months ended on the last day of July, 1990 (the ''Calculation Period'') multiplied by $25.00.

Such dividend is estimated to be $0.6453125 per share, based on a Prime Rate of 14-3/4 percent. This amount may vary depending upon the actual Prime Rate in effect for the Calculation Period and further notification will be made once the actual dividend amount is determined.

#90173p9021 06/22/1990 ~PR Newswire

WASHINGTON (JUNE 22) PR NEWSWIRE - The American Bar Association today called on Congress to pass legislation extending U.S. civil remedies to victims of torture.

Testifying at Senate Subcommittee on Immigration and Refugee Affairs hearings, chaired by Sen. Edward Kennedy (D-Mass.), ABA witness Robert F. Drinan told committee members that systematic and government-sponsored torture is "rampant throughout the world," and legislation is needed "to strengthen international mechanisms to protect human rights and enhance the rule of law."

Drinan said S.1629, the Torture Victim Protection Act, "would serve notice to individuals engaged in human rights violations that the United States strongly condemns such actions, and will not shelter violators from being held accountable for civil damages in the U.S."

Drinan, who is chair-elect of the ABA Section of Individual Rights and Responsibilities, explained that this legislation eliminates any uncertainty as to whether torture victims can sue for damages based on acts of torture committed under government authority abroad. It provides a "clear federal right of action against torturers or those who have engaged in political killings who are physically present in the United States," said Drinan.

The legislation authorizes a U.S. citizen or alien in the United States to sue an alleged torturer for civil damages, for acts of torture committed

in a foreign country, if the person sued also is in the United States. The legislation would not establish a criminal statute.

Drinan noted that S.1629, introduced by Sen. Arlen Specter (R-Pa.), is in accord with Article I of the Constitution, "to define and punish ... offenses against the law of nations."

Drinan said that the "threat of retaliatory and abusive use of the Torture Victim Protection Act by anti-American groups is not a legitimate ground to deny individuals legal remedies." This measure, he said, is important because it "confirms the existence of the right of aliens who have been victims of gross human rights abuses to bring suit and extends this same right to U.S. citizens."

NAPLES, FLA. (JUNE 22) PR NEWSWIRE - BancFlorida, a Federal Savings Bank (the "bank"), which is the principal subsidiary of BancFlorida Financial Corporation (NYSE: BFL) (the "company"), today announced that its capital plan has been approved by the Office of Thrift Supervision ("OTS"). The bank submitted its capital plan to the OTS as required by the Financial Institutions Reform, Recovery and Enforcment Act, to demonstrate how the bank will comply with the risk-based capital requirement, one of three more stringent capital requirements which took effect December, 1989. The bank's capital continues to exceed the tangible and core capital requirements.

The OTS did not require the bank to make any material changes to its submitted capital plan. While the capital plan contains various limitations on the bank's activities, the limitations are not expected to adversely impact the bank's operations, as long as the bank meets the projected risk-based capital ratios set forth in the capital plan.

BancFlorida Financial Corporation has assets of $1.7 billion and a book value per common share of $14.91 at March 31, 1990. The company has 3,414,021 shares of common stock and 1,138,000 shares of cumulative convertible preferred stock outstanding.

ALEXANDRIA, VA (JUNE 22) PR NEWSWIRE - Halifax Engineering, Inc. (AMEX:

HX) reported today it incurred a loss of $115,000 for its fiscal year ended March 31, 1990, on revenues of $28,480,000.

Howard Mills, president, stated that profits generated in the fourth quarter were not sufficient to offset earlier losses. These losses were caused by litigation and settlement expenses of $880,000 incurred in the third quarter.

Mills further stated that the outlook for the current year was promising. The financial position of the company remained strong with current ratio of 4.3 to 1, and the backlog is a strong $46 million.

New acquisitions and the emphasis on commercial and non-defense computer maintenance and commercial security services should make the company less dependent on defense programs.

Halifax provides professional, technical and support services to government and industry.

BOSTON (JUNE 22) PR NEWSWIRE - Bank of New England, N.A. President Leo R. Breitman today was elevated to the position of vice chairman and senior credit policy officer of Bank of New England Corporation (NYSE: NEB), and D. Bruce Wheeler, executive vice president of First Nationwide Bank in California and former executive here with the Bank of Boston, was named president and chief operating officer of BNE, N.A., BNEC Chairman and Chief Executive Officer Lawrence K. Fish announced.

As senior credit policy officer, Breitman will be responsible for setting credit policy for the corporation and its subsidiary banks and for Controlled Loan and Loan Review activities throughout the corporation. Strengthening the banks' credit portfolios and appointing a senior credit officer are important elements in the company's strategic recovery plan. Breitmen, who has extensive background in lending, became head of BNE, N.A. in January.

Wheeler will be responsible for BNE, N.A.'s major lines of business -- corporate banking, commercial banking, retail banking, commercial real estate, and trust and private banking.

"Leo Breitman and Bruce Wheeler are two of the most respected names in banking, and the particular talents they bring to their new jobs will complement and strengthen our ongoing recovery," Fish said. "Leo is a seasoned lender, and has spent most of 25 years directly and indirectly

involved in lending. He has a deep understanding of our large loan portfolios in Massachusetts and Connecticut and their importance to our recovery. Bruce has worked in nearly every aspect of banking, and he knows Massachusetts and appreciates the strengths of our franchise."

"A key element in our recovery is the establishment and management of sound credit policies -- policies that recognize the realities of the economy and the marketplace and allow us to make good loans to creditworthy customers," Breitman said. "We can't recover fully without making loans, but we won't make loans unless they're good ones."

"I'm very excited to be joining a team that is facing one of the most challenging opportunities in banking. And I'm especially pleased to become part of the recovery effort of a bank for which I developed a healthy respect when I competed against it," Wheeler said.

Before being asked to head BNE, N.A. in January, Breitman, 49, served as president of BNEC's affiliate, The Connecticut Bank and Trust. He has served as the founder and president of the New England Commercial Finance Corporation, and managed the company's Commercial Finance Division.

Breitman also was president and chief operating officer of Patriot Bank from 1985 to 1987. Patriot became part of BNEC in the 1987 merger with The Conifer Group.

Wheeler, 43, joined First Nationwide in San Francisco in November as head of its banking division with responsibility for 245 retail offices in 14 states, subsidiary banks in three states, as well as consumer loan, investments, and credit card operations.

From 1982 through 1989, Wheeler was with Bank of Boston, managing its Massachusetts banking operations -- including middle-market lending; and retail mortgage, and private banking. He earlier headed up the division providing retail banking products and support services for the New England Group. Prior to joining Bank of Boston, he was a general manager of Crocker National Bank's international banking subsidiary in New York City.

Bank of New England is a Boston-based interstate bank holding company with assets of $25 billion and banking offices in four New England states. Its common stock is listed on the New York Stock Exchange and is traded under the symbol NEB.

TORRANCE, CA (JUNE 22) PR NEWSWIRE - Toyota Motor Sales (TMS) - USA announced today that, effective Oct. 1 of this year, it will assume all product distribution functions of Frederick Weisman Co. and its subsidiary Mid-Atlantic Toyota (MAT), which handles distribution in the five-state area including Maryland, Pennsylvania, Delaware, Virginia, West Virginia and the District of Columbia.

"We are acquiring the distributor functions in accordance with provisions of a settlement agreement signed in May, 1987, by TMS and the Frederick Weisman Company (FWC) and approved by a federal court in Los Angeles," said TMS President Yuki Togo. "At that time, Mr. Weisman agreed to a one-time, five-year extension of his distributor agreement with TMS. The agreement contained an unconditional right for Toyota Motor Distributors (TMD), a subsidiary of TMS, to acquire the distribution functions of FWC after three years."

Togo noted that, as part of TMD's acquisition, it agreed to purchase certain assets of MAT and certain of its affiliate companies and pay a substantial royalty to FWC for every vehicle sold by TMD in the former MAT territory for the two-year period beginning Oct. 1, 1990.

"TMD will form a new subsidiary to assume all functions formerly handled by FWC. We have offered to retain all current employees of MAT, Crown Port Services and Global Computer Services," Togo said, "and we have asked Weisman to stay on as chairman of the new subsidiary."

#90173p9038 06/22/1990 ~PR Newswire
ANN ARBOR, MI (JUNE 22) PR NEWSWIRE - Schumaker & Company, an Ann Arbor-based management consulting firm, has increased its staff and expanded its East Coast office in response to its growing business needs.

In the last two years, Schumaker & Company has established an enviable record in its conduct of management and operations reviews of utilities and other companies, as well as information systems consulting for a variety of entities. The company has completed five comprehensive reviews of electric, gas and water utilities for four different state regulatory commissions, in addition to other focused reviews of manufacturing and service companies.

The company recently added five staff members to its headquarters, located in the Concord Center office complex at 455 East Eisenhower Parkway, Suite 220, Ann Arbor, MI 48108. Scott King has joined the Ann Arbor office as a consultant. King, who holds an M.B.A. from the University of Michigan, also has degrees in computer engineering and electrical engineering. He was employed by the Chrysler Corporation, The Stroh Brewery Company, and the Detroit Edison Company before coming to Schumaker & Company. Two

University of Michigan M.B.A. students, Richard Citrin and Gregory Reid, have joined Schumaker & Company's summer internship program. Citrin has advanced degrees in electrical engineering and computer science and over 10 years of experience with the General Electric Corporation. Reid holds advanced degrees in chemistry and chemical engineering. He also has extensive experience as a microcomputer analyst and cost control supervisor for the Handleman Company.

In addition, Ann Kelley joined Schumaker & Company as a technical editor and public relations coordinator. Kelley, an experienced copywriter for media advertising and promotional campaigns, was employed as a technical writer for the Detroit Edison Company prior to joining Schumaker & Company. Mercedes Cadiz, the company's new administrative analyst, is responsible for database administration and assists in the management audit information flow process. Cadiz, a recent graduate of Michigan State University, has substantial experience in accounting and financial aid coordination.

In May, Schumaker & Company moved its Princeton, N.J., office and opened a larger office in Wayne, Pa., near Philadelphia. The East Coast office, headed by Vice President Walter Drabinski, is located at Eleven West Avenue, P.O. Box 40, Wayne, PA 19087. Under the direction of Drabinski, this office will provide a full range of consulting services in the regulated utility, information services, and manufacturing areas. Drabinski, an electrical engineer with an M.B.A. from the University of Pennsylvania's Wharton School, worked for the Niagara Mohawk Corporation for more than 10 years and has eight years of management consulting experience.

BOSTON (JUNE 22) PR NEWSWIRE - Chancellor Corporation announced today that its board of directors has accepted the resignation of W. Barry Tanner as president and a director of the company and its subsidiaries. Tanner, who is leaving to pursue other interests, had served as president of the company for two years.

The company also announced that its board of directors has named Stephen G. Morison, the company's chief executive officer and vice chairman, as president and has appointed William C. Sprong, a senior vice president and the treasurer of the company, as a director to fill the vacancy created by Tanner's resignation.

Founded in 1977, the company has, in recent years, concentrated on the leasing of transportation equipment. It is also involved in the leasing of aircraft, communications, medical, agricultural and other equipment. Chancellor Corporation common stock is listed on the National Association

of Securities Dealers (NASDAQ) National Market System (symbol "CHCR").

NEW YORK (JUNE 22) PR NEWSWIRE - General Instrument Corp.'s (NYSE: GRL) VideoCipher Division today announced that its new proprietary digital video compression technology, DigiCipher(TM), has been precertified for testing for a national high definition television (HDTV) standard for terrestrial television broadcasting.

The company said that the precertification came in a unanimous vote today from Working Party 1 of the Systems Subcommittee of the Federal Communications Commission's (FCC) Advisory Committee on Advanced Television Services, following the committee's review of the DigiCipher technology in Washington, D.C.

DigiCipher technology is now the only all-digital system among the seven systems under review in the FCC HDTV standards setting program. The new technology uses proprietary techniques, for which patents have been applied, to digitize and compress television signals.

For broadcast HDTV, DigiCipher is a simulcast system transmitting the HDTV signal completely within a 6 MHz channel, consistent with current terrestrial and cable television channel technology.

General Instrument is the industry leader in cable TV electronics, coaxial cable and satellite encryption systems. The company's primary strategies are directed toward communications systems. The common stock of the company is listed on the New York, Midwest, Pacific and London stock exchanges.

NEW YORK (JUNE 22) PR NEWSWIRE - Southeast Banking Corp.'s 4.75 percent convertible subordinated debentures, due 1997, are lowered to 'B+' from 'BB+' by Fitch.

Approximately $12.1 million in debt is affected. A severe acceleration in levels of nonperforming assets relative to the corporation's low tangible

equity and loan loss reserves prompted the downgrade.

The credit trend is negative.

The weakening Florida real estate environment continues to severely impact Southeast's $10.4 billion loan portfolio, 24 percent of which is comprised of construction and commercial mortgage credits. At March 31, 1990, problem real estate loans from the corporation's rapid expansion into real estate lending were 7.5 percent of real estate loans, with aggregate nonperforming assets (including accruing loans 90 days past due) 4.89 percent of related assets.

This compares with 3.47 percent at Dec. 31, 1989, and 3.00 percent the prior year. Total nonperforming assets at June 30, 1990 are projected to increase to between $600 and $620 million, placing the ratio at 6.25 percent of loans and other real estate owned. Fitch expects problem real estate related credits to continue to rise throughout 1990 before stabilizing.

ALBUQUERQUE, NM (JUNE 22) PR NEWSWIRE - Summa Medical Corp. (AMEX: SUMA) today announced certain additional information pertaining to its press release of June 5, 1990.

On May 23, 1990 Summa's subsidiary, Quality Communications Products Inc. and I.C.M.X. of McLean, Va., a distributor and VAR of computers and selected products, entered into a letter of understanding pursuant to which the parties agreed to pursue business opportunities in the ruggedization of mini and super mini computers. Upon execution, the parties began to perform in accordance with the terms of that understanding, including providing pricing and technical criteria for the ruggedization activities. Negotiations are continuing to formalize that understanding.

On June 15, 1990 I.C.M.X. formally advised Quality Communications that I.C.M.X.'s contract with the supplier of the super mini computer was subject to termination. I.C.M.X. further advised Quality Communications to evaluate products of two other companies where the product performance was similar to the product initially contemplated to be ruggedized as to pricing and scope of work. This activity is ongoing and would be subject to a formalized agreement.

Summa's is of the opinion that this change should have no material impact

on its estimates regarding the formalization of a contract to modify 24 computers, its estimate of revenues related to that contract, and the time those revenues will be achieved.

In regard to the previously announced arrangement for the $3,000,000 credit facility, Summa has begun the negotiations of formal terms and conditions regarding that credit facility.

RAMSEY, NJ (JUNE 22) PR NEWSWIRE - Commenting on today's action by Honeywell (NYSE: HON) to withdraw the Section 337 complaint against Minolta filed last week before the International Trade Commission (ITC), Minolta issued the following statement:

We welcome Honeywell's decision to drop its ITC complaint and abide by its 1988 agreement to adjudicate this case in the federal court. Honeywell's allegations are unfounded -- Minolta does not use Honeywell autofocus technology in any of our cameras. We intend to aggressively defend ourselves in court against Honeywell's allegations, and are confident we will prevail.

We hope this decision will encourage Honeywell to discontinue its efforts to drag this straightforward patent dispute into the political arena.

Minolta's dedication to autofocus innovation dates back to the 1960s and is well documented by many U.S. patents on autofocus technology. Decades of research and development efforts by Minolta scientists and engineers have led to the many technological improvements -- including, but not limited to autofocus -- which contribute to the success of the state-of-the-art autofocus single-lens reflex cameras we market today.

#90173p9077 06/22/1990 ~PR Newswire

MOUNT CLEMENS, MI (JUNE 22) PR NEWSWIRE - Central Holding Company (NASDAQ: CHOL) announced that the Office of Thrift Supervision (OTS) has reviewed the loan and foreclosed real estate portfolios of Central Holding Company's wholly owned subsidiary, Colonial Central Savings Bank (CCSB). Based on this review, the OTS has directed that CCSB record an additional $1.7 million in loss reserves. The majority of the additional reserves considered necessary by the OTS relate to six construction projects which

had previously been identified as problem assets. While agreeing to increase its reserves, CCSB believes these additional reserves may be greater than the amount necessary to fairly value the portfolio, considering the collateral value of the properties.

At March 31, 1990, CCSB's tangible capital was $3.5 million above the regulatory capital requirement, core capital was $1.8 million below the regulatory capital requirement and risk-based capital was $5.6 million below the regulatory capital requirement. These additional reserves will reduce CCSB's net income for the quarter which will end on June 30, 1990, by approximately $1.5 million. As a result, CCSB's tangible and core capital will be reduced by approximately $1.5 million and its risk-based capital by approximately $0.5 million.

Separate from the above, Colonial Central's wholly owned mortgage banking subsidiary, Central Mortgage Corporation, announced the closing of its loan origination offices in Topeka and Wichita, Kan. Concurrent with these closings, Central Mortgage Corporation will write off the remaining $1.1 million in non-tax-deductible goodwill associated with the 1987 acquisition of Superior Mortgage, Inc. Due to the fact that this goodwill was already excluded from regulatory capital, the write- off will not affect regulatory capital.

The reduction in incremental operating losses related to these two branches (including administrative costs) is estimated at approximately $200,000 annually.

NORFOLK, VA (JUNE 22) PR NEWSWIRE - Sovran Financial Corporation (NYSE: SOV) today announced plans for the consolidation of its four data centers into a consolidated data center at the company's Villa Park facility outside Richmond, Va., by year-end 1991.

"Sovran will further enhance the quality, reliability and efficiency of its systems with a single data center," said John J. Sponski, executive vice president for corporate operations and technology.

"The new center will reduce current operational and managerial complexities that result from the maintenance of multiple data centers," he said. "And it will prepare us for achieving even greater efficiencies when Sovran completes its merger with The Citizens and Southern Corporation (NYSE: CTZ) later this year."

Equipment such as computers, disk drives, tape drives and switches in data centers in Nashville, Tenn., Hyattsville, Md., and Norfolk, Va., will be sold or moved to the new consolidated data center.

The consolidation will affect an estimated 130 positions in the data centers. Of this number, about 60 positions are expected to be relocated to Villa Park.

"With this consolidation, Sovran is continuing its commitment to reallocate resources to provide efficient customer service. The centralization of certain technological procedures allows banks throughout our company to concentrate their efforts more fully on customer service and convenience," said Sponski.

Sovran Financial Corporation and The Citizens and Southern Corporation

have announced a definitive agreement to combine under a new holding company, Avantor Financial Corporation, in a tax-free, stock-for-stock transaction. The Federal Reserve Board officially accepted the Sovran and C&S merger applications on May 25.

#90173p9095 06/22/1990 ~PR Newswire

FLINT, MI (JUNE 22) PR NEWSWIRE - Buick's totally redesigned 1991 Park Avenue and Park Avenue Ultra are now being shipped to dealers, General Manager Edward H. Mertz announced.

As a result of enthusiastic receptions earned by the Park Avenue and Park Avenue Ultra at recent auto shows and media previews, Buick has received orders for the first six months of production.

Manufacturer's suggested retail prices (MSRP) will be $24,385 for the Park Avenue and $27,420 for the Park Avenue Ultra.

The 1991 Park Avenue and Park Avenue Ultra incorporate more than 1,400 product refinements, including impressive standard equipment and product safety enhancements.

Mertz said these new models offer significant new features compared to

their predecessors and represent excellent values in the luxury car segment. "For example, three important new standard equipment items -- anti-lock brakes, Pass Key anti-theft system and driver's side supplemental inflatable restraint (air bag) -- together amount to a current market value of $1,850."

He said the new models are "not only the most sophisticated six- passenger cars Buick has ever offered, but among the most advanced automobiles available."

Not only are they completely redesigned, but they are 8 inches longer for additional trunk roominess and have an advanced 3800 V-6 engine with tuned port injection coupled to the first electronically controlled automatic transmission ever offered in a General Motors luxury car.

There are many more new features, such as substantial reinforcement of the body structure, standard use of the industry's first "solar control" glass to filter harmful sun rays, and engine oil-life and oil- level monitors.

Park Avenue Ultra in addition has dual automatic climate controls -- "ComforTemp" -- for the driver and the front passenger (optional in Park Avenue), rear console with vanity mirrors and auxiliary sun shades.

Robert E. Coletta, Buick's general sales and service manager, said dealers may sell the new models as soon as they arrive.

Coletta said dealers may have limited supplies of the new models in July as production is in an acceleration period at the B-O-C Wentzville Assembly Center in Wentzville, Mo.

"Buick is extremely proud of its ratings as the top quality domestic automaker and among the best in the world in quality, based on recent J.D. Power customer surveys, and we believe the new Park Avenues being shipped will enhance that reputation," he said.

While early customer reaction centered on the graceful and aerodynamic new exterior styling and wrap-around instrument panel, Mertz said the real pleasure is in the driving.

"This new powertrain, with its advanced engine and the first electronically controlled automatic transmission ever offered in a General Motors luxury sedan, provides effortless acceleration and precise and almost undetectable upshifts and downshifts in normal driving," he said.

BOISE, ID (JUNE 22) PR NEWSWIRE - William Agee, chairman and chief executive officer of Morrison Knudsen Corp. (NYSE: MRN) today announced that MK and partner, Eastmaque Gold Mines Ltd. have acquired minerals rights to the Oro Cruz property, a 3,500-acre tract in southeastern California with proven gold reserves.

Agee said rights to the property were acquired through the American Girl Mining Venture, a venture of MK and Eastmaque, from Pike's Peak Mining Co. formerly Texas Gulf Minerals & Metals Inc.

American Girl Mining Joint Venture presently is operating a surface and underground gold mine on a property adjacent to Oro Cruz in the Cargo Muchacho Mountains.

"This is another major step in our long-term strategy to acquire equity positions in mining projects," said Agee. He added that preliminary exploration has identified more than 150,000 ounces of gold at the Oro Cruz site.

MK is a majority partner and will be manager during exploration, development and operation of the property. Operation of the Oro Cruz surface workings will be performed in conjunction with American Girl operations, employing existing processing facilities.

BRANCHBURG, NJ (JUNE 22) PR NEWSWIRE - Air & Water Technologies Corporation (AMEX: AWT), a leading environmental treatment and services company, today announced that it has reached an agreement in principal with Compagnie Generale des Eaux (Generale des Eaux) for Generale des Eaux to purchase 500,000 shares of AWT Class A Common Stock at a purchase price of $26.25 per share, representing the closing price on Thursday, June 21, 1990, in a private placement outside the United States. The shares of Class A Common Stock are to be purchased from certain stockholders of the company and were to be included in a previously announced secondary public offering of 1,330,000 shares of Class A Common Stock. AWT will not receive any of the proceeds from the sale of the shares of the selling stockholders. AWT anticipates that the secondary public offering for the remainder of the registered shares will continue. Consummation of the purchase is subject to completion of a definitive purchase agreement.

Generale des Eaux is a leading diversified group of service companies, providing a comprehensive range of public, institutional and industrial service needs for water, power, heating and urban maintenance. Generale

des Eaux is the world's leading distributor of public drinking water, serving nearly 30 million people. Overall, Generale des Eaux is one of the largest French companies, employing 138,000 people with worldwide sales of approximatley $17 billion in 1989. Among its operating subsidiaries is Societe Generale d'Enterprises, which employs 62,000 people in the construction industry.

In conjunction with the purchase, AWT and Generale des Eaux have agreed to amend their previously announced agreement by which Generale des Eaux purchased 3,584,875 shares of AWT Class A Common Stock. The amendment would waive certain standstill provisions contained in such agreement to permit this transaction and to make the 500,000 shares to be purchased in this transaction subject to the terms of such agreement, including limitations on selling the shares acquired and a grant of right of first refusal.

Air & Water Technologies -- through its business units Metcalf & Eddy Companies Inc. (NASDAQ: METC), Research-Cottrell, Inc. and Residuals Management Company -- provides a broad range of environmental services for water resources management, air pollution control, and the disposal and reuse of waste by-products.

#90173p9110 06/22/1990 ~PR Newswire

RALEIGH, NC (JUNE 22) PR NEWSWIRE - Firstcorp, Inc. (AMEX: FCR) announced today a decision to proceed with a plan which would enable its subsidiaries, First Federal Savings and Loan Association of Raleigh ("FFR") and First Federal Savings and Loan Association of Durham ("FFD") to remove from their books approximately 83 percent and 100 percent, respectively, of their nonperforming assets.

Under the plan the subsidiaries will sell the assets to a to-be-formed company, the sole purpose of which would be to manage and sell the real estate. Approximately three-fourths of the classified assets that would be retained consist of real estate owned under contract for sale or performing loans which are classified substandard.

Firstcorp will engage PaineWebber to assist on a best efforts basis in the placement of debt and/or equity securities that would be issued to finance the creation of the new company. Implementation of the plan is expected to be completed on or before December 31 of this year. A final go ahead for the plan must await an independent accountant's review and approvals from the Office of Thrift Supervision ("OTS").

In February of this year, Firstcorp announced it had retained PaineWebber to study the possibility of creating a new company to purchase the nonperforming assets.

Since that time, Firstcorp has completed a detailed property-by-property analysis of the cash flows which would result from the disposition of these nonperforming assets by the new company and the cost of operating that company, and PaineWebber has undertaken its review relative to Firstcorp's real estate sales, the valuation of the properties proposed to be sold, and the plans for liquidation of those properties.

PaineWebber has provided Firstcorp with its preliminary estimates concerning net present values of the assets to be sold and of the securities to be issued by the new company.

Based upon such estimates, the Firstcorp Board of Directors unanimously determined that the plan would be in the best interest of the Company and its security holders.

Firstcorp projects that such a sales transaction, if completed on a timely basis, would enable FFR to immediately generate recurring operating income. It would, however, significantly reduce the capital of FFR.

It is anticipated that the resulting capital shortfall would be resolved by completing the previously announced plan to merge FFD with FFR, and completing an exchange offer with the holders of the Company's 8 1/4 percent Convertible Subordinated Debentures Due 2005 (the "Debentures").

NORMAN, OK (JUNE 22) PR NEWSWIRE - USA Waste Services Inc. (NASDAQ: USAS) announces the signing of a Stock Purchase Agreement by the Judy E. Hatley 1987 Trust with Donald F. Moorehead for the sale of a total 1,121,042 shares of the common stock of USA Waste representing approximately 40 percent of the total shares outstanding.

Melvin E. Hatley, chairman of the board and chief executive officer, and Judy E. Hatley, secretary, treasurer and a director, submitted their resignations effective June 20, 1990. The three remaining members of the board of directors, Terry Patrick, Robert Mosley and Michael Williams will serve as the full board until the Annual Meeting of Shareholders scheduled for August.

Hatley said, "I am pleased that we were able to reach an agreement with an

individual of Mr. Moorehead's reputation in the waste management business."

Patrick, president and new chairman of the board of USA Waste, stated, "Mr. Moorehead considers this acquisition of common stock a passive investment in USA Waste. He is confident in the leadership at USA Waste to protect all shareholders' investments and that he will not be required to have any involvement that would be a conflict with his employer, Mid-American Waste Systems Inc., Canal Winchester, Ohio. I appreciate what I consider to be a great opportunity to be associated with USA Waste."

USA Waste is engaged in the solid waste management business and provides services consisting primarily of solid waste collection and disposal performed primarily for municipalities in central Oklahoma.

HOUSTON (JUNE 22) PR NEWSWIRE - Commonwealth Mortgage of America L.P. ("Commonwealth"), announced today that it is distributing to its Class A Unitholders an information statement advising of the approval, on June 21, 1990, of a complete plan of liquidation and dissolution of Commonwealth.

The adoption of the plan by written consent in lieu of a meeting of the holders of limited partner interests in Commonwealth was furnished by Commonwealth Mortgage Corp. of America ("CMCA"), the general partner of Commonwealth and the holder of 20,700,000 Class A Units and 25 million Class B Units of limited partner interests in Commonwealth, which represent approximately 59.1 percent and 100 percent, respectively, of the outstanding Class A and Class B Units and Commonwealth Federal Savings Association, the parent of CMCA and the holder of 2,550,940 Series I Preferred Units of limited partner interests in Commonwealth, which represents 100 percent of the outstanding Series I Units.

Because of the size of Commonwealth's debt, the preference in liquidation of the Series I Units and other factors described in the information statement, holders of Class A Units are unlikely to recieve any liquidating distribution.

Earlier this year, Commonwealth announced the sale of its Federal National Mortgage Association servicing portfolio and the execution of an agreement to sell its loan origination operation. It has also previously announced that a broker has been retained to market the remainder of its servicing portfolio.

ATLANTA, GA (JUNE 22) PR NEWSWIRE - First Atlanta Corporation, through its First National Bank of Atlanta subsidiary, has agreed to assume all of the deposits and acquire certain assets of Great Southern Federal Savings and Loan Association from the Resolution Trust Corporation.

First Atlanta is a wholly owned subsidiary of First Wachovia Corporation (NYSE: FW)

In making the announcement, D. Raymond Riddle, president and chief executive officer of First Atlanta, reported that the deposits of Georgia-based Great Southern, as of March 31, 1990, totaled $516 million.

Great Southern is headquartered in Savannah and also has offices in Calhoun, Cumming, Dahlonega, Gainesville, Jesup, Macon, Moultrie, Statesboro and Tifton.

Riddle said that Great Southern customers are being informed about the purchase and given information on First Atlanta banking services. "Great Southern offices will open on Monday, June 25, as First Atlanta offices," Riddle added. "We will have First Atlanta representatives at each office to ensure that our new customers continue to receive convenient, competitive and high quality service through and after the transition."

With the transaction, The First National Bank of Atlanta will assume all customer deposits in each of Great Southern's offices. Assets to be purchased include short-term investments and marketable securities. The purchase price for Great Southern of $10,025,000 does not include bank facilities and equipment, which are subject to purchase option at a later date.

The First National Bank of Atlanta has 134 offices serving 50 Georgia communities, including 91 offices in metropolitan Atlanta. First Wachovia Corporation is an interstate bank holding company with assets of $23.9 billion on March 31.

#90173p9136 06/22/1990 ~PR Newswire

GAITHERSBURG, MD (JUNE 22) PR NEWSWIRE - Genex Corp. (NASDAQ: GNEX) announced at its annual shareholders meeting Thursday it is considering the possible sale of part or all of its bioseparations unit, which produces proteins, instruments and filtration devices for purifying or detecting antibodies. The company has retained an investment banker to identify interested buyers.

Reed Prior, president and CEO said Genex's antibody binding proteins have been "well received by our customers and we believe are superior to competitive bioseparations products." Thomas Corridon, controller, reported that although revenues in this business unit continued to grow in the first quarter of 1990, the company felt that the growth was short of what was needed to build a sustainable business within Genex.

Genex shareholders elected five directors: Dr. Vito M. Esposito, president and CEO of Theracel and Genex board member since 1984; Reed R. Prior, Genex president and CEO; David T. Morgenthaler, managing partner of Morgenthaler Ventures and Genex board member since 1987; Dr. Christopher D. Earl, general partner of Plant Resources Venture Funds and board member since 1989; and Donald L. Murfin, chairman of the board and former vice president of Lubrizol Corp.

Shareholders also voted to approve all proposals presented to them, including an amendment to the 1987 Stock Option Plan to increase the total number of authorized Common shares by 10 million, and an amendment to grant Donald L. Murfin, chairman and former interim president, an option to purchase an additional 30,000 shares of common stock.

In his report to shareholders, Prior said Genex's single-chain antigen binding proteins, trademarked SCA, have been shown in five studies conducted at the National Cancer Institute to bind "with high specificity to targeted human tumors transplanted into mice, while clearing rapidly from the blood and normal tissues, important characteristics for use in human diagnostic imaging and therapy. Confirmation of these advantages will not be complete however, until we have human 'in vivo' data as well."

Prior also reported on recent tests at a major medical school of Genex's protein-based bioadhesives. "We have promising evidence from animal studies that they should succeed as biocompatible wound closure agents... for a variety of surgical and dental applications. We are particularly encouraged by marketing studies recently completed for this product and are in discussions with several prospective multinational corporate partners."

SEATTLE (JUNE 25) PR NEWSWIRE - Washington Mutual (NASDAQ: WAMU), a Federal Savings Bank announced that, as of 6 p.m. (PDT) Friday, it has acquired certain assets and liabilities of Frontier Federal Savings and Loan Association of eastern Washington from the Resolution Trust Corp. (RTC).

Washington Mutual, a Federal Savings Bank is a wholly owned subsidiary of Washington Mutual Savings Bank.

Under the terms of the agreement, Washington Mutual will assume Frontier Federal's deposit liabilities which total approximately $91.5 million. The assets acquired by Washington Mutual will include Frontier Federal's consumer loan portfolio and exclusive options to purchase, among other items, branch facilities and the residential mortgage loan portfolio. Washington Mutual paid a purchase premium of $2.3 million and after appropriate accounting adjustments, the anticipated cost of the transaction to the bank is $1.8 million.

"This addition follows our strategy of making in-market acquisitons," said Kerry Killinger, president and chief executive officer of Washington Mutual Savings Bank. "This acquisition adds more than $91.5 million to our deposit base, increases our customer base by more than 14,000 accounts and should add to our profitability."

The RTC had managed Frontier Federal since it went into receivership on Feb. 23. The acquisition was approved by the Office of Thrift Supervision the primary federal regulator of Frontier Federal and Washington Mutual, a Federal Savings Bank.

Two of the former Frontier Federal branches are located in Walla Walla. The others are in Pullman, Kennewick, Richland and Dayton. All will reopen as Washington Mutual financial centers on June 25.

"Both Frontier Federal and Washington Mutual have been a vital part of the economy of eastern Washington for many years," Killinger said. "This acquisition reaffirms Washington Mutual's commitment to serving the people who live in these communities."

Washington Mutual Savings Bank and its subsidiary Washington Mutual, a Federal Savings Bank operate 67 financial centers in Washington and an additional 17 home loan centers in the Pacific Northwest.

With assets of approximately $7.0 billion, Washington Mutual is the largest independent financial institution in Washington.

CONTACT: Scott F. Selby of Washington Mutual, 206-461-3186.

DALLAS (JUNE 21) UPI - The Dallas Mavericks Thursday night traded a pair of first-round draft picks to the Denver Nuggets in exchange for All-Star guard Lafayette ''Fat'' Lever.

The Mavericks sent a first-round pick, the ninth overall, in this year's NBA draft as well as the Detroit Pistons' first-round choice in 1991 to the Nuggets in exchange for Lever, who has led the league's guards in rebounding for the past four seasons.

Lever, 29, averaged 18.3 points and 9.3 rebounds per game last season to lead the Nuggets in both categories. He was named to the Western Conference All-Star team for the second time.

The 6-foot-3 Lever has averaged 14.9 points and 6.4 rebounds per game in eight seasons.

The Mavericks hold the 14th and 18th first-round draft selections this year in addition to the ninth pick, which they aquired from the Washington Bullets in a 1986 trade for Jay Vincent.

Dallas acquired the Pistons' top choice along with Adrian Dantley in exchange for Mark Aquirre in February 1989.

''We're pleased to add another quality guard to support Rolando Blackman and Derek Harper,'' Mavericks Chief Operating Officer and General Manager Norm Sonju said.

''Back when the trade was made with Washington to acquire the pick which gave us the ninth pick in this year's draft, we said that pick was an asset to be used to improve our team,'' Sonju said. ''The same could be said for the acquisition of Detroit's pick.

''We believe strongly that the addition of Lafayette Lever meets our objective.''

The Portland Trail Blazers selected Lever as the 11th overall pick in the 1982 draft. He was traded to Denver in 1984 along with Wayne Cooper, Calvin Natt and two draft choices in exchange for Kiki Vandeweghe.

In addition to leading the Nuggets in scoring and rebounding last season, Lever led Denver in assists (6.5 per game), steals (2.12 per game) and three-point field goal percentage (.414) while averaging 35.8 minutes per game.

''Most opponents and coaches will tell you that Fat Lever is one of the fiercest competitors in the NBA,'' said Mavericks Coach Richie Adubato. ''Because of the versatility of Lever, (Rolando) Blackman and (Derek) Harper, and the experience of Brad Davis, we will have an opportunity to rotate guards and get the maximum production out of all four and be able to match up against any situation.''

WASHINGTON (JUNE 21) UPI - The Senate Agriculture Committee broke a month-long impasse over crop subsidies Thursday and approved a farm bill that would create a soybean marketing loan and give farmers some additional freedom in deciding which crops to grow.

Members approved the bill on a 15-4 vote in a 15-minute meeting called during a late-night Senate session. The final terms of their compromise - settling the thorny issue of crop loan rates - were worked out half an hour before the vote. Leaders met throughout the day in trying to clinch the deal.

The bill now goes to the Senate floor for debate, possibly the week after the Independence Day recess. The House Agriculture Committee approved its version of the new five-year farm bill eight days ago. It also was expected on the floor in early July.

Both bills call for a freeze in target prices and for the administration to come up with a new way to control dairy surpluses, create marketing loans for soybeans and propose a limited form of ''planting flexibility.''

The House bill would spend nearly $55 billion over five years on crop

support programs. The Senate bill would spend about as much. Both bills are several billion dollars above the spending level suggested by the White House.

''Essentially, we have a continuation of the farm programs we've had for the past five years,'' Sen. Richard Lugar, R-Ind., said of the Senate package.

Since mid-May, Lugar was the most vocal opponent to a proposal by Midwestern Democrats on the committee to raise crop target prices - a key factor in calculating subsidy payments - and loan rates. Republicans and the senior Democrats on the committee joined forces to pass the compromise package.

''We tinkered around the edges. We didn't have the votes,'' said Sen. Tom Daschle, D-S.D., who wanted higher farm program spending as a way to protect farm income.

The committee decisively defeated the idea of higher target prices during a rancor-filled meeting Wednesday.

The issue of loan rates was settled by adopting a plan under which the Agriculture Department would choose one of two options. One would be a marketing loan for wheat and feed grains. The other would be to keep the current formula for calculating loan rates. Whenever the department used its authority to unilaterally reduce the rate, it would have to offer a marketing loan and it would have to increase the size of advance subsidy payments.

Proponents said the new provisions would stop the administration from making excessive reductions in loan rates. The administration says it needs the power to reduce rates in order to prevent loan rates from becoming so high farmers are unwilling to market their grain and instead forfeit it to the government.

Assistant Agriculture Secretary Bruce Gardner called the additional provisions ''a needless complication'' and said there were ''a lot of problems'' with the Senate bill.

Committee Chairman Patrick Leahy, D-Vt., said neither side got all it wanted but the final result would have wide support and would meet spending guidelines.

''The budget process has driven a lot of these negotiations,'' Leahy said.

Planting flexibility and the soybean marketing loan were the major changes in policy contained in the Senate bill.

Under flexibility, farmers would be able to shift their mixture of crops on up to 25 percent of their land without losing eligibility for crop subsidies. Critics complain rigid rules now lock farmers into growing the same crop year after year.

Crop loans would be available for crops grown on ''flex'' acres. No subsidy payments would be made, a step intended to make the market price a determining factor in which crop is selected.

Agriculture Secretary Clayton Yeutter suggested a full-fledged version of flexibility covering all of a farmer's wheat, feed grains, cotton, rice and oilseed land.

The soybean marketing loan was touted as a way to encourage farmers to grow more soybeans. U.S. acreage has slumped by 10 million acres in the past decade despite burgeoning world demand for oilseeds. Senators proposed a marketing loan of $5.50 a bushel, about $1 higher than the loan currently available but lower than what the American Soybean Association suggested.

Under the marketing loan, a farmer with a government loan can sell the crop at the usually lower world price and pocket the difference between the loan rate and the selling price.

Gardner said the soybean marketing loan could cost $700 million a year, despite congressional estimates of no cost to the government.

HOUSTON (JUNE 22) UPI - Arizona State outfielder Mike Kelly was named the R.E. ''Bob'' Smith Baseball Player of the Year Thursday by the National Collegiate Baseball Writers Association.

Kelly beat out University of Miami pitcher Oscar Munoz and New Mexico State third baseman Joe Williams for the award, which is voted on by writers and sponsored by the Greater Houston Sports Association.

Kelly, a 6-foot-4 sophomore from Los Alamitos, Calif., already has collected 1990 player of the year honors from ''Collegiate Baseball,'' ''Baseball America,'' and ''The Sporting News.''

He is only the second player in the Southern Division of the Pac-10 to hit 20 home runs and steal 20 bases in a single season, and the only divison player to record at least 20 homers, 20 stolen bases, 80 runs scored and 80 RBI in a single season.

Kelly batted .376 this season with 21 home runs, 82 RBI, 20 stolen bases,

83 runs, 97 hits, 54 walks, a .506 on-base percentage and .732 slugging percentage.

The award, named for the late founder of the Houston Astros, is presented on the basis of a player's baseball talent, as well as his leadership abilities, character and scholastic achievement.

Pitcher Ben McDonald of Louisiana State University was last year's recipient.

(JUNE 22) UPI - The casualty toll from Thursday's earthquake in northern Iran has more than doubled... with officials now reporting 25-thousand dead. They also say 100-thousand people were injured and another 100-thousand left homeless by the strongest quake ever recorded in the quake-prone region. Iran's president called an emergency session of his Cabinet members to deal with the catastrophe.

Nelson Mandela says there has been NO miraculous change of heart in South Africa resulting in the changes currently taking place in his homeland. Mandela told a crowd gathered at New York's Riverside Church Thursday that the reforms are being caused by world-wide pressure such as economic sanctions which must continue. Mandela received a joyful welcome Harlem Thursday night and attended a rally in Yankee Stadium.

The proposed constitutional amendment to protect Old Glory from flag burners failed its House test Thursday. The amendment did NOT win enough support, falling 34 votes shy of the two-thirds majority needed for passage. Shortly after that, the House voted 236-179 to reject of a bill designed to protect the flag under certain circumstances.

A bipartisan budget summit has recessed until next week amid fears of a stalemate. Congressional Democrats Thursday rejected President Bush's 51-BILLION-dollar deficit reduction plan... saying it wasN'T a good start to the talks. A Republican negotiator says he's NOT sure who would offer the next proposal or where the talks will go now.

(JUNE 22) UPI - P-L-O leaders are accusing the United States of abandoning peace efforts in the Middle East. The group's Executive Committee made the charges Thursday in response to the U-S suspension of diplomatic contact with the P-L-O. Egypt and Jordan expressed regret at Wednesday's decision and urged Washington to retore its dialogue with the Palestinians as soon as possible.

Hundreds of mourners are expected to attend a memorial service Friday afternoon in Jacksonville, Florida, for the eight people killed earlier this week in a shooting rampage by a lone gunman at an auto loan office. Funerals for six of the victims were held Thursday. Jacksonville Mayor Tommy Hazouri calls the massacre ''one of the darkest chapters in the city's history.''

-30- 916
#90173u0217 06/22/1990 ~United Press International
BILWASKARMA, NICARAGUA (JUNE 22) UPI - Miskito Indian rebels formally ended their nine-year war against the Sandinista army this week, but complained they are getting a poor deal compared to other Nicaraguan rebels.

''Simply because we are peasants doesn't mean we can be treated any worse than the Contras,'' said Manuel Cunningham, alias ''Tiger 17,'' one of the military leaders of the ragtag group of 2,000 rebels.

The Miskitos, like the better-known Contra rebels, have been supplied with U.S. military and humanitarian aid. They often fought alongside the Contras and are often referred to as Contras.

''We know the war ended Feb. 25,'' said rebel leader Osorno Coliman, alias ''Commander Blas,'' at a ceremony Wednesday in which the remaining 200 Miskito rebels handed in their weapons to U.N. peacekeeping forces.

Coliman was referring to President Violeta Chamorro's election victory over Daniel Ortega, who was Sandinista president.

Cunningham said the disarmament was ''a big sacrifice. We have been fighting for a long time. Some have grown to love the war.''

The 25 or so wooden huts of Bilwaskarma, 250 miles north of Managua along Nicaragua's Caribbean coast, are built on stilts to protect against flooding during the May-to-October rainy season.

Cunningham and others complained that Chamorro's government, the United

Nations and the United States are failing to provide promised food and clothing and have given the Miskitos little compensation for a return to civilian life.

The government has set up three resettlement zones for Miskitos, with building supplies, medical assistance and six months' food supply.

Contras of the Northern Front, the main rebel group said to number 15,000, have been promised the lion's share of the $47 million in resettlement aid.

Some $15 million was set aside specifically to aid U.N. and Organization of American States forces in monitoring the disarmament, and to provide for the Contras and the Miskitos during the demobilization process.

Most of the rest is expected to go to Northern Front rebels, most of whom have already disarmed.

The Miskito rebels say they had been fighting the Sandinista army since 1981, after 11 Sandinista troops walked into a church in the village of Prinzapolka and sparked a shooting that left four soldiers and four Miskitos dead.

There are an estimated 150,000 Miskitos living along the Caribbean coast, where for years - under dictator Anastasio Somoza and during 10 years of Sandinista rule - they struggled to maintain their autonomy, their centuries-old customs and their language.

-30- 2836

#90173u0228 06/22/1990 ~United Press International

OAXTEPEC, MEXICO (JUNE 22) UPI - El Salvador's leftist rebels and government representatives broke off direct talks after a three-day stalemate over the armed forces, and opted to negotiate through a U.N. envoy.

Salvadoran Justice Minister Oscar Santamaria, who leads the government delegation, said both sides agreed Wednesday to end direct talks ''because we have not reached any agreement over the armed forces'' in the Central American nation torn by 10 years of civil war.

Rebels of the Farabundo Marti National Liberation Front, or FMLN, are demanding army reform and reductions, and the prosecution of those responsible for assassinations, including the Nov. 16 slayings of six Jesuit priests and the 1980 killing of Archbishop Oscar Arnulfo Romero.

''As a government, we see the FMLN position about prosecuting army members involved in human rights violations as very difficult since we think that (the rebels) could be prosecuted according to law,'' Santamaria said.

Indirect negotiations between the rebels and the government will continue. U.N. envoy Alvaro de Soto will meet separately with each negotiating team and deliver messages between the two camps.

De Soto, the personal representative of U.N. Secretary-General Javier Perez de Cuellar to the talks in Oaxtepec, 50 miles south of Mexico City, said, ''It is difficult, but possible, to think about peace in El Salvador before 1991.''

At preliminary talks last month in Caracas, Venezuela, the two sides set a tentative six-month deadline for reaching a cease-fire agreement.

Rebel delegation leader Shafik Handal said after direct talks were broken off that there remains ''profound differences with respect to demilitarization of Salvadoran society and punishment of military personnel involved in human rights violations.''

Handal said there have been many crimes committed by the military in El Salvador that have gone unpunished, ''and that impunity prevails to this day.''

But both delegations agree on the need for reductions in the armed forces.

Spokesmen for both sides say one of the objectives of the talks was to reach an accord so that rebels, once reintegrated into society, can participate in peaceful mayoral and congressional elections, tentatively set for March.

The government of President Alfredo Cristiani is under considerable pressure to find a solution to the civil war, which has reached a stalemate with neither side capable of defeating the other militarily.

The rebels have warned that they will launch another major offensive in El Salvador if the talks fail to bring results.

Observers said the government delegation also is under pressure to reach an accord because of Secretary of State James Baker's proposal to condition money from a group of industrialized nations, which will oversee development and aid for Central America's staggering economies, on democracy and peace in each of the region's countries.

(JUNE 22) UPI - Nelson Mandela filled New York's Yankee Stadium Thursday night as thousands of people paid between five and 50 dollars to attend a rally benefiting the African National Congress. Mandela received a tumultuous reception at the gathering, which was a joyous celebration with entertainment ranging from traditional African drumming to rap.

Mandela donned a Yankees jacket and cap and proclaimed to the crowd of 55-thousand- ''I am a Yankee.'' The South African freedom fighter also told spectators at the rally that the world canNOT afford to lower its guard until apartheid is ended.

The death toll from Thursday's earthquake in northern Iran now rivals that of the nation's worst quake in 1978. Officials now say 25-thousand people were killed and 100-thousand injured. Another 100-thousand are homeless. Television footage in Tehran showed a desolate flattened landscape with a few dazed children wandering among huge boulders.

Two more steps toward German unification Thursday. The Parliaments of East and West German parliaments approved measures writing off territory lost to Poland after the defeat of Nazi Germany at the end of World War Two. The Germanys also O-K'd the economic merger of their two countries. The moves came on the eve of a six-nation conference on German unification.

(JUNE 22) UPI - Kansas City Manager John Wathan expected an all too familiar performance from his team Thursday night but received a pleasant surprise instead.

The Royals, in last place in the American League Western Division, managed only four runs over their last two games and opened their 14-4 thrashing of Minnesota in similar fashion.

''When we only came out and scored one run in the first, I thought, 'Oh no here we go again,''' Wathan said. ''But the key in the game was when the Twins scored three times in the third to narrow our lead to 5-3, and we came right back to score two the next inning. It's nice to have a game like this every once in a while.''

Infielder Kevin Seitzer contributed five of the Royals' 20 hits and built his hitting streak to 11-for-17.

''I just want to go up there and keep swinging,'' Seitzer said. ''(The five-for-six hits) happened tonight. Tomorrow we've got to worry about tomorrow. We had a good game, we won it, but now we have to go out and get them again.''

Kansas City has been getting them a lot lately, winning six of their last eight after losing eight straight earlier.

Leading 7-4, the Royals turned it into a rout in the seventh, scoring seven runs on a three-run homer by Bo Jackson, a three-run hit by Steve Jeltz and Seitzer's second RBI double.

''We were in it until the seventh inning and then they knocked us around '' said Twins manager Tom Kelly. ''We didn't pitch very well. They got, what was it, 20 hits and 14 runs? We just couldn't hold them down.''

Tom Gordon, 4-4, gave up six hits in 5 2-3 innings for the win, allowing four runs, five walks and striking out six. Andy McGaffigan earned his first American League save, pitching 3 1-3 innings of scoreless relief.

''I was glad to see that seven-run seventh,'' said McGaffigan. ''I haven't pitched much in this league. In my situation, it was very reassuring to see that.''

Mark Guthrie, 2-2, the first of seven Twins pitchers, allowed two runs and five hits in 1 1-3 innings to take the loss. He was optioned to Class AAA Portland after the game. The Twins also demoted reliever Gary Wayne, who gave up five runs and four hits in two-thirds of an inning, including Jackson's three-run homer.

In other AL action, New York nipped Toronto 7-6, Cleveland edged Baltimore 4-3, and California defeated Detroit 6-4.

In the National League it was Atlanta 4, Cincinnati 3.

-- AROUND THE AL --

Yankees 7, Blue Jays 6

At Toronto, pinch hitter Matt Nokes belted a three-run homer in the eighth inning powering New York. Alan Mills, 1-2, worked two innings, allowing one run, two hits and striking out three. Dave Righetti pitched the final two innings for his 14th save. Reliever Jim Acker dropped to 1-2.

Indians 4, Orioles 3, 10 innings

At Cleveland, Tom Brookens delivered a bases-loaded single off third baseman Tim Hulett's glove in the bottom of the tenth inning to score Mitch Webster and lift Cleveland. Doug Jones, 3-2, pitched 1 1-3 innings to earn the win. Holton, 2-3, the fourth Baltimore pitcher, took the loss.

Angels 6, Tigers 4

At Anaheim, Calif. Dave Winfield and Jack Howell each stroked two-run homers and Bert Blyleven scattered five hits over seven innings to pace California. Blyleven, 7-4, notched his sixth win in his last seven decisions, striking out one and walking one. Bryan Harvey got the final out for his 10th save. Jack Morris, 6-8, gave up six runs and seven hits in his 2 1-3 innings.

#90173u0391 06/22/1990 ~United Press International
NEW YORK (JUNE 22) UPI - Nelson Mandela took his campaign against South African apartheid to the heart of Harlem and drew a thunderous ovation from a crowd of thousands with the ringing cry, ''Death to racism!''

Well over 100,000 people flooded the area around the Adam Clayton Powell Jr. state office building - named after the powerful congressman who represented Harlem through the 1950s and '60s - Thursday evening to hear the civil rights leader who has inspired many Americans in the quest for racial equality.

A host of black leaders, ranging from community activists to Mayor David Dinkins to Betty Shabazz, the widow of Malcolm X, turned out for the Harlem rally, expected to be the largest of Mandela's events in New York.

But they were overshadowed by Mandela, who when he strode to the lecturn touched off a roar from a crowd that seemed to spread for miles.

''My only regret is that I am unable to embrace each and every one of you '' the 71-year-old Mandela told the crowd that cheered and burst into tears at the sight of the deputy president of the African National Congress.

Mandela, who ended his speech with the cry, ''Death to Racism,'' was led off the stage to an explosion of applause - a reception the anti-apartheid leader has met with throughout his visit to New York.

He was scheduled to wrap up his three-day visit to the Big Apple Friday with an address before the United Nations General Assembly and a late night fete at a chic lower Manhattan nightclub.

''Just seeing him is the best part, seeing him and knowing he is well,'' said Charles Matthews, 67, a Harlem community activist. ''To know that we

have a black man in the world who the world has stopped to see and talk to. He is us and we are his.''

Mandela, who has been greeted enthusiastically since landing in New York Wednesday morning, obviously moved by the crowd's response, waved and thrust his fist into the air.

''While my comrades and I were in prison, we followed closely your own struggle against the injustices of racial discrimination and economic inequality,'' said Mandela, released Feb. 11 after more than 27 years in prison for his anti-apartheid activities.

''We were and are aware of the resistance of the people of Harlem and continue to be inspired by your indomitable spirit,'' he said. ''To our people, Harlem symbolizes strength and beauty in resistance.''

About the same time Mandela spoke, the top of the Empire State building 90 blocks to the south was lit up with the ANC colors - gold, green and black.

After the Harlem event, Mandela headed to Yankee Stadium for another mass rally and a concert that featured a wide variety of music, ranging from traditional African drumming to rap to folk to salsa to calypso to steel orchestras.

Mandela praised the cheering crowd of about 55,000 in the sold-out stadium for their solidarity in the fight against apartheid but repeated his assertions that the struggle is not yet over. ''Until apartheid is ended, neither ourselves nor the international community can afford to lower our guard. We must maintain the pressure against apartheid,'' he said.

Proceeds from the sale of tickets, which ranged from $5 to $50, were to go to the ANC.

After Mandela spoke, he donned a Yankees cap and jacket, turned to the microphone and proclaimed, ''I am a Yankee!''

Earlier Thursday, Mandela made a regal entrance at Riverside Church, a longtime center for anti-apartheid work, praising religious leaders for their solidarity in the fight against apartheid.

But the South African leader, in some of the strongest language of his visit so far, also chastized those who would suggest that sanctions against South Africa be lifted because of recent reforms. ''The structures of apartheid are crumbling. The old order is crumbling,'' he said. ''But the age of freedom has not yet dawned.

''To lift sanctions now before we have seen profound and irreversible change in apartheid would be a serious political error,'' Mandela said.

In Washington, White House press secretary Marlin Fitzwater sought to clarify mixed signals coming from the administration on the future of sanctions.

President Bush said Wednesday he would like to ''find a way to show our appreciation'' for steps taken by South African President Frederik de Klerk. But Fitzwater said Thursday that would not involve any change in the sanctions because Pretoria has yet to meet U.S legal requirements for a relaxation or repeal of the law.

Mandela was scheduled to head to Boston on Saturday and Washington on Sunday to keep up the pressure to maintain sanctions during a meeting with President Bush and an address before Congress.

In all, Mandela is to visit eight U.S. cities from June 20 to July 1, raising funds and raising consciousness for the ANC.

#90173u0404 06/22/1990 ~United Press International

SAN FRANCISCO (JUNE 22) UPI - Early treatment of people infected with the AIDS virus may slow the progression of the fatal disease, but scientists expressed concerns about the development of drug-resistant AIDS strains.

Margaret Fischl of the University of Miami Medical School presented test results Thursday at the 6th International AIDS Conference that treating people infected with HIV - the AIDS-producing human immunodeficiency virus - before AIDS develops appears to slow the onset of the disease.

''We have to come to the conclusion, based on the armamentarium of drugs we currently have ... that the greatest advantage in treatment of HIV infection has to occur with early intervention,'' Fischl said.

She said administering the drug zidovudine, or AZT, to HIV-infected people with slightly depressed immune systems but without evidence of AIDS symptoms can slow the progression of acquired immune deficiency syndrome.

Scientists estimate a decade or more may pass for someone infected with HIV to develop the fatal disease.

A study of about 300 HIV-infected patients without AIDS symptoms, but with low levels of key immune cells called T-4 helper cells, determined that patients treated early with AZT developed AIDS more slowly than similar patients whose AZT treatment began a year later, she said.

Fischl said AZT treatment benefits appear to last longer among patients receiving early treatment. AZT currently is the only government-approved

drug to directly fight the AIDS virus.

AIDS researchers said a major concern is the risk that patients receiving AZT and other experimental AIDS drugs may develop drug-resistant strains of the AIDS virus.

''Many of you may see resistance as something depressing, but it is something we must not ignore,'' said Brendan Larder, a scientist with Burroughs-Wellcome Co., the maker of AZT.

Larder, who previously reported that AZT-resistant strains show up in AIDS patients after about six months of treatment, said new findings show the resistance problem may be lessened with earlier treatment of the disease.

A Holland study of 18 HIV-infected people determined that patients who were treated with AZT before the onset of AIDS symptoms did not develop the resistant viral strains until they received two years of treatment. Those strains, he said, were only partially resistant to the AIDS drug.

Larder said it has not been determined what effect the drug-resistant strains have on a patient's condition or if the resistant strains can be passed on to other people.

On the positive side, Larder said an AZT-resistant HIV taken from AIDS patients apparently is not resistant to other AIDS drugs such as dideoxyniosine or DDI.

''It is likely combination therapy will prevent clinically resistant strains of HIV from emerging,'' Larder said.

Researchers also presented findings that a combination of AZT with DDC or dideoxycytidine can treat the AIDS symptons while effectively reducing the toxic side effects of each of the drugs.

''This is the first major trial to test combinations of anti-HIV drugs in an alternating manner,'' said Dr. Thomas Merigan of Stanford University, a co-author of the study.

Researchers gave 131 people with AIDS or a related condition known as AIDS-related complex four different regimens that alternated AZT with either a high or low dose of DDC, which is made by Hoffman-La Roche of Nutley, N.J. In some groups, the drugs were alternated every week, in others every month.

Preliminary findings show eight patients had to halt treatment due to DDC-related side effects like pain in the feet and hands and two stopped due to AZT-linked side effects like bone-marrow suppression. Researchers said that additional patients could have been expected to develop serious

side effects if either drug had been used alone.

Merigan said the best treatment strategy appears to be alternating the two drugs on a monthly basis using high doses of DDC.

Although early treatments and drug combinations may help, one study warned there will be little impact unless the drugs are made widely available to HIV-infected people.

Dr. Luc Montagnier, one of the discoverers of the AIDS virus reported at the conference that an unusual microbe may spur AIDS progression and antibiotics attacking the microbe appear to help some patients.

NEW YORK (JUNE 22) UPI - Harlem welcomed South African anti-apartheid hero Nelson Mandela to the heart of black America with raised fists and roaring chants of ''Amandla!'' - the Zulu word for power.

But the mood of the overwhelmingly black crowd of more than 100,000 seemed more joyous than ominous Thursday night, despite some angry rhetoric that preceded the arrival of the silver-haired revolutionary.

''One Bullet, One Settler,'' read a sign held aloft by a young black woman. ''Afrika must be free.''

Obviously moved by the cheering Harlem crowd, a highlight in the three-day love fest the Big Apple has staged for him, Mandela thrust his right fist

skyward and spoke eloquently of solidarity with black America's own struggle for racial justice.

During his 27 years in prison, he said, he ''followed closely your own struggle against the injustices of racial discrimination and economic inequality.

As he spoke, many leaned from windows of the Hotel Theresa, where Cuban leader Fidel Castro stayed during his historic New York visit soon after his communist regime came to power.

Uniformed police snipers were staked out atop buildings lining Martin Luther King Boulevard, which most Harlemites persist in calling 125th Street.

The marquee of the Apollo Theater, where many of the black superstars got their start, welcomed Mandela and his wife, Winnie, with the words ''We Love You.''

Adults hoisted toddlers to their shoulders when Mandela's motorcade drove into view in central Harlem, but a relatively few in the crowd were able to get a clear view of the 71-year-old freedom fighter. Many were held behind police lines and never got a glimpse of him.

Henry Hillenbrand, one of the few whites in the crowd, came from Philadelphia to distribute The Militant, the newspaper of the Socialist Workers Party.

''No doubt about it, Mandela's a revolutionary,'' said Hillenbrand, a Conrail train engineer who was wearing his union cap. ''Just read his speeches.''

''He came home,'' said Jeannie Bennett, a Harlem activist, as people danced in the streets following Mandela's speech. ''We needed this.''

Introduced by Rep. Charles Rangel, D-N.Y., as ''a man whose soul sings out for freedom,'' Mandela spoke briefly before leaving for a second rally at Yankee Stadium where he received another tumultuous welcome.

At the Harlem rally, money was passed to the podium in waves to aid the cause of the African National Congress, the militant organization that Mandela serves as de facto leader.

''The people were literally passing money to strangers and nobody was stealing,'' said an amazed Condon Jones, 21, who came from Queens to the rally in Harlem's usually mean streets.

#90173u0414 06/22/1990 ~United Press International
JOHANNESBURG, South Africa (JUNE 22) UPI - Authorities tightened security around President Frederik de Klerk and his Cabinet Friday and police detained 11 right-wing activists after a report detailed a plot to assassinate de Klerk and black leader Nelson Mandela as part of an elaborate coup.

The liberal Afrikaans weekly Vrye Weekblad reported Friday a former Nazi in the white-separatist Afrikaner Resistance Movement, or AWB, was leading a plan to shoot Mandela at the airport July 18 when he returned from his 45-day, 14-nation tour and at some time kill the reformist de Klerk as a prelude to a right-wing takeover.

The weekly said the AWB intended to take unspecified action against several unnamed Members of Parliament, destroy major power stations and dams, blow up the giant Soccer City stadium in Johannesburg's Soweto township, and revive an old project to poison Soweto's drinking water, which could kill 1 million blacks.

Cabinet ministers also were named as targets: Foreign Minister Roelof ''Pik'' Botha, Law and Order Minister Adriaan Vlok, and Defense Minister Magnus Malan.

Security around de Klerk and his Cabinet was immediately boosted, a Law and Order Ministry spokesman said, noting, ''We are taking this seriously. These are very serious allegations.''

The newspaper, basing its reports on information from a retired security policeman who infiltrated the AWB ''several weeks ago'' because he feared for national security, said the movement had hired sharpshooters and a chief assassin, who intended to use a weapon supplied by a renegade member of a secret military unit.

Police and court officials said Friday that based on a sworn affidavit by the infiltrator handed to them by Vrye Weekblad, 11 people were detained, six of whom were released before dawn.

''The others may be released today ... the details will then go to the attorney general for a decision on prosecution,'' police spokesman Lt. Nina Barkhuizen said.

One of the 11 detained was T.J. Ferreira, a former parliamentary candidate for the far-right opposition Conservative Party and a town councillor in Boksburg - an ultra-conservative satellite of Johannesburg - his family confirmed, but Barkhuizen would not reveal any names.

Vrye Weekblad, in 1989 responsible for breaking the first reports alleging

security forces ''death squads,'' identified the assassin-group ringleader as one-time SS Capt. Heinrich Beissner, 77, a self-confessed hater of Jews blacks and Afrikaners who shun the right.

Beissner, who allegedly told Smit he had always wanted to kill a million blacks in Soweto, is the leader of an AWB branch east of Johannesburg and reports directly to the movement's leader, Eugene Terreblanche.

The assassination plot was apparently sparked by the racial reforms launched by De Klerk in February, which included releasing Mandela from prison after 27 years, legalizing black opposition, allowing public protest, and promising to scrap discriminatory laws.

#90173u0415 06/22/1990 ~United Press International

SHADYSIDE, Ohio (JUNE 22) UPI - Search crews found a 23rd flood victim in a river lock about 30 miles downstream from Shadyside a week after a giant wall of water devastated the southeast Ohio town, authorities said.

The unidentified body was discovered Thursday evening at the Hannibal lock on the Ohio River, 30 miles downstream from the mouth of the Weegee Creek, Belmont County coroner investigator Charles Vogt said late Thursday.

The discovery increased the number of confirmed deaths in the disaster to 23. Earlier Thursday Vogt investigated the list of those unaccounted for, and set the number of missing people at seven.

Vogt said he would try to identify the body Friday morning.

The latest victim was discovered by a Marietta, Ohio, firm, contracted by the Army Corp. of Engineers, to sift through debris at the nearby lock, Vogt said.

Homes along the Wegee and Pipe creeks were destroyed by a gigantic wall of water that roared down the tiny tributaries, tearing up tree trunks, smashing cars like toys and stripping buildings from their foundations.

Entire families perished in the flash flood that dumped over 5 1/2 inches of water over the area in less than three hours.

One woman went outside to untie a dog, and turned to see her house - with her two children inside - swept away.

Thomas Humphrey's sons, David, 10, and Danny, 8, and his ex-wife Sue, were all killed by the raging flood waters.

The 22nd body was identified as Stephen Gatten, 9, the brother of Timothy,

6, also swept away in the storm. Their mother, Mary Alice, is on the list of the missing.

In the aftermath of what has been called Ohio's worst weather disaster, several weather experts questioned why forecasters did not issue a flood warning and whether the loss of lives could have been prevented.

Jeffrey Rogers, an Ohio State University professor of geography, told the Cleveland Plain Dealer, ''The more you look at the data, the more you wonder why they didn't issue a warning.''

''Given what I can see on the radar charts, it's not surprising the area got 5 1/2 inches of rain in a few hours,'' Rogers said. ''You can see these were severe storms in the National Weather Service's own data.''

But weather experts from the University of Virginia and Pennsylvania State University supported NWS forecasts.

The weather service posted a flood watch at 7:41 p.m. from its Akron-Canton station. A flood watch means that heavy rains may cause flash flooding and serves as a weather alert.

A flood warning tells the people to flee the area. This was not issued.

Some critics have said the failure to issue a flood warning was surprising because the Belmont County valleys are known to be flood-prone.

A 1976 weather service flood bulletin said the region, which includes southeastern Ohio, ''is the most flood-prone area in the country.''

Rogers said his analysis of the June 15 radar summaries show ''the highest intensity radar echo sat on the same spot for almost three hours.''

However, a Virginia state climatologist, Patrick Michaels at the University of Virginia, said the presence of intense radar echoes was not unusual in Appalachia during June.

Marvin Miller, chief meteorologist at the Cleveland weather station, said indicators did not warrant issuing a flood warning.

Lee Grenci, a meteorologist on the faculty of Penn State, said he went on the Pennsylvania public broadcasting system's TV network at 5:30 p.m. that evening and warned of possible flooding in the Ohio Valley.

J. Michael Fritsch, a thunderstorm expert at Penn State, said in his view, the radar data ''was not all that impressive'' in showing the danger of flooding.

Even if a flood warning had been issued, Shadyside area residents might not have left their homes during the late evening hours.

Becky Glaser, a volunteer at the makeshift disaster center in the Jefferson Elementery School, said her family barely escaped with their lives. She said advance warning probably would not have changed anything.

''It had gotten so we would hear the flood warnings and not pay any attention to them, anymore,'' Glaser said. ''It was like they were crying wolf.''

#90173u0423 06/22/1990 ~United Press International

MANILA, Philippines (JUNE 22) UPI - President Corazon Aquino said Friday that former Philippine first lady Imelda Marcos will be tried ''at the proper time'' in the Philippines for crimes she allegedly commited in the country.

Aquino was asked by palace reporters about news reports that U.S. district Judge John Keenan had expressed reservations about the propriety of holding the Marcos racketeering trial in New York.

News reports quoted Keenan as saying Aquino ''can enforce her own laws, I don't want to enforce her laws here.''

''Mrs. Marcos is being tried in the United States for offenses against the laws of the United States, allegedly committed in the United States,'' Aquino said in a statement.

''At the proper time, she will be tried in the Philippines for crimes committed in the Philippines, against Philippine laws,'' Aquino said.

Marcos is charged with using some $200 million stolen from the Philippine treasury to buy property in the United States while her husband Ferdinand Marcos was still president of the Philippines.

The former president died in exile in Hawaii Sept. 28.

After a three-month trial, the prosecution rested its case against Imelda Marcos this week. Defense lawyers said they would not call witnesses and jury deliberations were scheduled to begin after closing arguments next week.

A palace official who requested anonymity said Aquino's aides were holding discussions, concerned about the implications if Marcos were aquitted.

Aquino has refused to allow Ferdinand Marcos to be buried in the

Philippines and has opposed the return of Imelda Marcos for security reasons.

Aquino has crushed six coup attempts since she took power in a civilian-backed military revolt that ended two decades of Marcos rule. Defense and military officials have said mutineers were plotting another coup attempt and that the next three months would be critical for Aquino.

#90173u0426 06/22/1990 ~United Press International

LOS ANGELES (JUNE 22) UPI - Officials at UCLA plan to ask the University of California administration for permission to reject all grants from the National Endowment for the Arts this year and extend the boycott to the nine-campus statewide university system, a published report said Friday.

School officials told the Los Angeles Times they want to turn down the grants because of a requirement this year that all NEA grantees sign an anti-obscenity oath before they can receive the funds.

UCLA Chancellor Charles E. Young and administrators of the school's arts galleries, performing arts center and School of Theater, Film and Television have developed, during 10 days of discussions, a background paper to support rejecting the grant money, Andrea Rich, UCLA's vice chancellor for academic administration, told the newspaper.

She said the proposal to reject NEA grants would be presented to the UC administration ''next week or as soon as time allows.''

UCLA has received notice that it was been awarded two NEA grants totaling $40,000 and nine other applications totaling more than $700,000 in NEA grants this year are pending.

Last year, UCLA received 12 NEA grants totaling $803,400.

A phrase added to the 1990 NEA appropriations bill, written by Sen. Jesse Helms, R-N.C., mandates that NEA-funded applications be judged by whether they include ''depictions of sadomasochism, homoeroticism, the sexual exploitation of children or individuals engaged in sex acts.''

A half-dozen NEA grantees, including the Los Angeles-based Bella Lewitzky Dance Company, have announced they will reject the endowments because the anti-obscenity requirement violates artistic and creative freedom.

''We should not accept money from the government with those kinds of freedom of speech and expression constraints on it,'' Rich told the Times. ''As a public institution that stands for academic freedom, it would be just absolutely contrary to everything this institution stands for.''

#90173u0427 06/22/1990 ~United Press International

MANILA, Philippines (JUNE 22) UPI - The Philippines refused asylum Friday to 88 Vietnamese rescued by Canadian vessels, saying it wanted an assurance the boat people would be resettled in Canada in three years, officials said.

Officials said six ailing Vietnamese were airlifted to Manila Friday and hospitalized.

Foreign Secretary Raul Manglapus sent a letter to the Canadian Embassy detailing the Philippine position on the eve of the arrival in Manila of the Canadian supply ship Provider and the destroyer Kootney with the refugees aboard.

''We would like assurances that they would be transferred from the Philippines by Dec. 31, 1992, whether or not they are determined to be refugees,'' Manglapus told Canadian Ambassador Andre Simard in the letter released to reporters.

The Provider and the Kootney rescued 90 Vietnamese June 11 en route to Manila, where the ships were expected to arrive Saturday. Two of the refugees died during the journey, the Philippine military said.

A Philippine official who spoke on the condition of anonymity said Canada was unable to give the guarantee Manila was demanding, resettlement of the Vietnamese in Canada, because only those who qualified as political refugees would be resettled.

Under a comprehensive plan of action formulated by the U.N. High Commisioner for Refugees, boat people found to have left Vietnam for economic reasons would be returned.

A secretary for Simard said the Canadian ambassador was discussing the problem with the Philippine government and declined immediate comment.

Last week, the Philippines for three weeks refused temporary asylum to 255 Vietnamese picked up by U.S. vessels until it was given assurance the United States would resettle the refugees within three years.

First asylum countries in Asia have complained against the ''open-ended'' stay of refugees, saying their presence was straining resources.

#90173u0433 06/22/1990 ~United Press International

TOKYO (JUNE 22) UPI - A U.S. Navy vice admiral and two teams of Navy investigators combed through debris in a storeroom on the aircraft carrier Midway Friday, searching for the cause of a pair of explosions that killed two sailors and injured 16.

Six of the nine most severely burned crew members were airlifted in a mobile burn unit to Brooke Army Medical Center in San Antonio, Texas, said Cmdr. Mark Neuhart, the public affairs officer for the 7th Fleet.

Three others, including one who was too ill to be moved, were in serious condition at the hospital at the Yokosuka Naval Base, the Midway's home port, Neuhart said.

The two dead sailors were identified as Seaman Ulric Patrick Johnson, 20, of Martinez, Calif., who worked in the carrier's mess hall, and Seaman Jeffrey Allan Vierra, 20, of Nevada City, Calif., an engineer.

Vice Admiral Henry H. Mauz, the commander of the 7th Fleet, flew in from Hawaii to conduct a personal inspection of the emergency equipment storeroom where two explosions rocked the 45-year-old Midway while it was on routine maneuvers Wednesday 125 miles off the coast of Japan.

The Midway, which limped back to its home port in Tokyo bay Thursday afternoon, is expected to return to sea shortly, Neuhart said.

Upon its return, Rear Adm. Lyle Bull, commander of the 7th Fleet battle force, said the carrier was safe and seaworthy in all respects.

Residents near the port of Yokosuka had demanded that the Japanese government verify the Midway's safety. The carrier is capable of carrying nuclear weapons, although the military refuses to disclose whether it does.

A Naval Service investigation team and Line of Duty investigation team boarded the Midway to investigate the cause, including the possibility of foul play, Neuhart said.

''There is nothing to indicate that there was foul play,'' Neuhart said, adding such a line of inquiry was routine.

The two teams conducted interviews and inspected the damaged storeroom, Neuhart said.

A steam line next to the storeroom was being examined as a possible source of the blasts, Neuhart said.

The steam line powers the two catapults used to launch aircraft from the ship's deck. At the time of the explosion the steam line next to the storeroom had to be secured and alternate lines used to continue launching

planes, Neuhart said.

''Damage to the steam line is being investigated,'' Neuhart said.

The storeroom itself does not usually contain explosives, Neuhart said.

''They are trying to reconstruct what materials were in the storeroom,'' Neuhart said.

#90173u0442 06/22/1990 ~United Press International

TOKYO (JUNE 22) UPI - If the United States wants to solve trade problems with Japan, it should devote 5 percent of American GNP to education, maverick Japanese politician Shintaro Ishihara said Friday.

Noting that the United States advises Japan to spend about 10 percent of its gross national product on public works, Ishihara told reporters at a news conference that the United States was making absolutely no capital investment in education.

''I am of the view that the vital question for the U.S. is education,'' he said. ''At least 5 percent of American GNP should be spent on education.''

It is estimated the United States now spends between 3.5 percent and 6.8 percent of its GNP on education.

Ishihara admitted he did not know how much the United States spent educating its youth, but said Japan's comparatively low expenditure of about 1.5 percent of its GNP on education was adequate in view of its excellent school system.

Ishihara's education proposal is one of 109 ''friendly recommendations'' he wants his government to negotiate with the United States during next week's final round of trade talks under the so-called Structural Impediments Initiative.

The talks aim to resolve fundamental obstacles to balanced trade between the two countries.

Among the other recommendations Ishihara made were putting a stop to what he called the ''money game'' of leveraged buyouts and mergers and acquisitions, raising the minimum age of credit-card users and limiting home-equity loans.

A senior Foreign Ministry official said that Ishihara's suggestions would not be added to the agenda of the final round of SII talks, scheduled for Monday and Tuesday.

#90173u0444 06/22/1990 ~United Press International
SAN FRANCISCO (JUNE 22) UPI - The following are the highlights of the first full day of the 6th International Conference on AIDS:

-Dr. Luc Montagnier, co-discoverer of the AIDS virus, reported an unusual microbe may act as an important factor spurring AIDS progression, and antibiotics attacking the microbe appear to help some patients. A small, primitive microogranism called a mycoplasma may increase the cell-killing power of the AIDS virus and thereby lead to patients' decline and ultimate death, he said. The work does not contradict past findings that HIV is the cause of AIDS but may help explain why some people get sick quicker than others, he said.

-Margaret Fischl of the University of Miami Medical School presented results supporting earlier work that showed giving the drug AZT to infected people with slightly depressed immune systems but no signs of AIDS can slow their progression to developing the deadly disease.

-A study involving 131 patients showed combining AZT with a drug called dideoxycytidine or DDC appears to can reduce AIDS symptoms while reducing the toxic side effects of each drug, said Dr. Thomas Merigan of Stanford University. Although DDC produced such side effects as feet and hand pains fewer patients than would be expected to drop out from side effects for either drug used alone, he said.

-Assistant Secretary of Health James Mason said 30,000 to 40,000 more people are being infected with the AIDS virus every year in the United States and the federal government is spending $1.6 billion for research for AIDS, second only to that spent on battling cancer. A blood supply screening program has been particularly successful, with only 11 adults being infected with the AIDS virus from tainted blood since testing of donor blood began in 1985, he said.

-The AIDS virus is more easily passed from men to women during sex than from women to men, said Nancy Padian of University of California-San Francisco. A study of about 325 California couples with one infected partner found less than 2 percent of 58 males became infected over a five-year period while about 20 percent of 269 women became infected. The average number of sexual contacts in the couples was 300 to 400 over five years.

-Smokers infected with the AIDS virus appear to develop the deadly disease faster than infected non-smokers, according to researchers at the University of California at Berkeley. Preliminary data gathered during a 56-month, continuing study of 1,000 men infected with the AIDS virus

indicated smokers were nearly twice as likely to develop symptoms, the disease or die.

-A significant proportion of homosexual men may be reverting back to risky sexual behavior, threatening to undo gains made in halting the spread of AIDS. A study of nearly 400 homosexual men in San Francisco found about 20 percent of men who had adopted safe sex practices due to fear of AIDS reverted to more risky sex over four years.

-In Washington, a leading scientific journal reported a government probe apparently has failed to find proof a U.S. researcher stole credit for discovering the AIDS virus from a French scientist. There is no evidence Dr. Robert Gallo of the National Cancer Institute ''stole credit'' for discovering the virus that causes AIDS from French researcher Luc Montagnier of the Pasteur Institute in Paris, Science magazine reported. Gallo in 1984 claimed credit for discovering the AIDS virus. That claim was disputed by Montagnier, who had sent Gallo samples of virus the French scientist was testing.

#90173u0463 06/22/1990 ~United Press International

OMAHA, Neb. (JUNE 22) UPI - A federal judge in Chicago has dismissed a lawsuit filed against Creighton University by Kevin Ross, a Creighton basketball player who dropped out of college so he could learn to read and write.

Judge John Nordberg upheld Creighton's motion to dismiss the case for failure to state a claim upon which relief can be granted, Creighton announced Thursday.

Ross filed a lawsuit alleging educational malpractice, negligent infliction of emotional distress and breach of contract.

Ross, 31, enrolled in Creighton in 1978 to play basketball even though he could not read or write. The 6-foot-9 Ross left Creighton in the spring of 1982 to attend Westside Prepatory School in Chicago. He began at the second-grade level at Westside.

''Education is an intensely collaborative process, requiring the interaction of student with teacher,'' Nordberg said in dismissing the lawsuit on June 14.

''A good student can learn from a poor teacher. A poor student can close his mind to a good teacher. Without effort by a student, he cannot be educated,'' he said. ''In education, the ultimate responsibility for success remains always with the student.''

Ross's attorneys argued that his case was so unique that the court should recognize a new cause of action.

But Nordberg said: ''Ross's inability to plead a cause of action under existing law strongly counsels against creating a new cause of action in his favor.''

Nordberg said to create a new theory of recovery ''would also endanger the admissions prospects of thousands of marginal students as schools scrambled to factor into their admissions calculations whether a potentially 'negligent admission' now could cost unforseeable tort damages later.''

''We at Creighton are glad the books are finally closed on this matter,'' said the Rev. Michael Morrison, Creighton president. ''We sincerely hope that Kevin is now able to move forward with his life.''

#90173u0479 06/22/1990 ~United Press International

(JUNE 22) UPI - Around the world... around the clock... the latest news from U-P-I.

The White House says President Bush is disappointed the House voted against amending the Constitution to ban flag-burning. But Bush is hoping for a favorable vote in the Senate, and then reconsideration by the House. The lower chamber voted 254-177... 34 votes short of the two-thirds needed to start the amendment process.

The Senate has killed a proposal to allow rent vouchers along with building and rehabilitation as options to develop decent and affordable housing. The rent vouchers were a Republican proposal. And G-O-P senators say the rejection of their amendment will doom the first major housing bill in a decade.

Foul weather is delaying rescue and relief operations in mountainous areas of Iran. Thousands of people are believed to be buried in the rubble left by yesterday's earthquake. Iran estimates 25-thousand people were killed and 100-thousand were injured. The United States has offered assistance.

A 23rd flood victim has been found in Ohio. Searchers found a body at an Ohio River lock about 30 miles downstream from Shadyside last night. The discovery increased the number of confirmed deaths to 23. A half-dozen people are still missing from the flash-flood eight days ago.

Authorities at a prison in Tucson, Arizona, say black and Hispanic inmates threw rocks at each other and then the staff last night. Guards opened fire with buckshot and wounded 16 prisoners. Officials say about 100

inmates at the Tucson Prison Complex were involved in the fighting.

#90173u0482 06/22/1990 ~United Press International

(JUNE 22) UPI - A 14-mile-long asbestos spill has occurred in Ontario, Oregon. Crews are trying to vacuum up the spill, which came from a truck hauling asbestos from a school to a landfill. Officials don't think there's much health risk. Asbestos fibers breathed into the lungs can cause cancer.

California state senators have voted to create a 150-Million-dollar superfund of oil company money to clean up spills. The California House previously approved a similar measure. The two chambers will have to work out a compromise on the details.

The Environmental Protection Agency is tightening up on supervision of polluter-financed superfund clean-ups. The E-P-A says federal or state officials will conduct all health risk studies at toxic waste dumps because polluters tend to minimize the threats.

The legislature in the Canadian province of Newfoundland is set to vote today on a constitutional amendment that would keep Quebec part of Canada. Prime Minister Mulroney made an impassioned plea to the Newfoundland legislators yesterday... saying all of Canada will suffer if Quebec secedes.

Researchers say they have discovered a new ill-effect from cockroaches. A team of government scientists says roaches can aggravate allergies. The U-S Agriculture Department says people simply cannot continue to view cockroaches as just a nasty nuisance.

-30- 1526

#90173u0489 06/22/1990 ~United Press International

TEHRAN, Iran (JUNE 22) UPI - Thursday's staggering earthquake that struck northwestern Iran killed more than 32,000 people, injured at least 100,000 and left another 100,000 without a place to live, reports indicated Friday.

And despite a 10-year-old foreign policy that has left Iran largely isolated, international relief agencies and several countries, including the United States, offered assistance and some Red Cross teams were reportedly on their way to the stricken country.

Iran's mission to the United Nations issued a statement late Thursday, ''In the name of the Almighty,'' pleading for medicine and medical supplies, tents, food, blankets and sleeping bags.

Reports reaching the capital Friday said the quake that rocked Iran at 12:31 a.m. Thursday left scores of villages in ruin on the slopes of the Alborz Mountains between the Caspian Sea and Zanjan, some 175 miles northwest of Tehran.

Rescue work continued through the night but thousands were believed still buried under the rubble in areas difficult to reach.

In a mid-afternoon broadcast Friday, Tehran radio said 32,260 people were killed and thousands were homeless. Iran's U.N. mission said 100,000 were injured.

The U.S. Geological Survey in Menlo Park, Calif., measured the temblor at 7.7 on the Richter scale, one of the strongest ever recorded in the quake-prone area. An Iranian reading measured the quake at 7.3.

It was the worst quake to hit Iran since Sept. 16, 1978, when about 25,000 people died.

Television footage from the mountainous region showed hillsides strewn with the rubble of devastated villages. Some of the rubble appeared to have rolled hundreds of feet down the slopes.

A few dazed children were seen wandering among huge boulders but no adults were in sight. Some houses appeared to have sunk deep into the Earth.

Hospitals in Tehran were filled with survivors flown from the stricken areas. Rescue workers set up field hospitals and mass graves were being dug to bury the dead, the reports said.

Bad weather hampered relief and rescue work and landslides made it difficult to reach remote areas hardest hit by the quake.

The official Islamic Republic News Agency said 10,000 people were reported to have been killed in Gilan province, which borders the Caspian and was nearest the epicenter.

In Zanjan, the known death toll rose overnight to 2,300 but the state television said thousands were believed still buried under debris. Relief workers took bulldozers to stricken areas to remove rubble.

Gymnasiums and other sports facilities were put at the disposal of medical and relief teams when hospital space became overburned with victims.

Sadreddin Sadr, of Iran's Red Crescent relief organization, the equivalent of the Red Cross, said in an interview on Cable News Network that 100,000 people were reported homeless.

At least 100 aftershocks hit the stricken area Thursday and early Friday. The strongest measured 6.5 on the Richter scale.

The International Red Cross was believed to have sent relief teams to Iran and nations responded with offers of help.

Japan's Foreign Ministry announced Friday that the government would provide $543,000 in emergency aid to Iran and dispatch a 22-member medical and rescue squad to join an international emergency rescue operation.

Japan said its offer was for humanitarian reasons and because the two countries had improved relations in recent years.

In Canberra, Australian Prime Minister Bob Hawke said Friday his nation is ready to help Iran with emergency relief.

In Washington Thursday, White House press secretary Marlin Fitzwater said, ''We're saddened at the loss of life'' and that the United States had sent a message to Rafsanjani offering ''appropriate assistance'' if requested.

It was not known early Friday if the U.S. offer was accepted.

Although Iran is rich in oil, recent reports indicate financial problems because of falling oil prices and the country had been holding preliminary negotiations with major internatonal lenders for an infusion of cash.

The quake, which struck at 12:31 a.m. and was centered about 175 miles northwest of Tehran, caught people sleeping or watching a televised World Cup soccer match, the IRNA news agency said.

Killer earthquakes are no stranger to Iran. Two quakes in the summer of 1981 left about 11,000 people dead. About 25,000 died in the September 1978 quake in the eastern Taba region.

#90173u0530 06/22/1990 ~United Press International

NEW YORK (JUNE 22) UPI - A Zodiac sign-obsessed attacker who has claimed responsibility for four shootings since March warned police last fall that the rampage would only stop when 12 people have been killed, it was reported Friday.

The shooter, who police believe claimed a fourth victim Thursday, issued the warning in a letter signed, ''Zodiac,'' that was not taken seriously until this week, according to reports in the New York Post and New York Daily News.

''When the Zodiacal light is seen Zodiac will spread fear,'' the shooter

threatened in a letter that also declared the attacker's intention to kill 12 people, the Post quoted the communique as saying.

The warning, mailed to Brooklyn police last Nov. 19, predates a letter the Zodiac shooter sent earlier this month to the Post and another news organization.

Law enforcement sources told the News that police did not take the first letter seriously, although it was issued a property clerk's invoice and vouchered at the 75th precinct in East New York.

A note with astrological symbols was found on a bench near where a homeless man was shot Thursday in Central Park and police believe it is the work of the same person who has written three other such notes and claimed responsibility for shooting and seriously wounding three men on the Brooklyn-Queens border since March 8.

''By comparision now we're pretty well assured that the individual who has shot three other people is responsible for this fourth shooting,'' Chief of Detectives Joseph Borrelli told a news conference. ''The content of the note and some of the markings on the note are very consistent with the prior three shootings.''

Borrelli said the shooting near the Central Park Bandshell - a departure from the previous pattern of attacks in a six-block area of near the Brooklyn-Queens border - means the attacker could be stalking victims across the city and would force detectives to expand their investigation.

''It's completely out of the area,'' Borrelli said. ''This opens up a whole new Pandora's Box for us. Now we've got the whole city now to be looking at.''

The chief said investigators believe the attacker is preying on helpless victims, noting that the first and third victims walked with canes, the second victim apparently was drunk and the third asleep.

Borrelli, who Thursday increased a task force formed Tuesday to track down the attacker, said the would-be killer may have been driven out of the Brooklyn-Queens area by increased police presence there in response to the shootings.

The homeless victim, whom police did not identify, was expected to survive the chief said.

The attacker has written cryptic letters with similar symbols claiming responsibility for the attacks to the New York Post and the CBS News ''60 Minutes'' program. A third note was found at the scene of the third shooting.

All three previous shootings have been on Thursdays in the early morning hours.

Borrelli declined to disclose the contents of the new note, saying only that it was on similar paper to the others and had a fourth sign of the Zodiac.

The victim, who Borrelli said was 30, was found about 5:15 a.m. with a gunshot wound to his chest and was taken to New York Hospital, where a spokeswoman said he underwent surgery and was listed in critical condition.

The Central Park attack differs from the three previous shootings in several ways. All three earlier victims were shot in the back or side, all were walking on the street in the six-block area along the Brooklyn-Queens border and all are light-skinned Hispanics or whites. The latest victim is black.

Investigators also ruled out any link to ''The Zodiac,'' who has claimed as many as 40 murders in a series of notes sent to San Francisco-area newspapers from 1968 to 1987.

All the New York victims were seriously wounded, and all but one, identified in Wednesday's editions of the New York Post as Joseph Proce, 78, have been released from the hospital. The letters suggest that the attacker believed all these victims had died.

The letters begin ''This is the Zodiac,'' and have a Celtic cross - a circle with a cross over it - and a second circle with three astrological symbols in pie-shaped wedges.

The letter continues with the message: ''The 12 sign will die when the belts in the heaven are seen.''

#90173u0562 06/22/1990 ~United Press International

NAIROBI, Kenya (JUNE 22) UPI - Rebels in northern Somalia seeking to topple President Siad Barre's government said Friday they had killed more than 200 government soldiers in an attack on an army column.

There was no immediate independent confirmation of the rebel claims.

The insurgent Somali National Movement radio, monitored in Nairobi, said they wounded 38 soliders in the attack on Bederwanak, 25 miles east of Hargueisa about 500 miles north of the capital of Mogadishu.

Formed in 1981, the rebel movement began a serious push to topple Barre's

government two years ago. It has recently claimed a series of victories against government forces.

However, last March the government brought under their control four northern towns the rebels had captured in May last year.

#90173u0605 06/22/1990 ~United Press International

WEST BERLIN (JUNE 22) UPI - Checkpoint Charlie, like much of the Berlin Wall it faced, is no more.

The tiny military barracks, which for many symbolized the U.S. presence in Berlin, was removed Friday by a huge crane at a ceremony, attended by U.S. Secretary of State James Baker, Soviet Foreign Minister Eduard Shevardnadze and the foreign ministers of Britain, France and the two German states.

''At long last, we are bringing Charlie in from the cold,'' said British Foreign Minister Douglas Hurd in an address to mark the historic moment.

Said Baker: ''Berlin will be undivided. Germany will be united.''

In his speech, Shevardnadze proposed the demilitarization of Berlin and the withdrawal from the city of all foreign troops, a surprising proposal he was expected to touch on further at unification talks later in the day.

After the ceremony, the ministers walked across the demarcation line that separates the U.S. and Soviet sectors of the divided city, and drove to East Berlin's Niederschoenhausen palace for negotiations on German unification.

The commander of the French sector of Berlin formally ordered the removal of the barracks with the words, ''Please close the Checkpoint Charlie control point.''

Thousands of soldiers, foreign officials and Berliners cheered, and a military band played cheerful tunes as the crane lifted the barracks, bearing a sign with the British, French and U.S. flags and the words ''Allied Checkpoint Charlie.''

''For 29 years, Checkpoint Charlie was the symbol of a tragedy,'' said Baker. ''In this place, together, we pledge to build a bridge between East and West, a bridge not of cement and steel, but a bridge of peace, a bridge of freedom.''

Shevardnadze said, ''I wish for the city of Berlin to become the largest center of the new system of stability in Europe.''

West German Foreign Minister Hans Dietrich-Genscher said, ''This is the place where the world held its breath in 1961.''

A few weeks after the Aug. 13 construction of the Berlin Wall, Soviet and U.S. troops and tanks faced each other in a tense, 16-hour standoff.

The standoff began when East German border guards tried to bar American diplomats and soldiers from entering East Berlin.

The Americans sent 10 tanks to the border in a show of U.S. determination to keep their right of access to East Berlin, and the Soviets countered with 10 of their own.

After 16 hours, the Soviets withdrew and the American tanks left soon afterward.

Since the small Western control point was erected Aug. 23, 1961, Western military officials at Checkpoint Charlie have witnessed a series of dramatic escapes from East Berlin.

Now, the area is regularly surrounded by tourists and entrepreneurs chipping off blocks from the Berlin Wall, which is currently being torn down.

#90173u0612 06/22/1990 ~United Press International

(JUNE 22) UPI - The earthquake in Iran... the flag amendment in Washington... Nelson Mandela in New York... German unification talks in East Berlin... and more... the latest developments from United Press International.

Japan and Australia joined the United States today in offering emergency aid to Iran after a devastating earthquake devastated its northern region.

Latest estimates from Iran say 25-thousand people were killed and 100-thousand injured. Iran's Red Crescent relief organization said that as many as 100-thousand people may be homeless.

Tehran state television also says thousands of people are believed buried under debris. Bad weather thwarted relief efforts in the mountainous areas.

Iran issued a statement at the United Nations requesting items needed in the quake-stricken area. They include medicine and medical supplies, tents food, blankets and sleeping bags.

In Washington, the White House expressed sorrow at the loss of life and

sent a message to Iran offering what it called ''appropriate assistance.''

Japan's Foreign Ministry says it will provide emergency aid to Iran and send a medical and rescue squad to join emergency rescue operations.

In Canberra, Australian Prime Minister Hawke said his nation was ready to help Iran with emergency relief.

The U-S Geological Survey in California says yesterday's temblor measured seven-point-seven on the Richter scale. It was the worst quake to hit Iran since September 1978, when about 25-thousand people died.

#90173u0616 06/22/1990 ~United Press International

(JUNE 22) UPI - What might have been the 27th Amendment to the Constitution... an amendment against desecrating the American flag... lost in the House last night.

Each side trotted out war heros, quoted the founding fathers and uniformly said they despise anyone who burns a flag. 115 members arose to debate the issue.

After a day of emotional and eloquent debate, the amendment fell short of the two-thirds needed to start the amendment process. The House vote was 254-177.

Shortly after the amendment vote, the House voted 236-177 against a bill making it illegal to damage of destroy the flag in certain circumstances.

The Senate will hold its own vote on the amendment before the July Fourth recess. But the flag amendment's chances of passing the House are dim.

Both houses of Congress must pass a proposed amendment by a two-thirds vote. Then, three-quarters of the states, at least 38, must ratify it before it can be added to the Constitution.

Deputy White House news secretary Alixie Glen says President Bush is disappointed. But she says Bush hopes the Senate vote will be favorable and that the House will reconsider.

House Speaker Thomas Foley of Washington, who closed debate for the amendment opponents with a rare floor speech and vote, says he will NOT permit it to come to a vote in the House again this session.

#90173u0631 06/22/1990 ~United Press International

(JUNE 22) UPI - South African black nationalist leader Nelson Mandela addresses the United Nations General Assembly today on Day Three of the U-S leg of his world tour.

Mandela yesterday received a rousing welcome in the heart of New York's Harlem neighborhood... and drew a thunderous ovation from a crowd of thousands with the ringing cry- ''Death to racism!''

Mandela's U-S welcome comes in contrast to reports today from South Africa... where police have detained 11 right-wing activists on reports of a plot to assassinate Mandela and South African President de Klerk.

A published report says a member of the white-separatist Afrikaner Resistance Movement had led a plan to shoot Mandela as he returned from his current world tour. The report also says de Klerk's assassination would have been a prelude to a right-wing coup.

The newspaper says that a group ringleader is a former Nazi who served during World War Two in the German S-S... Captain Heinrich Beissner.

In Harlem, more than 100-thousand people turned out to hear Mandela, who has inspired many Americans in the quest for racial equality.

The 71-year-old Mandela told the crowd- quote- ''My only regret is that I am unable to embrace each and every one of you.''

Last night Mandela also appeared at a rally at Yankee Stadium.

Secretary of State Baker is going to a six-nation conference on German unification today, saying the Germans alone must decide which military alliance their united country will join.

A U-S official says NO rapid progress is anticipated at the conference in East Berlin. The negotiations are the second ministerial session in the unity process.

Baker yesterday also repeated the U-S view that the issue of Germany's military alliance cannot be resolved at the current negotiations.

The East Berlin and Bonn governments say a united Germany will want to belong to the North Atlantic Treaty Organization. The Soviet Union has objected... but the objection appears to be weakening.

The East and West German parliaments took two major steps toward unification yesterday. They wrote off the territory lost to Poland after World War Two and approved the economic merger of the two countries.

-30- 2404
#90173u0643 06/22/1990 ~United Press International
(JUNE 22) UPI - New York police say a homeless man who was shot and critically wounded as he slept on a Central Park bench early yesterday is believed to be the fourth victim of the so-called Zodiac gunman.

Detectives found a note with astrological symbols on a bench near where the victim was shot. Document analysts believe it is the work of the person who has written three other such notes and claimed responsibility for shooting and seriously wounding three men on the Brooklyn-Queens border since March 8th.

Chief of Detectives Joseph Borrelli told reporters that police believe the individual who has shot three others is responsible for the latest shooting.

Borrelli says investigators believe the attacker is preying on helpless victims. He noted that the first and third victims walked with canes... the second victim apparently was drunk... and the fourth asleep. All three previous shootings also were on Thursdays in the early morning hours.

The attacker has written cryptic letters to the media with similar symbols claiming responsibility for the attacks.

The federal government will announce the fate of the northern spotted owl today.

The U-S Fish and Wildlife Service may add the owl to the list of threatened and endangered species. If the northern spotted owl goes on the list of about 350 species, 28-thousand logging jobs may be lost in the Pacific Northwest by the turn of the century.

About 17-hundred nesting pairs of the 16-inch-tall northern spotted owls are believed to live in the Northwest. Most are on federally managed land. They roost principally in old-growth forests- ecosystems characterized by trees at least 200 years old and supporting a greater mass of life than is found in tropical rain forests.

Old-growth trees produce larger and superior quality logs. They are a major commodity of the Pacific Northwest.

-30- 2053
#90173u0657 06/22/1990 ~United Press International
JERUSALEM (JUNE 22) UPI - Prime Minister Yitzhak Shamir said Friday he will not propose a new peace initiative and predicted Israeli relations with the United States would improve following the break in the U.S.-PLO dialogue.

In an interview with the Hebrew daily Yediot Ahronot, Shamir said he was encouraged by President Bush's announcement Wednesday that he was suspending diplomatic contacts with the Palestine Liberation Organization because it did not condemn an aborted May 30 sea attack on Israel.

''It brings us back to the period when the United States was a partner to our position regarding the PLO: this is a terrorist organization and one doesn't talk with it,'' the Israeli leader said.

Shamir, however, said he was concerned that Bush left open the possibility of resuming contacts with the PLO if it meets U.S. demands.

''It really worries me that the United States will retreat from the policy it adopted this week,'' he said.

In response to a letter from Bush and other American statements, the Israeli leader said he was preparing a letter to Bush outlining his positions.

''I won't propose a new political initiative,'' he said in his first major interview since Bush's announcement.

Asked about Secretary of State James Baker's statement that Israel should call the White House when it is serious about peace, Shamir said, ''They're waiting for my answer, not especially for a phone call. They know I am not good on the phone. Anyway, I am preparing an answer to President Bush and the letter he sent me.''

Bush sent Shamir a letter congratulating him on the formation of a new government and outlining U.S. differences with Israel regarding the peace process and Jewish settlement in the Israeli-occupied West Bank and Gaza Strip.

The 74-year-old former Jewish underground leader said it was possible that terrorism would increase following the break in U.S.-PLO talks.

''It's expected, but I hope that more and more Arabs will understand that violent means will not bring any results,'' he said.

Questioned about U.S. confidence in his sincerity to advance the peace process, Shamir said, ''It is not a matter of trust or a state of mind. It's all a matter of interests and pressures from different directions. ... I believe we'll get over our differences and our relationship with the United States will return to a normal and good situation.''

He also said it was a mistake to consider peace negotiations leading to ''pulling back or far-reaching concessions'' in the West Bank and Gaza

Strip.

''Negotiations means talks and looking for ways for a solution to the problem,'' he told the newspaper.

#90173u0692 06/22/1990 ~United Press International

WASHINGTON (JUNE 22) UPI - Durable goods orders advanced by a surprising 3.9 percent in May on strong demand for motor vehicles and airplanes, the Commerce Department reported Friday.

Private economists had expected a 2 percent increase in durable goods - expensive goods made to last three or more years - after a decline of 4.2 percent in April and a gain of 6.7 percent in March.

May orders totaled $128.2 billion, a $4.8 billion gain over April, according to the monthly report compiled by the department's Census Bureau.

Not counting transportation, new orders were up 1.8 percent last month, a government spokesman said. Not counting defense, orders were up 2.8 percent, the spokesman said.

Almost two-thirds of the May increase in the volatile transportation sector - up $3.2 billion, or 9.9 percent, to $35.3 billion - was in motor vehicles, the Commerce Department said. The remainder was in aircraft.

Despite the overall 3.9 percent gain in durable goods orders for the month ''the underlying trend ... remains subdued,'' according to analysts at Fuji Securities in Chicago.

Total shipments of durable goods increased 3.5 percent - or $4.2 billion - in May to $126.1 billion, also on strength in the transportation sector, while unfilled orders inched up by 0.4 percent - or $2.1 billion - to $500.3 billion, the department said.

Nearly half of the backlog is for aircraft and parts, mainly to replace the world's fleet of passenger jetliners, many of which first started carrying passengers up to 20 years ago.

''Orders have increased three of the last four months, following a 10.5 percent plunge in January, although the level of orders is 2.7 percent below the recent high of $131.7 billion recorded in December,'' the report said.

May orders were also higher for primary metals and machinery but on the downside for electrical machinery, the Commerce Department said. In the capital goods industries, orders rose on a 19 percent spurt in defense

orders, the department said.

All of the figures were adjusted to reflect seasonal factors.

#90173u0705 06/22/1990 ~United Press International

RANGOON, BURMA (JUNE 22) UPI - The Burmese military junta has agreed to hold talks on the transfer of power with the pro-democracy party, which swept last month's elections, an official spokesman said Friday.

Replying to a question at a press conference, spokesman Kyaw Sann said the ruling State Law and Order Restoration Council is now willing to meet with leaders of the National League for Democracy (NLD), the party that won more than 80 percent of the seats in the May 27 elections.

''I cannot, however, say when this meeting will take place,'' Kyaw Sann said.

Earlier NLD acting leader Kyi Maung said his party wanted to open a dialogue with the military soon to discuss the transfer of power to a civilian government.

The military called the May election in an effort to improve its image abroad. Despite strict controls on campaigning by opposition parties, the military's own party won only a handful of seats in the newly created Parliament, which has yet to meet.

Since the election, the military has made little effort to turn over power to civilian rule, despite repeated urging by the victors.

The NLD has moved slowly and carefully to avoid giving the military any excuse to overturn the election.

But it has been under increasing pressure from some of its youthful supporters to call for a quick transfer of power and the release of all political prisoners.

Hundreds, perhaps thousands, of political activists have been arrested since the military crushed pro-democracy demonstrations in 1988.

Among those under detention are the two top leaders of the NLD, Aung San Suu Kyi and Tin U.

Analysts said the military and NLD need to discuss the release of the political prisoners, the drafting of a new constitution, the extent and pace at which the military will hand over power, and efforts to end the country's 40-year civil war with ethnic minority groups.

At the press conference, the military showed videotapes of a meeting of the Democratic Alliance of Burma (DAB) - a group of minority insurgents and dissident students - held last week at a jungle base near the border with Thailand.

Military spokesman Lt. Col. Ye Htut, said the alliance was demanding the creation of a federal union of Burma, with eight autonomous and politically equal states for the various ethnic groups.

Ye Htut said the insurgents also demanded that each state in the new union have its own armed forces.

''What the DAB wants to do is to turn insurgent armies ... into legal armed forces in their respective states,'' he said.

He said such an arrangement could lead to bloody internal conflicts.

The ethnic groups have been fighting since 1948 to win regional autonomy and protection for their local languages and cultures.

The military's fears that the civilian government was about to give in to minority demands was one motive for the 1962 coup d'etat by the armed forces that ended multi-party democracy in Burma until this year.

The NLD has said it would like to hold a national conference with the minorities to settle the conflicts that have weakened the country, but the military has indicated it would not tolerate too much compromise with the insurgent groups.

#90173u0707 06/22/1990 ~United Press International

(JUNE 22) UPI - Stock prices on the Tokyo Stock Exchange closed sharply lower Friday in light trading as investors concluded interest rates will not be lowered in the near future.

The closely-watched Nikkei Stock Average of 225 selected issues, which slipped 0.49 points Thursday, plummeted 392.70 points or 1.22 percent to end the week at 31,694.57.

The blue-chip average closed at its lowest level since May 11, when the key indicator stood at 31,512.14. The broader-based Tokyo Stock Exchange Price Index of all major listed issues fell 20.50 points to 2,341.06.

An estimated 350 million shares changed hands, compared with 409 million shares Thursday. Declines hammered advances 703 to 227, while 189 issues remained unchanged.

Analysts said prices fell amid investors' anticipation that the Bank of Japan may raise short-term interest rates, or at least keep the interest rates at their current level, prompted selling.

The U.S. dollar's advance 0.15 yen advance to 154.60 yen on the Tokyo Foreign Exchange market also contributed to stock sell-off, analysts said.

The dollar gained against the yen on remarks by U.S. Federal Reserve Board Chairman Alan Greenspan that there was little possibility of recession of the U.S. economy.

Greenspan's comments before Congress were interpreted among Tokyo market players as a sign that the U.S. Federal Reserve will not ease interests rates. That conclusion let to the purchase of dollars.

Some investors liquidated their holdings of high-priced issues to buy lower-priced ones and spread their risks, sending the major stock prices down, one broker noted.

On the trading floor, large-scale steels, such as Nippon Steel and NKK, were sold along with shipbuildings and non-ferrous metals. Mazda and Hino Motors were closed lower.

But high-priced electronics, such as Sony and Kyocera, bucked the trend. Sony and Kyocera ended higher.

Elsewhere in Asia, stock prices posted slight gains on the Hong Kong Stock Exchange but a continued bout of profit taking shaved the increases as action was regulated to the secondary issues.

The blue-chip Hang Seng Index, which climbed 11.82 points Thursday, added another 4.23 points to end the week at 3,250.44.

Among the narrower indexes, utilities fell 18.52 points, financials lost 11.46, industrials climbed 10.88 and properties gained 44.35 points.

Volume was fairly heavy as an estimated 2.21 billion shares changed hands, up from Thursday's turnover of 2.15 billion shares.

Stocks opened lower amid bouts of profit-taking driving prices down nearly 20 points in early trading but some late midday buying cut the losses.

"There was aggressive buying late in the session," said David Harman, an analyst with Morgan Grenfell. "There is still a lot af activity in the secondary stocks. There was also very good buying in the blue chips." Prices rose late led by strong interest from overseas investors.

In Singapore, stock prices closed mixed on the Singapore Stock Exchange, with no new factors to stimulate a buying spurt.

The closely-watched Straits Times Industrial Index, which slipped 2.28 points Thursday, eased 0.65 points to 1,532.92. The All Singapore Index managed an 0.11 point rise to 431.00.

An estimated 45.1 million shares changed hands, compared with 44.9 million shares Thursday.

Analysts cited the lack of corporate developments compounded by funds being diverted to the markets in Thailand and Hong Kong, as the main reason for the market's performance.

On the trading floor, Far East Shipping paced the advancing issues followed by Singapore Press (foreign) shares, OUB Corp., Overseas Chinese Banking Corp. (foreign) shares, and UOB Corp (foreign) shares.

Ming Court led the issues on thge down side followed by National Steel Ltd., SIA Corp., Singapore Press, and Parkway Holdings.

In Manila, stock prices closed higher in moderate trading on the Manila Stock Exchange.

The key Manila Composite Stock Index of 25 selected issues climbed 17.88 points to 945.58.

Analysts noted bullish sentiment lifted prices higher helped by Sanitary Wares Manufacturing Corp. which declared a 400 percent stock dividend and a one peso cash dividend.

In Australia, stock prices closed higher in slow trading on the Sydney Sharemarket despite a strong Australian dollar and the weak Tokyo market.

The blue-chip All Ordinaries Index, which gained 3.0 points Thursday, added another 7.0 points to 1,512.4.

An estimated 72.9 million shares changed hands, compared with 114 million shares Thursday. Advances led declines, 176 to 114, while 268 issues remained unchanged.

Analysts said the independent strength of the Australian market was a product of international bargain hunting.

Market watchers said Australian issues were undervalued by international standards, as the Australian market had lagged behind major markets elsewhere.

On the trading floor, BHP rose ten cents to $9.48 on good support from overseas buyers. BHP is expected to announce an eight percent rise in its annual earnings early next week.

Top resource stocks firmed despite the strong Australian dollar. WMC Mining gained three cents to $4.60 and CRA Mining gained ten cents to $12.30.

Elsewhere, Westpac Bank gained nine cents to $4.65, ANZ Bank gained ten cents to $4.92, and Elders IXL eased three cents to $1.74.

-30- 5615
#90173u0719 06/22/1990 ~United Press International
DETROIT (JUNE 22) UPI - At least six people have bought $10,000 tickets that will allow them to sit on the stage near Nelson Mandela when the African National Congress leader is honored Thursday at a Tiger Stadium rally.

More than 33,000 of the 49,000 rally tickets had been sold through Wednesday, organizers said Thursday, including at least six of the $10,000 seats.

Arthur Johnson, president of the Detroit chapter of the NAACP, said he is not worried about selling the remaining 16,000 seats or raising $1 million for the ANC, which has fought apartheid in South Africa for years.

The $1 million goal was set by Detroit Mayor Coleman A. Young, who on Thursday chastized City Council members who balked at paying $100 to get on the stage with Mandela.

If they're ''too cheap'' to contribute, they should skip the rally, the mayor said.

Young, who will introduce Mandela at the rally, said other dignitaries are paying at least $1,000 to share the stage with Mandela. Young has contributed $10,000.

Before Mandela takes center stage, Aretha Franklin, and maybe Stevie Wonder, will entertain the Tiger Stadium crowd. A publicist for Wonder said the singer has not yet decided on the Detroit rally.

The Winans, a Detroit gospel group, and Detroit singer Ortheia Barnes also will be on the program. The 1,200-voice choir will perform four songs at the rally.

Meanwhile, the Detrot Free Press reported Friday that Detroit municipal pension funds are carrying investments that total nearly $360 million in

113 U.S. firms doing business in South Africa.

Of the top 20 U.S. employers in South Africa - as identified by the Investor Responsibility Research Center in Washington, D.C. - Detroit's two pension funds own stock in 16, the newspaper said in a copyright report.

The investments are not illegal, but they exist at a time when Detroit's city workers are being asked for donations to help Mandela's ANC fight apartheid. Divestment of holdings in companies with even the slightest link to South Africa is seen as a way of pressuring the white-ruled government to dismantle segregationist laws.

#90173u0737 06/22/1990 ~United Press International

(JUNE 22) UPI - Opponents of a constitutional amendment against

desecration of the flag welcomed its defeat in the House yesterday. The executive vice president of the People for the American Way Action Fund called the amendment- quoting here- ''a bad idea from the start.'' The Senate will conduct its own amendment vote before the July Fourth recess, but outside of providing a political forum for amendment supporters it will be meaningless... and in any event the amendment is likely to fail there too.

Federal officials in Boston say an elderly Lithuanian man has admitted he was a guard at the Nazi death camp of Auschwitz during World War Two. However, 68-year-old Albert Ensin will NOT be deported because he is in failing health. Ensin told Immigration Court officials that his camp guard work from 1941 to '43 ''necessarily entailed'' leading prisoners to the gas chambers.

North Carolina's budget problems have caused a one-year delay in the construction of a jazz institute to be named after Thelonius Monk, the ''High Priest of Be-bop.'' Executive director Thomas Carter says the institute has lost a five-Million-dollar challenge grant due to the state's fiscal woes. Monk, a native of Rocky Mount, North Carolina, died in 1982.

Here's something straight from Hitchcock. Police in Cheektowaga, New York, found the body of an elderly woman propped up in a living room chair. She had been dead for six months. Police say the woman's 47-year-old son... Louis Kowalewski... denied that his mother was dead... and was taken to a medical center for mental evaluation.

#90173u0829 06/22/1990 ~United Press International

(JUNE 22) UPI - An impasse over crop subsidies has been broken. The Senate Agriculture Committee yesterday approved a farm bill that would give farmers some more freedom in deciding which crops to grow and would create a soybean marketing loan.

The government of Sri Lanka says it has recaptured the eastern part of the island from Tamil rebels. However, the separatists are still fighting in the northern tip of Sri Lanka.

A memorial service will be held in a convention center in Jacksonville, Florida, this afternoon, for eight people slain in a loan office massacre Monday. The gunman became the ninth victim when he killed himself.

A Detroit man was convicted yesterday of four counts of murder. A jury agreed with the prosecution that Lawrence DeLisle deliberately drove his station wagon into the Detroit River in August, drowning his children.

President Bush cut the ribbon yesterday on a six-Million-dollar privately funded facility to house critically ill children and their families. The housing will be used by children undergoing treatment at the National Institutes of Health.

The judge in the racketeering trial of former Philippine first lady Imelda Marcos has rejected a defense motion to dismiss the charges. Closing arguments against Mrs. Marcos are scheduled to begin Monday in New York City.

The New Jersey Assembly gave final legislative approval to an education reform bill. It requires a one-BILLION 300-Million-dollar income tax increase. Governor Jim Florio says he will sign the measure next week.

A former Cuban political prisoner is free from a 21-year-old air piracy charge. A federal judge in Miami ruled yesterday the government failed to grant the accused hijacker a speedy trial.

#90173u0894 06/22/1990 ~United Press International
BONN, WEST GERMANY (JUNE 22) UPI - West Germany announced Friday it will back a $2.9 billion bank credit to the Soviet Union to help President Mikhail Gorbachev's economic reform program.

The massive loan is seen by some observers as a way to soften Soviet objection to a united Germany's membership in NATO.

Government spokesman Hans Klein said the government decided to guarantee a credit of a consortium of German banks after Gorbachev met with Chancellor Helmut Kohl.

''The credit guaranteed by the federal government is designed to help the Soviet economic reform program steer through a difficult transitional period,'' Klein said.

Kohl decided to support the credit after talks with Gorbachev about the Soviet program to introduce free market economy measures, Klein said.

Klein said Kohl, in view of the tremendous task facing the Soviet Union in carrying out the economic reform program, believes Western countries should give aid to the Soviets and, if possible, devise a joint plan of assistance.

Kohl advocates that the West give a clear signal that it is ready for economic and financial cooperation at a meeting next week in Dublin of European Community leaders, and at a summit meeting in Houston next month of the seven leading industrial nations, Klein said.

To raise support for the plan, Kohl wrote Monday to the leaders of the 11 other European Community members and to the leaders of the seven top industrial nations, Klein said.

Kohl hopes the program will contribute not only to the expansion of Soviet-German ties but to the unification process in Germany, Klein said.

The announcement was made as the foreign ministers of the two Germanys and the four World War II victors - the United States, Britain, France and the Soviet Union - held their second meeting on German unification in East Berlin.

The main issue blocking agreement has been the Soviet rejection of the proposal of the other five countries that a unified Germany be a member of NATO.

Some observers contend the Soviet Union eventually will accept NATO membership if it gets security guarantees and massive German economic aid.

The well-informed West German news magazine Der Spiegel has reported the Soviets will accept German membership in NATO in return for $20 billion worth of aid.

(JUNE 22) UPI - Authorities in Tehran have revised the death toll from yesterday's devastating earthquake in northern Iran upward to least 32-thousand-260. Rescue work continues... but officials say thousands of victims still are buried under the rubble in areas difficult to access.

Television footage from the mountainous region between the Caspian Sea and Zanjan showed hillsides strewn with the remains of devastated villages. Some of the rubble appeared to have rolled hundreds of feet down the slopes. Mass graves are being dug to bury the dead quickly.

In South Africa, security is being increased around President de Klerk and his cabinet as police investigate an alleged plot to assassinate de Klerk and black nationalist Nelson Mandela . Reports say authorities temporarily detained 11 right-wing activists for questioning.

Mandela is in New York City, where he'll address the United Nations General Assembly today. There's NO word whether Mandela has been informed of the plot against him. Tens of thousands of New Yorkers turned out in Harlem yesterday to see the anti-apartheid champion.

A Navy vice admiral and two teams of Navy investigators combed through

debris in a storeroom on the aircraft carrier Midway today. They're searching for the cause of a pair of explosions that killed two sailors and injured 16 two days ago. Officials say there's nothing to indicate foul play.

WASHINGTON (JUNE 22) UPI - Personal income inched up by a modest 0.3 percent in May, and American workers appeared to play it safe by saving more and holding back on spending, the Commerce Department said Friday.

According to figures released by the department's Bureau of Economic Analysis, personal savings rose to 6.2 percent last month from 6 percent in April. Savings hit a nearly five-year high of 6.3 percent in March.

Personal consumption was unchanged in May following seven months of increases, a government spokesman said.

Last month's 0.3 percent increase in personal income was generally in line with estimates by private forecasters.

The $14 billion gain followed increases of 0.3 percent in April and 0.8 percent in March, the report said.

The Commerce Department noted the April and May advances in personal income were offset by smaller subsidy payments to farmers. Excluding these payments, personal income was up 0.4 percent in May and 0.5 percent in April.

Workers' wages and salaries increased $10.3 billion in May following an increase of $16.4 billion in April, with the manufacturing and commodity producing sectors of the economy reporting higher pay. Farm income, however, continued to slide.

The Commerce Department also said that May disposable income, take home pay after taxes and other expenses, increased 0.2 percent in May, the same as in April. In March, disposable income was up 0.8 percent.

The implicit price deflator - a gauge of inflation tied to personal income - was up 0.2 percent in May, after climbing by 0.2 percent in April and 0.6 percent in March, according to the government report.

The deflator appeared to pace other economic indicators that track price increases.

WASHINGTON (JUNE 22) UPI - President Bush declared Friday a major disaster

exists in Illinois as a result of severe storms, tornadoes and flooding last month and ordered federal assistance for the state.

The president's action makes federal funding available to individuals and local governments in a seven county area, including Edwards, Jasper, Marion, Shelby, Wabash, Wayne and White.

Jerry Jennings, acting director of the Federal Emergency Management Agency said that the damage surveys are continuing in other areas and additional counties may be added after the assessments are completed.

Assistance can include temporary housing, grants, low-cost loans to cover uninsured property losses, and other programs to help individuals and business owners recover from the effect of the disaster, which struck the region on May 15.

#90173u0969 06/22/1990 ~United Press International

SRINAGAR, INDIA (JUNE 22) UPI - Two Moslem guerrillas arrested by paramilitary police staged a daring escape Friday as they were being driven to jail, using karate chops to disarm their guards and fleeing with an apparent civilian informer under protective rebel gunfire, witnesses said.

The incident came amid continuing violence in the Kashmir Valley of northern India, where Moslem rebels are fighting for independence for Jammu and Kashmir state.

At least four people were killed Friday, authorities said.

One of the victims, a Hindu government employee, was killed at his home in the heart of the city, apparently by Moslem rebels, police sources said. He was shot three times in the head and chest, the sources said.

Moslem rebels say they want an independent state because Kashmiris have been systematically denied equal access to government jobs, higher education and economic development grants by the Hindu-dominated central government in New Delhi, 400 miles to the south.

Two members of the Kashmir Students Liberation Front escaped shortly after they were arrested by the paramilitary Central Reserve Police Force on the northern outskirts of the city, witnesses said.

Police were taking the two away in a jeep when other rebels opened fire with automatic rifles. The jeep crashed and one of the arrested rebels, whose nickname is ''Bita Karate,'' used martial arts to disarm their guards, the witnesses said.

''Bita Karate'' and his companion, Ghulam Hassan, fled the scene with a civilian, who apparently had tipped the authorities to their whereabouts, they said.

#90173u0973 06/22/1990 ~United Press International

WARSAW, POLAND (JUNE 22) UPI - Poland announced Friday it has dropped its demand for a treaty with the German states prior to unification in the wake of East and West Germany reaffirming the inviolability of the Polish border.

''We do not insist upon initialing the treaty,'' Polish government spokeswoman Malgorzata Niezabitowska told reporters. ''We are flexible in our stand.''

Since the fall of the Berlin Wall and the inevitable march toward unification, Poland has insisted that a treaty be signed with both German states before their merger affirming the Polish-German border.

Thursday, the East and West German parliaments took two major steps toward unification by writing off the territory lost to Poland after World War II and approving the economic merger of the two countries.

Both measures were milestones toward the political unification of Germany that West German Chancellor Helmut Kohl hopes to bring about Dec. 9, immediately after all-German elections.

Niezabitowska welcomed the joint declaration adopted by the West and East German parliaments but also said Poland would like to take part in negotiating the treaty.

''We still would like very much to agree on the content of the treaty before unification,'' she said. ''This could take the form of agreeing on protocols, something East Germany proposed May 29.''

Talks on a German-Polish treaty are expected to resume shortly in Warsaw.

About one-third of Poland is former German territory awarded after the end of World War II when the Soviet Union incorporated eastern Poland and its borders were pushed westward.

In the news conference, Niezabitowska dismissed demands by Solidarity leader Lech Walesa and his associates for quicker political and economic changes, saying they lacked substance.

''Those who call for acceleration of reforms do not give any specifics and

don't present any alternative program to that of the government,'' she said.

Such alternatives would be more helpful than ''wishful thinking, unrealistic demands or useless advice,'' she said.

Niezabitowska presented a long list of accomplishments by the government of Prime Minister Tadeusz Mazowiecki and stressed that the fundamental reforms require not only great effort but time.

She also lashed out at Walesa.

''Whoever contends that this can be done easier and quicker, taking shortcuts and what's more swinging an ax, presents only a populist radicalism offering only illusions to tired people instead of hope,'' she said.

Walesa had said on Wednesday what Poland needed was ''a president with an ax'' to push the reforms along.

The quarrel has been mounting for weeks between Walesa, who advocates swifter changes and eradication of the remnants of the communist influence and the Solidarity-led government of his long-time adviser.

#90173u1037 06/22/1990 ~United Press International

EAST BERLIN (JUNE 22) UPI - The Soviet Union suggested Friday that a united Germany only achieve sovereignty after a transitional period, a proposal promptly rejected by Western powers at unification talks.

Soviet Foreign Minister Eduard Shevardnadze suggested at the talks that East and West Germany remain in the Warsaw Pact and NATO, respectively, for five years after unification into a single country.

He also called for major troop cuts and the virtual withdrawal of all foreign troops from German soil.

Secretary of State James Baker, and his British and West German counterparts promptly rejected the proposals.

The occasion was the second ministerial session of the German unification negotiations, known as two-plus-four because of the participation of the two German states and the four World War II victors: Britain, France, the Soviet Union and the United States.

Shortly after the start of the talks, Shevardnadze unexpectedly announced that the Soviet Union proposed that Germany unite now but become fully sovereign only after a series of transitional periods.

Shevardnadze said, ''The four powers should first reciprocally cut troops by 50 percent and then bring them to a level of token contingents or completely withdraw them from Germany.''

He also suggested that German forces be reduced to 200,000 to 250,000 within three years of unification.

He said the Warsaw Pact and NATO should not extend their territories for five years, a proposal apparently aimed at stopping a united Germany from becoming a full member of the Western military alliance.

The governments in Bonn and East Berlin have said they wanted a future Germany to be part of NATO, a concept backed by the three Western powers.

Western officials said their delegations strongly rejected the Soviet suggestions.

French Foreign Minister Roland Dumas did not immediately respond because he made his opening speech before Shevardnadze made his proposals.

A West German spokesman said Foreign Minister Hans-Dietrich Genscher expressed his opposition to ''any transitional period'' except in certain specific areas.

He said Genscher said Soviet troops could remain in what is now East Germany for a period after unification.

While the differences over the military future of a united Germany became increasingly evident, it appeared that all parties to the negotiations agreed that unification can take place this year.

Shevardnadze said the six nations must reach a final settlement by November, before the Paris Conference on Security and Cooperation in Europe.

Western officials have said in the past they favored such a timetable and the two German governments have agreed that all-German elections should be held in December this year.

-30- 2998

#90173u1040 06/22/1990 ~United Press International

(JUNE 22) UPI - The government reports another indication of a growing economy. The Commerce Department said today durable goods orders advanced by three-point-nine percent last month. Officials say demand for motor vehicles and airplanes was strong. The large increase in the orders for durable goods- expensive and long-lasting items- is a surprise. Private economists had expected a two percent increase. May orders totaled more than 128-BILLION dollars, a gain of about five-BILLION dollars over April.

The death count from Iran's earthquake rose today. Iran says yesterday's earthquake killed more than 32-thousand people. Another 100-thousand people were hurt and about the same number lost their homes. Mass graves are being dug to bury the dead. Rescue workers have set up field hospitals in the quake-stricken areas of northwestern Iran. Hospitals in Tehran are filled with survivors flown from the stricken areas. The European Community granted one-Million 200-thousand dollars in emergency aid.

A former Nazi S-S captain who immigrated to South Africa from Germany and a former South African parliamentary candidate are among those who reportedly plotted to take over South Africa. They allegedly planned to murder President Frederik de Klerk, black leader Nelson Mandela, several cabinet members and some members of parliament. Police temporarily detained 11 suspects. Security around de Klerk and his cabinet has been tightened. Mandela is in New York.

Soviet Foreign Minister Shevardnadze is calling for the demilitarization of Berlin. The Soviet official says all foreign troops should be removed from Berlin. He's expected to outline the proposal at German unification talks later today. Before the talks began, Shevardnadze, Secretary of State Baker and other officials watched the removal of Checkpoint Charlie... the Western allies' military control point in the Berlin Wall.

-30- 2086

#90173u1047 06/22/1990 ~United Press International

NEW YORK (JUNE 22) UPI - Food and tobacco giant Philip Morris Cos. said Friday it will buy Swiss confectionary company Jacobs Suchard AG, maker of the familiar triangular Toblerone chocolate bars, in a cash deal worth a total of $3.8 billion.

In a first step, Philip Morris, which owns Kraft General Foods International, said it purchased Zurich-based Colima Holdings AG, which is controlled by Suchard chairman Klaus Jacobs and holds a 60 percent voting share in Suchard.

A tender offer for all remaining shares of the candy and coffee company is expected within two weeks, said Alice McGillion, a spokeswoman for New York-based Philip Morris.

Analysts said the $3.8 billion pricetag was a bargain for Philip Morris, since it would not result in a reduction of the company's share earnings.

Philip Morris said it will combine the worldwide coffee operations of Kraft General Foods with Suchard, whose sales last year amounted to $4.8 billion.

The deal will give Kraft General Foods, which previously was not in the confectionary business, a strong presence in that growing category, said Roy Burry, a securities analyst with Kidder, Peabody & Co.

McGillion said the European revenues of Philip Morris are expected to jump from about $3 billion annually to nearly $7 billion as a result of the transaction.

Suchard, Switzerland's second-largest confectionary and food company after global giant Nestle SA, will remain based in Switzerland and retain its name.

Using the Suchard distribution network, Philip Morris intends to expand its Kraft General Foods operations in Europe, said McGillion.

''Suchard is very strong and complements us in areas where we need to build up, including coffee markets in Germany, France, Switzerland and Austria,'' she said.

Analysts said Maxwell House coffee, Kraft General Foods' premier U.S. coffee brand, will now be positioned to expand substantially in Europe.

Suchard's net earnings in 1989 were down 10 percent to $196 million, attributed to a loss by its U.S. confectionary subsidiary E.J. Brach.

But Brach, as well as Suchard's Canadian subsidiary, its industrial chocolate holdings and its interest in certain banks, will be sold back to Klaus Jacobs, Philip Morris said.

Philip Morris, which posted earnings last year of $2.9 billion on sales of $45 billion, said it would finance the transaction by means of existing credit lines and through leading Swiss banks.

According to the Swiss financial magazine Cash, Klaus Jacobs wanted to sell his Suchard stake because he was under financial pressure after borrowing $500 million to acquire shares held by other members of the family.

(JUNE 22) UPI - New York City police are beginning to take seriously a letter signed ''Zodiac'' that they received last fall. The author of the letter said 12 people will be killed. The attacker has claimed responsibility for four shootings in New York since March. A note with astrological symbols was found on a bench near where a homeless man was shot in Central Park yesterday. Police expect the man to survive.

A high school graduation party in Norwalk, California, turned into a bloodbath early today. Police say three young men believed to be gang members fired their guns over a fence into the back yard where the party was being held... killing one boy and wounding nine other people. Police say the attackers used a shotgun and possibly some handguns.

A judge has dismissed a lawsuit filed against Creighton University by a basketball player who dropped out of college so he could learn to read and write. The school in Omaha, Nebraska, says Judge John Nordberg in Chicago yesterday dismissed the case because Kevin Ross did NOT state a claim upon which relief can be granted. Ross dropped out of Creighton to attend a private school in Chicago. He began in the second grade.

One of the nation's largest sellers of recycled paper is objecting to a federal plan to define paper made with sawdust as a ''recycled'' product. The sawdust paper plan is part of an E-P-A effort to get federal agencies to buy more recycled goods. However, the Conservatree Paper Company of San Francisco says federal purchases of sawdust paper would hurt- NOT help- the paper recycling industry and do nothing to ease the trash crisis.

WASHINGTON (JUNE 22) UPI - President Bush renewed a trade agreement with Hungary, continuing favorable trade status for the East European nation and promising to consider expanded contacts between the countries, the White House announced Friday.

In a brief statement, press secretary Marlin Fitzwater announced Bush had renewed the Bilateral Trade Agreement between the United States and Hungary, basing his decision mainly on "a satisfactory balance of concessions in trade and services between the two countries" since the pact went into effect in 1978.

"The administration will seek further negotiations in the near future" with the newly elected Hungarian government, Fitzwater added, concerning "investment matters, intellectual property protections, and other measures

aimed at increasing trade and business contacts."

In renewing the agreement, the spokesman said, Bush "reaffirmed support for the republic of Hungary's commitment to market mechanisms and the country's continued movement toward trade liberalization and non-discriminatory practices with her trading partners."

DETROIT (JUNE 22) UPI - Just one month after cost-of-living adjustments on pensions promised to be one of the hottest issues between the United Auto Workers and top carmakers this summer, the union seemed to be backing off on the idea.

UAW leaders said Thursday they might accept lump sum payments to help the union's 440,000 workers retired from General Motors Corp., Ford Motor Co. and Chrysler Corp. keep pace with inflation, rather than adding a COLA clause to their fixed pensions.

COLAs on pensions surfaced as one of the major concerns among delegates at the union's bargaining convention last month in Kansas City, Mo.

UAW President Owen Bieber merely promised at the time, however, to protect the union's retirees and uphold the practice of continuing to negotiate benefit improvements for retired workers.

The union begins negotiations for about 500,000 workers at the Big Three automakers during the third week of July to replace existing three-year pacts that expire Sept. 14.

Union pensioners have complained that their standard of living is being eroded by inflation because of their fixed income. The minimum pension for an autoworker after 30 years of work is $1,500 a month.

But automakers have told the union that COLAs on pensions would be extremely costly - in fact a Ford spokesman said this week such a clause could be as expensive as a total contract pacakage.

Anthony P. St. John, Chrysler's top negotiator, said this week the No. 3 automaker could not afford COLAs on pensions, but might consider some other form of increase, like lump sum payments.

The union considers job security to be its top priority in this year's negotiations, as it seeks to stabilize its declining membership and prevent automakers from sending work overseas or outside the company, notably to foreign-based companies.

#90173u1166 06/22/1990 ~United Press International

PITTSBURGH (JUNE 22) UPI - Creditors of Allegheny International have defeated a plan by the New York investment group Japonica Partners to put the troubled appliance-maker back on its feet.

That could see stage for what one lawyer warned will be ''a litigation nightmare.''

U.S. Bankruptcy Judge Joseph Cosetti said Thursday he will proceed with a June 28 hearing on AI's $687 million reorganization plan, despite pleas by Japonica and bank creditors who wanted time to settle their differences and come up with an alternate plan that can be approved.

Japonica has purchased millions of dollars of AI creditors' claims. The investors said Thursday that creditors had rejected a $661 million plan Japonica offered.

Opposition to the plan came from bank creditors and common stockholders, Japonica said.

But Joy Flowers Conti, a lawyer representing the banks, told the judge

that proceeding with AI's own reorganization plan will spark ''extensive, massive litigation'' among the company, Japonica and creditor groups.

''The present circumstances are a litigation nightmare,'' Conti said.

Cosetti said he understood Conti's concern and that he, too, has nightmares that the case will never end.

The judge has been frustrated by the slow pace and said allowing Japonica and the banks more time to negotiate a settlement would only further delay the day AI can emerge from bankruptcy.

AI, maker of Sunbeam and Oster appliances, filed for Chapter 11 bankruptcy protection in February 1988. Eight of management's reorganization plans have been scuttled, the latest rejected by creditors in April.

#90173u1177 06/22/1990 ~United Press International

PITTSBURGH (JUNE 22) UPI - Mellon Bank acknowledged Friday it is restructuring and will lay off an unspecified number of employees by year's end - possibly as many as several hundred.

But Chairman Frank Cahouet said there are no plans for across-the-board layoffs like those in 1987, which eliminated 3,000 jobs.

Mellon's goal is to increase efficiency, he said.

Cahouet acknowledged rumors placing the number of layoffs at several hundred but cautioned they were just that - rumors. But he said there is no question Mellon management is systematically and thoroughly reevaluating operations.

The evaluation process started early this year. Cahouet said departments have been asked to cut up to 40 percent of their budgets, but may not achieve such a high target. Some employees were preparing written jobs descriptions so that departmental operations can be analyzed.

Cahouet said that evaluation process is fueling fears of significant cuts.

Mellon had about 16,525 employees at the end of last year, more than 8,700 of them in Pittsburgh and another 2,500 in Philadelphia.

(JUNE 22) UPI - The government says orders for goods built to last at least three years rose nearly four percent last month, primarily on demand for cars and aircraft. Major orders totaled 128-point-two-BILLION dollars. Private economists expected only a two-percent increase in the orders for durable goods.

In other economic news, personal income inched up by a modest three-tenths of one percent in May, while American workers saved more and spent less. The increase in personal income was generally in line with estimates by private forecasters. Personal savings rose to six-point-two percent last month from six percent in April. Savings hit a nearly five-year high of six-point-three percent in March.

Several nations are offering aid to Iran following an earthquake that left more than 32-thousand people dead and at least 100-thousand injured. Iran's mission to the U-N issued a statement, pleading ''in the name of the Almighty,'' for medicine, tents, food, blankets, sleeping bags and medical supplies. Reports say 100-thousand people are homeless after the quake hit northwestern Iran yesterday with a force of seven-point-seven on the Richter scale.

South African authorities tightened security around President Frederik de Klerk and his Cabinet today. Police are detaining 11 right-wing activists in the wake of a report of an elaborate coup plot that included plans to assassinate de Klerk, other government officials and black leader Nelson Mandela. One report says the plan was to kill Mandela on July 18th, when he returns from a 45-day, 14-nation world tour.

Progressive members of the Russian republic's new Communist Party warned today that the organization could self-destruct at a national party congress next month if conservatives win control of the group. A contentious debate erupted between the two camps at the Russian Republic Communist meeting in Moscow, where hard-liners spent three days criticizing President Gorbachev. The group is to elect a president from seven candidates... four of them arch-conservatives.

NEW YORK (JUNE 22) UPI - Beverly Hills businessman Marvin Davis, who sold his holdings in two takeover-targeted airlines, topped Financial World's list of Wall Street's highest-paid financiers for 1989.

The magazine, in its July 10 issue, said the high-flying Davis - who sold off his stakes in NWA Inc., parent of Northwest and UAL Corp., parent of United - made more money in the stock market than anyone else in the country.

No. 2 on the list of Wall Street's highest paid was Bruce Kovern, a secretive futures trader who earned more than $110 million last year by fetching a 50 percent return for accounts worth more than $900 million at year-end.

Minneapolis investor Irwin Jacobs, third on the list, made more than $100 million from cashing out completey from Shaklee Corp. and CVN, the magazine said.

Peter Ackerman, right-hand man to Drexel Burnham Lambert's fallen junk-bond king Michael Milken, pulled down at least $100 million last year for the No. 4 spot, the magazine said.

The money came from Drexel, which filed for federal bankruptcy protection in February. Financial World said the firm paid Ackerman the sum in two installments after he resigned when informed of Drexel's cash woes last winter.

No. 5 on the list was Carl Icahn, who earned between $95 million and $135 million from winnings on his holdings in Texaco Inc.

Futures trader Paul Tudor Jones II ranked sixth with earnings of more than $65 million.

He was followed by Lazard Freres' top partner Michael David Weill, at

least $65 million; Miami investor M. Lee Pearce, at least $65 million; Quantum Fund's George Soros, at least $60 million and buyout fund manager Gerhard Andlinger, $60 million.

#90173u1245 06/22/1990 ~United Press International

MOSCOW (JUNE 22) UPI - Latvia and Israel signed a protocol Friday for economic cooperation, the first such agreement between a Soviet republic and Israel.

The accord was signed in the Lativan capital of Riga by representatives of the Ministry of Economy of Latvia and Israel's Ministry of Economy and Trade, the official Tass news agency said.

''It is a very important document and opens up great possibilities,'' said Professor Herman Branover of Ben Gurion University of Beersheva, Tass reported.

The protocol ''sets out basic directions for cooperation on the basis of equality and mutual benfits,'' Tass said.

''It envisions joint research and development by Latvian and Israeli scientists, the organization of joint ventures and also the exchange of scientific information, licenses, prototypes of inventions and materials '' it said.

Latvia, whose Parliament has declared its intention to achieve independence, is seeking economic autonomy and an end to Moscow's financial stranglehold exercised through the Kremlin's central planning.

Rich in farm products, Latvia lacks any raw materials. Israel also lacks any raw materials, but has great experience in management and an economy that is in many ways a halfway house between capitalism and socialism.

For Israel, the accord is a first step toward tapping an entire new market area in which it can use its vast reservoir of former Soviet Jewish citizens who know Russian and are familiar with the Soviet system.

Latvia is reaching out for economic partners beyond the nearby Scandinavian countries and the Western European market. Like all Soviet republics, Latvia has complained that it does not control its own land, resources, or the disposition of the products it manufactures.

#90173u1323 06/22/1990 ~United Press International

LOS ANGELES (JUNE 22) UPI - The Los Angeles Dodgers and Detroit Tigers

have reportedly discussed a trade that would return Kirk Gibson to the American League team in exchange for a starting pitcher.

The Los Angeles Times quoted sources Friday who said the clubs have talked about the proposed deal. Gibson spent eight years with Detroit before signing with the Dodgers as a free agent after the 1987 season.

Los Angeles Vice President Fred Claire would not confirm or deny names of players or teams he may or may not be talking with, but did indicate the Dodgers need a fifth starter. The team is using a four-man rotation until the All-Star break.

''I don't want to go with a four-man rotation, so in addressing the situation I'm not ruling out any possibility, and I don't think it would serve a purpose to trade pitching for pitching,'' Claire told the Times.

Gibson, who sparked the Tigers to the 1984 World Series title, missed much of last year and the first two months of this season because of a hamstring injury. He is currently sidelined with a strained groin.

Gibson still makes his home in Lapeer, Mich., and could be used as a designated hitter with the Tigers to lessen the chance of further injury to his legs. He will be a free agent after the season.

#90173u1346 06/22/1990 ~United Press International

BIRMINGHAM, Ala. (JUNE 22) UPI - Black leaders have called on the founder of the Shoal Creek Country Club, which will hold this year's PGA Championship, to apologize for remarks defending the club's policy of excluding blacks.

Businessman Hall Thompson, who founded the club just south of Birmingham, said earlier this week the country club would not be pressured into accepting blacks. His comments were in response to questions raised by Birmingham City Councilman William Bell over plans for the city to purchase an advertisement in the program for the PGA tournament in August.

''Bringing up this issue will just polarize the community ... but it can't pressure us,'' Thompson said in an interview with the Birmingham Post-Herald.

Thompson said blacks were allowed to play the course during the 1984 PGA tournament and that Shoal Creek's black caddies get to play the course every Monday.

''But we have the right to associate or not associate with whomever we choose,'' he said. ''The country club is our home and we pick and choose

who we want.''

Birmingham Mayor Richard Arrington called Thompson's comments ''disappointing'' and ''regrettable.'' City Council President Eddie Blankenship called for an apology from Thompson.

''He should issue a blanket apology,'' Blankenship said. ''He could say, 'I may have offended some folks, especially black folks, with my comments. I'm sorry if I offended somebody.'''

Bell, who sparked the controversy when he cited a 1980 resolution that forbids the city from supporting or sponsoring any private club that excludes blacks, said the matter could be resolved if the city's $1,500 is returned or if club officials agree to allow blacks to play as guests of members and honestly consider blacks for membership.

''I know that some members off that club have attempted to bring a black out there as a guest and that they have been strongly discouraged from doing so,'' Bell said. ''They don't all think like Thompson, but they're fearful of being blackballed by officials there.''

Thompson, who noted that Shoal Creek members include Jews, women, Lebanese and Italians, said members could invite black guests, but most would feel uncomfortable doing so.

''No, that's just not done in Birmingham, Ala.,'' Thompson said.

Pat Rielly, president of the Professional Golfers Association, said Thompson's statements are not valid reasons to break the contract to play the tournament, but he said discriminatory practices would be considered in deciding whether to bring future tournaments to the club.

''The PGA in no way condones any kind of discrimination,'' Rielly said.

#90173u1353 06/22/1990 ~United Press International

(JUNE 22) UPI - South African black leader Nelson Mandela is taking his world tour to the United Nations today. He is addressing the U-N General Assembly in a speech that's a highlight of his three-day visit to New York City.

In Detroit, organizers say at least six people purchased 10-thousand-dollar seats for Mandela's appearance at Tiger Stadium next week. They said more than 33-thousand of the 49-thousand rally tickets had been sold by late Wednesday. The 10-thousand-dollar tickets enable the buyers to sit on the stage near the black South African leader.

Reports out of Iran say scores of mountain villages northwest of Tehran are in ruins following a powerful earthquake that killed more than 32-thousand people. At least 100-thousand are reported hurt in the quake that struck northwest Iran yesterday. Another 100-thousand people are homeless.

Senate Majority Leader George Mitchell joined the chorus of Democratic disenchantment with the new Bush administration deficit-reduction proposal. Mitchell says the proposal- quoting now- ''doesn't even begin to seriously address the problem.''

Americans workers enjoyed a modest three-tenths of one percent boost in personal income in May, and saved more of it. The Commerce Department says the 14-BILLION-dollar gain follows a three-tenths of one percent gain in April. Personal savings last month jumped to six-point-two percent from six percent in April.

-30- 1601

#90173u1360 06/22/1990 ~United Press International

LONDON (JUNE 22) UPI - Stock prices, boosted by a favorable report on Britain's trade picture for May, closed slightly higher in moderate trading Friday on the London International stock exchange.

The blue-chip Financial Times 100-stock index, which slipped 0.9 points Thursday, closed up 7.9 points to 2,378.2. For the week, the key index, which measures the value of Britain's largest 100 companies in terms of market capitalization, posted a loss of 14.1 points.

The narrower top 30 industrial average added 5.2 points to 1,913.5 but lost 12.2 points on the week.

Volume amounted to around 387 million shares, vs. 415 million shares that changed hands Thursday.

Noting the modest volume, market analysts said there was no great enthusiasm to get involved in the market as Friday was the last trading day of the current two-week trading account.

On the economic front, the Central Statistical Office reported Britain's May current account deficit narrowed to seasonally adjusted estimate of $2.27 billion, down from $2.64 billion in April.

Market forecasters had been expecting the report to show a deficit of about $2.2 billion to $2.3 billion for the month.

In a seperate report, the government reported Britain's preliminary average estimate of gross domestic product for the first quarter was up by

0.7 percent from the fourth quarter of 1989 and by 1.6 percent from the 1989 first quarter.

Also, the Central Statistical Office reported wages and salaries per unit of output in the whole British economy rose a seasonally adjusted 10.1 percent in the fourth quarter from the-year earlier period.

The adjusted 10.1 percent was an upward revision from the 9.3 percent rise previously reported by the government.

Analysts said remarks by Chancellor of the Exchequer, John Major, warning that Britain's interest rates were not on their way down, checked the market's rise.

Among the most widely traded stocks, Wellcome PLC, the pharmaceutical company, gained 40 cents to $10.

Rothmans climbed 42 cents to $12.40 ahead of next week's earnings.

Housebuilder's shares looked brighter on news that cut-price mortgages have succeeded in stimulating activity among first-time house buyers.

Tarmac gained 14 cents to $4.35 and Laing gained 12 cents to $4.65.

British Aerospace gained 21 cents to $8.60 after recent falls following the government's announcement that it is to make substantial defense cutbacks.

Elsewhere in Europe, stock prices on the Frankfurt Stock Exchange closed slightly higher in light trading.

The closely watched German Stock Index, which gained 14.02 points Thursday added another 9.35 points to 1,872.92.

#90173u1365 06/22/1990 ~United Press International

(JUNE 22) UPI - President Bush meets with U-S attorneys from around the nation today at the Justice Department. The session caps a weeklong effort to stave off mounting concern about the costly savings-and-loan scandal. The White House says Bush also plans to ask Congress for more money to prosecute thrift fraud cases.

President Bush declared a seven-county region of Illinois a major disaster area following severe storms, tornadoes and flooding last month. Bush ordered federal assistance for the state, including temporary housing, grants and low-cost loans to cover UNinsured property losses to help people recover.

Police in East Hampton Connecticut say an unemployed Vietnam veteran disturbed by music that reminded him of the war went on a shooting spree, but later surrendered. NO one was hurt. Police say the man is receiving psychiatric treatement following last night's incident.

-30- 1053

#90173u1368 06/22/1990 ~United Press International

WASHINGTON (JUNE 22) UPI - Bush administration officials said Friday that despite their deal with a House committee to cut 1991 foreign military aid below last year's levels, they would seek more military assistance in the Senate.

The House Appropriations Committee, with administration support, approved a $15.8 billion foreign aid bill Thursday that includes $5.3 billion in military funds, of which $4.6 billion goes directly to U.S. allies.

The $4.6 billion represents a cut of $382 million from President Bush's request and $193 million less than the 1990 level. But it was $144 million higher than the figure approved last week by the committee's foreign operations subcomittee.

Reginald Bartholomew, undersecretary of state for international security affairs, told a Senate subcommittee Friday the administration agreed with the House committee because the figure was ''as high as the traffic would bear.''

Bartholomew said the administration's strategy was to seek more military money in the Senate. He said the funding in the House bill could have ''extremely serious'' consequences, threatening drug interdiction and aid for such allies as the Philippines and Portugal.

But Sen. Patrick Leahy, chairman of the foreign operations subcommittee of the Senate Appropriations Committee, said he wanted to cut more military aid from the House bill and shift it to developmental aid and export promotion.

''I think the House gave too much,'' said Leahy, D-Vt. ''You're going to have a rocky road ahead with me.''

The panel's ranking Republican, Sen. Robert Kasten of Wisconsin, criticized the administration for ''caving in'' to House Democrats and putting too much pressure on Senate Republicans to restore the aid.

Despite the agreement on overall military aid in the House, the bill contains a 50 percent cut in military assistance to El Salvador that has prompted veto threats from the administration.

However, to enable the bill to be voted on next week, House leaders and the administration agreed not to take action on the El Salvador provision until the measure reached the floor.

-30- 2339

#90173u1371 06/22/1990 ~United Press International

WASHINGTON (JUNE 22) UPI - Fresh out of committee, the farm bill is sure to face challenges during House and Senate debate, including attempts to cut the sugar subsidy and outlaw all subsidy payments to large farmers, observers said Friday.

The bill, an outline of agricultural policy for the next five years, also could undergo major modifications if White House and congressional leaders agree on budget cuts. The House and Senate Agriculture Committee versions of the bill call for spending several billion dollars more than the administration wants.

''More than ever, the final bill is going to be written in the committee of conference (between the House and Senate) because of the rapidly changing situation,'' said Senate Agriculture Committee chairman Patrick Leahy, D-Vt.

The Senate committee completed work on its version of the bill Thursday night, one week after the House committee. The committees proposed only a handful of key changes in policy and voted to freeze crop subsidy rates at 1990 levels.

The changes include a soybean marketing loan, a step supposed to put more land into soybeans, and a limited version of ''planting flexibility,'' which would give farmers an opportunity to adjust their mixture of crops and experiment with new ones without losing eligibility for crop support payments.

Both bills also expand environmental safeguards and would set up new, voluntary programs to preserve wetlands and to help farmers bear the cost of adopting new practices to reduce the risk of contamination water supplies.

Reps. Thomas Downey, D-N.Y., and Willis Gradison, R-Ohio, began circulating a letter this week to rally support for a 2-cent cut in the sugar support price, now 18 cents a pound.

''We can address the problems posed by the sugar program head-on by cutting the subsidy,'' they said in announcing they would file an amendment to do so.

Rep. Richard Armey, R-Texas, has pledged for months to seek a vote to bar crop support payments to farmers with more than $500,000 in sales or an adjusted gross income of $100,000. Armey views the farm program as wasteful and says there is no reason to give support payments to large operators.

Defenders say payments are based on production and that denying payments to some farmers will encourage crop surpluses and drive up the cost of the farm program for aiding the remaining farmers.

''The vulnerability is how to deal with the payment limit thing,'' one House staff worker said in assessing prospects for the House committee bill.

Sen. Richard Lugar, R-Ind., and Reps. Tim Penny, D-Minn., and Dan Glickman D-Kan. - all Agriculture Committee members - have raised the idea of lowering the current $50,000 limit on payments to an individual.

According to the government, 64 percent of farms receive no payments at all and 90 percent of payments go to 12 percent of the 2.1 million farms in America.

The administration has voiced dissatisfaction with the Senate bill's revisions in the way crop loans would be handled. The bill would curb Agriculture Department discretion to unilaterally reduce loan rates by requiring it to increase the size of advance subsidy payments whenever loan rates are lowered. The additional payment would have to be repaid later.

Assistant Agriculture Secretary Bruce Gardner called the provisions ''a needless complication.'' A Republican Senate staff worker said the loan rate restrictions might be altered during Senate debate or when House and Senate negotiators write a final version of the bill.

Rep. Steve Gunderson, R-Wis., has said he will try on the floor to end the so-called California make allowance, under which processors offer farmers a lower price than in other states for milk used in making butter, cheese and dry milk. Defenders say the lower price is needed to offset higher processing costs.

Lugar has said he may try to attach food-safety reforms to the farm bill. Environmentalists and the Bush administration have clashed for months over tolerance levels for chemical residues in food. The Senate bill also contains sections to create a seafood inspection program, to certify organically produced food and to ban the export of chemicals barred from use by U.S. farmers - all of which may draw opposition.

-30- 4529

#90173u1396 06/22/1990 ~United Press International

WASHINGTON (JUNE 22) UPI - Republican leader Robert Dole pushed Friday for a symbolic Senate vote on a constitutional amendment prohibiting desecration of the U.S. flag, charging that the House rejected ''the will of the American people'' in refusing its approval.

Dole, however, acknowledged that his personal head count showed ''the vote will be close'' and added, ''I think we will probably lose.''

A ''whip'' tally by assistant Senate Democratic leader Alan Cranston showed 54 supporting the amendment, 29 opposed and 17 undecided.

The House, after a day of emotional and eloquent debate, rejected Thursday what would have been the 27th amendment to the Constitution on a 254-177 vote - 34 short of the two-thirds neeed.

The House vote killed the measure at the first stage of its journey. A constitutional amendment requires a two-thirds majority vote in the Senate and House, and then must be ratified by three-fourths of the states.

But under an agreement reached last week, the Senate will hold a symbolic vote next week, probably on Tuesday, prompting one Democratic co-sponsor to comment it can serve no purpose except to provide ''30-second TV spots'' to be used against opponents in political campaigns.

Sen. James Exon, D-Neb., the co-sponsor, said, ''I see no need for a vote. The only reason would be for political purposes - which I think is sad.''

Dole, who has campaigned for the constitutional amendment from the moment the Supreme Court on a 5-4 decision struck down a statute banning desecration of the flag, said ''the choice for us in the Senate is crystal clear.''

''We can either follow the House's lead and embrace the beltway know-it-alls or we can embrace the will of the American people ... who want to give Old Glory the constitutional protection she so much deserves.

''With yesterday's flag amendment, the House of Representatives has turned its back on the Constitution, on the flag, and worst of all, on the American people,'' Dole said in a Senate speech.

''With a re-election rate of more than 98 percent,'' he said, ''with many incumbents running unopposed, it's no surprise that House members think they can get away with snubbing the voters of the country. Public accountability is out, public arrogance is in.

''As far as I'm concerned, this is a serious issue. I thought the flag was

pretty important - important enough to fight for, important enough to die for, important enough to spend a long time in a hospital for,'' said Dole, who was hospitalized with crippling wounds in World War II.

The Senate GOP leader branded as a ''sham'' the House's attempt to pass another statute, which failed 236-177, after the constitutional amendment went down and said it was purely a ''maneuver to get everybody off the hook ... so at least there was a little justice.''

Sen. Tim Wirth, D-Colo., an opponent of the constitutional amendment, said it would ''do our country and our Constitution a disservice'' and added the debate in the House exposed the flag issue ''as politics at its worst.''

Sen. Brock Adams, D-Wash., also an opponent, said the House vote ''rendered moot'' any Senate action, charging that the ''only possible reason (for a Senate vote) is to provide grist for the campaign mill.''

#90173u1404 06/22/1990 ~United Press International

MOSCOW (JUNE 22) UPI - Latvia and Israel signed a protocol Friday for economic cooperation, the first such agreement between a Soviet republic and Israel.

The accord was signed in the Lativan capital of Riga by representatives of the Ministry of Economy of Latvia and Israel's Ministry of Economy and Trade, the official Tass news agency said.

''It is a very important document and opens up great possibilities,'' said Professor Herman Branover of Ben Gurion University of Beersheva, Tass reported.

The protocol ''sets out basic directions for cooperation on the basis of equality and mutual benfits,'' Tass said.

''It envisions joint research and development by Latvian and Israeli scientists, the organization of joint ventures and also the exchange of scientific information, licenses, prototypes of inventions and materials '' it said.

Latvia, whose Parliament has declared its intention to achieve independence, is seeking economic autonomy and an end to Moscow's financial stranglehold exercised through the Kremlin's central planning.

Rich in farm products, Latvia lacks any raw materials. Israel also lacks any raw materials, but has great experience in management and an economy that is in many ways a halfway house between capitalism and socialism.

For Israel, the accord is a first step toward tapping an entire new market area in which it can use its vast reservoir of former Soviet Jewish citizens who know Russian and are familiar with the Soviet system.

Latvia is reaching out for economic partners beyond the nearby Scandinavian countries and the Western European market. Like all Soviet republics, Latvia has complained that it does not control its own land, resources, or the disposition of the products it manufactures.

#90173u1405 06/22/1990 ~United Press International

WASHINGTON (JUNE 22) UPI - President Bush launched a counterattack Friday on charges his administration has reacted slowly to the savings and loan crisis, promising prison sentences for ''the cheats and the chiselers and the charlatans.''

Speaking at the Justice Department, Bush also endorses proposed legislation to authorize an extra $25 million to combat thrift fraud.

Flanked by Attorney General Dick Thornburgh and Treasury Secretary Nicholas Brady, whose agencies are leading the effort to unravel the thrift catastrophe, Bush spoke to 88 of the nation's 93 U.S. attorneys, summoned to Washington for the event.

''We will not rest until the cheats and the chiselers and the charlatans spend a large chunk of their lives behind the bars of a federal prison,'' Bush said.

Bush did not mention questions about his son, Neil, who was a director of the failed Silverado savings and loan in Denver.

Congressional Democrats have charged the administration has been lax in pursuing thrift fraud cases, in part because the Silverado collapse alone will cost taxpayers some $1 billion and raises the possibility the president's son used his director's position to benefit himself and business associates.

Thornburgh, who introduced Bush as ''the boss,'' quickly blamed Congress for some of the delay in thrift prosecutions. Thornburgh maintained that his prosecutors were making progress ''despite congressional delays and funding shortfalls.''

Bush compared white-collar thrift criminals to ''cold-blooded snakes'' and said the time had come to ''throw the crooks in jail.'' The legislation Bush endorsed would allow court-authorized wiretaps in investigations of some thrift-related crimes.

Bush acknowledged ''we could have been moving even more rapidly'' to combat thrift fraud, but said Congress had delayed in providing enough money.

Rep. Charles Schumer, D-N.Y., called Bush's remarks ''a cheerleading speech'' and scoffed at some of the figures the president rattled off.

''Sure, we've recovered $100 million dollars. That's one percent of the over $20 billion lost to fraud. Yes, there've been a 150 convictions, but there are 21,000 referrals laying on someone's desk and gathering dust because there aren't enough people to work on the case,'' Schumer said.

Bush said Thornburgh also was creating a ''new unit'' at the Justice Department ''to direct and sharpen the department's actions'' and ''rapid response teams'' with ''razor-sharp'' agents who will ''jump right into the paper trail'' at troubled thrifts.

Bush said the Justice Department secured 791 major fraud convictions last year involving banks and savings and loans. But there was no specific detail on how many of those convictions were related to the thrift disaster.

The president's speech capped a week of intense politicking surrounding the collapse of the industry and the resulting taxpayer bailout, complete with fingerpointing over who is responsible and concern the issue will spill over into the fall election campaign.

The crisis is expected to cost taxpayers anywhere from $132 billion to $500 billion, making it the worst financial scandal since the Great Depression.

Burt Ely, an Alexandria, Va., thrift consultant, said regulatory policy during the 1980s caused the thrift crisis much more than criminal activity.

''It's show,'' Ely said of Bush's speech. ''The thing is, criminality wasn't the primary cause of the savings and loan disaster. This diverts attention from the real problem, which was policy, not criminality.''

In many cases, the massive losses that left thrifts insolvent came from real estate loans to high-flying speculators. When the 1980s real estate boom collapsed, the loan money - the federally insured personal savings of millions of Americans - simply disappeared.

#90173u1407 06/22/1990 ~United Press International

OTTAWA (JUNE 22) UPI - Canada's Liberal Party, which governed the country

for most of the last half-century before being ousted in 1984 by the Progressive Conservatives, Saturday chooses a new leader it hopes will return the party to power in the next general election.

The expected election of Jean Chretien, a native Quebecer and senior cabinet minister in the former Liberal adminstration of Pierre Trudeau, is also expected to return the party to an American-style of liberalism favored by Trudeau.

Recent polls of the 5,200 delegates registered to attend the Liberal convention in Calgary, Alberta, gave Chretien 62 percent of support, well ahead of his nearest rivals, Paul Martin, a wealthy Quebec businessman and Sheila Copps, a veteran member of Parliament.

Political observers predict the Liberals will win the next election, expected to be held in 1992, unless the Conservatives find a way to reverse their poor standing in opinion polls. Only 15 percent of Canadians still favor the Conservatives, the worst endorsement for a political party since national political polling began in 1942.

''At this point the Liberals could run a dog as leader and they would win an election,'' said University of Toronto political scientist Stephen Clarkson, who is completing a book on Trudeau.

Unlike Trudeau, Chretien is neither intellectual nor ideologue. As a populist, however, he has enormous public appeal in most regions of the country, including the heavily populated provinces of Quebec and Ontario which account for most of the seats in the elected House of Commons.

''He's not a good thinker. He's a pleaser and a negotiator,'' added Clarkson. He believes Chretien, a right-wing liberal who favors foreign investment and free trade with the United States, would have little trouble winning support from the business community, something it lost under Trudeau and current leader John Turner, who was opposed to the U.S.-Canada free trade agreement.

But Chretien's close alliance with Trudeau also marks him as yesterday's man, who may be unable to repair the deep divisions between the old-guard of the party and its younger members.

''What's difficult is the extent to which the present Liberal Party will continue the liberalism of the Trudeau era,'' said Clarkson.

Under Trudeau, the Liberals more analogous to the U.S. Democrats, alienated from business and more closely aligned with the disadvantaged. Under Turner, the party became much more nationalistic and opposed the U.S.-Canada free trade agreement.

Turner also adopted a more conciliatory attitude toward the French-speaking province of Quebec, throwing his support behind a constitutional amendment that would keep the province in Canada by recognizing it as a distinct society and giving it powers to promote and preserve its French language and culture.

The change in attitude toward Quebec was publicly condemned by Trudeau and Chretien, who believed the rights of the English-speaking minority in the province would be violated if Quebec was given special powers to pass laws that benefitted the French.

Debate over Quebec has preoccuppied the leadership convention and caused deep divisions within the party, but is unlikely to affect the outcome of Saturday's vote.

However, some political observers believe that Trudeau's presence at the Calgary convention this weekend and his involvement in the leadership campaign - he reportedly wrote some of Chretien's speeches - suggest Liberals are ready to reaffirm the Trudeau legacy.

''It's likely that Chretien will reassert an American style of liberalism '' said Clarkson.

Other observers contend the Liberal Party requires a long period of self-examination and renewal before it is ready to regain power. Many of the policies that kept liberal politicians in power in Canada and the United States, including intervention in private industry and using government expenditures to create jobs and promote economic growth, are no longer valid.

The Liberal Party in Canada will have to reassess its position on free trade with the United States and whether it can continue to guarantee that the welfare state, with its vast social safety net, is a sacred heritage.

#90173u1417 06/22/1990 ~United Press International

PRAGUE, CZECHOSLOVAKIA (JUNE 22) UPI - President Vaclav Havel and the nation's leading political parties agreed Friday on the makeup and platform of the next government and said the current leadership would step down on June 27.

The agreement came 13 days after Czechoslovakia held its first free Parliamentary elections following 42 years of communist rule.

A communique issued by the official Czechoslovak news agency CTK said a deal was struck following negotiations Friday morning in the Slovak capital of Bratislava.

Participants included Havel, Prime Minister-designate Marian Calfa and delegates from Civic Forum and the three Slovak-based groups, the Christian Democratic Movement, the Democratic Party and Public Against Violence, sister organization of Civic Forum.

Civic Forum led last November's revolution against the ruling communists.

''The participants agreed on the basic personnel content of the new Federal government,'' the CTK dispatch said. ''They spoke of its program proclamation and agreed the present Federal government will resign June 27 and the same day ... the new government will be nominated at Prague Castle.''

A spokesperson for Havel said she knew nothing more than what was in the communique.

Havel may give more details on his regular Sunday afternoon radio chat from the president's official summer residence at Lany Castle, or at a regular news conference on Monday.

Civic Forum polled over half of the vote nationwide (53.15 percent in the House of People and 49.96 percent in the House of Nations for the Federal Assembly) in the June 8-9 parliamentary elections.

Forum and PAV combined took 170 of the 300 seats in the two houses of the Federal Assembly, but sought broader support to counter the second-place Communist Party, which won 47 sets, and to pass essential economic and constitutional reforms, which require a 200-seat majority.

The addition of the Christian Democratic Movement to the Federal government is seen as a triumph for Civic Forum and Havel, who want to build a broad anti-communist coalition, without relying on nationalist parties representing Slovaks, Moravians and Silesians and Hungarians.

The Democratic Party, the largest in Slovakia before the 1948 communist putsch, is expected to join a coalition with PAV and CDM in the Slovak national government.

Meanwhile, to cope with an expected influx of tourists this summer, requirements to exchange a minimum amount of hard currency for Czech currency at the official rate - far below what the free or black markets offer - will be abolished for tourists from countries with visa-free travel to Czechoslovakia.

U.S. and Canadian citizens no longer need visas to visit Czechoslovakia, but British subjects will continue to require them.

Government spokesman Zdenek Fiala said he expected visas will no longer be required of West Germans after July 1. France is now studying dropping visas for Czechoslovaks.

The government also canceled long-ignored Communist-era laws Thursday requiring citizens to report their contacts with foreigners and restricting where visitors can take photographs.

#90173u1420 06/22/1990 ~United Press International

MEXICO CITY (JUNE 22) UPI - Cuban authorities have been jamming U.S.-sponsored Radio Marti broadcasts for several weeks in Havana and soon will block the signals throughout the country, the official Cuban news agency said Friday.

In a dispatch monitored in Mexico City, Prensa Latina cited the official Cuban Communist Party publication Granma as saying Radio and TV Marti broadcasts will be unavailable to Cuban audiences.

''Radio Marti, that began its transmissions in 1985, has been totally silenced for several weeks on medium-wave frequencies in the capital and later in 70 of the country's 169 municipalities, including most of the major cities,'' Granma said in a front page article.

''The total suppression of (Radio Marti) is very close, using a minimum of resources and expenses,'' Prensa Latina quoted Granma as saying.

Cuba first began jamming operations following the March 27 launch of Spanish-language TV Marti, designed to supplement the radio broadcasts that had been operating for five years and had gained a wide audience among Cuba's 10.5 million inhabitants.

The launch of TV Marti drew strong condemnation from the government of President Fidel Castro, who accused the United States of violating Cuban sovereignty and international communications agreements - charges the United States rejected.

Granma referred indirectly to previous threats by Cuba to interfere with public broadcasts in the United States if Washington continued to send TV Marti broadcasts, which feature Spanish language programs originating in Washington and relayed via a blimp tethered off the Florida Keys to Cuba 90 miles away.

''Other means and options that Cuba has in case of an eventual escalation have not been necessary to reach the goal of inflicting a technological, political and moral defeat on the United States, making the TV Marti signals invisible and Radio Marti signals inaudible,'' Prensa Latina said.

When Radio Marti was first launched, Castro suspended an immigration agreement signed with the United States the year before, although the agreement was later reinstated.

Prensa Latina said the Cuban government had not begun jamming the Radio Marti broadcasts before because ''it had other priorities,'' adding that it was the appearance of TV Marti that led to the decision to block all U.S.-sponsored radio and television programs.

Cuban authorities, who jam the transmissions by sending a competing signal on the same wavelength, say none of the television programs have ever been seen on Cuban televisions.

On Thursday, Prensa Latina published a report in which U.S. officials said TV Marti was reaching between 20 percent and 30 percent of viewers in the western half of the Caribbean island.

#90173u1425 06/22/1990 ~United Press International

MOSCOW (JUNE 22) UPI - None of the seven candidates vying to head the new Russian republic Communist Party won a clear majority Friday, forcing a runoff between a hard-line foe of the free market and a more moderate party boss.

The second vote was scheduled later Friday but the results were not expected until Saturday.

The election came as progressives fought back from a week of criticism of reform efforts launched by President Mikhail Gorbachev, warning that conservatives would lead the party to ruin if they won the leadership.

The failure of a candidate to win a majority of the 2,633 votes at the Russian republican Communist Party conference forced a runoff between Ivan Polozkov, the conservative party boss in Krasnodar, and Oleg Lobov, a long-time party official serving as second secretary in Armenia.

Polozkov, the free market foe who was defeated by Boris Yeltsin last month in his bid for the presidency of the Russian Republic, received 1,017 votes in the first round of balloting Friday. Lobov got 848.

Lobov had been seen as a dark horse on the slate of seven candidates - four of them arch conservatives - but he was seen as a possible way to bridge the gap between conservatives and radicals.

Among the candidates who failed in the first round of voting were hard-liner Alexander Melnikov, the first secretary of Kemerovo who has

called for Gorbachev's resignation, and Vladimir Lysenko, a leader of the radical Democratic Platform.

Others who failed were Nikolai Polovodov of Leningrad, an articulate worker who at 37 is the rising star of the conservatives, Oleg Sheinin, conservative party boss of Krasnoyarsk, and moderate Vladimir Kuptsov of Vologda.

Critics of the new Russian party officially formed by a vote of delegates to a constituent congress Wednesday fear its conservatives will dominate next month's national Communist Party Congress and turn it away from reforms.

''I want to address them directly and say that if you win at the Congress, it will be for you a Pyrrhic victory, because the people don't need a totalitarian party,'' said Gennady Yashin, a delegate from Moscow.

The term ''Pyrrhic victory'' derives from King Pyrrhus in Asia Minor, who after suffering heavy losses in a grand victory over Roman forces in 279 A.D., declared: ''One more such victory and I am lost.''

Vyacheslav Bragin, a progressive first secretary from Kalinin, warned the delegates against electing Polozkov, the first secretary of Krasnodar who has closed every cooperative business in his region.

''If we elect Polozkov, it will be the sunset of our party,'' Bragin said.

Bragin also warned the delegates that the party is losing relevance and people are more interested in the Russian Parliament.

The Russian republic did not have its own separate Communist Party branch, but Communists from the Soviet Union's largest republic dominate the national party and control its leadership.

Lysenko, the democrat among the candidates, had told the Congress he realized he had no chance to be elected first secretary of the Russian Communist Party.

But Lysenko, who wants the party to change its name and renounce communism as a goal, shocked the delegates by suggesting that Soviet Communist founder Vladimir Lenin be taken from his mausoelum in Red Square ''and be buried in the Earth in a Christian ritual.''

''Let the people decide,'' he said.

The Congress's drafting committee is working on a resolution to protect the memory of Lenin against abuse, and Gorbachev told the conclave that there are three different versions and one of them will be adopted.

#90173u1427 06/22/1990 ~United Press International
GENEVA (JUNE 22) UPI - The League of Red Cross Societies said Friday that earthquake-struck Iran is seeking only certain types of aid, such as medicines, blankets and food, and does not want doctors or search dogs.

A request from the Iranian Red Crescent asked specifically for medicines, antibiotics, tents, blankets and dried foods ''conforming to Islamic rules '' the League said.

Iran said it ''does not want or need'' doctors, medical technicians, search dogs or blood, Red Cross League officials said at a news conference. The League is the Geneva-based aid coordinating agency for all national Red Cross and Red Crescent societies.

The League said the Iranian Red Crescent also reported that flights carrying relief supplies may land only at Tehran. People accompanying the flights will receive 24-hour visas but will not be permitted to visit the stricken region, the League said.

The League said Iran, in a message sent by telex, put the provisional death toll at 12,000. But the U.N. Disaster Relief Organization said the Iranian Foreign Ministry told U.N. officials in Tehran the latest death toll estimate is 35,000 with more than three times that number injured.

UNDRO also reported Friday that the Iranian government does not want any medical and rescue teams arriving without prior clearance.

UNDRO headquarters in Geneva said all foreign governments and relief agencies wanting to send teams should first contact local Iranian embassies or diplomatic missions.

It confirmed that Iran included rescue dogs on its ''unwanted list,'' along with doctors, medical personnel and blood, and specified that all food must conform to ''Islamic tradition.''

UNDRO said Iran also asked for rough terrain vehicles, power generators and collapsible water containers.

A first UNDRO relief flight with 37 tons of supplies was going to Tehran on Friday from Pisa, Italy, where the agency has an emergency warehouse.

NORWALK, CA (JUNE 22) UPI - Three young men believed to be gang members fired their guns over a fence into a backyard high school graduation party early Friday, killing one boy and wounding nine others, authorities said.

Jesus E. Diaz, 16, of Artesia, was killed in the 1:10 a.m. shooting, sheriff's Deputy John Ashley said.

The nine wounded were taken to area hospitals, Deputy Bill Linnemeyer said.

''Three male Hispanics entered an adjacent yard and fired at the victims over a back wall,'' Linnemeyer said.

They used a shotgun and possibly some handguns to shoot into the crowd of at least 100 guests, Ashley said.

The wounded were all males aged 19 and 20. Four of them were treated at Pioneer Hospital and released. A fifth was transferred from Pioneer to Harbor-UCLA Medical Center, a Pioneer Hospital spokeswoman said.

George Hershey, principal at Tracy High School in Cerritos, said a Tracy student, Rick Nava, hosted the party to celebrate his graduation Thursday evening.

Hershey said the party was not an official school function. The graduation ceremony ended about 9 p.m. and was followed by a brief reception at the school.

Investigators believed gang members were responsible for the shooting because of the way it occurred, but they did not immediately identify any of the guests as gang members.

Hershey declined to speculate if Nava or others at the party had any gang connections, but he said witnesses reported the gunmen shouted ''Norwalk '' probably the name of their neighborhood.

Hershey said the neighborhood, known as the ''Chivas'' barrio, has a history of regional battles with Norwalk.

''The conflict going on between them and Norwalk has been going on for many years on and off,'' he said.

''This could have happened any weekend, any time, at a wedding reception or any party,'' he said. ''It makes me very sad that it happened at all, but especially on a graduation night.''

#90173u1464 06/22/1990 ~United Press International

NEW YORK (JUNE 22) UPI - Sony Corp., the leader in rewritable optical storage technology, Friday predicted the U.S. market will grow into a multibillion-dollar business in less than five years.

Sony, which introduced the first rewritable optical drives in Japan and the United States in late 1988, said it now controls 70 percent of the world's market and sold 70,000 units worth nearly $300 million in just over a year in the United States alone.

''The new technology, which was developed by Sony over 10 years and has absorbed about $100 million in research and development capital, is catching up fast and we expect to sell around 250,000 units this year in the United States,'' said Olaf Olafsson, vice president for Sony optical products division.

Sony, which has sold about 150,000 drives worldwide so far, estimated it will generate about $1 billion this year from its latest product in optical storage technology in the United States and that the market will be in the multibillion-dollar range by 1995.

Optical storage, which uses the resources of laser technology, allows to store a large volume of complex information on a single disk, including text, data, graphics, as well as audio and visual material. The information can be easily accessed with a computer.

The drive introduced by Sony allows users not only to retrieve but to edit the information, by substituting, updating or inserting data at will. The new information can come from any source which can be channeled through or generated by computer, such as word processing, image scanning or software-generated graphics.

The drive's price is in the $4,000 to $6,000 range, depending on the performance requested and the software.

One rewritable optical disk holds 650 megabytes of information, or the equivalent amount of data contained in a pile of typewritten documents as high as the Washington Monument.

''According to our survey over just over a year, users buy between one and nine optical disks, depending on their business needs,'' Olafsson said.

''A disk sells for about $250 and is cost-effective because of the ability to rewrite information on the same support.''

The disk has a lifespan of about 10 years during which information can be written over up to 1 million times.

''The market right now is in the United States and Japan,'' Olafsson said, ''but the disk has also been introduced in Europe where we expect growth as well although the takeoff time for the product is slower.''

Major users are businesses dealing with complex information, such as insurance companies or stock traders who need to store and constantly update financial data about a large number of companies.

The drive can be hooked up to a single personal computer in a small business environment. It can be used with powerful workstations or a host server, the main computing unit in a network, to meet larger business needs.

''We already have a system which allows to stack up optical disks at one place, creating an optical juke-box,'' Olafsson said.

But Sony is hoping that, on a long-term basis, rewritable optical drives will filter into the household and open a huge market for the leading Japanese consumer products manufacturer.

''We are looking at a mass market,'' Olafsson said. ''Certainly, not everyone needs this storage capacity and flexibility, but the number of users is growing.''

Sony's rewritable optical drive has been recognized as the industry's standard by the International Organization for Standardization, the independent body which identifies worldwide technical requirements in the computer industry.

''We have a clear goal which is to compete with magnetic storage,'' Olafsson said. ''Another goal is to take care of customers' needs and create products that can meet those needs.''

Two other Japanese manufacturers, Ricoh Co. and Canon Inc. are Sony's main competitors in the new high-tech sector. But Sony could have an additional competitive hedge through its subsidiary Publisher Data Service Corp., which produces optical disks aimed at the consumers market, such as encyclopedias or learning programs.

Sony is banking its success in optical technology products will result from its control of the entire production line, since the company produces the basic components, the drive, the disk and the software.

Sony last year reported worldwide sales of $16.3 billion and net income of $549 million.

#90173u1476 06/22/1990 ~United Press International

LONDON (JUNE 22) UPI - A blaze swept through an 18th century mansion in central Buckinghamshire Friday, causing an estimated $86 million in damage to the building owned by an Arab sheikh and crammed wih antiques and art works, officials and news reports said.

Officials, however, said they had not yet determined what started the blaze at Dropmore House in Burnham, 30 miles northwest of London.

Flames, some 30-feet-high, damaged walls and ceilings and gutted the entire east wing of the stately $20 million house that included a room in which there were six solid gold chairs.

Authorities deployed more than 80 firemen and 12 fire engines to battle the blaze, which raged for nine hours before being controlled.

''The trouble with these old places, is that once they get going they take an awful lot of stopping,'' a fire officer said. ''These houses were not built with fire prevention in mind, so there is a lot of old timber, and voids that fire spreads behind.''

He said personnel had managed to retrieve many articles, but various other items were consumed by the flames. He would not estimate the cost of the damage, but the Evening Standard newspaper put the figure at about $86 million.

The house is owned by Mahdi Al-Tajir, a former ambassdor to Britain for the United Arab Emirates who is one of the world's richest men. He has about 30 properties around the world, including three central London homes and castles in Kent and Scotland.

Al-Tajir, 58, is renowned as one of the world's greatest collectors of gold and silver. Armed robbers in January stole the equivalent of $8.6 million from Dropmore House, and Al-Tajir four years before paid about $3 million demanded by kidnappers as ransom for his brother.

UNITED NATIONS (JUNE 22) UPI - Nelson Mandela thanked the United Nations Friday for waging a nearly 45-year diplomatic fight against South Africa's system of racial segregation and asked member states to continue their

economic sanctions against his homeland.

''We pay tribute to this organization and its member states for this (diplomatic effort) and other decisions and actions it took to expunge this crime,'' Mandela said.

Calling the apartheid system an ''indelible blight on human history,'' Mandela urged the world body to suppress the racial policy and to punish its ''perpetrators.''

The silver-haired, 71-year-old deputy president of the African National Congress asked the world community not to relax its economic measures against South Africa.

The U.N. General Assembly last December adopted a declaration outlining steps to be taken to dismantle apartheid, including stepped-up economic sanctions on South Africa and financial assistance to southern African nations.

Mandela said the world community still has ''some distance to travel'' before the declaration would be implemented.

Mandela was warmly received in the General Assembly, packed with more than 2,000 people. The United Nations had repeatedly pressed for Mandela's release from prison in South Africa.

Ambassadors representing the United Nations' 159 member states were present, as well as New York Gov. Mario Cuomo, New York City Mayor David Dinkins, boxing promoter Don King and boxer Mike Tyson. Mandela was a boxer in his youth.

''We thank you most sincerely for (the U.N. fight against apartheid), especially because you have given us the opportunity to join hands with you in the search for a speedy solution to the enormous problems facing our country, our region and continent and humanity as a whole,'' Mandela told the U.N. representatives.

The ANC leader canceled several appearances in New York, reportedly because he was tired, but at the U.N. he showed no sign of fatigue.

He asked that the European Community, which is to meet next week in Dublin Ireland, to review economic sanctions against South Africa and to remain ''faithful'' to the purposes contained in U.N. resolutions against apartheid that it has supported.

But he also commended the present South African government in Pretoria.

''We believe that President (Frederik) de Klerk and his colleagues in the

leadership of the ruling party are people of integrity,'' Mandela said. ''We are of the view that they will abide by decisions that are arrived at in the course of our discussions and negotiations.''

Mandela warned the world not to underestimate reported threats of assassination against him and de Klerk, but he said the ANC will do everything it can to bring about a ''peaceful abolition of the apartheid system.''

Mandela hugged Secretary-General Javier Perez de Cuellar when he stepped inside the U.N. headquarters and the two met privately for almost an hour. The U.N. leader called Mandela the ''most popular man in town.''

Perez de Cuellar said in an address to the General Assembly that Mandela has shown ''no rancor or vengeance'' since his release from prison in February and his statements ''simply express his vision for a democratic and non-racial society.''

Mandela's appearance in the General Assembly hall was sponsored by the U.N. Special Committee Against Apartheid, which formulated most of the U.N. measures against the South African regime.

#90173u1493 06/22/1990 ~United Press International

NEW YORK (JUNE 22) UPI - Lisa Ann Jones, a trading assistant convicted for lying to a grand jury investigating Wall Street corruption, was resentenced Friday to 10 months in prison and a $25,000 fine after an appeals court found her original sentence was too stiff.

Jones, 27, was sentenced last year to 18 months in prison and a $50,000 fine for her conviction on seven counts of perjury and obstruction of justice, but the 2nd Circuit U.S. Court of Appeals in March ordered her to be resentenced.

Jones, a former Drexel Burnham Lambert Inc. trading assistant who worked under junk bond king Michael Milken, suffers from psychological problems and already has paid dearly for her crimes, her attorney argued in asking U.S. District Court Judge Leonard Sand for leniency.

''Nothing takes away this agony for very long,'' Jones wrote to the judge in a letter read aloud by her attorney. ''I've been shattered and humiliated. I don't even know where to begin to try to rebuild my life.''

Jones, clad in a white tee-shirt and long, flowered skirt, sat crying quietly throughout the court proceeding and broke into sobs as the judge pronounced the new sentence.

Jones was convicted in March 1989 for lying to protect her superiors during her testimony before a grand jury investigating insider trading and other stock scandals on Wall Street.

During the investigation, it was relealed that Jones was a runaway who lied about her background and education, but worked her way up to a $100,000-a-year post at Drexel's Beverly Hills, Calif., office executing orders for traders under Milken.

Milken, credited with masterminding the use of junk bonds that fueled the corporate takeover frenzy of the 1980s, pleaded guilty in April to six counts of securities law violations and agreed to pay a $650 million fine. He is scheduled to be sentenced in October.

Jones' immediate superior, former Drexel junk bond trader Bruce Newberg, was convicted last year for his role in a stock scandal involving the now-defunct Princeton/Newport Partners Ltd.

The 10-month prison sentence imposed Friday by Sand, whose earlier sentence was overturned by the appeals court, was the minumum under federal sentencing guidelines.

The appeals court had ruled the earlier, longer sentence was unwarranted because Jones' crimes did not amount to the kind of ''substantial interference with the administration of justice'' covered in the stiffer sentencing guidlines.

Jones was ordered to report in 30 days to a federal miminum security facility near Phoenix, Ariz. She is eligible to be transferred to a halfway house in Los Angeles after five months.

The judge also imposed two-and-a-half years probation and ordered Jones to continue undergoing psychotherapy.

''She is a young woman with very serious psychological problems,'' her attorney said in court. ''She needs help, not punishment. She needs treatment, not to be made an example of.''

But Assistant U.S. Attorney Neil Cartusciello noted that Jones still has not cooperated with government investigators.

''Her evidence remains concealed,'' he said. ''Her knowledge remains within her.''

According to transcripts read at her trial, Jones denied to the grand jury any knowledge of illegal trading activities.

However, the government had made potentially damaging tape recordings of

Jones' conversations with another Princeton/Newport trader. Jones later indicated she wanted to change her grand jury testimony, but the government pursued the perjury charges against her instead.

On the witness stand during her trial, Jones said she answered the grand jury's questions ''inaccurately because I could not remember.''

Her attorneys said she executed thousands of trades each year at Drexel and could not be expected to recall all of them.

#90173u1520 06/22/1990 ~United Press International

(JUNE 22) UPI - The Western powers quickly rejected a Soviet proposal today that a united Germany achieve sovereignty only after a transitional period. The proposal and the quick rejections came at the second ministerial session of the German unification talks in East Berlin. Soviet Foreign Minister Eduard Shevardnadze proposed that East and West Germany remain in NATO and the Warsaw Pact for five years. The United States, Britain and France rejected the idea.

Nelson Mandela takes his campaign against South African apartheid to the

United Nations today with an address to the U-N General Assembly. The speech comes on the third day of the African National Congress leader's New York visit. Tonight, he's to visit a Manhattan nightclub, and tomorrow he travels to Boston. On Sunday, he heads for Washington, D-C, where he'll meet with President Bush.

Hospitals in Tehran are filled with earthquake survivors flown in from areas devastated by yesterday's powerful quake. Tehran Radio today reported the death toll at 32-thousandN mission says 100-thousand people were hurt. Rescue work continued through the night, but thousands are believed still buried under the rubble in hard-to-reach areas. U-S officials say the quake measured seven-point-seven on the Richter scale.

A Washington, D-C, city official testified today that he saw drugs in a hotel room Mayor Marion Barry was visiting in December 1988... the same night that a convicted drug dealer has testified he shared crack cocaine with the mayor. The testimony at Barry's drug and perjury trial came from public works official James McWilliams. He testified that he lied to police about seeing the drugs because he did NOT want to add to Barry's problems.

#90173u1522 06/22/1990 ~United Press International

CAPE CANAVERAL, FL (JUNE 22) UPI - A $150 million communications satellite was cleared Friday for launch atop a Titan 3 rocket modified to prevent a repeat of an embarrassing failure in March that left an identical relay station stranded in a useless orbit.

''We will do anything to make sure that the mission is, in fact, successful,'' said Ed Browne, president of Commercial Titan Inc. ''If that causes us to spend more than we're going to make, then we'll do that.''

The commercially-built $120 million Titan 3 and its uninsured Intelsat 6 satellite payload were scheduled for liftoff at 7:19 a.m. EDT Saturday from launch complex 40 at the Cape Canaveral Air Force Station. Meteorologists predicted a 90 percent chance of favorable weather.

The last Titan 3 launch - on March 14 - put an identical Intelsat 6 satellite into a useless orbit because a wiring error in the Titan second stage payload ejection mechanism prevented the relay station's separation from the rocket.

It was only the second flight of a commercially-built Titan 3 and a major failure for rocket-builder Martin Marietta Astronautics Group of Denver, struggling to win business from the European Ariane rocket program and other U.S. launch companies.

Controllers with the International Telecommunications Satellite Organization - Intelsat - ultimately sent commands that caused the stranded spacecraft to separate instead from its on-board rocket booster, leaving the otherwise healthy spacecraft stranded in a safe-but-useless orbit that was later raised to an altitude of 345 miles.

Intelsat announced last week that it will pay NASA some $90 million to mount a space shuttle rescue mission in February 1992 in which two spacewalking astronauts plan to attach a new rocket motor to the satellite so it can continue on its way to the 22,300-mile-high orbit required by communications stations.

In the meantime, Intelsat proceeded with previous plans for Saturday's launch atop the third commercially-built Titan 3 rocket, which can carry up to two satellites at once. For Saturday's launch and the one last March the Intelsat 6 spacecraft were the only ones on board.

Browne said the March mishap was caused by a communications problem at the factory in which engineers reversed two electrical cables. As a result, the separation command went to the wrong satellite position, the one ''where the payload was not.''

''I have to tell you, we were embarrassed over that failure, we don't like to have failures,'' Browne said at a news conference Friday. ''Martin Marietta's reputation is one of mission success and we hold that foremost in our mind.''

The Intelsat 6 satellite scheduled for launch Saturday cost around $150 million. Like the one stranded in March, it was not insured and under the terms of the launch contract, Martin Marietta's responsibility ended at the moment of liftoff.

But Browne said Martin Marietta went to great lengths to ensure a safe launch and paid for the use of an Air Force tracking plane to monitor the satellite separation procedure directly. When all the bills are added up, he said, the company will make very little, if any, profit on the mission.

''We have gone through exhaustive reviews, we have asked (Intelsat) to participate in it and they have,'' Browne said. ''They have not attempted to rub our nose in what we did.''

The satellite set for launch Saturday is the third in a series of five Intelsat 6 communications stations built by Hughes Aircraft Co. of El Segundo, Calif., and owned by Intelsat, a non-profit consortium of 118 member nations.

With an expected lifetime of more than 13 years, the Intelsat 6 satellites are the largest and most powerful such communications stations ever built

on a commercial basis.

Each spacecraft is equipped with 48 radio transponders, allowing them to carry a minimum of 24,000 simultaneous two-way telephone conversations and three simultaneous color television channels - a far cry from Intelsat's first ''Early Bird'' satellite, which carried just 240 telephone circuits or one TV channel.

Intelsat spacecraft mission director Frederick Ormsby said that by using ''digital circuit multiplication equipment on the ground, we can increase this capacity to 120,000 simultaneous circuits'' for Intelsat 6 by quickly switching between six coverage regions with connection times as short as 4 microseconds.

(JUNE 22) UPI - Thunderstorms rattled the Plains and Midwest with heavy rains early today across Arkansas and parts of Oklahoma, Texas and Louisana. Forecasters recorded 15 cloud-to-ground lightning strikes per minute in parts of eastern Arkansas early today. Heavy downpours were reported across northeastern Kansas, where residents were told to watch for flash flooding.

The fate of a constitutional amendment designed to keep Quebec from seceding from Canada rests today with Newfoundland and Manitoba... the last two provinces left to approve it. The amendment must be approved by all 10 Canadian provinces by midnight Saturday or it will expire. A spokesman in Newfoundland says a vote is expected. But there are indications that a Cree Indian member of the Manitoba legislature will scuttle the amendment by denying lawmakers the opportunity to extend debate on the matter into tomorrow.

Israeli Prime Minister Shamir predicts Israel's ties with the United States will improve now that Washington broke off a dialogue with the Palestine Liberation Organization. Shamir says he is encouraged by an announcement this week that President Bush is suspending diplomatic ties with the P-L-O. Shamir said the move- quote- ''brings us back to the period when the United States was a partner to our position regarding the P-L-O.''

#90173u1532 06/22/1990 ~United Press International

CHICAGO (JUNE 22) UPI - Grain and soybean futures tumbled to session lows about midday Friday on the Chicago Board of Trade.

Closing prices were lower across the board in fairly active trading.

The market was pressured by forecasts for cooler and drier weather during the weekend and into the early part of next week. The prospect of favorable growing conditions weighed on corn and soybean prices, and wheat was lower on the likelihood of increased harvest activity.

Losses were limited by news that Morocco will be in the market next week for about 40,000 tons of soybean oil and that the Philippines has been offered 1 million tons of wheat.

Soybeans rallied from session lows during the final minutes on short-covering, but closed with moderate losses.

Commercial selling and the lack of buying interest pressured corn prices. Profit-taking and positioning ahead of the weekend contributed to the losses.

Wheat futures followed corn and soybeans to lower levels.

Country movement was light.

At the close, corn was off 2 1/4 to 4 1/2, soybeans down 3 3/4 to 7, wheat off 4 1/2 to up 3/4 and oats down 5 to 6 1/4 cents.

#90173u1536 06/22/1990 ~United Press International

BOSTON (JUNE 22) UPI - The black neighborhood best known by outsiders for drugs, crime and being a loser in the war on poverty is rallying its pride for Nelson Mandela's first stop in Boston Saturday.

After arriving from New York, Mandela will visit Madison Park High School, a multi-cultural vocational school in the city's predominantly black Roxbury section, where he will speak to students, politicians and community leaders.

Outside the school, Roxbury artist Paul Goodnight and three students put the finishing touches Friday on a 9-foot by 15-foot mural celebrating Mandela and the principles for which he stands.

It shows Mandela, flanked by a boy and a girl, with the African symbols for knowledge, love, cultural growth, power and the dove of peace.

''They are universal symbols that all of us are dealing with,'' Goodnight said. ''This visit speaks about goals, not obstacles.''

For Roxbury residents Mandela is a symbol not only of freedom but of the hope for a better life.

Three years ago, community activists launched an unsuccessful movement to secede from Boston, arguing city officials were ignoring the blighted neighborood's needs. They wanted to call their new community Mandela.

One Madison Park student, George White, 16, said he takes pride in the way Mandela fights for the rights of black people. ''He doesn't do it by shooting and violence. He does it by praying, waiting and hoping,'' White said.

Themba Vilakazi, director of the Fund for a Free South Africa, which is coordinating Mandela's Boston schedule, said he hopes Mandela will inspire Bostonians to follow his example in his persistent push for racial equality.

''My wish is that all of us in our own way can emulate the life of Nelson Mandela and work for social justice in our communities,'' Vilakazi said.

Nelson Mandela's U.S. tour hits Boston with hundreds of thousands of spectators expected to pack the banks of the Charles River to hear the black South African leader and an accompanying star-studded concert.

After his speech at the high school and a motorcade through several Boston neighborhoods, Mandela, 71, will lunch with Sen. Edward Kennedy, D-Mass., at the John F. Kennedy Library overlooking Boston Harbor.

The biggest event of his daylong Boston schedule is a public rally and six-hour concert at the Charles River Esplanade expected to draw more than 250,000 people. Featured artists include Paul Simon, Jackson Browne, Michelle Shocked, Bobby McFerrin and several South African performers, including Ladysmith Black Mambazo and Johnny Clegg & Savuka.

Mandela, who was freed Feb. 11 after 27 years in South African prisons, is expected to address the crowd at 4 p.m.

An organizer of Mandela's Boston visit said ''thousands and thousands and thousands'' of people were expected to attend the outdoor speech and concert.

He will attend a fund-raiser Saturday night at the Copley Plaza Hotel. More than $300,000 had been raised to benefit the Fund for a Free South Africa and the Nelson Mandela Freedom Fund.

Mandela is expected to fly to Washington on Sunday.

Along with the public appearances, Mandela will be reunited with his eldest daughter, Makaziwe ''Maki'' Mandela-Amuah, a graduate student at the University of Massachusetts at Amherst. Mandela-Amuah plans to see her

father this weekend for the first time since his release from Victor Verster prison farm in South Africa.

Another daughter, Zenani Mandela-Dlamini, joined her father in New York City. Mandela-Dlamini is an undergraduate at Boston University.

#90173u1539 06/22/1990 ~United Press International

WASHINGTON (JUNE 22) UPI - Although a federal appeals court panel ruled last week the Securities and Exchange Commission cannot prevent publicly traded companies from issuing multiple classes of stock, the rule in question will likely be maintained, industry sources said Friday.

Known as the one-share, one-vote rule, the measure says companies that want to be listed on national stock exchanges could not issue new classes of stock with voting rights that would disenfranchise existing stockholders.

On June 12, a three-member panel from the Court of Appeals for the District of Columbia Circuit ruled that voting rights were matters of corporate governance and thus should be decided by states rather than the SEC.

While the SEC is expected to fight the decision, perhaps in the Supreme Court, some experts have said the stock exchanges will continue to follow one-share, one-vote rules, if only to preserve their exemptions from state securities laws.

The SEC has until mid-July to either ask the appeals panel for a rehearing or request the full court of appeals, which has ten members, to review the panel's decision. If either is turned down, the SEC can petition the Supreme Court for a review of the case.

But David H. Gunning, head of the corporate law division for the law firm Jones, Day, Reavis & Pogue, said the Supreme Court would likely refuse anyrequest.

"If you look at the kind of cases (the Supreme Court) takes, they usually are cases where there is a disagreement among the circuit courts" - which has not happened with the SEC case - "or cases that may have major societal impact," Gunning said. "This case has important ramifications for those in the corporate world, but I don't think it is important societally " he added.

Corporate raiders would suffer the most from those ramifications. If the ruling stands, companies could seek to fend off hostile takeover attempts by issuing blocks of stock with enhanced voting rights to friendly investors, known as white knights, siding with management.

In 1988, around the height of the recent spate of corporate takeovers, the New York Stock Exchange asked the SEC for rulemaking help aimed at clearing up the issue of multiple classes of stock.

The SEC's response was to create the rules it is now defending. But even if the SEC loses its court battle, the exchanges will likely create or maintain their own one-share, one-vote rules.

The issue in court, Gunning said, was not really one-share, one-vote. In reality, the SEC and the court grappled over the agency's right to establish its own federal corporate laws, according to several industry experts.

"The real issue ... was whether the SEC was going to get away with creating a federal corporate law in which they would be both the legislature and the judge in (creating) legislation and interpreting it," Gunning said.

Thus, the one-share, one-vote rule, the vailidity of which was never really addressed, will continue to hold a place in stock exchange listing rules.

Already, the National Association of Securities Dealers, which oversees the over-the-counter and NASDAQ markets, has announced it may introduce a one-share, one-vote rule pending an SEC appeal. It would likely be similar to the SEC's one-share, one-vote rule, which was originally written by the NASD.

The NASD gave as a reason the need to uphold certain listing standards - some of which cover voting rights - to maintain exemptions to states' securities laws.

At least one state agency, the California Department of Corporations, is closely following developments on the one-share, one-vote issue. "We are encouraged by the NASD's plan to adopt a rule similar to (one-share, one-vote) regarding voting rights," said Bill Kenefick, assistant commissioner for the California agency.

California regulators had earlier asked the NASD to adopt corporate governance standards if its stocks were to be exempt from state securities laws. Other states may make similar requests if the SEC loses in court.

#90173u1553 06/22/1990 ~United Press International

COLOMBO, SRI LANKA (JUNE 22) UPI - More than 65 people were killed, including at least 50 villagers, and an unknown number abducted in a 24-hour period of separatist-linked violence in northeastern regions of

the island, military and police sources said Friday.

Only 15 of the dead were regular government troops, they reported.

The most serious incident took place in the village of Nintavur, 32 miles from the eastern provincial capital of Batticaloa, where separatist Tamil Tiger guerrillas killed more than 50 villagers and kidnapped an unknown number of others.

Details of the incident were sketchy but security sources said it occurred Thursday night when well-armed rebels attacked the village.

A Defense Ministry statement Friday night on separatist violence gave no details of the incident, saying only that Tiger rebels looted Muslim homes in Nintavur and assaulted its residents.

Ten soldiers were killed, meanwhile, and an unknown number wounded when the separatists rebels continued an attack for the third day on the main military base in the northern Jaffna peninsula at Palaly, 10 miles to the north.

Since Wednesday, troops at the camp have come under heavy mortar, machine gun and small arms fire whenever they ventured out to extend the perimeter and secure the airfield.

Earlier, four soldiers and two air force men, including an officer, were killed at Palaly.

In another camp, located in an old Dutch fort, on the Jaffna peninsula more than 400 troops were surrounded and under fire by rebels with mortars machine gun and small arms.

A Defense Ministry official said helicopters Friday night dropped food inside the camp but added that military headquarters in Colombo and the military base in Palaly both have lost radio contact with the base.

The rebels Thursday also attacked and overran the Kondachchi military detachment, located near the northwestern coastal town of Mmannar, military sources said.

One officer and 22 soldiers in the camp managed to escape with their weapons. Five were killed and three were missing, the sources said. Others made their way to the neighboring Silavaturai army camp, the sources said.

The Sri Lankan government claimed Thursday it had recaptured the eastern part of the country, where fighting erupted 10 days ago and triggered a major confrontation between the rebels and security forces. Authorities say more than 800 soldiers, police, rebels and civilians have been killed

in the fighting.

The Tamil Tigers are demanding a separate state because they believe the country's Tamil minority, which is predominantly Hindu, has been discriminated against for years by the Sinhalese majority, which is mostly Buddhist.

WASHINGTON (JUNE 22) UPI - The Iranian government told the State Department that it would welcome earthquake relief supplies through the American Red Cross or other humanitarian agencies, officials said Friday.

State Department officials said the United States contacted Iranian government officials through diplomatic channels to offer assistance.

State Department spokesman Ricahrd Boucher said, ''It is clearly a human tragedy. We want to be helpful, without regard to our political

differences with Iran.''

Boucher said the Iranians have responded that ''they would welcome assistance from either the American Red Cross or other such organizations.''

Officials with the Office of Foreign Disaster Assistance of the U.S. Agency for International Development said a list of the aid supplies would be ready by late Friday and the material would be supplied through the Red Cross, which would deal with the Iranian Red Crescent Society.

Iranian officials have informed United Nations disaster relief officials in Geneva that Iran needs such things as blankets and tents and some kinds of food, but would not accept ''non-Islamic'' things such as search dogs or some kinds of foods, and western doctors would not be required.

WASHINGTON (JUNE 22) UPI - Rates on 30-year fixed mortgages increased to 10.16 percent from 10.12 percent and adjustable-rate mortgages held steady at 8.50 percent, the Federal Home Loan Mortgage Corp. said Friday.

The fixed-rate average is for a 30-year loan covering 80 percent of a home's cost. The average adjustable-rate mortgage also is for 30 years, but for 75 percent of the home price.

PHILADELPHIA (JUNE 22) UPI - Three premature infants died after being fed a faulty intravenous solution at Albert Einstein Medical Center, prompting hospital officials Friday to fire two pharmacy employees.

The babies died on June 15 and 16 after they were given a solution that was incorrectly prepared in the hospital's pharmacy, Center President Martin Goldsmith said.

A third employee was briefly suspended, but was reinstated Friday after it was determined he was not at fault, a hospital spokesman said.

Goldsmith said the potassium-rich formula caused the babies' heartbeats to drop and led to their deaths. He said the infants, two boys and a girl, were all in the hospital's neonatal intensive care unit. All had been born premature and weighed less than three pounds.

''The infants were given an IV solution, incorrectly prepared in the pharmacy, that contained potassium,'' Goldsmith said. ''The potassium caused a drop in heart rate in the three babies. Despite aggressive resuscitation efforts, the infants died.''

Medical examiner's office spokesman Bill Gilbert said Friday that all three deaths had been ruled accidental. Gilbert said the infants died of

hyperkalemia, an abnormally high level of potassium in the blood.

The infants, all of whom are from Philadelphia, were identified as Latoya Simmons, 1 month, George Rodriguez, 3 months, and Rayna Williams, 15 days.

Goldsmith said he has ordered mandatory in-service training for all pharmacy personnel and has hired an independent group of experts to review saftey procedures at the pharmacy.

He said the case has been turned over to the medical examiner's office.

The hospital would not release the names of the fired employees.

He said an internal investigation blamed the deaths on human error in the pharmacy department. The pharmacy workers incorrectly prepared a batch of heparin solution, which is used to flush IV tubes after medication is administered.

''The IV solution should have contained heparin, dextrose and water. Instead, it contained heparin and potassium,'' Goldsmith said.

''We extend our deepest sympathy to the families involved,'' he said. ''They, of course, have our full support.''

''We are certain this was an isolated occurrence due to human error, and we want to make sure we're doing everything possible to prevent future accidents.''

#90173u1577 06/22/1990 ~United Press International

OAKLAND, CA (JUNE 22) UPI - Environmentalists, led by ex-Sierra Club director David Brower, protested outside the courthouse Friday as the arraignment for two Earth First! members on controversial bombing charges was delayed again.

Assistant District Attorney Chris Carpenter told Municipal Court Judge Jack Gifford that prosecutors were not ready to go ahead.

The judge continued the case to July 18 when Carpenter said the investigation, including FBI forensic test results, was expected to be completed. The prosecutor said it will be decided then whether charges will be filed.

''We are deeply disturbed that the district attorney has not taken the opportunity to clear (Judi) Barri and (Darryl) Cherney of these charges,'' Barri attorney Susan Jordan told the judge. ''However, we will return with great optimism that this cloud of suspicion over their heads will be

removed.''

About 75 demonstrators representing various environmental groups rallied outside the courthouse, chanting ''Free the Redwood Two; It could have been me or you.''

Some carried banners in support of the two accused Earth First! leaders.

Cherney and Barri were arrested after a nail-packed pipe bomb exploded in their car in Oakland May 24. They were accused of knowingly carrying the explosive, angering environmentalists across the country.

Their scheduled May 29 arraignment was postponed, however, when prosecutors decided to investigate further before deciding whether to charge them.

The two Earth First! members insist they were targets of an assassination attempt for their organizing efforts for the anti-logging ''Redwood Summer'' protests.

Barri remains hospitalized for a broken pelvis and abdominal injuries suffered in the car blast, but Cherney, out on $100,000 bail, appeared in court and addresed the crowd of supporters.

At a news conference afterwards, he was asked if the bombing incident hadn't helped Earth First!'s cause.

''An act of terrorism has taken place and we have no choice but to try to make the best out of a horrible situation,'' Cherney said.

A statement by Barri, written from her hospital bed, was read to the crowd.

''We are being targeted for infiltration, disruption and destruction and violence because we are effective organizers,'' Barri said. ''We have begun to speak, not just about destruction of the earth, but about the system that has has destroyed it.''

Brower drew loud applause from the protesters, saying, ''Now that the Cold War is over, the FBI seems to be replacing the Red Menace with the Green Menace. This nation and this world is in danger, and Earth First! is trying to give CPR to the environmental movement.''

#90173u1623 06/22/1990 ~United Press International

ATLANTA (JUNE 22) UPI - The Atlanta Braves, with the worst record in the National league, Friday fired Manager Russ Nixon and replaced him with their general manager, Bobby Cox.

''We had talked about this, but didn't give serious thought to terminating Russ until the last few days,'' Cox said. ''I wanted to see Russ succeed. But the strain on him and the players was bearing pretty hard.''

Under Nixon, the Braves finished with the league's worst record last season (63-97). They were off to a 25-40 start this year, with only the New York Yankees in the American League in worse shape.

''It will be my job to perk up this team,'' Cox said. ''I'm not afraid of a challenge. I'm not going to worry about my job.''

Cox previously managed the Braves from 1978 to 1981 and then spent four seasons as manager of Toronto before returning to Atlanta as general manager in October 1985. The Braves finished last under Cox in 1978 and 1979.

''We felt a change was necessary at this time,'' Braves President Stan Kasten said. ''Bobby has had success as a manager and certainly knows our personnel. We appreciate all that Russ has done for us and wish him well.''

Cox said he notified Nixon of the decision Friday morning.

''I haven't even had a chance yet to talk to the coaches or the players,'' Cox said.

Cox returned for Friday night's game in Atlanta against San Diego, his first managerial stint in more than four years.

''I'll need a lot of help from the coaches,'' he said. ''It's been a while since I've been on the field.''

Nixon is the third manager to be fired this season, following Davey Johnson of the New York Mets and Bucky Dent of the Yankees.

Cox is in the last year of a five-year contract, but Kasten indicated he

would be back next year, either as general manager or manager.

''It won't be both,'' Kasten said. ''If Bobby, for whatever reason, had not wanted to take on the dual role now, we'd have found someone else to replace Russ.

''The general feeling was that we're 25-40 and we're a better club than that. It was not working out as well as we had hoped and we didn't want to waste the rest of the season. This is not criticism of Russ. We just felt a change might enable us to get more out of the season.''

Nixon succeeded Chuck Tanner as manager in May 1988. In the little more than two full seasons that Nixon managed, the Braves were 130-216, finishing last in the NL West in 1988 and 1989.

Cox, 49, began his managerial career in 1971 after playing professional baseball for 12 years, mostly in the minors although he was with the New York Yankees in 1968 and 1969.

The Braves Friday called pitching coach Lee Mazzone from Richmond of the International League and replaced him with Atlanta pitching coach Bruce Dal Canton.

Cox indicated he will be making more coaching changes, but added he had no timetable at the moment.

''This thing just came to a head yesterday,'' he said.

Cox and Kasten said they feel the team has been on the right track the past few years, even though the Braves have been unable to escape the cellar.

''We got rid of a lot of our older players and have spent a lot of time and money developing younger players in our farm system,'' Cox said. ''We think we did the right thing.''

SENATE CONFIRMS NOMINATIONS OF U.S. AMBASSADORS TO SEVEN NATIONS

WASHINGTON (JUNE 22) UPI - The Senate Friday confirmed the nominations of U.S. ambassadors to seven nations, including Joseph Edward Lake, a career foreign service officer, as the envoy to Mongolia.

Lake was confirmed by voice vote and without debate along with the six other ambassadors.

Also confirmed were: David Passage, Botswana; Richard Wayne Bogosian, Chad; William Milam, Bangladesh; James Daniel Phillips, Congo; Roger Gran Harrison, Jordan; and William Bode, Marshall Islands.

#90173u1641 06/22/1990 ~United Press International

NEW YORK (JUNE 22) UPI - The mystery of the 'Zodiac' gunman case deepened Friday with a disclosure suggesting the gunman knew something about his four victims and stalked them down before shooting them.

Police confirmed that each victim's birth date corresponds to the astrological signs listed in notes apparently written by the shooter, whose work had originally been described as ''random.''

The chilling evidence, suggesting the gunman hunts down victims about whom he at least knows the astrological sign, emerged after the so-called Zodiac shooter struck a fourth time, leaving a 30-year-old homeless man critically wounded in Central Park Thursday.

The New York Post said Friday that the astrological sign on a handwritten note left at the scene was identical to the victim's astrological sign of Cancer.

''We are checking every aspect,'' Sgt. Peter Sweeney, a police spokesman said.

He refused to speculate about whether or not the gunman knows his victims, but confirmed the Post's report that the three earlier victims each have different astrological signs that correspond to the Taurus, Scorpio and Gemini signs in notes sent to the two news organizations last week.

None of the gunman's targets has died but investigators have said its seems the gunman believes his shootings were fatal.

An early cryptic warning with a threat to kill 12 people was sent to Brooklyn's 75th Precinct last November but not taken seriously - until a police officer remembered it and prompted detectives to dig it out of files, Sweeney said.

Test results Thursday showed the letter was written by the same author as the other notes.

''The sign is dead,'' proclaimed the note, indicating the sign of Taurus and included other scrawlings similar to those on other letters, Sweeney said.

Thursday's shooting was the first outside an area bordering Brooklyn and Queens and investigators said they were forced to widen their search across the whole city.

The investigation is being headed by Chief Joseph Borrelli, who led the city's hunt for ''Son of Sam'' killer David Berkowitz. Berkowitz killed six and wounded seven in a year-long series of shootings before his capture on Aug. 10, 1977.

Investigators have ruled out any link to ''The Zodiac,'' who was never captured but claimed as many as 40 murders in a series of notes sent to San Francisco-area newspapers from 1968 to 1987.

An expert on serial killers described the gunman as roughly a cross between Berkowitz and ''The Zodiac.''

''Zodiac,'' a 1986 book by Robert Graysmith on the San Francisco case, appears to be something of a manual for the shooter, said the expert, Candice Skrapec.

''The drawings, the name 'Zodiac', the astrological components, they are similar, but his M.O. is very different,'' said Skrapec, a psychologist and profesor of criminology at John Jay College of Criminal Justice.

''He shares more in common with 'Son of Sam,''' she said. ''In California, there was a very personal element to those attacks'' which often included sexual assault and stabbing.

She suggested public notoriety was a prime motivation of New York's ''Zodiac.''

''One thing appears to be clear is the underlying motivation to secure some kind of attention from us, from society. He's probably had a lifelong history as an individual who didn't seem to count a lot and he probably felt he deserved more from life, from us. Since that (attention) was not forthcoming, he would take it from us.''

-30- 3731

#90173u1652 06/22/1990 ~United Press International

WASHINGTON (JUNE 22) UPI - Gen. Colin Powell, chairman of the Joint Chiefs of Staff, Friday urged a ''realistic, prudent'' scaling back of U.S. military forces in the face of world changes.

While acknowledging dramatic transformations in the Soviet bloc and elsehwere in the world, Powell said, ''This is still a dangerous world and you better be able to respond when someone challenges your interests.''

Speaking to the National Press Club, Powell said that ''the question now is how to shape our armed forces in a way'' that is responsive to the changes, ''yet adequate to deal with dangers inherent in such a tumultous environment.''

Congress, in reviewing budget priorities, ''will soon make a judgment'' on reducing the defense budget, Powell said, adding, ''We know we will get smaller. But as we get smaller, we also need to get better.''

He said the U.S. military would become ''hollow'' if reductions are made too quickly or severely.

The military services are working on plans for reducing their sizes, but, he said, ''We need some breathing space. We need time to make the plans work.''

Powell said the new blueprint for the Pentagon should ''reflect a realistic, prudent response to the changed world and our need to reduce our defense spending.''

In discussing ''the realities we will continue to face,'' Powell said the United States must continue to be wary of the Soviet Union, despite reductions and withdrawals in their forces.

The Soviet Union ''is still a nuclear power. ... That is the No. 1 concern to us ... now and in the future it is the only country that has the capacity to destroy the United States in 30 minutes.

''They won't give it (the nuclear arsenal) up. Don't expect them to,'' he said.

Powell said Soviet conventional forces ''are smaller, but they're modernized, they're intact'' and still the major military power on the Europe-Asia land mass.

''And in return we must ensure that our strategic forces ... all three legs of the triad ... are never second best,'' Powell said.

He said the administration and the military leaders will continue to fight for the B-2 bomber, strategic defense initiative and other ''essential components,'' while at the same time pressing ahead with strategic arms negotiations.

The decline of communism does not eliminate the need for the United States to be ''engaged in a superpower way'' in Europe, the Pacific and elsewhere Powell said.

''Just because communism seems to be going away, our interests are not

going away with communism.''

LOS ANGELES (JUNE 22) UPI - Northrop Corp. plans to consolidate its aircraft business within the next 60 days, shifting some operations from Pico Rivera, Calif. to Palmdale, Calif. and elminating some surplus facilities in Hawthorne, Calif., it was reported Friday.

The company previously announced it would eliminate 3,000 jobs this year, but the consolidation creates the possibility that there will be even more layoffs, the Los Angeles Times said.

Northrop employs 41,000 people, about 70 percent of them in Southern California.

''We are looking at cost reductions across the board,'' said Northrop spokesman Tony Cantafio. ''We already announced that there are going to be

3,000 layoffs. We are always looking at achieving further cost reductions.''

As part of the consolidation, Northrop officials are looking at a wide variety of options, including the acquisition of additional facilities in Palmdale.

Northrop representatives held a meeting with Rockwell International earlier this week regarding that firm's surplus capacity in Palmdale, industry sources told the Times.

The consolidation at Northrop will fall under the general guidelines set down by company president Kent Kresa at the firm's annual shareholders meeting last month. Under Kresa's direction, the company sold its headquarters building in Century City and a manufacturing plant in Anaheim. It is reportedly seeking to sell a Palos Verdes research facility and a number of facilities in Hawthorne.

Northrop's elimination of 3,000 jobs is already creating some surplus space. Defense Secretary Dick Cheney in late April cut future production of B-2 bombers from the 132 originally planned to just 75, which may create even more pressure for consolidation on Northop.

Many of the buildings at Northrop's Hawthorne complex are old, and in some cases dilapidated, workers say. One Northrop worker told the Times last week that he was injured when he slipped in a quarter-inch pool of water that had leaked through the roof in a facility that makes components for the Boeing 747.

Northrop leases a significant number of buildings in Hawthorne, while it owns its Pico Rivera plant.

Lawrence Harris, an analyst with Bateman Eichler, Hill Richards, estimated that Northrop owns 218 acres of land in Hawthorne, worth $410 million.

#90173u1698 06/22/1990 ~United Press International

KIEV, UKRAINE, USSR (JUNE 22) UPI - The leader of the Ukrainian Communist Party resigned at a tumultuous party congress Friday, saying he wanted to concentrate on his position as chairman of the republic's Parliament.

After a fourth day of stormy debates on how to increase the dwindling prestige of the party and and solve growing economic problems, delegates to the party congress were voting Friday night for a new leader. Results were not expected until Saturday.

Ukranian Radio said there were originally nine candidates for the top

party post, but after outgoing party leader Vladimir Ivashko recommended his deputy Stanislaw Gurenko for the job, all dropped out of the race except Gurenko and Ivan Sali of the radical Democratic Platform.

Ivashko said he wanted to give up the party job to devote more time to his position as Chairman of the Ukranian Supreme Soviet, which is the republic's effective presidency. The practice of communist leaders simultaneously holding top party and government posts has increasingly been the subject of criticism by reformers.

Foreign reporters were kept away from the party congress at the Kiev Palace of Culture by a guard who said, ''It is a working session of communists, and foreigners are not welcome.''

The party sent an official outside to brief two reporters on the debate inside, but he refused to give his name.

''We lost our prestige,'' the official said. ''The congress is debating how to rebuild it.''

He said a special commission was set up to reduce the privileges of leading communists, evident by the three dozen or so black Volga sedans parked outside the hall. The rest of the 1,676 delegates traveled to the meetings in chartered buses.

The official said this week's meeting was the stormiest party congress ever held in the republic, which is the Soviet Union's second largest by population.

He said while in past years only about 200 people spoke at party congresses, this time about 1,000 speakers participated in eight subject groups.

''It is democracy, but it's still a fledgling democracy,'' he said, adding that there were frequent clashes between old-style party conservatives and members of the Democratic Platform.

''The Democratic Platform wants to speed up the political and economic reform and the others say the people have not been mature enough to have reforms,'' he said.

The official said the party would likely agree to ''round-table negotiations'' with the republic's nationalist Rukh movement on the economic problems illustrated by the long lines in the Ukranian capital.

''Being enemies we cannot build our common house,'' he said. ''We have to build this house together.''

(JUNE 22) UPI - South African black nationalist leader Nelson Mandela received a rousing and historic welcome at the United Nations today. About two-thousand spectators jammed the General Assembly Hall to give the African National Congress deputy president a standing ovation. Mandela thanked the United Nations for its support in the the fight against white-ruled South Africa's racial policies.

The League of Red Cross Societies says Iran wants only certain types of international aid for earthquake victims... in a bid to conform with ''Islamic rules.'' Red Cross officials in Geneva, Switzerland, say Iran wants only medicine, tents, blankets and dried foods... and NO doctors, medical technicians, search dogs or blood. The Red Cross says Iran will allow flights with medical supplies to land in Tehran, but those aboard the flights will NOT be permitted into quake-stricken areas.

The Soviet Union proposed today that a united Germany gain sovereignty only after a transition period... an idea promptly rejected by Western powers at unification talks. Soviet Foreign Minister Shevardnadze wants East Germany to remain in the Warsaw Pact and wants West Germany to stay in NATO for five years after merging into a single nation. U-S Secretary of State Baker and his British and West German counterparts said ''NO'' to the Moscow plan at the talks in East Berlin.

#90173u1730 06/22/1990 ~United Press International

ROME (JUNE 22) UPI - Three longshots are part of the unlikely ingredients for Saturday's start to the next round of the World Cup, where the stakes are higher and there are no second chances.

Sixteen survivors begin the next step on what they hope will be the road to Rome for the July 8 final.

Among those still standing for the second round is the surprising trio of Cameroon, Costa Rica and Colombia, while teams such as the Soviet Union, Austria, Sweden and Scotland have been sent home.

In Saturday's two games, a quarterfinal place awaits the winners of the

Cameroon-Colombia game in Naples and the Czechoslovakia-Costa Rica game in Bari.

In this single-elimination round, tie scores are followed by 30-minute overtimes. Deadlocks are then settled by penalty kicks.

On Sunday, it's Brazil vs. Argentina at Turin and West Germany vs. Holland at Milan. Monday, it's Ireland vs. Romania at Genoa and Italy vs. Uruguay at Rome. Tuesday, Spain vs. Yugoslavia at Verona and England vs. Belgium at Bologna.

Cameroon came to Italy regarded as cannon fodder, but opinions changed after they mauled defending champion Argentina 1-0 in the World Cup opener and dropped Romania 2-1. Cameroon fell to earht with a 4-0 loss to the Soviets but still finished first in Group B.

Colombia's progress in group D was less spectacuular, a 2-0 victory over the weak United Arab Emirates and a 1-0 setback against Yugoslavia, but a 1-1 draw against the powerful West Germans showed the team was no pushover.

Colombia Coach Francisco Maturana is likely to field the same team against Cameroon that produced the draw with West Germany with Freddy Rincon's last-minute goal.

''The African team play a type of game that can give us serious problems '' Maturana said.

Cameroon's Soviet coach Valery Nepomniachi plans changes following the resounding loss to the Soviet Union.

''We must recover our strength after the Soviet game,'' Nepomniachi said. ''Then, we walked through the match. Now we must learn to run again.''

Cameroon's Francois Omam Biyick, the goal-scoring hero against Argentina, is doubtful after bruising his right knee against the Soviets, but defender Benjamin Massing is available after after missing two matches. He was sent off against Argentina, suspended for the Romania match and was ruled out of the Soviet game because of illness.

Nepomniachi is leaving nothing to chance and has acquired Pierre Bala Tsala, a dietitian who hopefully doesn't practice what he preaches. Tsala weighs almost 290 pounds.

Czechoslovakia has World Cup pedigree on its side against first-time qualifier Costa Rica. This is the Czechoslovakia's eighth appearance in the tournament, but after losing in the finals in 1962, they failed to get beyond the first round in 1970 and 1982.

The Czechoslovaks showed finishing power in crushing the United States 5-1 but labored for a 1-0 victory over Austria and lost 2-0 to Italy.

''Our players are smart enough to know they cannot have a letdown after the Italy loss,'' Czechoslovakia Coach Josef Venglos said. ''I hope our experience will show in our performance. We must not overlook Costa Rica. They are well-coached and have defeated very good teams. A letdown on our part will be disasterous.''

Costa Rica stunned Group C with victories over Scotland (1-0) and Sweden (2-1). The Costa Ricans then lost to Brazil 1-0, but their tenacious defense and enthusiasm carried them into the second round.

They are coached by Yugoslav Bora Milutinovic, who guided Mexico to the quarterfinals of the 1986 World Cup and took over the Costa Rican squad only eight weeks before the tournament.

''Czechoslovakia is not an unsurmountable hurdle,'' he said.

#90173u1739 06/22/1990 ~United Press International

TEHRAN, IRAN (JUNE 22) UPI - Medical teams from Japan, Switzerland and France and Turkey arrived in Tehran Friday to assist in relief operations for victims of the massive earthquake that devastated northwestern Iran, killing at least 30,000 people, Iran radio reported.

The quake, now believed to be one of the worst in the country this century hit early Thursday, measuring 7.7 on the Richter scale, according to the U.S. Geological Survey, and reducing scores of towns and villages to rubble. An Iranian reading measured the quake at 7.3.

Staggering reports of devastation came in Friday. IRNA, the official Iranian news agency, put the death toll at 30,000 by mid-afternoon, but the Iranian mission to the United Nations said the death toll was estimated at 36,000. Some 100,000 were injured and thousands were homeless.

''Whole towns were flattened like they were never there. We have no way to get to many,'' Mohammad Afshar, an official of the Iranian Red Crescent relief organization, told UPI.

''For the next 10 days we will be digging through the rubble for corpses '' Afshar said. ''Roads are blocked by falling rocks, and planes have difficulty landing in the mountains of Gilan,'' a province on the Caspian Sea coast hit by the quake, he said.

Reports reaching Tehran said the quake left some 112 villages in total or partial ruin on the slopes of the Alborz Mountains between the Caspian Sea and Zanjan, some 175 miles northwest of Tehran.

Iranian state radio said medical teams from Japan, Switzerland, France and Turkey landed in Tehran Friday and prepared to move to the stricken areas immediately.

A team from the International Committee of the Red Cross flew in from Switzerland and one from Doctors without Frontiers, an independent French medical group, was among the first to arrive.

Iran Airlines has flown 3,000 relief workers into the area since Thursday, and a spokesman for Minister of Roads and Transportation Mohammad Saeedi Kya said loaders, bulldozers, graders, trucks and vans have been mobilized from nine provinces to help provide access to the stricken regions.

Tehran radio said President Akbar Hashemi Rafsanjani, who declared three days of national mourning for the victims, visited the stricken area Friday with high-ranking Cabinet officials, giving on-the-spot instructions for relief work.

In Geneva, the League of Red Cross Societies said Friday that Iran had said it seeks only certain types of aid, such as medicines, blankets and food, and does not want doctors or search dogs, even though teams of doctors have arrived from other nations.

A request from the Iranian Red Crescent asked for medicines, antibiotics, tents, blankets and dried foods ''conforming to Islamic rules,'' the League said.

At least 100 aftershocks hit the stricken area Thursday and early Friday. The strongest was reported in Iran to measure 6.5 on the Richter scale.

Gilan and Zanjun were the provinces hardest hit by the quake. More than 20,000 are reported dead in Gilan, with some 20,000 more injured. In Zanjun, more than 8,000 are estimated to have died, with more than 3,700 injured.

Afshar said Roudbar in Gilan province was the worst hit. ''This was a village in which houses were built on several terraces of the mountain slopes. All of Roudbar collapsed into the valley.'' Tehran radio said 6,000 people were killed at Roudbar and 10,000 injured.

Zanjan's governor-general, Jaafar Mousavi, said 40 to 60 percent of the villages in the province were demolished, IRNA reported.

Afshar said people in the quake-hit areas ''have little means of survival. They have no basic means for cooking and no shelter.''

Iranian rescue work continued throughout Friday, and bodies are still being dug out of the debris, IRNA reported.

''There were cracks as wide as 40 centimeters (16 inches) along the Zanjan road,'' said Amir Ehsan, a 21-year-old volunteer. ''The four walls of many villages were still standing but the roofs had fallen through and killed whole families inside.''

An Iranian reporter interviewing survivors in a Tehran hospital broke into tears after hearing eyewitness accounts of the disaster.

One victim, an air force lieutenant from from Manjil deep in the Alborz Mountains, said his brother and his entire family were killed instantaneously when the roof of their brick house came down on them.

#90173u1740 06/22/1990 ~United Press International

(JUNE 22) UPI - The wife of a New Orleans radio talk show host called his program to complain about their marriage... and less than 10 hours later she was dead of a gunshot wound in the chest. Talk show host Ron Hunter told authorities that Marilou Hunter shot herself in the chest while lying next to him in bed as he slept yesterday. Hunter told police he was awakened by a loud ''pop'' noise and found his wife with a chest wound. She died about an hour later at the hospital.

A prison superintendent testified today that Florida officials did NOT conduct a thorough investigation into the malfunction that caused flames to shoot from the headpiece worn by a convicted killer at his execution. The testimony came at a hearing into the condition of the electric chair. Defense attorneys say the malfunction would amount to ''cruel and unusual punishment'' in executing Judi Buenoano , the so-called ''black widow'' killer. Her execution has been stayed pending the hearing.

Authorities say a leaking storage tank valve at a canning company near downtown Green Bay, Wisconsin, released a cloud of dangerous ammonia gas this morning. 15 people were sent to a hospital for treatment, and a spokesman says most of the injuries were minor. Fire officials say a stem on the storage tank gave way, producing the leak.

#90173u1742 06/22/1990 ~United Press International

SAN FRANCISCO (JUNE 22) UPI - Unconventional tests of a controversial drug derived from a Chinese cucumber have produced promising results in AIDS

patients, an AIDS group reported Friday.

But leading medical experts attacked the study's methods and warned AIDS patients not to take the sometimes dangerous drug.

Following a silent demonstration against AIDS drug testing efforts directed by the government's National Institutes of Health, Martin Delaney executive director of Project Inform, reported preliminary results of community-based trials of a drug commonly called Compound Q.

Compound Q, a nickname for trichosanthin, is a highly purified version of an abortion drug used in China. It is derived from the root tuber of a cucumber plant and has been shown to selectively kill AIDS-infected cells in the test tube.

In the Project Inform study, 46 patients infected with the AIDS-causing human immunodeficiency virus or HIV were given monthly infusions of Compound Q. The patients had taken AZT, the only government-approved AIDS drug, for a year before the study and were allowed to take AZT along with Compound Q.

After 116 days of receiving compound Q, the patients' average count of key immune cells called T-4 helper cells rose from by about 77 cells per cubic millimeter of blood. Based on the patients' past medical history, it would have been expected their T-cell count would have fallen by about 40 cells per cubic millimeter during that same period, Delaney said.

Delaney said the rebound of the immune system appears to have continued in the two months since that data was compiled, and if the trend continues the patients' average T-cell count after a year of Compound Q treatment will be higher than when they started treatment. The patients had an average T-cell count of 490 when they started the study; an average person's T-cell count is 800 or more.

''I don't know what is going to happen a year from now. We've seen a major and dramatic trend of what is happening to these patients,'' Delaney said.

The Project Inform director said he expected to be sharply rebuked by scientists for releasing his results in an unconventional way.

Dr. Arnold Relman, editor of The New England Journal of Medicine, was first on the attack.

''It's irresponsible,'' Relman said. ''You should show your data, tell the world through a scientific journal what your results were and let the chips fall where they may.''

Until such publication, Relman said it is impossible to tell if Compound Q

''is a flash in the pan or something great.''

But Delaney, whose San Francisco-based group acts as a clearinghouse for AIDS information, countered: ''I don't think our operation is unethical. I find it extremely compassionate.''

In response to Relman's, criticism a patient who was involved in the tests stood up and said the treatment has ''literally turned my life around.''

Dr. James Kahn of the University of California-San Francisco, who is helping coordinate a government-sanctioned study of a more highly purified form of Compound Q made by Sandoz Pharmaceuticals, was less critical of Project Inform's work, saying such quick, community-based tests ''prods us forward in helping this epidemic.''

But Kahn said early tests with the Sandoz drug, called GLQ223, found one patient out of 18 suffered severe side effects from the drug. That patient had neurological complications that left him partially disabled.

''This is a very dangerous drug. ... This is not a drug that someone should take in hopes it is going to improve their condition,'' said Kahn, who said further testing of Compound Q has not produced T-cell increase like those reported by Delaney.

Last year, the Food and Drug Administration sharply criticized Project Inform's underground tests of Compound Q after one patient taking the drug and two others suffered adverse reactions. However, in March, the FDA gave Project Inform the go-

Roger Williams, a spokesman for Genelabs Inc., a partner with Sandoz in the Compound Q testing, said about 50 to 75 patients are receiving the drug at Kahn's center and three other sites.

So far, results of the tests which started in November have been ''reasonably promising,'' Williams said. He added there had been increases of T-cell counts seen in some patients at some sites, while other patients have had no response to the drug. No severe side effects have been reported since the one patient suffered neurological damage early in the San Francisco study, he said.

#90173u1751 06/22/1990 ~United Press International

BUCHAREST, ROMANIA (JUNE 22) UPI - The interim government offered its full support Friday to opposition political parties whose offices were wrecked in last week's vigilante rampage by Romanian miners.

The announcement came as the country marked the six-month anniversary of

the Christmas uprising that overthrew dictator Nicolae Ceausescu and ended four decades of communist rule.

President Ion Iliescu has been trying to counter allegations that his government is slipping back into authoritarianism following the violence last week that left six dead and hundreds injured.

''The government is willing to grant its full support to political and non-political parties, organizations and associations whose activity was interrupted over June 13-15,'' the provisional government said in a statement carried by the official news agency Rompres.

''Their free, unhampered activity is a guarantee of the free expression of political and civic opinions, in a manner different from street confrontations which can only lead to acts of violence,'' the statement said.

It did not say whether the government would make monetary reparations, as some opposition groups have demanded.

The statement also refuted earlier claims by government officials that weapons and other contraband had been found in the offices of the opposition National Liberal Party.

The Liberal party building was one of several that were wrecked by about 10,000 miners who swarmed into Bucharest last Thursday and Friday. The miners were responding to Iliescu's appeal to workers to suppress anti-government violence.

Iliescu, who was inaugurated as president Wednesday, laid a wreath at the Young Heroes' Cemetery in Bucharest in a ceremony marking the anniversary of the uprising against Ceausescu.

Memorial wreaths also were placed at three other squares where some of the heaviest fighting occurred in December. Iliescu's National Salvation Front has dominated the provisional government since Ceausescu's execution Dec. 25, and it won a landslide victory in the May 20 elections.

As required by law, Iliescu relinquished his role as the leader of the Front to assume his presidential duties, Bucharest radio said.

In another development, one of Ceausescu's sisters, Maria Agache, went on trial in Bucharest on charges of fraud and abuse of privilege.

Agache is the third member of the former dictator's immediate family to go on trial since January. Thursday, Ceausescu's look-alike brother, also named Nicolae, was sentenced to 15 years imprisonment for inciting genoicde.

The dictator's youngest son, Nicu, the former Communist Party boss in the city of Sibiu, is currently being tried on similar charges, and two other Ceausescu children are imprisoned in Bucharest awaiting trial.

#90173u1756 06/22/1990 ~United Press International

WASHINGTON (JUNE 22) UPI - Ames Department Stores Inc., beset with store closings, falling sales, and high debt, is now being investigated by the state of Maine for alleged antitrust violations.

In particular, the state is investigating Ames' October 1988 purchase of the Zayre Store division of Zayre Corp. for $778 million, officials from the Maine Attorney General's office said Friday.

The states of New York and Vermont are closely following the investigation and may also launch antitrust cases against Ames, according to a quarterly financial report the company filed Monday with the Securities and Exchange Commission.

At present, Ames has 29 Zayre stores operating in Maine, 91 in New York, and 13 in Vermont, according to Christina Divigard, the company's public relations coordinator.

The SEC filing says that Maine has asked for information relating to the Zayre acquisition "in order to determine whether that acquisition or the subsequent disposition of certain stores violated Maine's antitrust laws." Earl Spector, an executive vice president for Ames, declined comment on the case, but the SEC filing said the company is complying with Maine's request.

Frank Ackerman, an assistant attorney general in the Maine Attorney General's office, confirmed that an investigation was underway, but also declined further comment.

Neither Maine nor Vermont have large antitrust units; Maine's consumer and antitrust unit, for example, has four attorneys, two of whom are antitrust specialists. New York, however, is a different story. The state attorney general's office has a staff of 18 attorneys with a broad range of experience.

Much of that experience was gained in 1988, when the state antitrust unit fought the Campeau Corp.'s acquisition of R.H. Macy & Co., which owned several New York department store chains.

The state charged that Campeau, which owns Bloomingdale's department stores and other retail chains, was violating antitrust rules by merging

with Macy.

By March of 1988, New York had forced Campeau to agree to divest 11 Abraham and Strauss stores - with annual sales of more than $500 million - owned by Macy and the valuable Gimbels building, located in the heart of Manhattan. New York state officials confirmed that the attorney general's office is cooperating with the investigation in Maine.

Speaking on whether New York will begin its own investigation, George Sampson, the deputy bureau chief of the antitrust bureau, said "The issue is indeed under consideration in the office, but no decision has been made on what action if any will be taken."

Edward Barbini, press secretary to New York attorney general Robert Abrams said one possible outcome was the creation of a multi-state task force to handle the investigation.

He said that attorney generals of different states have found over the last few years that working together on a case is a "very successful" approach.

Any action by the states would be disruptive to Ames' plans for the Zayre, chain, which had 392 stores when acquired in 1988. Since that time, Ames has closed 269 Zayre stores, some of which were in Maine, Vermont and New York.

Christina Divigard of Ames said the closings are intended to weed out stores that are losing money. "This way we keep the cream of the crop," she said. Ames, based in Rocky Hill, Conn., filed for bankruptcy on April 25, 1990.

-30- 3653

#90173u1759 06/22/1990 ~United Press International

NEW YORK (JUNE 22) UPI - A Brooklyn judge Friday decided not to add manslaughter counts to the charges facing John Vento, the third man to be tried in the Bensonhurst racial killing.

The decision by state Supreme Court Justice Thaddeus Owens as the trial neared its end, means the jury will have to choose between murder and a score of lesser charges against him.

Vento, 21, is charged with two counts of murder, riot and civil rights violations and other lesser charges in the death of Yusuf Hawkins, a black 16-year-old shot during a mob attack by a gang of whites last summer in Bensonhurst.

Prosecutors had asked that the jury be allowed to consider manslaughter

charges, which are easier to prove than murder and can carry a maximum sentence of up to 25 years in prison.

But Owens said, ''with his (Vento's) lawyer having opposed it, I don't think I'll charge it'' when he instructs the jury before deliberations.

Vento's lawyer, Gerald DiChiara, said Vento himself decided to fight the bid to introduce manslaughter counts.

''It was my client's choice,'' DiChiara said. ''He feels he's not guilty of murder.''

DiChiara closed his defense in the case after bringing to the witness stand four black men who testified they were friends of Vento's and insisted he was not racist.

''Johnny's an OK guy among me and my friends,'' said Napoleon Bonaparte Brown, who said he knew Vento in Dayton, Ohio, for seven or eight years while Vento was living there with his brother.

Brown, who flashed a victory sign at Vento as he mounted the stand, said he had persuaded Vento to return to New York after the 21-year-old fled from to Ohio last December.

Vento was charged with murder after reneging on an agreement to cooperate with prosecutors by testifying before the grand jury in exchange for conditional immunity, and that testimony is now considered the strongest evidence against him.

Vento admitted to the grand jury that he knew someone on the scene had a gun and that he had carried a bat the night of the murder. His lawyer has argued that Vento did not have the gunman's murderous intent.

Closing arguments are schedualed for Monday in the case.

#90173u1765 06/22/1990 ~United Press International

BRUSSELS, BELGIUM (JUNE 22) UPI - A common European Community position on East-West relations will be the main test of next week's EC summit in Dublin, the president of the EC executive Commission said Friday.

''The European Community should have a common position on the way it wants Europe to develop, including the roles of the Soviet Union and the United States,'' Commission President Jacques Delors said at a news conference.

''I see this as a test of whether our Community is as strong and convincing in this area as it is in the economic area,'' he said. ''The

main test of this summit will be to look at East-West relations and the next CSCE summit meeting.''

The 35-member CSCE or Conference on Security and Cooperation in Europe is expected to be held in Paris in December.

''We need a frank discussion on these issues (in Dublin) or at Paris the sirens may pull us one way or another,'' Delors said, adding that some proposals for Europe's future may be contrary to the EC's interests.

He said the Soviet Union would be a major topic at the Dublin summit, which begins Monday morning and concludes at midday on Tuesday.

The EC had not received any requests from the Soviets for financial aid, but the subject had been discussed at length, Delors said.

''If the 12 leaders believe we should get involved in an aid program for the Soviet Union, the Commission will be ready and will make proposals,'' Delors said. ''We have our ideas on this.''

Delors avoided a reporter's question asking if he favors relaxation of EC sanctions on South Africa, an issue that has sharply divided EC member states.

Ireland and Denmark are staunchly opposed to lifting sanctions, while Britain and Portugal say sanctions should be eased as a show of support for liberalizing measures taken by South African President Frederik de Klerk.

Irish Prime Minister Charles Haughey, the EC president, wrote to other heads of state that Dublin-summit agenda items include the environment, drugs, the Community's sanctions on South Africa and the siting of EC institutions.

Haughey and Delors both urged a decision on where to site three new EC institutions, a training foundation, trademark office and environment agency.

Delors said said the Dublin conferees would name Dec. 13 and Dec. 14 as starting dates for two conferences in Rome on political union and on economic and monetary union.

-30- 2635

#90173u1781 06/22/1990 ~United Press International

NEW YORK (JUNE 22) UPI - Winnie Mandela branched off from her husband's busy schedule Friday, meeting with women's groups throughout the city to further the struggle against apartheid.

Following Nelson Mandela's address to the United Nations, Mrs. Mandela had lunch with about 150 wives of African U.N. ambassadors, dignitaries and celebrity guests, including actress Cicely Tyson.

She used the occasion to issue a call for solidarity throughout the African continent and to thank the women from the neighboring nations for their support during her husband's 27-year imprisonment.

''I am a grandmother now,'' she said to the gathering, mostly members of the United Nations African Mothers Association. ''At my age, this is the first time I have been able to leave my country. This is the first time I am able to thank you directly for all you have done.

''Above all, I thank you for what you did for our children, who have suffered the brutality of apartheid. They were killed in the thousands.''

Mrs. Mandela said it was protests from ''many, many miles away'' that led to the release of the leaders of the African National Congress. ''Due to your protests, we have our leaders. We have comrade Mandela with us today.''

The luncheon, provided some of the more intimate moments of the packed tour. Mrs. Mandela said she felt relaxed addressing the women from the largely African group, which raises money for programs for women and children throughout the continent.

On seeing Cicely Tyson, Mrs. Mandela recalled an anecdote about being under house arrest in South Africa.

''When a person is banned in South Africa, they can't meet with another person. They can't go to a movie. They can't go out,'' she said.

''When I defied my banning order, I went to see Cicely Tyson in 'Sounder ''' Mrs. Mandela said. ''She made me cry in that film. She was so brutally frank in translating our own situation in South Africa. I am so happy to meet her in the flesh.''

Mrs. Mandela and Tyson hugged and cried.

''The whole time I'm sitting with her, I'm trying to discern for myself what gave this woman her strength, the indomitable spirit that kept her,'' Tyson said after the lunch. ''I never dreamed I would be able to touch her. That's what her career has been about: trying to reach people.''

Mrs. Mandela then went to Brooklyn to speak at a leadersip symposium before going to a community tribute hosted by Tyson at the Brooklyn Academy of Music.

-30- 2703

#90173u1785 06/22/1990 ~United Press International

JACKSONVILLE, FL (JUNE 22) UPI - Several hundred mourners, including family members and a number of prominent state and local officials, gathered Friday to mourn the eight people slain in a loan office massacre earlier this week.

Jacksonville Mayor Tommy Hazouri, who earlier described the incident as ''one of the darkest chapters in the city's history,'' was the opening speaker in the memorial service for seven General Motors Acceptance Corp. employees and one customer who were shot to death Monday by gunman James Edward Pough.

''I want each of you to know we care about you very much and share in your sorrow,'' Hazouri said in asking for a moment of silent prayer at the outset of the service in the ballroom of the Prime Osborn Convention Center.

Gov. Bob Martinez, several state lawmakers and local officials were among those who attended the service. For some of the audience, it was the second memorial service of the week following funerals Thursday for six of Pough's victims.

Another memorial service was scheduled for Saturday morning, also at the convention center, for GMAC employees.

Pough's attack on the GMAC auto finance office was the final act in a two-day shooting spree that ended when Pough, 42, shot and killed himself in the loan office.

His rampage began when he killed a prostitute and her pimp early Sunday and then wounded two teenagers 10 minutes later, Duval County Sheriff James McMillan said.

The next day Pough entered the GMAC office and sprayed it with gunfire from a .30-caliber semiautomatic rifle, killing the eight people and wounding five others before turning a .38-caliber revolver on himself.

Hazouri called for tougher gun control laws after it was disclosed that Pough was allowed to buy guns, despite a history of violent crimes dating back to 1966, including a 1971 aggravated assault conviction.

Pough was arrested on a murder charge in 1971 and later pleaded guilty to aggravated assault in the incident. The trial judge withheld judgment of guilt in the case, sentencing Pough to five years probation.

Because Pough was not convicted, he could legally purchase a weapon, a right he would otherwise have lost.

The Florida Times-Union quoted unnamed sources Thursday in reporting that Pough owed GMAC $6,394 on a car he had voluntarily returned in January. Police were refusing to speculate on a motive in the mass shooting.

''We still don't know exactly what his motive was, and we are not going to speculate,'' McMillan said.

-30- 2722

#90173u1788 06/22/1990 ~United Press International

WASHINGTON (JUNE 22) UPI - Here are capsule descriptions of the major provisions of the five-year farm bill approved 15-4 by the Senate Agriculture Committee:

-Planting flexibility: Farmers allowed to adjust mixture of crops or experiment with new ones on up to 25 percent of land now devoted to wheat, feed grains, cotton and rice. Eligibility for future support payments preserved but no payments on ''flex'' acres although crop loans will be available. Restrictions to prevent loss of oilseed acreage.

-Oilseed marketing loans: Soybean marketing loan created at $5.50 a bushel with Agriculture Department authority to reduce it to $5 if stocks-to-use ratio exceeds 25 percent; loan rates for sunflowers, canola, flax and safflower set at 9.7 cents per pound with adjustments possible; other oilseed may be added.

-Wheat and feed grains: Wheat, corn, sorghum and barley target prices frozen at this year's levels, oats raised to $1.55 a bushel for 1991 with price rising 10 cents a year to maximum $1.85; farmers have option to get higher target price in exchange for proportional increase in setaside; crop loans converted to marketing loan set at 1990 rates but, if department uses authority to unilaterally reduce rate, it must increase size of advance defiency payment at rate of .75 cents for each penny cut in loan rates; the addition to the advance payment must be repaid.

Maximum setaside for wheat and feed grains set at 20 percent; pilot program in which farmers can limit marketings to specific bushel amount instead of acreage limits on production.

-Sugar: Current program extended for five years with support price frozen at 18 cents a pound.

-Cotton and rice: Target prices frozen at 1990 levels; marketing loan program continued; minimum cotton loan of 50 cents a pound, minimum rice loan of $6.50 per hundredweight; maximum cotton acreage setaside 25

percent; maximum rice setaside 35 percent.

-Dairy: Support price set at minimum of $10.10 per hundredweight; price adjustments above that level to discourage overproduction; department ordered to design supply management plan; plan could be implemented after 1991 if government purchases of surpluses would exceed 7 billion pounds.

-Pesticides: Prohibits export of pesticides barred from use by U.S. farmers.

-Organic food: Sets up program to certify food is grown without use of farm chemicals.

-Conservation: Strengthens ''swampbuster'' protections for wetlands by making it easier to prove a violation; creates graduated penalties for violations and allows, in limited cases, for farmers to convert wetlands if they restore a former wetland; requires farmers to keep records of use of ''restricted use'' pesticides; creates voluntary program that would help pay cost of modifying practices on sensitive land; sets up program to buy 30-year easements to protect wetlands and authorizes putting up to 50 million acres in long-term land retirement program, including 34 million acres already enrolled in Conservation Reserve.

-Research: Authorizes tenfold increase in funding for research into sustainable agriculture; authorizes up to $6 billion over five years for expanded program of competitive grants for research.

-Exports: Revises ''Food for Peace'' program to allow outright donation of food, rather than concessionary sales, and allows debt forgiveness for poor countries; provides up to $100 million for ''Food for Freedom'' program to aid developing democracies; Export Enhancement Program authorized for $900 million in fiscal 1991; Targeted Export Assistance Program authorized at $200 million a year.

-Forestry: Creates ''Forest Stewardship Program;'' broadens range of improvements eligible for federal cost share but, in exchange, owners have to pledge to keep land in the program for 20 years; creates ''Forest Legacy Program'' to buy conservation easements to protect land from development.

NEW YORK (JUNE 22) UPI - Branding Nelson Mandela's praise for Yasser Arafat, Moammar Gadhafi and Fidel Castro ''anti-American,'' an Orthodox Jewish city councilman Friday angrily demanded the city withdraw taxpayer support for his visit.

But another Jewish councilman called the suggestion ''silly and childish'' and major Jewish groups said they remained fully committed to Mandela and his anti-apartheid cause, even though they were distressed by his comments.

During an appearance Thursday on ABC's ''A Town Meeting with Nelson Mandela,'' the black South African leader said his African National Congress sympathizes with ''the Jewish struggle'' and recognizes Israel's right to exist.

But he reiterated his stand that the ANC considers Arafat, Gadhafi and Castro ''comrades in arms'' because of their longstanding financial and moral support.

Mandela made clear the basis of ANC policy, which takes into consideration Israel's ties to the white minority South African government it is fighting.

''Our attitude toward any country is determined by the attitude of that country toward our struggle,'' he said.

He said the ANC makes no attempt to judge a country or group's policies in other areas.

''Our attitude is based soley on the fact that they fully support the anti-apartheid struggle,'' Mandela said. ''We have no time to be looking into the internal affairs of other countries.''

Brooklyn Councilman Noach Dear, an arch-conservative who threatened to organize protests during Mandela's visit, but backed down after meeting with Mayor David Dinkins, condemned the statements and said they would encourage Arafat, Gadhafi and Castro to commit terrorist acts.

''I consider these anti-American slogans,'' said Dear, who took an expense-paid trip to South Africa in the spring as guest of the all-white Johannesburg City Council. ''These people are anti-Americans ... terrorists who want to overthrow us.''

Dear said he believes apartheid is ''a sin,'' but said ''maybe (Mandela) is not the friend we think he is.''

He asked City Council officials to investigate the cost to the city of the Mandela visit, which could run into millions of dollars in worker overtime. The State Department also is picking up part of the tab for security.

''No taxpayer dollars should be used,'' said Dear, who insisted the ANC be handed the entire bill for a trip organized in part to help it raise funds.

But Brooklyn Councilman Abraham Gerges, who accompanied Dear on the South African junket, said the idea would not and should not get too far.

''The city of New York invited Mr. Mandela to be in a parade. It would be silly and childish to now say that somebody else is to pay for it,'' he said.

Leaders of the American Jewish Congress and the Anti-Defamation League of B'nai B'rith, who praised Mandela following a meeting with him two weeks ago in Geneva, said they were very upset by his latest comments. But they said they stood by Mandela.

#90173u1821 06/22/1990 ~United Press International
WASHINGTON (JUNE 22) UPI - The Bush administration said Friday it is nearing a decision on whether to lift economic sanctions against South Africa, saying it expects Pretoria to meet most U.S. conditions.

South African leader Nelson Mandela, who wants the sanctions maintained, is to meet with President Bush Monday. But Herman Cohen, an assistant secretary of state for African Affairs, said, ''We will make our own decisions.''

Briefing reporters at the White House, Cohen said that the question of how to define a political prisoners and arranging their release and the lifting of the state of emergency in Natal are the remaining sticking points in negotiations with the South African government of Prime Minister F.W. de Klerk.

''We are quite close,'' Cohen said, because of an agreement in May between Mandela and South African negotiators on the definition of what is a political prisoner.

''Once Mr. Mandela returns home and ratifies that agreement, I assume the release of the political prisoners will move rather rapidly,'' Cohen said.

''It is quite conceivable that this point will be reached in the near future, at which point we will be faced with decision making time,'' he declared.

At that point, the administration would go to Congress and ask for a modification or a suspension of the restrictions, imposed on Sept. 12, 1986, under the Anti-Apartheid Act.

Cohen explained that the law requires the administration to notify Congress of any plans to lift the sanctions and to give lawmakers 30 days to act.

Pointing to negotiations now under way, and the release of some political prisoners in the past year, including Mandela, Cohen said when all conditions are met, ''we will begin consultations with Congress.''

Asked about how Mandela's opposition to lifting sanctions could influence the U.S. decision, Cohen said, ''I do not believe anyone in the administration or Congress will allow any foreigner to dictate our foreign policy, whether it is Mr. Mandela or Mr. de Klerk.''

At a news conference in Huntsville, Ala. on Wednesday, Bush said he would

like to find a way to show de Klerk that the United States is ''grateful'' for his approach to the problems of apartheid. ''He's come a long, long way,'' said Bush.

#90173u1825 06/22/1990 ~United Press International

OTTAWA (JUNE 22) UPI - The legislatures of Manitoba and Newfoundland adjourned Friday without approving a constitutional amendment that would keep Quebec in Canada, and the government announced it would seek to extend a crucial deadline to save the measure.

The fate of the amendment, which must be approved by the legislatures of all 10 Canadian provinces by midnight Saturday or expire, rested with Newfoundland and Manitoba, the only two provinces yet to approve it.

Newfoundland had been expected to vote on the amendment late Friday. But provincial leader Clyde Wells, who personally opposes the amendment, canceled the vote after the federal government said it would seek approval from the Supreme Court to waive the Saturday deadline.

Wells had asked for an extension to the deadline two weeks ago so the province could hold a referendum on the amendment. When the federal government refused to consider an extension, Wells had agreed to hold a free vote in the legislature.

The federal government immediately scheduled an emergency Cabinet meeting Friday afternoon after the Newfoundland legislature announced it would adjourn.

In Manitoba, a Cree Indian member of the provincial legislature stymied the amendment by denying lawmakers the opportunity to extend debate on it to Saturday. A motion to extend sitting hours would require unanimous consent.

Quebec has threatened to separate if the amendment, which recognizes the French-speaking province as a distinct-speaking society and gives it powers to promote and protect its language and culture, is not approved before midnight Saturday.

The amendment, formally called the Meech Lake Accord, was negotiated by Prime Minister Brian Mulroney and leaders of the 10 provinces three years ago because Quebec refused to sign the 1982 constitution on grounds it did not recognize the province's French-speaking population.

Quebec has promised to add its signature to the constitution if the Meech Lake Accord is approved.

In a surprise announcement Friday, Sen. Lowell Murray, the federal government's special envoy on the constitutional amendment, told reporters the government would seek approval from the Supreme Court of Canada to extend the time for approval of the amendment.

Murray told reporters that Manitoba Premier Gary Filmon and the two opposition leaders have already said they support the amendment, and only needed additional time to complete the process.

He said the government believes the Quebec legislature could vote on the amendment next week and start the clock ticking again on another three-year period.

In Manitoba, Elijah Harper, a Cree Indian member of the provincial legislature who stonewalled debate on the amendment for a week, softly answered ''no'' when asked if he would consent to extend the sitting hours through Saturday.

Outside the Manitoba legislature, hundreds of native Indians celebrated Harper's action.

''The voice of aboriginal people has been heard across the country,'' Harper said, adding that Canada's 600,000 native Indians must be recognized as a fundamental part of Canada and a distinct society.

Manitoba leader Filmon said the federal government by trying to extend the deadline was trying to ''pull a rabbit out of the hat.''

''We have no reason to believe the proposal of Mr. Murray will be validated by the Supreme Court,'' Filmon said, adding it would be counterproductive for the Manitoba legislature to resume sittings next week without a legal decision on waiving the June 23 deadline.

But Filmon said he may insist on reopening negotiations on the amendment if the deadline is waived.

#90173u1881 06/22/1990 ~United Press International

NEW YORK (JUNE 22) UPI - Hugh Southern resigned unexpectedly Friday as general manager of the Metropolitan Opera less than eight months after assuming the post, saying, ''I have not found fulfillment.''

Southern, 58, informed the Met's board of directors that his resignation will be effective July 1.

Backstage rumors at the Met said Southern's views on how the Met should be run had come in conflict with the artistic directorship of James Levine, who joined the Met as principal conductor in 1973 and has been artistic director since 1986. It was said that the Met's board tended to go along with Levine rather than listen to Southern.

News of Southern's resignation came in a terse press release from the Met's press department chief, David Reuben, who said he add nothing further to add as to why Southern was leaving.

The release quoted Southern as saying: ''I have been reluctant to make such a choice, but I have become aware over the course of the season that I had not found fulfillment in the position of general manager of the Metropolitan. I therefore felt it would not be fair or productive either to myself or to the Met to continue and have tendered my resignation.''

When reached for comment, Mrs. Gilbert W. Humphrey, president of the Metropolitan Opera Association, said the board ''understands his decision'' and will accept Southern's resignation with regret.

''On behalf of the many friends he has made on the board and throughout the company, I thank him for his service and wish him the best in his future endeavors,'' she said.

Announcement of Southern's selection by the board as general manager came last Sept. 14 after a year-long talent search to fill the post vacated by Bruce Crawford, former head of the BBDO ad agency who returned to corporate life after serving as general manager four years. Southern assumed the post Nov. 1.

At the time of his appointment, the English-born Southern was deputy programs chairman of the National Endowment for the Arts in Washington.

#90173u1887 06/22/1990 ~United Press International

NEW YORK (JUNE 22) UPI - The dollar ended mostly lower Friday in New York as players focused instead on foreign currencies, including the Swiss franc, which gained on news of a U.S. buyout of Zurich chocolatier Jacobs Suchard.

Currency traders said participants were unimpressed with the news that U.S. durable goods orders for May posted a surprisingly strong 3.9 percent gain, hinting at strength in the U.S. manufacturing sector.

Activity was concentrated in the so-called high-yield currencies, led by the British pound, which rallied on a reduced U.K. trade deficit. British interest rates being appreciably higher than most others, global investors often "park" funds in sterling deposits when markets slow.

Reports of the purchase of chocolate and coffee group Jacobs Suchard by the U.S. conglomerate Philip Morris spurred Swiss franc buying. Traders believed the U.S. corporation's $3.8 billion acquisition could have considerable impact in the market for Switzerland's currency. "We could see some very large buying of Swiss (francs)," said Audrey McNiff of Hongkong & Shanghai Banking Corp.

In late New York trading, the dollar was quoted at 1.6755 West German marks, down slightly from 1.6760 late Thursday, but continued to firm against the Japanese unit, closing at 154.90 yen against 154.65.

McNiff said the dollar remained strong against the yen on uncertainties about the course of Tokyo-Washington trade negotiations, the stability of Tokyo's securities markets and a potential political scandal.

Other dollar rates: 1.4120 Swiss francs, off from 1.4130; 5.6250 French francs, down from 5.6270; and 1,228 Italian lire, off from 1,228.30. The pound surged more than one cent to $1.7320, from $1.7210.

In Europe, the dollar closed lower against the main currencies as the pound took center stage on favorable U.K. trade figures.

Sterling broke through the psychological $1.73 barrier after U.K. trade figures showed the May deficit narrowing to 1.32 billion pounds from 1.6 billion pounds in April. The pound ended at $1.7305, up from $1.7240.

Overall, though, dealers held back ahead of a spate of major political events coming up, one analyst said. He pointed to the European Community summit to be held in Dublin, to continuing trade talks between the U.S. and Japan next week and to German monetary union set for July 2.

The dollar declined in Frankfurt to 1.6765 deutsche marks against 1.6800 but was unchanged in Zurich at 1.4155 Swiss francs.

The dollar closed lower in Paris and Milan, at 5.6380 French francs compared with 5.6485, and at 1,231.50 lire against 1,233. The U.S. unit was slightly lower in Brussels at 34.45 Belgian francs against 34.46.

Earlier in Tokyo, the dollar climbed against the yen, reacting to comments by Federal Reserve Chairman Alan Greenspan that there was little possibility of a U.S. economic recession. The dollar closed at 154.75 yen, up from 154.60 Thursday.

In Zurich, gold closed down at $348.50 an ounce against $350.50. Gold also eased in London to $348.75 an ounce from $350.

Republic National Bank in New York closed cash gold at $350 an ounce, down from $350.25 Thursday. The New York Commodity Exchange settled gold at $350.40 an ounce, down from $350.70.

Silver was unchanged in Zurich at $4.85 an ounce but was down in London at $4.83 an ounce compared with $4.86 Thursday.

Republic closed cash silver at $4.835 an ounce, off from $4.845. The Comex settled silver at $4.813 an ounce, down from $4.824.

NEW YORK (JUNE 22) UPI - Boxer Mike Tyson Friday gave Nelson Mandela high marks as a heavyweight fighter - in the human rights arena.

The deputy president of the African National Congress was himself once a boxer and said in interviews upon his release that he admired Tyson. During a morning walk outside Gracie Mansion Thursday, Mandela asked Police Chief of Department Robert Johnston where the former heavyweight champion lived.

Tyson was in the audience at the United Nations as Mandela addressed the world body. The two chatted briefly in the General Assembly Hall as Mandela entered to give his speech.

Tyson said he and Mandela joked about the possibility of the two shadow boxing each other.

''It was very constructive that he would come, especially at a time when we're looking for a leader,'' Tyson said.

''He's a fighter in all aspects. Truly he's fighting the greatest fight, not only for himself, but for human rights. He is perhaps the greatest individual of our time.''

Mandela was released from 27 years in prison the morning after Tyson lost his boxing title to Buster Douglas.

(JUNE 22) UPI - South Africa's Nelson Mandela received a thunderous welcome as he visited the United Nations in New York City today. In a speech to a large audience, Mandela stressed his graditude to the world organization for its support for blacks campaigning to end what he termed the ''crime'' of apartheid.

The casualty toll is mounting in the powerful Iranian earthquake. Tehran radio says more than 32-thousand people were killed in yesterday's quake, and Iran's U-N mission says 100-thousand were hurt. Another 100-thousand were left homeless. Iran issued an international plea asking for help-quote- ''in the name of the Almighty.''

Preparations are under way to boost a 150-Million-dollar communications satellite into orbit tomorrow aboard a Titan-3 rocket at Cape Canaveral, Florida. It's the first such launch since a duplicate launch in March that left an Intelast satellite in useless orbit because of a wiring error in the Titan rocket.

Israel and the Baltic republic of Latvia have signed an agreement calling for economic co-operation. The accord will involve, among other things, co-operative efforts between Israeli and Latvian scientists. The pact represents the first such accord between Israel and a Soviet republic.

None of the seven candidates vying to head the Russian republic's Communist Party won a clear majority today. That forces a runoff later between a hard-line foe of the free market and a more moderate party boss. Reformers warn that conservatives could ruin the party if they win control of the organization.

#90173u1973 06/22/1990 ~United Press International

(JUNE 22) UPI - A penny saved is a penny earned... and Americans did a little more of both in May. The Commerce Department reported today that personal income crept up by three-tenths of one percent last month, while personal savings rose by two-tenths of one percent. Consumers appear to be playing it safe by cutting down on spending.

Economists are urging caution despite a pleasant surprise in the durable goods report. The Commerce Department said today that durable goods orders

rose a surprising three-point-nine percent in May. But some analysts note that motor vehicles and airplanes made up much of the rise, while other orders remain subdued.

Reports from Cuba say the government plans to jam U-S-sponsored broadcasts received on the island from T-V Marti. Havana says the action comes as a followup to similar jamming that has blocked reception of Radio Marti broadcasts throughout the island.

Hospital officials in Philadelphia say a poorly prepared intravenous solution led to the deaths of three premature infants early this month. A spokesman at Albert Einstein Medical Center says the potassium-rich formula caused the babies' heartbeats to drop and led to their deaths. Three persons were suspended because of the error.

(JUNE 22) UPI - Powerful thunderstorms strafed the Plains, Midwest and South Friday, ripping down trees in the Carolinas, staging a spectacular lightning display in Arkansas and swamping streets in Wisconsin.

Showers and thunderstorms dampened much of the rest of the nation, including parts of New England, the Mid-Atlantic region and the Pacific Northwest. Dodge City, Kan., recorded a morning low of 50 degrees, tying a record for June 22 set in 1902.

The National Weather Service warned north central Wyoming residents that warm temperatures in the Big Horn Mountains were expected to melt mountain snow faster than usual, causing rivers and streams to run high and swift.

Showers and thunderstorms - sometimes heavy - extended from the Dakotas to the Carolinas and from Georgia to Louisiana. Rain and thundershowers were

also scattered over eastern and southwest Washington state and northwest Oregon.

Early afternoon storms blew down trees in a number of towns in the Carolinas, blocking most of the major roadways in Iredell County, N.C., the NWS said.

Locally heavy thunderstorms flooded streets in northeast and east central Wisconsin, where almost an inch of rain fell at Green Bay in just six hours.

Cloud-to-ground lightning strikes were recorded at a rate of 15 per minute early Friday in parts of eastern Arkansas, the NWS said. Showers and thunderstorms struck across nearly all of the state and in parts of Oklahoma, Texas and Louisiana, the remnants of turbulent weather Thursday that produced tornadoes and high winds and caused some damage.

Some 50 houses sustained light shingle damage and several mobile homes were overturned Thursday when winds near 80 mph blasted the tiny northern Oklahoma town of Waukomis, Police Chief Jerry Niles said.

''The wheat harvest has just ended here, and some wheat stubble was blown against chain link fence,'' Niles said. ''When it got to be too much, some of the fences fell over. That's the first time I'd seen that.''

Officials at Albaster Caverns State Park in northern Oklahoma said strong winds toppled trees and moved a tour bus parked near the caverns 500 feet but caused no injuries.

Several funnel clouds were spotted in Oklahoma and Arkansas Thursday night but no touchdowns were confirmed.

Crews in flood-ravaged southeast Ohio said they had discovered a 23rd victim of the killer floods that roared through the town of Shadyside. The unidentified body was found 30 miles downstream Thursday evening, a week after the flood hit.

#90173u1986 06/22/1990 ~United Press International

DENVER (JUNE 22) UPI - Georgetown Coach John Thompson Friday turned down a multimillion-dollar offer to become general manager of the Denver Nuggets.

''Obviously we were interested in John Thompson because he is a quality individual and he would have greatly improved our organization,'' Nuggets owner Peter Bynoe said in a brief statement. ''We respect his decision to stay at Georgetown and sincerely wish him the best.''

Thompson, who has coached Georgetown for 18 years and helped make them a national basketball power, held a news conference in Washington to announce his decision.

The Nuggets reportedly offered Thompson a four-year, $3.5 million deal and a 4 percent ownership stake in the team to take the job that has been vacant since Pete Babcock left in February.

Thompson said earlier in the week that this was the most serious offer he had ever received from an NBA club, and he promised to make up his mind ''as soon as possible.''

Thompson, 48, has compiled a 423-142 record at Georgetown, won the 1984 NCAA championship and coached the 1988 Olympic team to a bronze medal.

Bynoe said the Nuggets will suspend their search for a general manager until after Wednesday's NBA draft. Club president Carl Scheer and Coach Doug Moe will continue to oversee the club's day-to-day operations.

Thompson's decision comes on the heels of the Nuggets' second major trade in less than 24 hours. Denver sent its two first-round draft choices to the Miami Heat Friday for the third pick overall in this year's draft.

The Nuggets, who sent All-Star guard Lafayette ''Fat'' Lever to the Dallas Mavericks Thursday night, gave up the No. 9 and No. 15 picks to move up in the draft.

Denver acquired the No. 9 choice in the Lever deal, along with the Detroit Pistons' first-round pick in 1991, which Dallas owned through the Mark Aguirre-Adrian Dantley trade.

''This is an exciting deal for us,'' Moe said. ''Sure, we'll miss Fat, he is a tremendous player. But we need to be aggressive in improving our team for the long run. With the No. 3 pick, we should get a player who can really help us.''

The No. 3 choice will be Denver's highest draft choice since joining the NBA. Their previous highest was the fifth pick of the 1980 draft, which the Nuggets used to pick James Ray.

NEW CANAAN, CT (JUNE 22) UPI - The AmeriCares Foundation prepared Friday to airlift thousands of pounds of medical supplies and food to survivors of the earthquake that killed at least 30,000 people in Iran, officials said.

''We've now got about 85,000 pounds of things which will be loaded on a 707 cargo jet to leave Bradley International Airport (in Windsor Locks) at about noon Saturday,'' said Stephen R. Norman, spokesman for the international relief agency.

AmeriCares volunteers worked around the clock since hearing about the earthquake early Thursday to collect the supplies from its warehouse

in Stamford and from donors, said Norman.

He said the goods include tents and blankets for some of the 100,000 people left homeless by the quake. At least 100,000 others were injured in the earthquake that struck northwestern Iran.

GRAND CANYON, ARIZ (JUNE 22) UPI - A Pennsylvania man hiking in the Grand Canyon died when he and his wife ran out of water in temperatures above 110 degrees, authorities said Friday.

The Coconino County Sheriff's Office identified the man as William Styker, 26, of Hershey, Pa.

Investigators suspect Styker died from heat exhaustion, but an autopsy will be performed, Sheriff's Lt. Terry Kennedy said.

Kennedy said temperatures Thursday on the floor of the canyon, where the couple was hiking, were near 115 degrees. The official high recorded Thursday at Phantom Ranch at the bottom of the canyon was 111 degrees. The Stykers were hiking on the Tonto Trail, one of the main hiking trails in the canyon.

Kennedy said Styker reportedly died about 3 p.m. Thursday. The sheriff's office was notified about 7 a.m. Friday, when his wife reached Phantom Ranch, she said.

She said the wife was delirious from the heat. It was not clear whether she had hiked to Phantom Ranch alone or was found by another hiker, Kennedy said.

The couple began their hike on Wednesday, Kennedy said.

#90173u2082 06/22/1990 ~United Press International

(JUNE 22) UPI - Oil prices surged by as much as 55 cents a barrel on world markets Friday amid signs OPEC is stepping up pressure on its maverick members to curb excess production and abide by their individual output quotas.

OPEC President Sadek Boussena met in Baghdad with the Iraqi oil minister on the first leg of a tour to four of the cartel's powerful Arab Gulf members.

Boussena, who also is the Algerian oil minister, urged the Organization of Petroleum Exporting Countries' 13 members to adhere to their output quotas to help reduce the global oil surplus and bolster sagging oil prices.

On the New York Mercantile Exchange, West Texas Intermediate - the key U.S. crude for immediate delivery - shot up by 52 cents to $17.46 a barrel.

Unleaded gasoline for July delivery jumped by 1.14 cents to 61.37 cents a gallon and home-heating oil rose 0.75 cent to 48.66 cents a gallon on the Merc.

On the U.S. Gulf Coast spot market, where oil is sold to the highest bidder, West Texas Intemediate climbed 55 cents to $16.30 a barrel.

Industry bellwether Conoco Inc., Marathon Petroleum Co. and Sun Co. raised the price they are willing to pay for WTI by 50 cents to $16.25 a barrel. Official U.S. crude prices are determined by how much the buyer will pay as the oil comes out of the ground.

''With the OPEC president on a whirlwind tour through the Persian Gulf, there seems to be from a political standpoint a behind-the-scenes effort by OPEC to ensure success at its July meeting,'' said Andrew Lebow, analyst at E.D.F. Mann International Futures Inc. in New York.

OPEC oil ministers are slated to hold their regular summer meeting in Geneva to set prices and production levels.

''It's not known whether Boussena's trip will bear fruit, but the market may be showing some optimism in advance of next month's OPEC meeting,'' Lebow said.

On the European spot market, the United Arab Emirates' Dubai light - the key OPEC crude from the Gulf - rose 24 cents to $13.87 a barrel.

Following a severe drop in oil prices, OPEC held an emergency meeting in May and agreed to cut its overall production ceiling by 1.4 million barrels to 22 million barrels a day.

But Boussena told a news conference in Baghdad that OPEC still is producing more than 23 million barrels a day and blamed the erosion in oil prices since the May meeting on OPEC members that have continued to exceed their output quotas despite the new accord.

World oil prices have nosedived by 30 percent since the beginning of the year, based on industry calculations.

Analysts said oil prices also were buoyed Friday by a fire at a Siberian oil facility that resulted in the loss of at least 10,000 tons of oil in the world's largest oil-producing nation. The official Soviet news agency Tass said the fire started Wednesday night when lightning struck the Karkateyevy oil station in the Tyumen region of western Siberia.

On the European market, Britain's North Sea Brent - the world's most widely traded crude - gained 35 cents to $16.10 a barrel.

WASHINGTON (JUNE 22) UPI - J.M. Schneider Inc. of Ontario, Canada, is voluntarily recalling 20,000 pounds of its ''Schneider's Franks'' distributed in the Northeast because they may contain a bacteria that can cause serious illness, it was announced Friday.

The Food Safety and Inspection Service said the problem was discovered during a routine import inspection at Buffalo, N.Y. The inspection service said the franks could be contaminated with the bacteria that causes listeriosis, which can cause chills, fever, headaches and diarrhea.

The frank, made of pork and beef, were distributed to grocery outlets in the Northeast and are sold in one-pound plastic packages. The words ''Canada 35'' appear on the inspection seal on the label. All franks bearing the ''best before'' date of ''Jul 03'' are being recalled.

Officials said no illnesses have been reported but urged consumers to return the suspect franks to the store where they were purchased.

Consumers with questiona about the recall may telephone the toll-free Meat and Poultry Hotling at 1-800-535-4555 from 10 a.m.-4 p.m. EDT Monday through Friday. At other times, a recording with information about the recall will be connected to the line. Persons in the Washington area can call 447-3333.

IJAMSVILLE, MD (JUNE 22) UPI - Walter Payton, one of the top running backs in pro football history, promised Friday to lose a golf match with President Bush.

''You see, I want to be invited back so I'm going to lose,'' the retired Chicago Bear said following the front nine at the Holly Hill Country Club in Frederick County, Md., north of Washington.

At that point, Payton told reporters, he and Bush were even, although he declined to disclose the score. Earlier, when asked if he played a lot of golf, Payton joked, ''No, I got roped into this.''

The ex-football player and the 66-year-old president were joined on the links by Rep. Marty Russo, D-Ill., and sports writer Dan Jenkins, author of the novel-turned-movie, ''Semi-Tough.''

Bush groaned when he missed a short putt on the ninth hole, and he called Russo a ''show-off'' when the congressman jumped up and down after sinking a long one.

Bush planned to spent the weekend in the nearby presidential retreat of Camp David, Md.

#90173u2142 06/22/1990 ~United Press International

OAKLAND, CA (JUNE 22) UPI - Mills College president Mary Metz, who drew the ire of students when she voted to end the school's 138-year-old tradition of admitting only women, has resigned to pursue other goals, school officials announced Friday.

Metz's resignation was accepted by the school's board of trustees on Thursday. Dr. Virginia Smith, a board member and former president of Vassar College, was named interim president while a national search is conducted for a successor.

Metz directed Mills College through stormy economic times during her tenure. Enrollment has fallen by 130 students over the past 20 years to the current level of 777 undergraduates. With tuition revenues down, Mills is paying its bills with an unusually high 7.25 percent of endowment income.

In attempt to stem the economic decline, trustees voted on May 4 to accept male undergraduate students for the first time in the school's history. The decision touched off widespread student protests on the school's tree-lined campus and attracted national attention.

On May 18, trustees - at Metz' request - revoted on the coed issue and reversed the earlier decision. The announcement was greeted by a mass celebration from the student body.

#90173u2144 06/22/1990 ~United Press International

LOS ANGELES (JUNE 22) UPI - A slate of candidates backing Japanese-style ''team management'' at the troubled General Motors Corp. assembly plant in Van Nuys won 15 of 19 union offices, a spokesman for the slate said Friday.

The results represent an endorsement of the cooperative philosophy espoused by Jerry Shrieves, president of United Auto Workers Local 645 at the plant, which builds Firebirds and Camaros but has a cloudy future.

The issue of support for the management-backed team concept has been the focus on battles within the UAW nationwide for several years. Opponents believe that the idea, which calls for teams to work cooperatively on entire sections of cars and make suggestions to improve productivity, reduces job security.

The Van Nuys workers first backed ''team concept'' in 1986 by a margin of 53 percent to 47 percent.

In the election Wednesday and Thursday, Shrieves was re-elected with 1,534 votes, beating Pete Z. Beltran, a former Local 645 president who headed a slate calling for less concessions to management by workers at the plant, the spokesman said.

About 75 percent of the 4,000 UAW members eligible to vote cast ballots.

A runoff will be held Wednesday for office of vice president between Jess Pacheco of the Shrieves slate and Jake Flukers of the Beltran slate, as neither received a majority. Pacheco got 1,063 votes and Flukers had 1,011.

The campaign between the slates focused on the future of the plant, the only remaining auto assembly facility in Southern California.

The plant's viability was thrown into doubt late last year when GM announced that when it introduces the next generation of the Camaro and Firebird, the assembly of those cars will be moved to its plant in Ste. Therese, Canada. That move could take place as early as 1992.

GM has not said what its plans are for the Van Nuys plant, but it has said that it is considering converting it to a ''flex'' facility, which would be able to build a number of different models, depending on demand.

The uncertainty over the plant's future was heightened in April by the disclosure in news stories of an internal GM report, which showed that the Van Nuys facility had the highest defect rate of the 21 GM North American car assembly plants and the 10 GM truck plants.

However, GM insisted that the report also reflected customer perceptions of vehicle problems and denied that it ranks plants by defect rate.

Union members alleged that the report had been deliberately leaked by management to lay the groundwork for closing the plant. They also said that the comparisons of defect rates are not valid since the Van Nuys plant has older equipment than most others.

#90173u2157 06/22/1990 ~United Press International

JACKSONVILLE, FL (JUNE 22) UPI - Church bells rang throughout downtown Friday, signaling a time set aside to heal the city traumatized by a gunman's loan office shooting spree that killed eight people five days ago.

As the Rev. B. Fred Woolsey recited names of the dead at an afternoon memorial service attended by 600 mourners, Mayor Tommy Hazouri dabbed at his eyes. He said attending funerals and visiting survivors had made it an emotional week.

''This memorial is a release valve for me as well as everyone,'' Hazouri said after the interdenominational service. ''Now is the time for the coming together of this community.''

Woolsey, executive director of the National Conference of Christians and Jews, told mourners they needed to draw strength from each other and to send a message of healing and support to the families stricken by the tragedy.

''Their grief is our grief. Their loss is shared by all of us,'' Woolsey

said.

The service honored seven General Motors Acceptance Corp. employees and one customer who were shot to death Monday by gunman James Edward Pough. His attack in the GMAC auto finance office was the final act in a two-day shooting spree that ended when Pough, 42, shot and killed himself in the loan office.

Pough also had killed a prostitute and her pimp early Sunday and then wounded two teenagers 10 minutes later, Duval County Sheriff James McMillan said.

The next day Pough entered the GMAC office and sprayed it with gunfire from a .30-caliber semiautomatic rifle, killing the eight people and wounding five others before turning a .38-caliber revolver on himself.

Representatives of the Navy, paramedics and police officers were among those who took time out Friday to attend the restrained tribute to the dead.

As the ceremony began at the Prime Osborn Convention Center, people were still going in, standing wherever they could find space. The podium on the stage was bedecked with flowers, and eight religious leaders sat facing the audience.

In the front rows sat city and state officials, including the mayor and Gov. Bob Martinez.

Hazouri has described the incident as ''one of the darkest chapters in the city's history.

''I want each of you to know we care about you very much and share in your sorrow,'' said Hazouri, who asked for a moment of silent prayer to begin the service.

''Today is a solemn time,'' Woolsey said, ''a coming together to express our sorrow at the tragedy that struck our community. This is a call to healing and we are depending upon the One on high.''

''It's been tough because I feel, like everyone else does, this has been a loss for this community and I take that personally,'' Hazouri said later. ''It's been a very tough week for all of us and an emotional strain for me personally.''

Another memorial service was scheduled for Saturday morning, also at the convention center, for GMAC employees.

The shooting spree prompted Hazouri to call for tougher gun control laws.

Pough was allowed to buy guns, despite a history of violent crimes dating back to 1966, including a 1971 aggravated assault conviction.

#90173u2163 06/22/1990 ~United Press International

VANCOUVER, BRITISH COLUMBIA (JUNE 22) (UPI) - The Loewen Group Inc. of Burnaby, B.C. said Friday it has agreed to purchase the Paragon Family Services funeral home chain of Houston for $65 million.

Loewen said the price is ''subject to adjustment to reflect changes in certain assets and liabilities.'' The deal is scheduled to close September 18, 1990.

Loewen said the purchase is part of a program of owning ''well-managed funeral home operations throughout Canada and the United States.''

Houston-based Paragon owns and operates 47 funeral homes, primarily in the south central United States, and has pending agreements to acquire nine others.

All 185 Paragon employees will keep their jobs, Loewen said. Three senior Paragon executives, John T. Turner, Ronald R. Hamlin and F. Duane Schaefer will become Loewen executives.

#90173u2173 06/22/1990 ~United Press International

RIO DE JANEIRO, BRAZIL (JUNE 22) UPI - Workers at the state-owned petrolem monopoly Petrobras returned to their jobs Friday, ending a nine-day strike, the company president said.

Petrobras President Luiz Otavio da Mota Veiga told United Press International the workers, who had been striking to protest proposed layoffs, returned to their posts Friday without signing an agreement.

But Luiz Carlos de Souza, head of the petroleum worker's union at the Duque de Caxias refinery, told UPI that workers still were striking in the petroleum refineries at Paulina, Sao Paulo, Canoas, Rio Grande do Sul and Manaus in the Amazon state.

Petrobras has 10 refineries in all.

De Souza said leaders of Brazil's several petroleum unions decided whether they would continue striking at a meeting in Brasilia Thursday night after they had unsuccessfully presented their case before the Supreme Labor Court.

Union leaders asked the court to order Petrobras to rehire 2,500 workers laid off in government cutbacks this week, De Souza said.

Company officials refused to review the dismissals.

Under Brazilian labor legislation, the dispute should be legally decided by the high labor court. But since the tribunal will recess for July, it could be August before the court hands down an opinion.

The continuing strikes in Paulinia, Canoas and Manaus should not significantly affect Brazilian petroleum production, a company engineer told UPI.

The superintendent of the Canoas refinery said 1,050 striking refinery workers had agreed to comply with a company request to keep production at a minimum of 9,000 cubic meters of gasoline and natural gas per day.

In a related labor development, electric company workers, who had been striking for over a week, also returned to their posts Friday after accepting a 51 percent wage hike.

NEW YORK (JUNE 22) UPI - The last of four sales of antiquities and Greek and Roman coins from the collections of Texas' Hunt brothers brought the total for the auction series to $24.2 million, $9 million more than the pre-sale evaluation.

The collections were consigned to Sotheby's gallery by Nelson Bunker Hunt and William Herbert Hunt of Dallas, onetime multimillionaires who ruined themselves financially by trying to corner the world silver market a decade ago.

The antiquities and coins were among the Hunts' personal assets which must be sold by federal order within six years to pay back taxes and recompense creditors. More sales of coins are scheduled at Sotheby's next December and in March and June, 1991.

''We offered 953 lots this week and every one of them sold,'' said Matthew Weigman, a Sotheby spokesman. ''That's very special, really quite

exceptional for any sale of any kind. We are running $9 million - nearly 60 percent - above our experts' pre-sale estimates.''

The highest prices fetched in Friday's two-session sale was $66,000 for a Syracusan silver decadrachma coin minted in 405 B.C., $35,000 for an Greek electrum stater minted in 430 B.C., and $33,000 for a Roman aureus minted in 193 A.D. All were purchased by unidentified private collectors.

WASHINGTON (JUNE 22) UPI - The United States sent $300,000 worth of earthquake relief supplies - includings tents, blankets and hard hats - to Iran Friday through the American Red Cross and is planning more aid, State Department officials said.

According to a situation report released late Friday, the United States is preparing a relief flight carrying 1,000 hard hats, 1,000 pairs of leather gloves, 10,000 face masks, 2,940 wool blankets, and at least 500 tents.

The report said the total value of the first shipments is approximately $300,000, and more supplies will be sent through the Red Cross.

Japan has pledged $1 million cash and the European Community has donated $1.2 million relief supplies, the report said.

The U.S. situation report quoted Iranian government estimates putting the death toll in Thursday's massive quake at 35,000, with another 105,000 people injured and 250,000 homeless.

State Department officials said the United States contacted Iranian government officials through diplomatic channels to offer assistance.

Department spokesman Richard Boucher said, ''It is clearly a human tragedy. We want to be helpful, without regard to our political differences with Iran.''

Officials with the Office of Foreign Disaster Assistance of the U.S. Agency for International Development said the U.S. aid would be supplied through the Red Cross, which would deal with the Iranian Red Crescent Society.

Iranian officials have informed United Nations disaster relief officials in Geneva that Iran needs such things as blankets and tents and some kinds of food, but would not accept ''non-Islamic'' items, such as search dogs.

#90173u2209 06/22/1990 ~United Press International

NEW YORK (JUNE 22) UPI - Motorola Inc. went to a federal appeals court Friday seekinga permanent stay of an injunction that would prevent the U.S. manufacturer from selling powerful computer chips at the center of a patent dispute with Hitachi Ltd.

''Motorola filed documents for a permanent stay of injunction at noon with the U.S. Court of Appeals for the Federal Circuit,'' a Motorola spokesman told United Press International. ''We requested a permanent stay in connection with the ruling issued earlier this week in a Texas court.''

The two companies have been engaged for 18 months in a complex legal battle over a chip manufactured by Motorola - the 68030. Hitachi claims the chip infringes on one of its patents.

Federal District Judge Lucius Bunton in Austin, Texas, Tuesday entered an order to enforce an injunction he issued in March that barred both Motorola and Hitachi from selling in the United States the chips that are at the heart of the patent dispute.

When he issued the injunction, Bunton also granted a stay and urged the two chip manufacturers to settle the complex case out of court.

Because Motorola and Hitachi have failed to reach an agreement, Bunton Tuesday lifted the stay on the injunction barring the two companies from selling the chips. However, the Washington appeals court issued a temporary stay later Tuesday.

Without a legal stay in place, several U.S. computer manufacturers using the Motorola chip could be forced to stop production.

''In our documents, we cited the crucial role of the chip for the U.S. computer industry,'' the spokesman said.

Among the main users of the Motorola chip are Apple Computer Inc.'s high-performance Macintosh, Sun Microsystems Inc. and Hewlett-Packard Co.'s Apollo line.

According to industry experts, a suspension in distribution of the chip could also affect a wide range of workstations, the more powerful line of individual computing units.

Motorola lawyers were back in court Friday seeking a permanent stay until the case is resolved.

''Our appeal is a reiteration of what we think is essential - that Motorola be allowed to continue to supply the industry with the chip while the court deliberates,'' the spokesman added.

Motorola and Hitachi have a cross-licensing agreement due to expire next year. But Motorola initiated a suit against Hitachi, saying the Japanese manufacturer had secured its own patents in the United States, based on technology developed by U.S. companies.

Hitachi filed a countersuit against Motorola, claiming infringement of patent.

According to analyst George Lindamood, the issue at stake is so complex that it is hardly a matter to be handled by the courts.

''The court system is a poor place for resolving conflicts of this kind,'' saidLindamood, who follows the computer industry for the Gartner Group in Stamford, Conn. ''The complexity of these issues makes it inappropriate for the court system.

He said the two companies would gain from attempting to settle the issue out of court, possible through binding arbitration.

''International Business Machines Corp. and Fujitsu Ltd. resolved a dispute in the 1980s after agreeing to go through binding arbitration, and both companies gained from this,'' he said.

#90173u2213 06/22/1990 ~United Press International

HUNTSVILLE, TX (JUNE 22) UPI - A state appeals court Friday refused to allow a woman to seek a stay of execution for her son, a former voodoo priest and Hare Krishna follower who wants to die as scheduled Tuesday.

James Edward Smith, 37, insists he wants to be executed by injection, and has vowed there would be unspecified consequences if his mother or ''do-gooder'' defense attorneys succeeded in halting his execution a second time.

The Texas Court of Criminal Appeals, acting on a recommendation from state District Judge Bill Harmon of Houston, ruled Friday that Alexine Hamilton had no authority to intervene in her son's case.

''If anything is going to be filed challenging the conviction, Mr. Smith is going to have to file it,'' said court spokesman Rick Wetzel in Austin. ''It can't be filed by his mother, or his friends.''

Hamilton sought to intervene in the case by claiming her son was incompetent to waive further appeals, and it was not immediately known if she would pursue the case into the federal court system.

The U.S. Supreme Court in May rejected without comment an appeal filed by Hamilton, a resident of Indianapolis.

Smith was sentenced to die for the 1983 shooting of Missouri City insurance agent Larry Rohus, 44, who was killed after turning over money during a robbery at the Union National Life Insurance Co.

After handing Smith a bag of money, Rohus pleaded with the gunman not to shoot him.

Smith was angered when his mother managed to win a stay of a May 11, 1988, death date.

''Don't let my last words to you be bitter,'' Smith once wrote his mother. ''Please let my wish be carried out and let them execute me.''

Smith earlier said his continued incarceration was ''cruel and unusual punishment.''

Shortly after his first execution date was stayed, Smith claimed to have been involved in ritualistic killings in Orangeburg, S.C., New York City and Miami. But authorities in those areas said they were unable to substantiate any of Smith's claims that human sacrifices were offered to voodoo gods, and Smith said last week that he had lied.

Smith apparently believes he will come back to life as another person after his death.

''Time is all I have,'' he said of the delay of his 1988 execution date. ''I could already be 2 years old in another body, a 2-year-old prodigy.''

#90173u2221 06/22/1990 ~United Press International
(JUNE 22) UPI - The world is responding to Iran's call for help following a devastating earthquake.

The latest report by Tehran radio says 32-thousand-600 people died in the quake that struck yesterday. At least 100-thousand others are reported injured... and another 100-thousand were left homeless.

Iran's 10-year-old foreign policy has left it largely isolated. But international relief agencies and several countries... including the United States... are offering assistance.

Iran's mission to the United Nations issued a statement last night asking for help- ''in the name of the Almighty.'' The Red Cross says Iran needs medical supplies, tents, food, blankets and sleeping bags... but NOT doctors or search dogs.

The European Community granted more than one-Million dollars in emergency aid today, and Japan pitched in more than one-half-Million dollars. The International Red Cross is believed to have sent relief teams to Iran.

The White House also offered assistance, but it's NOT yet known if the offer has been accepted.

Although Iran is rich in oil, recent reports indicate falling oil prices have caused it to seek international loans.

-30- 1330
#90173u2228 06/22/1990 ~United Press International
WASHINGTON (JUNE 22) UPI - An international panel of experts said Friday radiation is three times more health-damaging than previously thought and it will recommend that governments reduce worker exposure limits by more than 50 percent.

The International Commission on Radiological Protection, an advisory panel of radiation experts, said new studies - particularly those focusing on Japanese atomic bomb survivors - show radiation is a more potent cause of cancer and genetic damage than was estimated by the panel 13 years years ago.

''Radiation is more risky than we thought in 1977 (by) a factor of three times more dangerous,'' said Dan Beninson, chairman of the commission and head of Argentina's nuclear energy commission.

Beninson also told reporters the new health risk estimates underlined more clearly than ever before that even low levels of radiation pose a hazard.

''Any dose of radiation, no matter how small, means a risk,'' he said. ''The larger the dose, the larger the risk, but we don't say there is any dose where there is no risk.''

The commission's conclusions are similar to the findings announced several months ago by a National Academy of Sciences panel, which said radiation was three to four times more deadly than previously believed.

As a result of its new health risk estimates, the international commission said it would revise its 1977 radiation protection guidelines later this year and recommend governments reduce occupational exposure limits from five rems of radiation per year to two rems.

The occupational exposure limits apply to nuclear power plant workers, uranium miners, medical personnel administering X-rays and other workers routinely exposed to radiation sources on the job.

For the general public, the commission said it would recommend no change in its current annual limit of 100 millirem - one-tenth of a rem - based on average exposure over a lifetime.

However, the panel said it would effectively tighten the standard by recommending the 100 millirem limit be applied over an averaging period of five years.

The new occupational exposure recommendation was criticized by Thomas Cochran, a nuclear expert with the Natural Resources Defense Council, who suggested the commission did not go far enough due to pressure from the nuclear industry.

Beninson acknowledged such pressures, but said the commission was confident its recommendations were based on solid scientific evidence, most notably new studies of cancer rates and genetic defects among Japanese who survived the U.S. atomic bomb attacks on Nagasaki and Hiroshima during World War II.

Frank Ingram, a spokesman for the U.S. Nuclear Regulatory Commission, which sets U.S. radiation exposure standards, said the agency had no immediate response to the commission's findings.

''We'll review the recommendations when they are made final and see what action, if any, is appropriate,'' Ingram said.

The NRC is just now acting to update its regulations to conform with the international panel's 1977 recommendation to reduce occupational exposure

limits to five rems. Current NRC regulations limit workers to 12 rems per year and the general public to 100 millirems per year.

A rem, which stands for ''roentgen equivalent, man'' is a unit of measurement expressing the biological effects of radiation.

U.S. officials estimate the average American is exposed to 360 millirem of radiation each year from radon, radiation from certain stone building materials, cosmic radiation and medical x-rays.

One hundred rem can cause radiation sickness and 500 rem is a lethal dose.

Beninson said the commission would not formally adopt its recommendations until November, but that the basic outline of the changes had been agreed to by members of the panel, a group first formed in 1928 by medical radiologists to provide expert advice on radiation protection.

Of the affected industries, Beninson maintained lower occupational exposure limits would have little impact on the nuclear power industry because most current exposures were far below the two-rem recommendation.

However, Beninson predicted the commission's recommendations could prompt new efforts to reduce exposure of medical personnel who apply X-rays and uranium miners in some countries.

-30- 4562
#90173u2240 06/22/1990 ~United Press International
(JUNE 22) UPI - The spotted owl and several forests may be saved because of a federal decision today... but thousands of timber jobs may be lost in the processs.

U-S Fish and Wildlife Service chief John Turner ordered the northern spotted owl classified as a threatened species. That paves the way for sharp logging restrictions intended to protect the rare bird.

The decision will climax three years of debate when it takes effect July 23rd.

The Fish and Wildlife Service says the owl's existence is threatened because logging breaks up the ancient forests that are the bird's main habitat.

Environmental groups see the listing as vital to save both the owl and old-growth forests... which have 200-year-old trees and support more life than tropical rain forests.

Old-growth trees also are highly valued for the large and superior logs

they produce.

The U-S Forest Service estimates an owl-protection plan would throw 28-thousand people out of work by the turn of the century.

President Bush launched a counterattck today against criticism that he has moved too slowly in responding to the savings-and-loan scandal.

Speaking at the Justice Department, Bush promised prison sentences for what he termed ''the cheats and the chiselers and the charlatans'' involved in the scandal. He also endorsed legislation calling for an extra 25-Million dollars to combat thrift fraud.

His comment came in a talk to the nation's U-S attorneys involved in investigating the S-and-L crisis. It also came as a followup to Democratic congressinal criticism that the administration has been lax in pursuing thrift fraud cases.

Attorney General Thornburgh told today's meeting Congress is reponsible for some of the delay in handling of thrift fraud cases. He says prosecutors are making progress despite what he termed ''congressional delays and funding shortfalls.''

#90173u2252 06/22/1990 ~United Press International

WASHINGTON (JUNE 22) UPI - U.S. exporters sold 120,000 metric tons of soft white wheat to Pakistan, a deal worth about $14.7 million, the Agriculture Department said Friday.

It was the first wheat sale to Pakistan since the wheat marketing year opened June 1.

There are 36.7 bushels of wheat in a metric ton of 2,204.6 pounds, so the tranasction called for the delivery of the equivalent of 4.4 million bushels in the coming months.

-30- 613

#90173u2258 06/22/1990 ~United Press International

WASHINGTON (JUNE 22) UPI - A city official testified Friday he saw Mayor Marion Barry slumped in a hotel bathroom with a makeshift crack cocaine pipe and a bag containing drug residue, the same night a convicted drug dealer testified he and Barry smoked crack in the bathroom.

District of Columbia Department of Public Works official James McWilliams testified he had earlier lied to police when he said no drugs were present in the Ramada Inn room of former city worker Charles Lewis.

McWilliams and Lewis, a convicted drug dealer, both testified against Barry as part of plea agreements with the government.

McWilliams testified he gave Lewis $40 to buy drugs on Dec. 19, 1988, and that when he visited Lewis at his hotel room that night saw crack cocaine and two makeshift crack pipes in the room.

Barry arrived later and the mayor and Lewis repeatedly went to the bathroom area, McWilliams testified, adding he saw smoke and smelled an ''unusual odor.''

But McWilliams said he never actually witnessed Barry using any drugs, and did not use any himself.

At one point, McWilliams, a special assistant with the Department of Public Works who had asked Barry about a job transfer, said he looked through the open bathroom door and saw Barry ''sitting on the commode with all his clothes on.'' He said a plastic bag with white drug ''residue,'' one of the makeshift pipes and matches were on the sink area.

''He appeared restful, peaceful. He was sitting on the commode and he was just sort of slumped over,'' McWilliams said. ''I kept making my pitch about the job and he looked up at me and said, 'You know, you look a lot like Santa Claus.'''

The courtroom broke into laughter.

''Did he look high to you?'' defense attorney Robert Mance asked during cross examination.

''He said I looked like Santa Claus,'' responded McWilliams, who has frosty gray hair and a gray beard and mustache, bringing another wave of laughter.

''That's not my question,'' Mance shot back.

''I don't have enough experience to say if he was high,'' responded McWilliams.

McWilliams said Barry and Lewis repeatedly returned to the bathroom over a several hour period, as he watched Monday Night Football.

McWilliams said Lewis would spend four or five minutes in the bathroom; Barry would spend about 10.

Barry and Lewis said things like, ''This is good stuff,'' and ''Let's go have another hit,'' said McWilliams.

But he added that Lewis would come out of the bathroom ''jubilant. ... He danced around and moved about.''

But he said Barry was ''somber.''

''The mayor was more subdued,'' he said. ''I was amazed at the contrast.''

Another witness, Barry's security guard Fred Gaskins, said he delivered an envelope to the room that night for Lewis from the mayor.

Lewis had said the envelope contained $300 so he could buy drugs. Gaskins said he saw the mayor place several papers in the envelope but not money.

Lewis testified for three days this week in Barry's drug and perjury trial that he and Barry shared crack at the Ramada on Dec. 16, 17, 19 and 22, 1988.

According to Lewis's testimony, McWilliams was the only other person present at any of the crack-smoking sessions and then only on Dec. 19.

McWilliams's testimony is considered critical because seven of the 14 counts against Barry directly relate to Lewis and the Ramada Inn, and only McWilliams apparently was present at any of the alleged crack smoking sessions.

McWilliams, a former assistant attorney general for the Virgin Islands and a friend of Lewis's since the 1960s, pleaded guilty in January to aiding and abetting the possession of cocaine by another person, Lewis. The government agreed not to prosecute him on the misdemeanor in return for his cooperation.

McWilliams told police on Dec. 27, 1988, that he did not see drugs during his Dec. 19 visit to the hotel room, but testified Friday he had lied to police.

''I did not want to be the one to give Barry problems,'' testified McWilliams, calling Barry, who he has known for two decades, ''a man who I respect.''

Barry later told reporters he thought McWilliams was ''well rehearsed.''

Lewis had testified that Barry frequently used crack and powder cocaine. On Thursday, defense lawyer R. Kenneth Mundy worked to undermine his credibility by challenging his ability to recall dates and details.

Mundy did not, however, challenge Lewis's accounts of drug use with Barry, the city's mayor since being elected in 1978. Barry is not seeking a

fourth term but would be removed from office if convicted of a felony and jailed before his term ends next Jan. 2.

''Everybody keeps looking for a knockout with the witnesses,'' Mundy told reporters after court Friday. ''I remind you that you win fights also on points, by knicks and bruises. ... We're in the fifth round, approximately equating this with a boxing match, and there's a lot more to come.''

Barry is charged with three felony counts of perjury, 10 misdemeanor counts of cocaine use and one misdemeanor count of conspiracy to possess cocaine. If convicted he faces a maximum 26 years in prison and $1.85 million in fines.

The grand jury probe that led to Barry's drug arrest in an FBI sting five months ago began with an investigation of the Ramada Inn incident. Barry was arrested Jan. 18 at another city hotel, the Vista International, after the FBI allegedly videotaped him smoking crack cocaine.

#90173u2268 06/22/1990 ~United Press International

ST. LOUIS (JUNE 22) UPI - The diverse St. Louis economy could absorb layoffs of 4,000 McDonnell Douglas Corp. workers, although a sluggish national economy could hamper some employees' job-seeking efforts, an employment analyst said Friday.

McDonnell Douglas said this week it would make companywide layoffs in a cost-cutting move as it copes with cuts in U.S. defense spending.

The company did not release figures on the potential layoffs, but the largest union at the company's St. Louis plant said Thursday that McDonnell Douglas had indicated 4,000 workers could be laid off there.

''Four thousand people losing their jobs is a significant number of workers put out of work,'' said Russ Signorino, research analyst with the Missouri Division of Employment Security in St. Louis.

''To keep it in perspective, we have to remember that even though McDonnell Douglas is the largest employer in the metropolitan area, that's 40,000 people out of a labor force of about 1.2 million people - or 4 percent of the work force.''

Signorino said it was difficult to predict how the McDonnell Douglas layoffs would affect the area's employment.

''Not only do you have to look at what the economy will be like when these people are put out on the street, but we don't know what jobs will be affected,'' he said.

Signorino said laid-off white collar employees could have a more difficult time finding jobs than some blue-collar workers such as journeymen machinists, whose skills are sought at manufacturing plants across the country.

He said the St. Louis area recently has experienced layoffs at several companies, including the layoff of 1,900 Chrysler Corp. workers, yet the area's unemployment rate has declined.

The rate for April was 5.1 percent, close to the national average, Signorino said.

As McDonnell Douglas employees await layoff notices, local officials are devising plans to help.

St. Louis County Executive H.C. Milford on Thursday outlined a three-part initiative to deal with the layoffs.

Among other things, the county would apply to the Defense Department's Office of Economic Adjustment for assistance in developing an economic diversification plan.

The initiative also calls for seeking Missouri Division of Job Development and Training funds for worker assessment, counseling, training and job development and search assistance.

-30- 2599

#90173u2277 06/22/1990 ~United Press International

(JUNE 22) UPI - The government says durable goods orders, personal income and savings are up... but economists doN'T seem overly impressed.

The Commerce Department reported today that personal income nosed up by three-tenths of one percent in May.

Personal savings rose by a reported two-tenths of one percent last month. The six-point-two percent savings total for the month is just off the five-year high in March.

A government spokesman said personal consumption stayed the same in May after seven months of increases.

While the personal income hike was generally expected... analysts were surprised by a jump in durable goods orders last month of three-point-nine percent.

Most of the increase came in the transportation sector, which increased

orders by almost 10 percent. Much of that came from orders for motor vehicles. Economists say General Motors is trying to build inventories in case of a possible strike.

But some economists say the underlying economic trend remains down.

A second picture of the heavens taken by the Hubble Space Telescope was released by NASA today.

The black-and-white picture is of two stars in a star cluster taken earlier this week by the telescope's most powerful camera. The cluster is about five-thousand light years from Earth and is about 12-BILLION years old.

NASA officials say the cluster was selected because the positions and brightness of the stars are well known. The picture was taken as an engineering test of the camera and NOT to yield any new scientific discoveries.

The first telescope picture was taken May 20th by a second camera aboard the one-BILLIONMillion dollar space observatory. The new picture is about twice as sharp as the earlier one, and that photo was clearer than scientists had expected.

-30- 1971
#90173u2307 06/22/1990 ~United Press International
(JUNE 23) UPI - SPORTS DIGEST

Baseball

Commissioner Fay Vincent set a July 5 hearing concerning the relationship between Yankees owner George Steinbrenner and admitted gambler Howard Spira. ... Chicago Cubs second baseman Ryne Sandberg committed his first error in 156 games, bobbling a grounder by the Cardinals' Milt Thompson in the fourth inning. The error was only the second by Sandberg in 754 chances.

Basketball

Georgetown Coach John Thompson, citing poor timing, turned down the Denver Nuggets' offer to become their general manager. Thompson was reportedly offered $700,000 a year for four or five years and a chance to eventually own almost 4 percent of the club. He said said money played a limited factor in his decision.

Boxing

Boxer Mike Tyson gave Nelson Mandela high marks as a heavyweight fighter - in the human rights arena. The anti-apartheid hero, once a boxer, said in interviews upon his release that he admired Tyson. Tyson was in the audience at the United Nations Friday as Mandela addressed the world body. The two chatted briefly in the General Assembly Hall. Tyson said he and Mandela joked about shadow boxing each other.

College

The NCAA is investigating allegations of grade fixing by Miami (Ohio) basketball Coach Jerry Peirson. The NCAA alleged that in the 1988-89 academic year, Peirson arranged for a player to receive an ''A'' in ''basketball theory,'' a course Peirson taught, even though the player did not attend the class or do any work. ... West Virginia and Notre Dame announced a three-game football arrangement beginning in 1997. ... The University of Miami and the city signed an agreement under which the Hurricanes football team will play in the Orange Bowl Stadium for 10 more years. ... Anthony Avant of Seton Hall scored 20 points and Carl Beckett of St. John's added 18 to guide a Big East team a 109-84 victory over Tallin Kalev II in Jovega, Estonia. The Big East is 1-2 in its tour of Finland and the Soviet Union.

Cycling

Sean Kelly of Ireland won the Swiss cycling tour. Kim Andersen of Denmark won the 11th and final stage. Swiss Daniel Steiger was second and American Andy Hampsten third.

Drugs

Former NCAA shot put champion Mike Stulce of Texas A&M has been suspended for two years by The Athletics Congress for testing positive for testosterone, a muscle-building drug. ... Long jumper Larry Myricks, an Olympic medalist for the United States who is serving a three-month drug suspension, tested positive for the same stimulant at two other indoor events this year.

Football

Doug Flutie, the former Boston College quarterback and 1984 Heisman Trophy winner met with the CFL's British Columbia Lions, but did not discuss contract terms.

Golf

Black leaders have called on Hall Thompson, the founder of the Shoal Creek Country Club in Birmingham, Ala., which will hold this year's PGA Championship, to apologize for remarks defending the club's policy of

excluding blacks. Thompson said earlier this week the country club would not be pressured into accepting blacks. He said blacks were allowed to play the course during the 1984 PGA tournament and that Shoal Creek's black caddies get to play the course every Monday. ''But we have the right to associate or not associate with whomever we choose.'' he said.

Harness Racing

The $1 million North America Cup, the biggest harness race of the year in Canada, will have undefeated Beach Towel as the 6-5 favorite. In six starts this year the 3-year-old pacer has won $362,933.

Law

A federal judge in Chicago dismissed a lawsuit filed against Creighton University by Kevin Ross, a basketball player who dropped out of college so he could learn to read and write. Ross alleged educational malpractice and emotional distress.

Soccer

A 40-year-old civil servant in Egypt hanged himself after Egypt lost 1-0 and was eliminated by England from the World Cup. ''My life was over the minute the Egypt-England match was over and the Egyptian national soccer team eliminated from the World Cup finals,'' he said in a note found near his body. ''I wish the Egyptian team better luck in the 1994 World Cup.'' ... Africa's call for an increase in its two-nation quota for the World Cup will be discussed by soccer's governing body in December.

Tennis

Defending champion Martina Navratilova will meet Gretchen Magers in the finals of the Pilkington Glass Championships at Eastbourne, England. Navratilova defeated Jana Novotna 7-6 (7-3), 3-6, 6-3 and Magers beat Lori McNeil 7-6 (8-6), 6-2.

-30- 4767
#90173u2318 06/22/1990 ~United Press International
(JUNE 22) UPI - South African authorities are investigating a report that right-wing activists planned to stage a coup aimed at toppling the governent.

The plot is said to have included a plan to assassinate President Frederik de Klerk and black leader Nelson Mandela. Details of the plot were reported in a South African newspaper that said the suspects included a former Nazi in the white-separatist Afrikaner Resistance Movement, known as the A-W-B.

The report said the plan called for Mandela to be killed when he returns from a 14-nation tour late next month. It said De Klerk was to be killed as a prelude to a right-wing takeover.

Other details of the plot are said to include unspecified action against several unnamed members of Paliament.

An A-W-B spokesman had NO comment on the report.

Eleven persons were questioned by authorities concerning the report, but have since been released.

The Soviet Union today asked of German re-unification the same thing it seeks of Lithuania's independence movement... a period of transition.

Soviet Foreign Minister Shevardnadze suggested that East Germany remain in the Warsaw Pact... and that West Germany stay in NATO for five years after unification.

He also called for major troop cuts and the virtual withdrawal of all foreign troops from German soil. But U-S Secretary of State Baker and his British and West German counterparts promptly rejected the proposals.

The exchange came in East Berlin at the second round of German unification talks. The negotiations are known as two-plus-four because of the participation of the two German states and the four World War Two victors: Britain, France, the Soviet Union and the United States.

While the differences over the military future of a united Germany are increasingly evident... it appears all parties agree that unification can take place this year.

SALT LAKE CITY (JUNE 22) UPI - Mormon Church President Ezra Taft Benson, religious leader to the world's 7 million Mormons, remained hospitalized Friday for treatment of a bacterial infection, church officials said.

The 90-year-old church leader remained in serious but stable condition in LDS Hospital's intensive care unit, but his condition was improving, the church said in a statement.

''His attending physicians reported he had a restful night and is responding well to treatment,'' the statement said.

Hospital officials said Benson felt well enough Thursday to sit up in a

chair in his room on two occasions, each time for about an hour.

Benson, church president since Nov. 10, 1985, was taken by ambulance to the hospital about 7:45 a.m. Wednesday ''after experiencing difficulties at his Salt Lake City apartment,'' according to a church statement.

Benson was agriculture secretary during the Eisenhower administration. He was the first Mormon to serve in a presidential cabinet and the first clergyman in 100 years to attain cabinet rank.

He has suffered from recent health problems and was hospitalized a month ago for medical tests. Doctors gave Benson a heart pacemaker in November 1986.

Mormons believe their president receives direct revelations from God.

SAN MATEO, CA (JUNE 22) UPI - An ex-bus driver charged with a fatal random shooting rampage died at the jail ward of San Mateo County General Hospital, apparently from his second suicide attempt, authorities said Friday.

Paul Bellazain, 48, was found unconscious in his hospital bed by one of his doctors about 10 a.m. Thursday, authorities said.

One end of his bathrobe was tied around his neck. The other was connected to his bed, County Health Director Margaret Taylor said. Bellazain was revived and put on a ventilator, but died around midnight.

Bellazain, who had been on disability leave from his job as a bus driver with the San Francisco Municipal Railway, was in custody for fatally wounding James Vazko, 43, a copy editor with the San Francisco Examiner, May 1 at a San Francisco Park with a shotgun.

He was also accused of wounding a motorist on Interstate 280 and wounding two Daly City police officers in a shootout after he fled to a chiropractic office and took two hostages.

He pleaded innocent by reason of insanity. While awaiting a preliminary hearing, he drank a caustic cleaner in the San Mateo County Jail and was hospitalized with internal injuries.

Bellazain was being checked by doctors for a scheduled court appearance Monday when the latest incident occurred.

One of his doctors, whose identity was withheld, had been with Bellazain

and left him alone for about 5 minutes. When the doctor returned to the room, Bellazain was unconscious.

He remained in critical condition, unable to breathe on his own, until he died.

#90173u2351 06/22/1990 ~United Press International

MINNEAPOLIS (JUNE 22) UPI - Honeywell Friday withdrew its International Trade Commission complaint against Minolta Camera Co. after a trial date was set in its autofocus patent infringement lawsuit.

Honeywell said U.S. District Judge Alfred Wolin set Set. 3, 1991 for the start of the trial in New Jersey.

In a statement, Honeywell said ''we are very pleased that our case has been accelerated by more than one year and that we are finally on track to get a decision in this matter.''

Christopher Steffen, Honeywell vice president, said the company was confident of ''a favorable trial outcome.''

In a suit which has been pending for three years, the company is seeking both damages and a sales injunction against the Japanese camera company.

Steffen said the fixed trial date will end Minolta's continued efforts to delay the court case and will produce a decision in the same time frame as a trade commission action.

At the same time, he said, ''We recognize that our ITC complaint would have been an important test case to clarify Congress' intent in amend Section 337 to protect American Technological know-how.''

Steffen said Honeywell was considering filing trade complaints against other camera manufacturers that it said allegedly violated Honeywell autofocus technology.

SAN ANTONIO (JUNE 22) UPI - Six sailors critically injured in a fire aboard the U.S. aircraft carrier Midway off the coast of Japan arrived in Texas Friday for treatment of burns suffered in the accident.

The six sailors arrived at Brooke Army Medical Center at Fort Sam Houston about 4:15 p.m., after being airlifted from Japan to Kelly Air Force Base in San Antonio and then transported by ambulance to the Army hospital's

world-renowned burn treatment unit.

Each sailor was listed in critical condition. Their burns covered from 14 percent to 80 percent of their bodies, Brooke spokesman Ray Dery said.

''The fact that they were able to be moved and withstand the trip is an indication that they're going to be doing all right,'' Dery said.

The six injured sailors were identified as Chief Warrant Officer Michael Huffman, 35, of Gibbon, Neb.; firefighter Joseph A. Boccuzzi, 25, of Northfield, Ohio; damage control chief Joseph A. Brock, 36, of Jeffersonville, Ind.; firefighter Robert Harris, 19, of Kincaid, Ill.; firefighter Robert ''Shane'' Kilgore, 22, of Ventura County, Calif., and firefighter Daniel A. Robertson, 23, of Powder Springs, Ga.

The injured sailors were accompanied by a 10-member medical team that had departed Brooke Army Medical Center Wednesday night for Japan. The team originally was scheduled to bring eight injured sailors home, Dery said, but one of the victims did not need hospitalization and another was injured too seriously to be moved back to the United States.

The Midway, the oldest aircraft carrier in the U.S. fleet, was conducting routine flight operations about 125 miles northeast of Tokyo in the Pacific Ocean when an explosion ripped through a damage control storeroom three decks below the flight deck at midday Wednesday.

The cause of the fire was under investigation.

Dery said families of the injured sailors from Ohio, California and Georgia were waiting at Fort Sam Houston when the injured men arrived and would be housed on the base while the victims are treated.

BAMC's 40-year-old burn treatment unit is the only military research and treatment center for burns.

#90173u2370 06/22/1990 ~United Press International

BOSTON (JUNE 25) UPI - Bank of New England Corp.'s chairman and at least one other top executive were headed to the Far East Friday on trips analysts said may be designed to sell subsidiary banks or other assets to Japanese investors.

Bank of New England spokesman Thomas Lavelle, who first described Chairman Lawrence K. Fish's trip as personal, later called it a ''courtesy visit to our traditional Japanese correspondent banks.''

But Fish's trip was not an effort to raise cash, said Lavelle, who

declined to provide details or to confirm plans by Arthur Meehan, company treasurer, to fly to Japan and Taiwan.

Fish has wide experience and many contacts in Japan, where he represented the Bank of Boston Corp. His wife is Japanese.

Moreover, in a series of asset sales that have reduced the company to about $25 billion in assets from more than $32 billion last fall, Bank of New England has already sold some businesses to Bank of Tokyo.

Roger Powell, an analyst who follows Bank of New England for Alex. Brown & Sons in Baltimore, said a sale of the ''good'' parts of the company's banks in four New England states is a possibility.

''There are investors interested in buying into the banking industry at the right price and with the right protection against risk,'' Powell said. Also, he said, ''Mr. Fish and his domestic team have a lot of money contacts, domestic and international.''

However an analyst who declined to be identified said a sale of the New England banking operation to a Japanese bank is unlikely because ''they tend not to like to do anything with troubled institutions.''

A second analyst who declined to be named said: ''Obviously, they are pursuing any and every legitimate lead they can. ... They're short on capital and there's a priority to get some capital back into the bank.''

Lavelle said the company has sold most of the properties it intends to shed except for Bank of New England-Old Colony in Rhode Island and Maine National Bank, both of which he said the bank expects to sell by the end of this year.

Meanwhile, in a separate announcement, the company said it hired D. Bruce Wheeler, a former Boston banker, to replace Leo R. Breitman as president and chief operarting officer of the company's biggest bank, Bank of New England N.A., in eastern Massachusetts.

Breitman was promoted to vice chairman and senior credit policy officer.

Wheeler, who for several years worked directly for Fish at the Bank of Boston, was hired from First Nationwide Bank of San Francisco, where he had been head of its banking division for just eight months.

#90173u2419 06/22/1990 ~United Press International

(JUNE 22) UPI - Iran today said it would welcome earthquake relief supplies from the United States. State Department officials in Washington

say Iran would accept the offer of help through the American Red Cross or other humanitarian agencies.

Nelson Mandela thanked the United Nations today for its 45-year campaign against South Africa's racial segregation policy. The nationalist leader also urged the world to continue economic sanctions against the Pretoria government.

In an address to the world organization in New York, Mandela termed the apartheid system an ''indelible blight on human history.'' And he urged the United Nations to suppress the racial policy and to punish its ''perpetrators.''

The U-S government put the northern spotted owl on its list of threatened species today. That will mean sharp logging restrictions expected to cost thousands of jobs in the Pacific Northwest. Federal officials are to announce logging changes Tuesday.

The Navy says a C-H-46 Sea Knight helicopter crashed today five miles off Virginia in the Chesapeake Bay. A search team is trying to find the crew. The Navy grounded C-H-46 helicopters twice this year to repair defects.

Quebec's threat to pull out of Canada reached a crisis point today, as Manitoba's legislature adjourned without approving a constitutional amendment demanded by Quebec. The government will try to extend a deadline to save the measure.

A woman real estate agent dubbed ''Robin Hud'' when she claimed to have given away Millions of dollars of government funds was sentenced to nearly four years in prison in Baltimore today. The theft is linked to a Housing and Urban Development scandal.

Fire swept through an 18th century mansion 30 miles northwest of London today, causing an estimated 86-Million-dollars in damage. Police say the dwelling was crammed with antiques and art works belonging to an Arab sheikh. The cause of the blaze is still UNknown.

#90173u2458 06/22/1990 ~United Press International

NEW YORK (JUNE 22) UPI - The stock market ended a sluggish week Friday in a frenzied final hour of speculator selling that accounted for almost the entire week's losses.

''It was a sluggish week, with not a lot of interest and not a lot of economic numbers to influence trading,'' said one analyst, who asked to remain unidentified.

''Traders feared the Federal Reserve Board's anticipated easing of credit won't happen,'' he said. ''It was a week of unmet expectations.

The Dow Jones industrial average fell 44.55 Friday to close at 2857.18, ending the week down 78.71. It plunged 58.66 in the last hour of trading.

Among broad market indexes, Standard & Poor's 500-stock index fell 7.48 to 360.47 and the New York Stock Exchange composite index was off 3.62 points to close the week at 197.53.

Declines led advances 1,007-818 among the 2,188 issues traded this week. Big Board volume totaled 717,051,540 shares, compared with 776,524,540 a week earlier and 842,517,800 a year ago.

Friday, the Dow was up 14.11 at 3 p.m. EST, supported by many cash-rich institutions closing out their books for the quarter, and the day was expected to end on the upside.

But then the market was hit ''by three waves of program selling,'' said Trude Latimer, market analyst with Josephthal & Co. in New York.

Another analyst agreed saying, ''The programs were definitely the catalyst but then the move downward took on its own momentum.''

''Being a Friday, some people in speculative positions didn't want to go home and spend the weekend with that on their minds,'' he said.

He said about 45 points were lost in the last half hour of trading.

On the trading floor, AT&T was the most active issue off 1 1/8 on the week to 42 1/2.

American Express was the next most active gaining 1/4 on the week to 30 1/2. Philip Morris, which announced Friday that it will buy Swiss confectioner Jacobs Suchard, followed with a gain of 3/8 to 44 3/4.

Beverly Enterprises, the nursing home chain, was up 5/8 to 5 7/8, reflecting the market's week-long interest in drug and health-care stocks.

On the American Stock Exchange, the Amex Market Value index added 2.86 to close Friday at 364.03. Advances led declines 432-373 among the 1,007 issues traded.

Amex volume totaled 62,423,780 shares, compared with 58,054,835 traded a week earlier and 64,046,805 traded in the same week a year ago.

Hillhaven led the Amex actives, up 1/4 at 1 3/4.

The National Association of Securities Dealers composite index fell 8.22 to end the week at 450.33.

#90173u2479 06/22/1990 ~United Press International

CAIRO, EGYPT (JUNE 22) UPI - A 40-year-old soccer fan hanged himself Friday because Egypt was eliminated by England from the World Cup.

Siyyed abdel Aal, a civil servant, wrote a note that was found near his body.

''My life was over the minute thet Egypt-England match was over and the Egyptian national soccer team eliminated from the World Cup finals,'' the note said. ''I wish the Egyptian team better luck in the 1994 World Cup.''

Police sources said abdel Aal was a loner living in the densely populated Nile Delta town of Damietta and had been suffering from depression.

Egypt lost 1-0 to England in Cagliari, Sardinia, Thursday and was eliminated from the 24-team tournament. The game was broadcast live on Egyptian television.

England was left counting the cost of its successful battle to qualify for the second round of the World Cup.

Centerback Des Walker was having a precautionary X-ray on his injured right fibula, striker Gary Lineker was nursing a badly infected toe and skipper Bryan Robson was making slow progress from an Achilles tendon injury which threatens to keep him out of next Tuesday's second round match against Belgium in Bologna.

England manager Bobby Robson said Walker was left limping and sore after Thursday night's 1-0 victory over Egypt which secured England the top spot in Group F ahead of Ireland and Holland.

''We have laid the foundations for our World Cup,'' said Robson, ''we've now got five days to get everyone fit for the match against Belgium.''

The last time the two teams met was during the 1980 European Championships in Italy. The match played in Turin ended in a 1-1 draw and is remembered mainly for a riot by English fans who were tear-gassed by police. The tear-gas also drifted across the field and left the players of both teams sputtering and gasping.

Czechoslovakia's Ivan Hasek has the appearance of someone better suited to follow rather than lead.

But when the 5-foot-8, 160-pound midfielder spoke in Prague's city square last November to show that the country's national soccer team backed the people's revolt against the Communist government, he clearly solidified his role as team captain.

''Being the team captain carries big responsibility,'' the soft-spoken Hasek said. ''We also have a responsibility to our people and their wishes.

''For years, we were were told, 'You must do this, you must do that.' Now we, the people, decide what we will do if it is what we want. Man must only die.''

Hasek, 26, said the spirit of last November's uprising has been a constant thought for the Czechoslovak soccer team, which has advanced to the second round of the World Cup, and plays Costa Rica Saturday night in Bari.

''Of course when we lose, our supporters are not satisfied,'' Hasek said. ''Lately, they have been very satisfied.''

FIFA officials, and the team managers, players and supporters of England, Ireland and Holland breathed an audible sigh of relief after the completion of Group F.

England's 1-0 victory over Egypt and Holland's 1-1 draw with Ireland meant that the worst possible fears of all concerned - a lottery to settle a four-way tie in the group - had been averted. Egypt was not so fortunate. Its loss to England put it out of the competition but at least it went out with its destiny answered on the field and not left to a random draw by officials.

Ireland was placed second in the group and Holland third, and although that determined their second round opponents, at least FIFA did not have to decide which teams qualified and which were eliminated by drawing plastic balls out of a bowl.

The six matches in the group, split between Cagliari in Sardinia, and Palermo in Sicily, produced five draws.

That has only happened once since the 24-nation finals started eight years ago.

In 1982 Group 1 in Spain between Cameroon, Peru, Poland and Italy also ended with five tied games. Poland won the group, Peru was eliminated, but Italy qualified at the expense of Cameroon, having scored one goal more than the Africans. Italy went on to win the Cup.

Africa's call for an increase in its two-nation quota for World Cup finals will be discussed by FIFA, soccer's governing body, at its December

meeting.

''We will look at the qualifying system for Asia, Africa and CONCACAF on technical merits and sentiment won't come into it,'' FIFA president Joao Havelange said Friday.

But he rejected complaints from African members, who claimed there should only be one British representative in the qualifying competition and not four.

''If there are two British teams here in the finals (England and Scotland) it is because they are good enough. They had to qualify like everyone else '' he said.

-30- 4951

#90173u2498 06/22/1990 ~United Press International

NEW YORK (JUNE 22) UPI - Debt-troubled real estate and casino magnate Donald Trump broke his silence about his financial plight Friday, voicing confidence he will survive and implicitly urging a group of foreign banks to approve a critical bailout plan.

Meanwhile, a source informed on the talks said they were moving ahead after two days that showed little apparent progress. ''It looks like we're moving closer to an agreement,'' said the source, who declined to be moved.

The banking source said Japanese banks that raised objections to the plan late Friday seemed to be softening their position.

''They haven't yet agreed, but it looks very promising that they will,'' the banker said. But there was ''somewhat less optimism'' that the Dresdner Bank, a West German institution, would back the plan.

Trump, scrambling for weeks to restructure $2 billion in bank debt in order to keep up interest and principal payments on another $1.3 billion in publicly traded bonds, said more than his personal fortune is at stake.

In a one-page statement released in his name by the Trump Organization, his holding company, he argued that thousands of employees and suppliers of his real estate, hotel and casino holdings would also suffer if he went under.

Trump must pay nearly $43 million in overdue interest and principal on bond issues for his Trump's Castle casino in Atlantic City, N.J., by midnight Tuesday, or his creditors can move to foreclose on it. That could send a line of financial dominoes toppling, ending in bankruptcy.

The foreign banks, which hold shares of loans made to Trump by Chase

Manhattan Corp. and Citicorp, have emerged as the main hurdle to the plan to give Trump new money and a breather from his huge interest burden.

Citicorp's talks with the foreign banks were ''ongoing,'' another source said, indicating the No. 1 U.S. bank also was stalled.

The Japanese, German and Canadian banks holding liens on Trump assets refused to allow other liens to be attached to the properties. The secondary claims were part of the complex deal to refloat Trump's empire.

But by the end of the week, the Japanese bankers ''all seemed to believe that the agreement was the best course for the entire group,'' said the first banking source, though talks had not yet concluded.

He said it was believed the Frankfurt-based Dresdner Bank wanted the others to buy out its $15 million share in the Trump Tower, the developer's headquarters, but said the other banks were unwilling to do this.

This source said he believed Trump's statement was in response to the news that the Japanese were close to agreeing.

''The banks we have been working with are very close to coming together in support of a restructuring plan,'' Trump said in the statement.

He said ''an overwhelming majority'' of the banks he owes money to have agreed to the plan, under which he would obtain $65 million in fresh cash to meet casino bond obligations, and suspend some interest payments.

Trump said this was ''a tremendous vote of confidence in the strength of the Trump Organization as we move forward.'' He added, ''I look forward to working with'' the banks to reach a final accord.

''A final agreement would benefit all of us, but perhaps most important are the 25,000 employees and thousands of family firms and other suppliers - spanning the hotel, construction, development and travel industries, that are dependent upon the Trump Organization,'' he said.

''There is a dramatic multiplier effect - take one person out of a hotel and six service people are affected,'' said Trump, who owns the Plaza Hotel in Manhattan and three Atlantic City hotel-casinos.

''I want to do not only what is in my economic interests,'' said Trump, who was often regarded as a symbol of the Eighties mania for acquisition and personal aggrandizement, ''but what is right for the economy of the region.''

Then the struggling developer issued an implicit appeal to the Japanese

and other foreign banks who were standing in the way of his bailout.

''I am confident,'' he said, ''that the handful of remaining banks will choose to join us to get this restructuring deal put together.''

#90173u2620 06/22/1990 ~United Press International

OTTAWA (JUNE 22) UPI - The Canadian government Friday declared dead a constitutional amendment that was designed to keep Quebec from fulfilling its threat to secede but ended up alienating several other of the nation's provinces.

Prospects for passage of the legislation, formally known as the Meech Lake accord, were buried when provincial legislatures in Manitoba and Newfoundland adjourned without voting on the measure.

The amendment to Canada's constitution would have answered the longtime separatist sentiment in Quebec by conferring upon the province special powers to promote and preserve its French language and culture.

Sen. Lowell Murray, the federal government's special envoy lobbying for the amendment, said Newfoundland Premier Clyde Wells ''has killed the last hope for success of the constitutional accord by refusing to hold a vote.''

Upon hearing that the amendment was dead, the French-speaking province's premier, Robert Bourassa, told Quebec's National Assembly: ''In the name of all Quebecers I want to profess my profound disappointment.''

Murray said Prime Minister Brian Mulroney would address the nation Saturday on the demise of the accord. The senator said even if the vote had been held in Newfoundland, ''it would have turned out the way Mr. Wells wanted it to.''

Bourassa, who has said repeatedly Quebec would secede if the amendment failed, refused to indicate what his next step would be. But he told his

province's Assembly the rest of Canada should understand that ''Quebec is today and forever a distinct society, capable of ensuring its own development and destiny.''

Bourassa was to make a longer formal statement Saturday on Quebec's future. Several months ago he organized a committee of provincial politicians to examine several options, including declaring sovereignty but keeping some sort of legal association with the rest of Canada.

In Calgary at a convention of Canada's Liberal Party, several hundred delegates from Quebec wore black arm bands after hearing of the amendment's demise.

The fate of the amendment, which had to be approved by the legislatures of all 10 Canadian provinces by midnight Saturday, rested with Newfoundland and Manitoba, the only two provinces that had not approved it.

The amendment was negotiated at Meech Lake by Mulroney and leaders of the 10 provinces three years ago when Quebec refused to sign Canada's 1982 constitution, arguing it did not recognize the province's French-speaking population.

Quebec had promised to add its signature to the constitution had the Meech Lake accord been approved.

Wells, a constitutional lawyer and hero to millions of English-speaking Canadians who oppose the amendment, said he decided not to hold a vote Friday after the federal government said it might ask the Supreme Court for an extension.

In an eloquent 90-minute speech, Wells said the government's attempts to have the deadline waived amounted to another ''fabricated precipice'' and he could not allow the vote at this time. However, Wells said he was willing to hold the vote at a later time if the Supreme Court agreed the deadline could be waived.

''We want to treat Quebec fairly,'' Wells said, ''but we are not prepared to sell our souls.''

But Murray, emerging from a two-hour emergency session of the federal Cabinet, said there was no longer any point in seeking to waive the deadline. ''Mr. Wells' decision not to hold a vote has dashed the one remaining hope to have Meech Lake succeed,'' Murray said.

In Manitoba, Elijah Harper, a Cree Indian member of the provincial legislature stymied the amendment by denying lawmakers the opportunity to extend debate on the measure until Saturday. A motion to extend the legislative session would have required unanimous consent.

Outside the Manitoba legislature, hundreds of native Indians celebrated Harper's action.

''The voice of aboriginal people has been heard across the country,'' Harper said, adding that Canada's 600,000 native Indians must be recognized as a fundamental part of Canada and a distinct society.

#90173u2672 06/22/1990 ~United Press International

(JUNE 22) UPI - Nelson Mandela urged the United Nations today to continue its support for economic sanctions against South Africa. The African National Congress leader coupled his call with praise for the world organization's record in opposing Pretoria's racist policies. In a speech at U-N headquarters in New York, Mandela termed apartheid ''a crime against humanity'' and thanked the United Nations for its 45-year campaign against it.

Iran radio reports foreign medical teams arrived in Tehran today to assist in relief operations for earthquake victims. The official Iranian news agency says yesterday's quake killed at least 30-thousand people. It is now believed to be one of the worst in Iran this century. An official of the Iranian Red Crescent relief group told U-P-I ''whole towns were flattened like they were NEVER there.''

Senate Republican leader Robert Dole urged a symbolic vote today on a constitutional amendment prohibiting desecration of the flag. He coupled this with a charge that in rejecting the proposal yesterday the House... in his words... rejected ''the will of the American people.'' But he conceded that even if the Senate voted on the amendment, the proposal would probably lose.

An AIDS information group in San Francisco says a controversial drug derived from a Chinese cucumber improves patients' immune systems. Project Inform based its findings on tests of 46 patients who took Compound Q and the drug A-Z-T for about four months. But the editor of The New England Journal of Medicine was among the doctors who criticized the group for NOT showing its data in a scientific journal. Compound Q can cause disabilities.

Romania's government today offered its support to opposition parties whose offices were ransacked last week by vigilante miners. A government statement in Bucharest said the free activity of the opposition guarantees free expression. But the statement did NOT say whether the government would pay for the damages.

#90173u2691 06/22/1990 ~United Press International
MILWAUKEE (JUNE 22) UPI - The sausage company Fred Usinger Inc. said Friday it would recall packaged meat products from 150 Milwaukee-area stores after a city official said he was told that rat poison had been put in some products.

Alderman Michael McGee wrote Police Chief Philip Arreola, telling him he had received a phone call Thursday night from a group calling itself the Militant African Underground Squared, or Mau-Mau.

McGee called Usinger's Friday to report the threat and his letter was faxed to the news media.

Mayor John Norquist, contending the threat was concocted by McGee, called for the Common Council to censure the alderman.

Usinger's took the threat seriously, however, pulling its products from shelves.

''Because our greatest concern is the health and safety of our customers, Usinger's has issued orders to remove all of its packaged products from stores throughout the metropolitan Milwaukee area,'' owner Fritz Usinger said at a news conference. ''This order will remain in effect until we answer all questions and concerns about the truthfulness and accuracy of this threat.''

He said Usinger's fresh deli products would continue to be offered.

Norquist told reporters that McGee was responsible for the threat.

''It's him. He's the one that's doing this. He's totally responsible,'' Norquist said. ''He gets a big thrill out of having everybody pay attention to him. He ought to resign. If he wants to be some kind of revolutionary Fidel Castro figure, he should resign from office.''

In his letter McGee said he was told Mau-Mau planned to continue its action through July 4.

McGee did not say why Usinger's was targeted. He did say that he and his Black Panther Community Militia had no involvement in the action.

''I would like to go on record on behalf of myself and the Black Panther Community Militia that we have no involvement in this type of tactics,'' McGee said in his letter. ''Therefore, if anyone is injured or becomes ill we bear no responsibility. Any type of action like this I would only endorse after 1995.''

McGee, who called the company Friday to inform officials of the threat, could not be reached for comment.

A company official speculated Usinger's was targeted because it is on Old World Third Street in an area where some protesters had marched on Tuesday to demand all of Third Street be renamed Martin Luther King Jr. Drive. The portion of the street north of Old World Third Street was renamed in honor of King earlier.

Norquist at the news conference blasted McGee, a former member of the Black Panthers who earlier this year organized a black militia to push for improvements in the quality of life for blacks. McGee has said he won't advocate violence unless conditions for blacks fail to improve by 1995.

''I'm sending a letter to members of the Common Council and I'm calling on them to censure Alderman McGee for acting in a manner that violates every sense of what a Milwaukee alderman should be,'' said the mayor, who took a bite of sausage to show his confidence that the poisoning report was a hoax.

(JUNE 23) UPI - FRIDAY'S SPORTS TRANSACTIONS

Baseball

Atlanta - Fired Manager Russ Nixon, replaced him with General Manager Bobby Cox; called up pitching coach Lee Mazzone from Richmond of International League (AAA), replaced him with Bruce Dal Canton.

Minnesota - Released outfielder Jim Dwyer; called up first baseman Paul Sorrento from Portland of Pacific Coast League (AAA).

Basketball

Erie (WBL) - Signed forward Dwayne McClain; released guard Eric McLaughlin and center Jon Roberts.

Miami - Traded No. 3 draft pick to Denver for Nos. 9 and 15 selections.

College

Ball State - Named Joseph Hernandez sports information director.

Delaware - Announced the resignation of assistant basketball coach Dennis Felton to take a similar position at Tulane.

Miami - Signed a 10-year contract with the city to play home football games at the Orange Bowl.

Ohio State - Suspended running back Carlos Snow and defensive back Vinnie Clark indefinitely.

Oklahoma State - Baseball Coach Gary Ward agreed to 1-year contract extension.

St. Joseph's (Pa.) - Named David Spiller assistant men's basketball coach; named Michelle Finegan field hockey coach.

Hockey

Detroit - Signed goaltender Scott King to 3-year contract.

Minnesota - Named Les Jackson player personnel director.

Track

The Athletics Congress - Suspended shot putter Mike Stulce for two years for testing positive for excessive levels of testosterone.

#90173u2735 06/22/1990 ~United Press International

OTTAWA (JUNE 22) UPI - The Canadian government Friday declared dead a constitutional amendment that was designed to keep Quebec from fulfilling its threat to secede but ended up alienating several other of the nation's provinces.

Quebec Premier Robert Bourassa, who has said repeatedly the French-speaking province would secede if the amendment failed, refused to immediately indicate what his next step would be.

Prospects for passage of the legislation, formally known as the Meech Lake accord, were buried when provincial legislatures in Manitoba and Newfoundland adjourned without voting on the measure.

The amendment to Canada's constitution would have responded to the longtime separatist sentiment in Quebec by conferring upon the province special powers to promote and preserve its French language and culture.

Sen. Lowell Murray, the federal government's special envoy lobbying for the amendment, said Newfoundland Premier Clyde Wells ''has killed the last hope for success of the constitutional accord by refusing to hold a vote.''

Murray said Prime Minister Brian Mulroney would address the nation

Saturday on the demise of the accord. The senator said even if the vote had been held in Newfoundland, ''it would have turned out the way Mr. Wells wanted it to.''

Upon hearing that the amendment was dead, Bourassa told Quebec's National Assembly: ''In the name of all Quebecers I want to profess my profound disappointment.''

He told his province's Assembly the rest of Canada should understand that ''Quebec is today and forever a distinct society, capable of ensuring its own development and destiny.''

Bourassa was to make a longer formal statement Saturday on Quebec's future. Several months ago he organized a committee of provincial politicians to examine several options, including declaring sovereignty but keeping some sort of legal association with the rest of Canada.

In Calgary at a convention of Canada's Liberal Party, several hundred delegates from Quebec wore black arm bands after hearing of the amendment's demise.

The fate of the amendment, which had to be approved by the legislatures of all 10 Canadian provinces by midnight Saturday, rested with Newfoundland and Manitoba, the only two provinces that had not approved it.

The amendment was negotiated at Meech Lake by Mulroney and leaders of the 10 provinces three years ago when Quebec refused to sign Canada's 1982 constitution, arguing it did not recognize the province's French-speaking population.

Quebec had promised to add its signature to the constitution had the Meech Lake accord been approved.

Wells, a constitutional lawyer and hero to millions of English-speaking Canadians who oppose the amendment, said he decided not to hold a vote Friday after the federal government said it might ask the Supreme Court for an extension.

In an eloquent 90-minute speech, Wells said the government's attempts to have the deadline waived amounted to another ''fabricated precipice'' and he could not allow the vote at this time. However, Wells said he was willing to hold the vote at a later time if the Supreme Court agreed the deadline could be waived.

''We want to treat Quebec fairly,'' Wells said, ''but we are not prepared to sell our souls.''

Murray, emerging from a two-hour emergency session of the federal Cabinet,

said there was no longer any point in seeking to waive the deadline. ''Mr. Wells' decision not to hold a vote has dashed the one remaining hope to have Meech Lake succeed,'' Murray said.

In Manitoba, Elijah Harper, a Cree Indian member of the provincial legislature stymied the amendment by denying lawmakers the opportunity to extend debate on the measure until Saturday. A motion to extend the legislative session would have required unanimous consent.

Outside the Manitoba legislature, hundreds of native Indians celebrated Harper's action.

''The voice of aboriginal people has been heard across the country,'' Harper said, adding that Canada's 600,000 native Indians also must be recognized as a fundamental part of Canada and a distinct society.

BATON ROUGE, LA (JUNE 22) UPI - Abortion opponents scoffed at administration-offered amendments to a tough anti-abortion bill Friday and predicted victory next week when the legislation is considered in the state Senate.

The state House already has overwhelmingly approved the bill, which would outlaw all forms of abortion in Louisiana except in cases where pregnancy threatens a woman's life. Gov. Buddy Roemer said he will veto the legislation if it does not contain exceptions for rape and incest.

The announcement Friday by state Sen. Mike Cross and state Rep. Louis ''Woody'' Jenkins, co-authors of the bill, came on the heels of Roemer's request that the legislation be amended to include the rape and incest exceptions.

''We have five amendments, four of which deal with (cleaning up language in the bill),'' Roemer said. ''The bill as presently constructed is not sound in saving the unborn's life.''

The fifth amendment is the major sticking point in finding a compromise between Roemer and the Legislature, Cross said. It would allow a woman 90 days to report rape or incest if she wanted to get an abortion.

''That is abortion on demand,'' Cross said. ''He knows that 80 percent or more of abortions are done in the first trimester. All a woman would have to do is go to the local law enforcement agency and say, 'I was raped,' get a copy of the report she gave, bring it to the abortionist and have an abortion on demand.''

The governor said he believes there is movement in the Senate toward accepting his compromise, but did not predict how the vote would turn out on the bill Tuesday.

''I'm not sure that the Senate will agree on a modified bill that is pro-life, but allows for what I think are legitimate and compassionate exceptions in the real world,'' Roemer said. ''If we don't get that, I'll veto the bill. I've made that as clear as I can make it.''

Cross and Jenkins both said the Senate would pass the bill without the administration amendments, forcing Roemer to veto the legislation.

''We're going to resist anything that we feel is not right, that would sacrifice children on this altar that the governor is proposing, that would allow abortion upon demand,'' Jenkins said.

Cross said he believed the Legislature could override Roemer's veto - an action that has not happened in Louisiana in at least the last 69 years.

''They're going to be hard-pressed not to override his veto on this issue '' he said. ''This is not an issue as to whether or not we should build a road. This is an issue of whether or not we're going to save lives.''

#90173u2964 06/22/1990 ~United Press International

LOS ANGELES (JUNE 23) UPI - A former Mexican police officer turned informant testified Friday that a man on trial in the killing of drug agent Enrique Camarena also joined in the fatal beatings of two American travelers mistaken for U.S. lawmen.

The prosecution witness, Enrique Placencia Aguilar, also testified that a Drug Enforcement Administration operative who arranged for the controversial arrest and abduction of a Mexican doctor also charged in the Camarena killing attended a 1984 meeting in which Camarena's death was plotted.

The same DEA operative, Antonio Garate Bustamante, has arranged for Placencia and other confidential informants to testify in the trial.

Defense attorneys said Placencia's testimony that Garate attended the meeting at drug baron Ernesto Fonseca Carrillo's home shows Garate was among the plotters, but has avoided prosection.

''Garate should have been indicted, but instead he turned himself into witness factory and produced a bunch of bought witnesses,'' defense attorney Martin Stolar said.

Gregory Nicolaysen, another defense attorney, charged that prosecutors have used Garate to produce several ''midnight witnesses'' who provided alleged first-hand accounts of who plotted and executed the murder.

''The government was willing to let a guilty guy go for the sake of nefarious informants...,'' Nicolaysen said.

Prosecutors were expected to rest their case on Tuesday.

Placencia, a former Mexican police officer, testified that defendant Javier Vasquez Velasco was among 10 to 15 men who attacked two American travelers when they inadvertently walked into a party of drug traffickers at a Guadalajara restaurant.

The Americans, John Walker and Alberto Radelat, were mistaken for DEA agents and beaten to death a week before Camarena's February 1985 murder.

At the time, Walker had been living in Guadalajara temporarily and working on a mystery novel, and Radelet, his friend, was visiting him.

Placencia testified that he and a contingent of other Mexican law enforcement officials watched as the drug traffickers and their henchmen beat Walker and Radelat with guns and fists.

The witness said the Mexican police officers earlier had spent several hours at the La Langosta restaurant, where Fonseca had arranged for them to be served at a table while he and his drug trafficking partners dined at a separate table nearby.

Placencia, however, testified that he left the restaurant shortly after Walker and Radelat were attacked and did not witness the killings.

In addition to Vasquez, convicted drug kingpin Juan Ramon Matta Ballesteros, Mexican businessman Ruben Zuno Arce and another man, Juan Jose Bernabe Ramriez are also on trial.

Camarena was interrogated and tortured more than 30 hours by drug traffickers before being killed, partially in retribution for DEA raids on marijuana fields.

NORFOLK, VA (JUNE 23) UPI - Four sailors were missing Friday after their CH-46 Sea Knight helicopter crashed in the Chesapeake Bay and a flotilla of rescue vessels was unable to find them before sundown.

A Navy spokesman said late Friday he did not know if the search, suspended

at sunset, would be resumed at dawn Saturday, and he declined further comment. The identities of the missing crewmen were not immediately available.

At least seven Navy and Coast Guard vessels were in the area following the chopper's 12:50 p.m. EDT crash, said Lt. Cmdr. Carrie Hartshorne, a spokeswoman for the Atlantic Fleet in Norfolk. Aircraft were also used in the unsuccessful search.

The helicopter, based on the fast-combat support ship USS Detroit, was returning to Naval Air Station Norfolk. The Detroit is stationed in Norfolk and was returning to port at the time of the accident.

In addition to the Navy ships, two Coast Guard cutters and a utility boat assisted in the rescue effort, Hartshorne said. Navy ships on the scene included the fast frigate USS Truett and the USS Opportune, a rescue, salvage and towing ship.

The Navy has been having trouble with its worldwide fleet of twin-engine CH-46 helicopters. All were grounded in mid-May because of transmission problems found in the aft rotor, and the safety check affected 340 Navy and Marine Corps helicopters.

At the end of May, Navy officials announced the second grounding of the helicopters, to check a cracked connecting link in the forward rotor.

The first grounding was ordered following a May 4 crash of one of the helicopters in Twenty-Nine Palms, Calif. There were no fatalities in that crash.

Investigators said excessive wear was taking place in a quill shaft inside the aft transmission of the twin-rotor helicopter. The transmissions were all to be repaired.

The second grounding was ordered after a technician found a cracked connecting link during a routine inspection of a Marine helicopter at Cherry Point, N.C. All damaged assemblies were to be replaced and the components were to be inspected more frequently, Navy officials said.

The CH-46, used to transport Marines and cargo, was first flown in 1962 and has been out of production since 1971. It is the Navy's primary helicopter for resupplying ships at sea.

The helicopter crash comes two days after a fire aboard the carrier USS Midway killed two sailors and seriously injured nine. The fire occurred while the Midway was taking part in a joint exercise off Japan.

#90173u2984 06/22/1990 ~United Press International
(JUNE 22) UPI - The Canadian provinces of Newfoundland and Manitoba have called Quebec's bluff by NOT passing a constitutional amendment recognizing Quebec's unique place in the nation. Quebec has threatened to separate from Canada if the amendment is NOT passed by tomorrow. The parliaments of Newfoundland and Manitoba adjourned today without acting on the issue. The Canadian government says it will seek an extension.

President Bush made an attempt to appear forthright today on the savings and loan bailout. He appeared alongside Attorney General Thornburgh and Treasury Secretary Brady in Washington and promised prison sentences for those he called ''the cheats and the chiselers and the charlatans.'' Bush did NOT address the case of his son Neil, who's faces inquiries on his handling of the failed Silverado Savings and Loan in Denver.

Several hundred people gathered today in Jacksonville, Florida, to mourn eight people slain in shooting rampage Monday. Seven loan office employees and one customer were shot to death by a lone gunman who then killed himself. Jacksonville Mayor Tommy Hazouri told the families of the victims the city shares their sorrow. Hazouri called for tougher gun control laws because the killer was allowed to buy guns despite a history of violent crimes.

A 16-year-old youth was killed and nine others injured early today when three young men believed to be gang members fired on a high-school graduation party in Norwalk, California. About 100 people were gathered at the backyard party when they came under fire. Police label the incident gang-related, although NONE of those attending the party was believed to be a gang member.

#90173u3174 06/22/1990 ~United Press International
(JUNE 22) UPI - A Soviet proposal that a re-united Germany NOT become a sovereign state until several years after unification was flatly rejected today at the so-called two-plus-four talks in East Berlin. Both East and West Germany joined the United States, Britain and France in nixing the idea. Soviet Foreign Minister Shevardnadze responded that he is open to compromise on the issue.

An international commission composed of experts on radiation presented a report in Washington, D-C, today, asking that the government take new steps to lower radiation-exposure limits. The panel says radiation is three times more dangerous than was believed 13 years ago and that exposure limits should be reduced by more than 50 percent. The findings were based on recent studies- including a long-term examination of Japanese survivors of the atomic bomb.

A Texas appeals court in Huntsville today refused to allow a mother to seek a stay of execution for her condemned son. The mother claims her son... James Edward Smith... is incompetent to waive further appeals of his Tuesday execution. Smith believes in reincarnation, and was angered when his mother won an earlier stay of execution. He says the two-year delay of his execution has kept him from being ''a two-year-old prodigy'' in another body.

Doctors at Philadelphia's Albert Einstein Medical Center blame a batch of improperly prepared intravenous solution for the deaths of three premature infants last week. Potassium mistakenly added to the formula caused the infants' heartbeats to drop and led to their deaths. Two employees have been fired from the hospital's pharmacy.

#90173u3190 06/22/1990 ~United Press International

(JUNE 22) UPI - The leader of the Ukrainian Communist Party resigned today at the party congress in Kiev after saying he he wanted to concentrate on his job as head of the republic's Parliament. Delegates elected the outgoing leader's deputy to fill the post. The practice of communist leaders simultaneously holding top party and government posts has increasingly been criticized by reformers.

More than one-thousand Iranians rallied near the White House today to mourn those killed in yesterday's devastating earthquake in northern Iran. Latest reports say at least 30-thousand people died in the quake. But the demonstrators also criticized Iran's Islamic government. In the words of one woman... ''The devastation could have been prevented by certain proper facilities but the government is totally incompetent.''

The chairman of the Joint Chiefs of Staff today urged a ''realistic, prudent'' scaling back of the U-S military. General Colin Powell told the National Press Club in Washington that the United States must be able to respond to any challenge to its interests. Powell says the Soviet Union remains capable of destroying the United States in half an hour. He warned U-S defense would become ''hollow'' if reductions are made too quickly or severely.

A publisher who built a Depression-era grocery circular into one of the nation's most successful family-owned newspapers was buried today near Chattanooga, Tennesse. Roy McDonald... founder of the Chattanooga News-Free Press... died Tuesday at age 88. Friends said McDonald had fallen asleep with a newspaper tucked under his arm. McDonald often congratulated those who survived catastrophe for- as he put it- having ''been through the fire.''

#90173u3347 06/22/1990 ~United Press International
(JUNE 22) UPI - Quake toll rises in Iran... Nelson Mandela calls apartheid a ''crime against humanity''... northern spotted owl placed on endangered species list... and Canada says amendment to keep Quebec from seceding is dead. U-P-I has it all, next:

Despite years of international isolation, Iran today began receiving foreign aid following a staggering earthquake.

Iran radio reports at least 30-thousand dead, while the Iranian mission to the U-N puts the death toll at 36-thousand. Some 100-thousand are injured and thousands remain homeless.

Earthquakes killed thousands in Iran in years past, but this is believed to be one of the worst natural disasters this century.

In response, medical teams arrived in Tehran today from Japan, Switzerland France and Turkey.

Iran also said it would accept offers of U-S aid, despite a decade of hostile relations.

But the League of Red Cross Societies in Geneva said Iran is seeking only certain types of aid such as medicines, blankets and food ''conforming to Islamic rules.'' The Moslem country does NOT want blood, doctors or search dogs.

Iranian television showed scenes of mass destruction. One air force lieutenant said his entire family had been killed when the roof of their house collapsed.

The ''most popular man in town'' addressed the world today from the podium of the United Nations.

Nelson Mandela stepped from the streets of New York City into the U-N building, where he spoke to the General Assembly, expressing his gratitude for the U-N's long-term support in the battle against apartheid.

Mandela received a standing ovation and was characteristically eloquent on the evils of apartheid, calling it ''a crime against humanity'' and lauding the U-N for- in his words- the ''actions it took to expunge this crime.''

But he also praised South Africa's new reform-minded leadership, saying it's made up of ''people of integrity'' who ''will abide by decisions'' to come which will abolish the official policy of racial segregation.

Before his speech, Mandela met with U-N Secretary-General Javier Perez de Cuellar, who greeted him enthusiastically and called him the ''most popular man in town.''

Mandela ends his triumphant stay in the ''Big Apple'' tonight before traveling to Boston tomorrow and Washington, D-C, Sunday on his way to a Monday meeting with President Bush at the White House.

#90173u3361 06/22/1990 ~United Press International

(JUNE 22) UPI - A liberal weekly newspaper in South Africa is reporting an elaborate, right-wing plot to assassinate both President Frederik de Klerk and Nelson Mandela and seize the government in a coup .

The report links the plot to a former Nazi in a white-separatist movement known as the A-W-B. The A-W-B plot supposedly calls for the assassination of Mandela on his return from a 14-nation tour on July 18th and the killing of de Klerk and several members of the government shortly after, followed by the destruction of major power stations, dams and the giant Soccer City stadium in the Soweto township.

The plot also is said to include the poisoning of Soweto's drinking water, which could kill one-Million people.

An official in the South African Law and Order Ministry responds... ''We are taking this seriously. These are very serious allegations.''

The government has tightened security around de Klerk and other high-ranking government officials and has detained 11 right-wing activists.

The federal government today placed the northern spotted owl on the endangered species list, a move that will lead to logging restrictions costing thousands of jobs in the Pacific Northwest.

The decision sets in motion a long process to decide how to protect the owl. After three years of debate, the process is open to further legal challenges and congressional intervention.

U-S Fish and Wildlife Service chief John Turner signed the order. He called it ''a difficult and painful decision,'' but said ''there is room in the world for both owls and loggers.'' The listing of the owl as threatened bars the government from taking any action jeopardizing its survival. Federalpc bn-mxxv m. to nur nbw r dWorld-3rd-Roundup-MORE

A liberal weekly newspaper in South Africa is reporting an elaborate, right-wing plot to assassinate both President Frederik de Klerk and Nelson

Mandela and seize the government in a coup .

The report links the plot to a former Nazi in a white-separatist movement known as the A-W-B. The A-W-B plot supposedly calls for the assassination of Mandela on his return from a 14-nation tour on July 18th and the killing of de Klerk and several members of the government shortly after, followed by the destruction of major power stations, dams and the giant Soccer City stadium in the Soweto township.

The plot also is said to include the poisoning of Soweto's drinking water, which could kill one-Million people.

An official in the South African Law and Order Ministry responds... ''We are taking this seriously. These are very serious allegations.''

The government has tightened security around de Klerk and other high-ranking government officials and has detained 11 right-wing activists.

The federal government today placed the northern spotted owl on the endangered species list, a move that will lead to logging restrictions costing thousands of jobs in the Pacific Northwest.

The decision sets in motion a long process to decide how to protect the owl. After three years of debate, the process is open to further legal challenges and congressional intervention.

U-S Fish and Wildlife Service chief John Turner signed the order. He called it ''a difficult and painful decision,'' but said ''there is room in the world for both owls and loggers.''

The listing of the owl as threatened bars the government from taking any action jeopardizing its survival. Federal officials are to announce Tuesday how the owl's status will affect management of timber on federal lands.

Environmentalists hailed the listing, saying it will help save the owl and old-growth forests.

But the Northwest Forestry Association in Portland, Oregon, vowed to sue the Fish and Wildlife Service over the decision.

#90173u3397 06/22/1990 ~United Press International

(JUNE 22) UPI - A high-ranking U-S naval commander and two teams of Navy investigators went aboard the U-S-S Midway in Tokyo Bay today to determine the cause of a pair of explosions which killed two sailors and injured 16 Wednesday.

The blasts ripped through the aircraft carrier's emergency-equipment storeroom while the ship was on maneuvers, 125 miles off the Japanese coast.

The investigators are said to be closely examining a steam line which powers two catapults used to launch jets from the deck.

But they are also trying to reconstruct the materials in the storeroom at the time of the blasts.

One naval official issued a statement today saying... ''There is NOTHING to indicate that there was foul play.''

Nine of the 16 injured sailors are suffering from severe burns, covering from 14 to 80 percent of their bodies. Six of those were airlifted to a special burn unit in San Antonio, Texas, today. Three others remain listed in serious condition at a naval base hospital in Japan.

The Navy says four airmen are missing in Chesapeake Bay after a C-H-46 Sea Knight helicopter crashed today.

Navy swimmers searched the Bay and aircraft flew over head. But a storm moving in off the coast threatens to hamper rescue efforts.

A Navy spokeswoman says at least seven Navy and Coast Guard vessels were in the area following the afternoon crash.

The helicopter was returning to Naval Air Station Norfolk in Virginia. It is based on the fast-combat support ship U-S-S Detroit.

The Navy's fleet of twin-engine C-H-46 helicopters was grounded twice this year due to mechanical problems. The first grounding was ordered following a crash in California in May. There were NO fatalities in that crash.

The C-H-46 moves Marines and cargo. It was first flown in 1962 and has been out of production since 1971, but is the Navy's primary helicopter for resupplying ships at sea.

#90173u3471 06/22/1990 ~United Press International

(JUNE 22) UPI - The Canadian government tonight declared that it has failed to gain the needed support for a constitutional amendment designed to keep Quebec a part of Canada. The announcement followed the refusal by the provinces of Manitoba and Newfoundland to ratify the so-called Meech Lake Accord.

Manitoba and Newfoundland adjourned their legislatures without voting on the measure. Approval of the pact by all 10 Canadian provinces was needed to gain Quebec's signature on the as-of-yet UNsigned constitution. Quebec withheld its support of the constitution to gain protection of its French heritage.

South African black nationalist Nelson Mandela today received a rousing welcome at the U-N General Assembly in New York. Mandela praised the world body for its efforts to stamp out apartheid ... but said continued pressure is needed to eradicate the racist policy.

There was near unanimity among top AIDS researchers in San Francisco today that scientists will develop a vaccine to combat the deadly virus by the year 2,000. The optimistic forecast came at the sixth International AIDS Conference.

Four Navy airmen are missing after their C-H-46 Sea Knight helicopter crashed in the Chesepeake Bay. The chopper went down this afternoon as it flew to Norfolk Naval Air Station. The helicopter was based on the U-S-S Detroit.

#90173u3626 06/22/1990 ~United Press International
(JUNE 22) UPI - The Canadian government says it has given up hope of passing an accord to ensure Quebec remains part of Canada. The announcement comes after the legislatures of Manitoba and Newfoundland adjourned without voting on a critical constitutional amendment designed to satisfy Quebec's desire for recognition of its unique French heritage. The so-called Meech Lake Accord was to have been acted upon before a deadline tomorrow. Many English-speaking Canadians opposed the measure.

Nearly every top AIDS researcher at the International AIDS Conference in San Francisco today agreed that an AIDS vaccine may be ready by the year 2000. Polio vaccine pioneer Dr. Jonas Salk told a packed seminar that results of recent animal and human studies pave the way for a vaccine. The chief of AIDS vaccine development for the National Institutes of Health says testing will NOT get underway until at least the mid-1990s.

A federal appeals court in San Francisco has resurrected a 15-year-old anti-trust suit filed against major oil companies accusing 13 firms of fixing prices and creating the 1973 gas crisis. The suit was dismissed four years ago by a federal judge, but it now appears headed for trial. California, Oregon, Washington and Arizona brought the suit, which could... if successful... cost the major U-S oil companies BILLIONS of dollars.

Nelson Mandela today thanked the U-N General Assembly today for meting out ''punishment'' against the South African government's policy of apartheid. Also today, Mandela defended his support of Palestine Liberation Organization chairman Yasser Arafat. Mandela said ''the only solution'' to violence in the Middle East is a peace agreement between Israel and the P-L-O.

-30- 1904
#90173u3630 06/22/1990 ~United Press International
(JUNE 22) UPI - Anti-abortion lawmakers in Baton Rouge, Louisiana, today scoffed at efforts to dilute their tough anti-abortion bill. The hardline legislators refused to consider overtures by Governor Buddy Roemer , saying they have enough votes in the state Senate to approve the legislation Tuesday. The House has already approved the bill, which would outlaw all abortions in Louisiana unless the woman's life is threatened by the pregnancy. Roemer says he'll veto the bill unless it allows abortions in cases of rape and incest.

A federal appeals court in Philadelphia ruled today that public schools

that make themselves open to extra-curricular public events are NOT allowed to bar religious groups. The case involved a 1987 incident in which a Pennsylvania school district did NOT allow a religious group to rent an auditorium for a magic show carrying a Christian message.

The chief of the U-S Southern Command says American military bases in Panama are increasingly devoting their attention to the war on drugs. General Maxwell Thurman calls the Panamanian bases the ''coordinating entity'' in the drug war, sending military equipment and U-S trainers to Colombia and Bolivia. Maxwell says the U-S forces have become ''a big-time player in the anti-narcotics business.''

Donald Trump issued a one-page statement on his financial crisis today, urging foreign banks to O-K a deal restructuring his debt... and arguing that thousands of his employees will suffer if he is forced into bankruptcy. Trump expressed confidence the deal will float, but others are NOT so sure. Japanese banks are moving toward a compromise, but a major West German bank reportedly wants out.

#90174d0530 06/23/1990 ~French/German News Agency

MONACO (JUNE 24) - Members of the art-collecting jet set flocked to an auction of segments of the Berlin Wall here Saturday, and some painted chunks went for over 33,000 dollars.

Two slabs of concrete decorated with bisected hearts by a wall painter called Kiddy Citny were knocked down for a cool 188,700 French francs (33,500 dollars) apiece.

Eight lots making up a huge fresco went for a total of 976,800 francs (173,000 dollars) to two anonymous Swiss collectors.

And Ljiljana Hennessy, a Yugoslav and member of the Cognac family whose name she bears, paid 133,200 francs (23,600 dollars) for a slab adorned with a red heart and signed by Thierry Noir. "For liberty," she said, announcing that she planned to hang onto her acquisition.

In all 81 slices of the Wall, part of a 100-metre (110-yard) segment of the former East-West barrier, were sold, as French and Japanese television crews recorded the event for posterity.

However Monaco's Park-Palace gallery, which organized the sale at the Metropole Hotel here, said it would not know the total sum raised for several days, due to expected bargaining between sellers whose pieces did not reach the reserve price they had set.

Six of the items sold, each weighing two and a half tons, were exhibited

outside the hotel for three days before the auction.

#90174d9300 06/23/1990 ~French/German News Agency
OTTAWA, (JUNE 23) - Prime Minister Brian Mulroney said Saturday he was confident Canada would overcome the crisis caused by the collapse of a constitutional amendment aimed at preventing Quebec's secession.

''Canadians have always solved challenges to their unity and we will do it again,'' he said in a nationwide television address.

Mulroney was speaking a day after the amendment, known as the Meech Lake accord, was declared dead by his government after two of Canada's 10 provinces failed to endorse it by midnight Saturday.

The amendment would have given nationalist-oriented Quebec special powers to preserve its French language and culture.

In return, Quebec would have put its signature to the 1982 constitution it has refused to sign on the grounds it did not recognise the province's French-speaking population.

Quebec Premier Robert Bourassa told the province's assembly that Quebec was ''free and able'' to determine its own fate. He did not elaborate.

In his address, which Mulroney also directed at Canada's ''friends overseas,'' the premier said ''Canadians are not a nation of defeatists and this is not a government of quitters''.

Observers said the reference to abroad was designed to reassure foreign investors so they would not sell their Canadian dollars and shares, thus triggering a rise in interest rates and inflation. dpa ms 232058 jun 90

-30- 1593
#90174u0028 06/23/1990 ~United Press International
ORLANDO, FL (JUNE 22) UPI - A federal judge refused Friday to halt the execution of Florida's notorious ''black widow'' killer, rejecting defense arguments that using the state electric chair would constitute cruel and unusual punishment.

The ruling by U.S. District Judge Patricia Fawsett cleared the way for the state to execute Judi Buenoano, who was sentenced to death for the 1971 poisoning murder of her husband.

Following the judge's decision, the state scheduled Buenoano's execution for 9:01 a.m. Monday, said Bob MacMaster, a spokesman for the Florida

State Prison in Starke.

Defense lawyers have filed appeals with the 11th Circuit Court of Appeals in Atlanta and the U.S. Supreme Court.

After a two-day hearing, Fawsett said independent tests indicated there was no problem with the circuitry in the electric chair and that Buenoano would suffer no cruel or unusual punishment should the state use it to execute her.

Thomas Brandies Jr., an electrical contractor, examined the chair Friday afternoon.

''The electrodes, the lead, the connectors - they were good. In fact, they were very good,'' he testified.

Lawyers for Buenoano, who poisoned her husband and drowned her crippled son for insurance money, contended the chair is still defective and could subject her to cruel and unusual punishment.

Buenoano had been scheduled to die at noon Thursday, which would have made her the first person executed in Florida's electric chair since it malfunctioned during the May 4 execution of Jesse Tafero. But she was granted a temporary stay by Fawsett to allow time to hear defense arguments about the chair.

Buenoano, who traveled from death row in Starke to Orlando for the hearing appeared calm and smiled frequently while chatting with attorneys.

Prison officials claim the flames that shot from Tafero's headpiece were caused by a faulty brine-soaked sponge used to conduct electricity to the condemned. The sponge was replaced after three surges of electricity were needed to kill Tafero.

But Thomas Barton, superintendent of the Florida State Prison, testified during the hearing that the state Department of Corrections did not fully investigate Tafero's execution.

''I would not classify it as an investigation ... as far as I'm concerned it's a report,'' Barton said.

David Brierton, deputy secretary of the Florida Department of Corrections, acknowledged the state has not confirmed the defective sponge caused the fire.

The defense contends evidence points to a faulty electrode in the headpiece that has not been repaired or replaced.

Ronald Thornton, maintenance and construction supervisor of Florida State Prison, testified that no resistance tests have been done to determine whether the electrode is faulty. An abnormally high amount of resistance would indicate a crack, break or corrosion.

Defense witness Fred Leuchter, an expert on execution equipment, testified that burn marks on Tafero's head indicated the headpiece electrode had slipped, indicating it was broken.

''The only thing that would account for these (burn marks) is a break in the electrode,'' Leuchter said.

However, Assistant State Attoreny Margene Rope argued the burn marks indicated only that the sponge was faulty.

Thornton testified that several components in the prison's electrical system need to be replaced and that some cables were 30 years old and deteriorating.

Defense attorneys claim such problems could botch an execution, causing added pain and suffering to the condemned.

Buenoano, 47, was sentenced to death for the 1971 arsenic poisoning murder of her husband, James Goodyear, in Orlando. Buenoano is her translation into Spanish of her husband's name.

Buenoano would be the second woman executed in the United States since the Supreme Court lifted its ban on capital punishment in 1976 and the 131st person put to death since executions resumed. She would be the 10th person executed in the country this year.

She also would be the first woman to be executed in Florida, since the state began executing people in 1924, corrections spokeswoman Paula Tully said.

Buenoano's lawyers turned to the federal court system after the Florida Supreme Court refused to halt the execution, saying it was satisfied that the Department of Corrections had repaired the electric chair.

Buenoano also is serving a life sentence for the 1980 drowning of her 19-year-old quadriplegic son, Michael. She drew a 12-year sentence for the 1983 attempted murder of her boyfriend, John Gentry, and is suspected of poisoning her common-law husband, Bobby Joe Morris, in Colorado in 1981.

The state says her motives were to collect on insurance policies. One prosecutor dubbed her the ''black widow'' killer for preying on her loved ones, and the name stuck.

The last woman executed in the United States was Margie Velma Barfield, 52 who was put to death by injection Nov. 2, 1984, in Raleigh, N.C., for killing four people with rat poison to hide a drug habit. Between 1930 and 1967, 32 women were executed in the United States.

ARLINGTON, TX (JUNE 23) UPI - A pilot who ran into trouble in midair but had no radio in his small plane used a Styrofoam cup to get help on the ground.

Steve Smith, 29, was flying a single-engine airplane from Louisville, Ky., to Arlington Thursday when he noticed a malfunction.

One of the plane's warning lights would not shut off and an alarm informed him the plane's nose gear was not locked. Smith knew that without a locked nose wheel, the nose gear will collapse on landing.

To make matters worse, his radio microphone was not working. The Abilene man said he could hear but could not transmit. A backup microphone also would not work.

Smith circled in his plane south of Arlington trying to decide his next move. He finally flew to his intended destination, the Van Bortel Aircraft building at Arlington Municipal Airport, hoping to attract someone's

attention.

With the plane on automatic pilot, Smith scribbled a note explaining his predicament on a plastic foam cup and dropped it out the window. A worker at the aircraft company picked up the cup.

Employees later told Smith his nose gear looked fine and to go ahead and try landing. He turned off the plane's engine and glided in on the runway without any problems.

Smith was a bit shaken by the incident but said he was calm while in the air.

''I guess it could have been a big deal,'' he said.

#90174u0182 06/23/1990 ~United Press International

OTTAWA (JUNE 23) UPI - Prime Minister Brian Mulroney lamented the collapse of a constitutional amendment aimed at preventing Quebec's seccession, saying it marked ''a sad day for Canada.''

The amendment, known as the Meech Lake accord, was declared dead Friday by the federal government after Manitoba and Newfoundland adjourned their legislatures without voting on it.

Mulroney, in an attempt to keep Canada united, was to make a televised address to the nation Saturday. The amendment was to expire Saturday at midnight.

''It's a sad day for Canada. This was all about Canada and the unity of our country,'' Mulroney told reporters after an emergency meeting Friday with his Cabinet.

Mulroney said it was also a sad day for him personally, but that he was also thinking about ''the youth of Canada who count on us to provide for a strong and united nation. We will have to work very hard on that.''

Quebec Premier Robert Bourassa, who had said repeatedly the French-speaking province would secede if the amendment failed, refused to immediately indicate what his next step would be.

The amendment to Canada's constitution would have responded to the longtime separatist sentiment in Quebec by conferring upon the province special powers to promote and preserve its French language and culture.

Sen. Lowell Murray, the federal government's special envoy lobbying for the amendment, said Newfoundland Premier Clyde Wells ''has killed the last

hope for success of the constitutional accord by refusing to hold a vote.''

The senator said even if the vote had been held in Newfoundland, ''it would have turned out the way Mr. Wells wanted it to.''

Upon hearing that the amendment was dead, Bourassa told Quebec's National Assembly: ''In the name of all Quebecers I want to profess my profound disappointment.''

He told his province's Assembly the rest of Canada should understand that ''Quebec is today and forever a distinct society, capable of ensuring its own development and destiny.''

Bourassa was to make a longer formal statement Saturday on Quebec's future. Several months ago he organized a committee of provincial politicians to examine several options, including declaring sovereignty but keeping some sort of legal association with the rest of Canada.

In Calgary at a convention of Canada's Liberal Party, several hundred delegates from Quebec wore black arm bands after hearing of the amendment's demise.

The fate of the amendment, which had to be approved by the legislatures of all 10 Canadian provinces by midnight Saturday, rested with Newfoundland and Manitoba, the only two provinces that had not approved it.

The amendment was negotiated at Meech Lake by Mulroney and leaders of the provinces three years ago when Quebec refused to sign Canada's 1982 constitution, arguing it did not recognize the province's French-speaking population.

Quebec had promised to add its signature to the constitution had the Meech Lake accord been approved.

Wells, a constitutional lawyer and hero to millions of English-speaking Canadians who oppose the amendment, said he decided not to hold a vote Friday after the federal government said it might ask the Supreme Court for an extension.

In an eloquent 90-minute speech, Wells said the government's attempts to have the deadline waived amounted to another ''fabricated precipice'' and he could not allow the vote at this time. However, Wells said he was willing to hold the vote at a later time if the Supreme Court agreed the deadline could be waived.

''We want to treat Quebec fairly,'' Wells said, ''but we are not prepared to sell our souls.''

Murray, emerging from a two-hour emergency session of the federal Cabinet, said there was no longer any point in seeking to waive the deadline. ''Mr. Wells' decision not to hold a vote has dashed the one remaining hope to have Meech Lake succeed,'' Murray said.

In Manitoba, Elijah Harper, a Cree Indian member of the provincial legislature, stymied the amendment by denying lawmakers the opportunity to extend debate on the measure until Saturday. A motion to extend the legislative session would have required unanimous consent.

Outside the Manitoba legislature, hundreds of native Indians celebrated Harper's action.

''The voice of aboriginal people has been heard across the country,'' Harper said, adding that Canada's 600,000 native Indians also must be recognized as a fundamental part of Canada and a distinct society.

#90174u0192 06/23/1990 ~United Press International
WASHINGTON (JUNE 24) UPI - An international panel of experts said radiation is three times more health-damaging than previously thought and it will recommend that governments reduce worker exposure limits by more than 50 percent.

The International Commission on Radiological Protection, an advisory panel of radiation experts, said Friday that new studies - particularly those focusing on Japanese atomic bomb survivors - show radiation is a more potent cause of cancer and genetic damage than was estimated by the panel 13 years years ago.

''Radiation is more risky than we thought in 1977 (by) a factor of three times more dangerous,'' said Dan Beninson, chairman of the commission and head of Argentina's nuclear energy commission.

Beninson also told reporters the new health risk estimates underlined more clearly than ever before that even low levels of radiation pose a hazard.

''Any dose of radiation, no matter how small, means a risk,'' he said. ''The larger the dose, the larger the risk, but we don't say there is any

dose where there is no risk.''

The commission's conclusions are similar to the findings announced several months ago by a National Academy of Sciences panel, which said radiation was three to four times more deadly than previously believed.

As a result of its new health risk estimates, the international commission said it would revise its 1977 radiation protection guidelines later this year and recommend governments reduce occupational exposure limits from five rems of radiation per year to two rems.

The occupational exposure limits apply to nuclear power plant workers, uranium miners, medical personnel administering X-rays and other workers routinely exposed to radiation sources on the job.

For the general public, the commission said it would recommend no change in its current annual limit of 100 millirem - one-tenth of a rem - based on average exposure over a lifetime.

However, the panel said it would effectively tighten the standard by recommending the 100 millirem limit be applied over an averaging period of five years.

The new occupational exposure recommendation was criticized by Thomas Cochran, a nuclear expert with the Natural Resources Defense Council, who suggested the commission did not go far enough due to pressure from the nuclear industry.

Beninson acknowledged such pressures, but said the commission was confident its recommendations were based on solid scientific evidence, most notably new studies of cancer rates and genetic defects among Japanese who survived the U.S. atomic bomb attacks on Nagasaki and Hiroshima during World War II.

Frank Ingram, a spokesman for the U.S. Nuclear Regulatory Commission, which sets U.S. radiation exposure standards, said the agency had no immediate response to the commission's findings.

''We'll review the recommendations when they are made final and see what action, if any, is appropriate,'' Ingram said.

The NRC is just now acting to update its regulations to conform with the international panel's 1977 recommendation to reduce occupational exposure limits to five rems. Current NRC regulations limit workers to 12 rems per year and the general public to 100 millirems per year.

A rem, which stands for ''roentgen equivalent, man'' is a unit of measurement expressing the biological effects of radiation.

U.S. officials estimate the average American is exposed to 360 millirem of radiation each year from radon, radiation from certain stone building materials, cosmic radiation and medical X-rays.

One hundred rem can cause radiation sickness and 500 rem is a lethal dose.

Beninson said the commission would not formally adopt its recommendations until November, but that the basic outline of the changes had been agreed to by members of the panel, a group first formed in 1928 by medical radiologists to provide expert advice on radiation protection.

Of the affected industries, Beninson maintained lower occupational exposure limits would have little impact on the nuclear power industry because most current exposures were far below the two-rem recommendation.

(JUNE 23) UPI - Quebec's premier is refusing to speculate on what Quebec will do following the refusal of Manitoba and Newfoundland to vote on a constitutional amendment aimed at keeping Quebec part of Canada. Robert Bourassa has said failure to pass the amendment... known as the Meech Lake Accord... would cause his province to secede from Canada.

A federal judge Friday refused to issue a stay to block Monday's scheduled execution for Florida's notorious ''black widow'' killer. But defense lawyers for Judi Buenoano are awaiting word on appeals they have filed with an Atlanta federal appeals court as well as the Supreme Court. Buenoano's lawyers say Florida's electric chair is faulty... and that would constitute cruel and unusual punishment.

San Francisco police have arrested more than 140 AIDS demonstrators who tied up a busy San Francisco street. The protest was to draw attention to what the demonstrators say is a serious lack of AIDS research for women and minorities. Some 500 people took part in the rally, which coincides with the sixth annual International AIDS Conference.

Six sailors who suffered serious burns Wednesday when a pair of explosions ripped through a storeroom aboard the aircraft carrier U-S-S Midway arrived in Texas Friday for treatment of their burns. All the sailors were listed in critical condition at the Brooke Army Center at Fort Sam Houston.

#90174u0249 06/23/1990 ~United Press International

WASHINGTON (JUNE 23) UPI - NASA released the second image of the heavens captured by the Hubble Space Telescope since the observatory was placed into orbit, a picture of ancient stars snapped with the telescope's most powerful camera.

''After waiting all these years, it is a very exciting time. We are now ready to start our observations with a tool more powerful than ever before '' said Robin Jakobsen of the European Space Agency, which built the camera.

The Faint Object Camera, one of six instruments aboard the $1.5 billion telescope, took the 10-minute exposure June 17 as an engineering test of the camera and not to yield any new scientific discoveries.

The black-and-white picture released Friday is of two stars in a star cluster called NGC 188, which was selected because the positions and brightness of the stars are well known, officials said.

The cluster is about 5,000 light years from Earth and is about 12 billion years old, making it the oldest known cluster of its kind. A light year is the distance light travels in a year at 186,000 miles per second, about 5.8 trillion miles.

The image shows the telescope's focus has improved significantly since the telescope snapped its first picture May 20 with the observatory's other camera, the Wide Field Planetary Camera.

The new picture is about twice as sharp as the ''first light'' picture,

which was clearer than scientists had anticipated.

''It shows that we made progress in focusing the telescope between when the first light photographs were taken and this was taken,'' said NASA astronomer Steve Maran. ''But it also shows we're a long way from the perfection Hubble was made to attain.''

Once engineers finish focusing the telescope, the images should be about 3 1/2 times sharper, he said.

Earlier this week engineers hit a snag in their attempts to continue focusing the telescope and analysts were trying to determine what caused the problem. Officials, however, were optimistic they would overcome it.

NASA has battled one problem after another since the telescope was placed into orbit by the crew of the space shuttle Discovery.

Most of the problems have been resolved but engineers are rewriting some of the telescope's computer programs to compensate for two small vibrations, including one that occurs whenever the telescope passes into or out of sunlight.

''I'm pleased at (the picture) but like everybody else I'm concerned that things are taking us as long as they are,'' Maran said. ''We have a lot of people and a lot of interest riding on this.''

NASA released the new image with a picture of the same stars taken by the Nordic Optical Telescope in the Canary Islands to show the Earth-based image was much blurrier because it was taken through Earth's obscuring atmosphere.

From its perch 381 miles above Earth, the Hubble telescope is expected to revolutionize astronomy by studying the universe in greater detail than ever before for 15 years, possibly answering fundamental questions about the cosmos.

''I'm excited for many reasons. To me its the conclusion of a 15-year road and the beginning of another 15-year road,'' said F. Duccio Machetto, lead scientist for the camera. ''It's a demonstration that we're on the right track.''

The camera can intensify starlight 100,000 times, the same as increasing the light of a candle flame to the brightness of the noon sun.

SALT LAKE CITY (JUNE 23) UPI - Mormon Church President Ezra Taft Benson, religious leader to the world's 7 million Mormons, was reported improved Friday night after treatment for a bacterial infection, church officials said.

The 90-year-old church leader was upgraded from serious to fair condition and transferred to a regular hospital room from the intensive care unit of LDS Hospital Friday night, church spokesman Don Lefevre said.

An earlier church statement said Benson's condition had been improving.

''His attending physicians reported he had a restful night (Thursday) and is responding well to treatment,'' the statement said.

Hospital officials said Benson felt well enough Thursday to sit up in a chair in his room on two occasions, each time for about an hour.

Benson, church president since Nov. 10, 1985, was taken by ambulance to the hospital about 7:45 a.m. Wednesday ''after experiencing difficulties at his Salt Lake City apartment,'' according to a church statement.

Benson was agriculture secretary during the Eisenhower administration. He was the first Mormon to serve in a presidential cabinet and the first clergyman in 100 years to attain cabinet rank.

He has suffered from recent health problems and was hospitalized a month ago for medical tests. Doctors gave Benson a heart pacemaker in November 1986.

Mormons believe their president receives direct revelations from God.

(JUNE 23) UPI - Canadian Prime Minister Brian Mulroney told reporters Friday that the collapse of a constitutional amendment designed to prevent the threatened secession of Quebec is a ''sad day for Canada.'' Mulroney is scheduled to make a national address about the issue Saturday. Quebec leaders have offered NO hint as to what course they'll take.

An international panel of radiation experts Friday warned that previous statistics severely underestimate the danger of radiation. The International Commission on Radiological Protection says recent studies reveal that the health risks associated with radiation are three times what had been assumed in 1977. Friday's findings parallel those offered several months ago by the National Academy of Sciences.

An Oakland, California, judge Friday delayed for the second time in three weeks the scheduled arraignment of two members of the Earth First! envionmental group. Prosecutors requested that Municipal Court Judge Jack Gifford postpone legal proceedings to let authorities continue investigating whether they should file charges against the pair. The two were arrested in late May after a pipe bomb exploded in their car.

A police spokesman in Pontiac, Michigan, says Del Vikings rock group member Corinthian ''Kripp'' Johnson died at his home Friday night of prostrate cancer. 57-year-old Johnson was a founding member of the vocal group, which was formed 35 years ago and racked up hits like ''Come Go With Me'' and ''Whispering Bells.'' Johnson last performed with the group two months ago in Florida.

-30- 1742
#90174u0345 06/23/1990 ~United Press International
(JUNE 23) UPI - Umpire Terry Tata changed his mind, then Lou Piniella nearly lost his.

Tata, behind the plate Friday night for the Los Angeles Dodgers' 7-6 10-inning victory over the Reds, called Cincinnati's Eric Davis safe at home with what appeared to be the winning run in the ninth inning, but then thought better of it and reversed the call.

That didn't sit well with Reds manager Piniella, who charged out of the dugout to give Tata a few pointers on decisiveness.

''Everyone saw it,'' fumed Piniella, who has had relatively little anxiety

this season with his club atop the National League West. ''He called him (Davis) safe, as vivid as vivid can be, and then all of a sudden he changed his mind and called him out.

''There was no reason to change his mind and I've never seen anything like it in my 21 years in baseball. Then, he had the audacity to kick me out of the game for arguing about the play.

''He screws up the game and my team and I get penalized,'' added Piniella, whose confrontation with Tata evoked memories of George Brett's frenzied pine-tar incident of years past.

''Afterwards, he said he called it too quick, but the game was over right then, we had won and I was ready to congratulate our guys,'' Pinella said, who decided to play the game under protest after the controversial call. ''I hope the league reviews the play, and I believe they should make it stand.''

The play came with two out and the Reds trailing, 6-5.

Paul O'Neill singled and Davis Walked before Todd Benzinger doubled down the right field line. O'Neill scored the tying run and Davis followed him home on the play. Davis slid across the plate and was called safe . . . and then out.

Despite the changed call Tata was certain about the play.

''He was out, no doubt about it,'' Tata, the veteran umpire said emphatically. ''My mechanics were screwed up and I made the call too quickly.

''I realized right away that I'd made a mistake, so then I made the right call. I'd rather have my mechanics screwed up, as long as I make the right call. He was definitely out because (Los Angeles catcher Mike) Scioscia had the plate sealed off.''

Afterwards Scioscia sounded as if he were establishing a Terry Tata fan club. ''The important thing is that he got it right,'' Scioscia said, adding that ''I give Terry Tata a lot of credit for having a lot of courage because obviously after making the safe sign he reconsidered and called him out.''

''I felt Davis hit me,'' Scioscia said, ''but I don't think he got to the plate.''

Davis, however, was not impressed with Tata's ''courage.'' ''What he did, he let the catcher make the call,'' Davis said. ''After he said 'safe,' Scioscia came up saying 'he didn't touch the plate, he didn't touch the

plate.' Then Scioscia showed him the ball and he called me out. I've never seen anything like it in my life.''

Loser Randy Myers, 2-2, gave up the winning run in the 10th when Alfredo Griffin singled in Eddie Murray with two out.

Jay Howell, 3-4, earned the win in relief, with Tim Crews earning his third save.

Trailing 2-1, Los Angeles took the lead with three runs in the fourth.

Cincinnati pecked away with runs in the fourth and fifth, O'Neill tying it at 4-4 with his ninth homer in the fifth.

The Dodgers regained the lead with two runs in the eighth, but Benzinger got one back with his solo shot in the eighth.

Elsewhere in the National League: St. Louis routed Chicago 7-0, Montreal edged Pittsburgh 4-3, New York pounded Philadelphia 5-1, San Francisco nipped Houston 4-3 and San Diego at Atlanta was postponed by rain.

In the AL, it was: New York 8, Toronto 7 in 15 innings; Boston 4, Baltimore 3; Minnesota 3, Kansas City 2; Milwaukee 9, Cleveland 7; Texas 5 Seattle 2; Chicago 5, Oakland 0 and California 1, Detroit 0.

Cardinals 7, Cubs 0

At Chicago, Pedro Guerrero and Todd Zeile hit solo home runs to power St. Louis and wake a winner of Joe Magrane, 4-9, who pitched a three-hitter, striking out a career high 11. Starter Steve Wilson, 1-5, took the loss. Chicago second baseman Ryne Sandberg snapped his errorless-game streak at 156 by misplaying a ball in the fourth inning.

Expos 4, Pirates 3

At Montreal, Mike Aldrete doubled home the winning run in the eighth inning, lifting Montreal to within a half-game of first-place Pittsburgh. Bill Sampen went 2-3 of an inning to improve to 6-0. Stan Belinda, 2-2, took the loss.

Mets 5, Phillies 1

At New York, Frank Viola became the NL's first 10-game winner, leading the Mets to their fourth straight win. Viola, 10-3, struck out eight and scattered eight hits in eight innings. Starter Ken Howell fell to 8-4, allowing seven hits in 2 1-3 innings.

Giants 4, Astros 3

At Houston, Scott Garrelts scattered seven hits over eight innings to send Houston to its seventh straight loss. Garrelts, 5-6, struck out three and walked none. Jim Deshaies dropped to 3-5, lasting 2 1-3 innings. Jeff Brantley recorded two outs for his ninth save. San Francisco has won 19 of its last 23.

#90174u0348 06/23/1990 ~United Press International

(JUNE 23) UPI - The Yankees are ''stumped'' but they know why they have won four games in a row.

Their latest triumph, a courageous 8-7, 15-inning victory over the Toronto Blue Jays Friday night demonstrated the new found spark in the pinstripes.

''I think Stump has lit a fire under us,'' Dave LaPoint, who pitched seven solid innings said. ''He's so optimistic it's contagious ... it's carrying over to all of us.''

LaPoint held a 6-1 lead entering the eighth inning but left after walking the lead-off batter. The Blue Jays proceeded to score five times to tie the score, yet the Yankees refused to collapse.

''Two weeks ago we would have lost this game,'' LaPoint said. ''''We would have given up another two runs in that eighth inning and we would have gotten blown out ... we would have hung our heads and just gone through the motions. Not anymore.''

The Yankees hung on until Mike Blowers' two out, two run single in the 15th inning decided the 4 hour and 53 minute marathon.

With two out in the 15th inning, Jessie Barfield singled and went to third when Deion Sanders hit a grounder to Manny Lee who threw to Nelson Liriano at second to get the force out. Liriano failed to make the catch and the ball sailed into the outfield, leaving runners on second and third.

Blowers followed with a sharp single to put the Yankees ahead 8-6.

''Early on in the season we were losing a lot of close games, but we just weren't getting any breaks, none at all,'' Blowers said. ''Now we're getting a few and it helps.

Dave Righetti entered in the 15th inning and promptly gave up George Bell's 15th home run of the season, but the Yankees relief ace retired the next three batters to earn his 15th save.

Greg Cadaret, 2-4, pitching two scoreless innings of one-hit relief for

the victory. Willie Blair, 0-4, allowed only the two unearned runs and four hits in five innings.

Merrill was delighted his club was able to rebound after blowing the five run lead.

''There's no quit in this ballclub,'' Merrill said. ''Those men in there worked their butts off.

The Yankees opened the scoring with a pair of runs in the first on a ground out and Steve Balboni's first of two solo homers.

New York added another run in the third when Roberto Kelly scored on an error but Toronto got one back in their third on Kelly Gruber's sacrifice fly.

Robert Geren's two-run single in the sixth inning made it 5-1 and Balboni's second blast in the eighth made it 6-1.

Blue Jays rebounded in the eighth. Their five run outburst was highlighted by John Olerud's three-run homer and an RBI double by George Bell.

Elsewhere in the American League, Minnesota nipped Kansas City 3-2, Boston bumped Baltimore 4-3, Milwaukee clipped Cleveland 9-7, Texas topped Seattle 5-2, Chicago blanked Oakland 5-0 and California edged Detroit 1-0.

In the NL, it was: St. Louis 7, Chicago 0; New York 5, Philadelphia 1; Montreal 4, Pittsburgh 3; Los Angeles 7, Cincinnati 6 in 10 innings; San Francisco 4, Houston 3 and San Diego at Atlanta was postponed because of rain.

Twins 3, Royals 2

At Minneapolis, Kevin Tapani and Rick Aguilera combined on a seven-hitter and Gary Gaetti smacked a two-run homer to lead Minnesota. Tapani, 8-4, gave up four hits over eight innings and Aguilera gained his 17th save. Bret Saberhagen, 5-7, lost his fourth straight start for the Royals.

Red Sox 4, Orioles 3

At Boston, Tony Pena broke a tie with a seventh-inning RBI single and Mike Boddicker, 9-3, went 8 1-3 innings in winning his eighth straight decision. Jeff Ballard, 1-8, has just one win in his last 16 starts. Tom Brunansky was 2 for 4 with two RBI for Boston.

Brewers 9, Indians 7

At Milwaukee, Charlie O'Brien hit a three-run triple to key a five-run

second inning that pulled Milwaukee to victory. Tom Edens pitched 3 2-3 in relief to improve to 1-0. Dan Plesac recorded one out for his 13th save. Bud Black fell to 6-4.

Rangers 5, Mariners 2

At Arlington, Texas, Nolan Ryan, 6-4, allowed five hits over 7 1-3 innings struck out nine and won for the 295th time, running his all-time leading strikeout total to 5,170. Matt Young, 2-8, took the loss. Harold Baines delivered a two-run single for Texas.

Angels 1, Tigers 0

At Anaheim, Calif., Dave Winfield tripled home Wally Joyner from first base with no outs in the ninth for the victory. Paul Gibson, 2-2, surrendered the game-winning triple. Scott Bailes, 2-0, pitched 2-3 of an inning in relief to gain the win.

Chisox 5, Athletics 0

At Oakland, Dan Pasqua and Scott Fletcher each hit two-run homers in the fourth inning and Eric King pitched a five-hit shutout. King, 7-1, struck out a season-high eight hitters for his second shutout of the season and fourth of his career. Scott Sanderson, 8-4, suffered the loss.

#90174u0351 06/23/1990 ~United Press International

NEW YORK (JUNE 23) UPI - Nelson Mandela concluded a momentous three-day visit to New York City meeting with Wall Street executives, speaking to United Nations diplomats and anti-apartheid activists and socializing with actors and rock stars.

The 71-year-old leader of the African National Congress was scheduled to depart for Boston early Saturday, as he continued his eight-city tour of the United States.

The silver-haired South African civil rights leader received a rousing, historic welcome Friday to the United Nations where he thanked the world body for its support in trying to abolish the ''crime'' of apartheid.

More than 2,000 spectators in the packed General Assembly Hall, many wearing their bright colored native costumes, gave the deputy president of the ANC a standing ovation.

''My visit to New York has exceeded all my wildest expectations, from the response of the crowd and the response to requests that were made for resources to unable us to carry the program facing us,'' he told reporters

Friday.

For more than a hour, Mandela listened closely to the outpouring of praise and the pledges of continued support for his cause against apartheid by speaker after speaker at the General Assembly.

In his own speech, Mandela gave rare praise to the Pretoria government.

''We believe that President de Klerk and his colleagues in the leadership of the ruling party are people of integrity,'' he said. ''We are of the view that they will abide by decisions that are arrived at in the course of our discussions and negotiations.''

Mandela praised the General Assembly's adoption last December of a declaration outlining steps to be taken to dismantle apartheid, including stepped-up economic sanctions on South Africa and financial assistance to southern African nations. But he added, the world community still has ''some distance to travel'' before the declaration would be implemented.

At a taping later of a PBS program, ''Meeting with Mandela,'' the ANC leader defended his support of Yasser Arafat, a stance that drew criticism from major Jewish groups in the city.

He said he was ''more astonished than surprised'' by the slew of headlines in the local press about comments Thursday in which he praised the PLO leader's support of the ANC.

''To me, the only solution to the problem in the Middle East is peace and for the operatives to sit down and hammer out a solution,'' Mandela said. ''The only solution is an agreement between the PLO and Israel.''

Earlier Friday, Mandela met in a private session with business leaders in the towering World Trade Center, where he urged the executives to support economic sanctions against South Africa.

He ended his trip quiety, with a private fund-raising dinner at the upper East Side home of film producer Arthur Krim and his wife, Dr. Mathilde Krim, a renowned AIDS expert, and a star-studded cocktail party at Robert DeNiro's Tribeca restaurant.

Among the estimated 350 celebrities who paid $2,500 to fete Mandela were actors Eddie Murphy, Denzell Washington, filmmaker Spike Lee, comedian Robin Williams, and singers Cyndie Lauper and Bette Midler.

#90174u0362 06/23/1990 ~United Press International

(JUNE 23) UPI - Thunderstorms soaked the Gulf Coast and the Pacific

Northwest early Saturday, while families in Wisconsin took refuge from flooding that inundated a trailer park and stranded motorists on flooded roads.

The thunderstorms in the Northwest dumped nearly 2 inches of rain in eastern Washington and prompted the National Weather Service to issue flash flood warnings for two counties in the area.

A front moving across the Gulf Coast dumped heavy rain across eastern Louisiana into southern Mississippi and Alabama.

Thunderstorms in the Midwest Friday night triggered flooding that forced the evacuation of 20 familes from a trailer park in Green Bay, Wis. Those left homeless were taken to a shelter set up at a public school.

The area was hit with 4.7 inches of rain in a 24-hour period.

''It's about halfway up the trailers,'' said police Sgt. Mike Zettel. ''There is flooding virtually all over the city. Almost all of our main streets are closed in spots.''

The Brown County Sheriff's Department said it rescued two people stranded in a car Friday night in the Town of Bellevue near Green Bay.

Skies were clear across much of the rest of the nation with temperatures in the 50s in the Plains; 60s along the West Coast, Midwest and Northeast; 70s in the South; 80s in southern Florida and Texas; and 90s in the desert Southwest.

#90174u0366 06/23/1990 ~United Press International

BEIJING (JUNE 23) UPI - The death toll from torrential rains and floods last week in south China has risen to 254, with nearly 75,000 people homeless and damage estimated at $362 million, official reports said Saturday.

Six days of heavy rains beginning June 11 swamped a wide area of Hunan province in floodwaters, affecting an estimated 20 million people and leaving 3,297 injured, the state-run People's Daily reported.

Severe crop damage was reported over about 3.1 million acres of farmland across Hunan province, reducing the region's expected grain harvest by 827,000 tons, it said.

Nearly 200,000 houses were destroyed or severely damaged in 82 Hunan counties and cities, leaving 74,788 people homeless, the newspaper said.

Hunan officials estimated the damage at $362 million. Hunan insurance companies have paid out $6.4 million in claims and the national ministries of civil affairs, finance and water conservation have allocated $638,000 in flood relief.

Government agencies have mobilized nearly 8 million people for emergency relief and rebuilding projects.

#90174u0372 06/23/1990 ~United Press International

LOS ANGELES (JUNE 23) UPI - A 9-year-old boy arrived from El Salvador for a deathbed reunion with his terminally ill mother made possible by special permission granted by immigration authorities, officials said.

A visa request for the boy, Walter Siguenza, was denied by U.S. embassy officials in El Salvador on grounds it did not meet State Department protocol.

But after intervention by U.S. Sen. Pete Wilson's office, officials with the U.S. Immigration and Naturalization Service arranged for the boy to enter the country under regulations allowing aliens temporary humanitarian visits in special circumstances.

The 9-year-old boy arrived in Los Angeles aboard a TACA airlines flight from El Salvador shortly after 11 p.m. Friday, INS District Director Bob Moschorak said.

The boy's father, Israel Siguenza said the family, including the boy's 22

month-old sister, was headed straight for the hospital where his wife lay in a coma.

''I'm very happy to have my son back,'' the father said. ''Right now my wife is unconscious and she's not responding. Hopefully when she hears his voice she will respond,'' he said.

''It's a happy ending mired in tragedy,'' INS spokeswoman Virginia Kice said.

Sonia Siguenza, an immigrant from El Salvador was on life-support at Western Medical Center in Santa Ana, when her son boarded the plane in El Salvador Friday afternoon. Kice said Siguenza, who is suffering from an incurable blood disease, has been slipping in and out of a coma for several days.

Her dying wish was to see her son, who was sent back to live with his grandparents in El Salvador last year when doctors discovered her infectious blood disease.

''We felt compelled and are gratified to assist the Siguenza family in their hour of need,'' INS Commissioner Gene McNary said.

Wilson also expressed satisfaction.

''This case lets you know that the system does work for individuals,'' he said.

Siguenza's husband, Israel, is also a Salvadoran immigrant who is living and working legally in the United States, Kice said.

#90174u0379 06/23/1990 ~United Press International

MANILA, PHILIPPINES (JUNE 23) UPI - More than 30 people were killed and 85,000 fled to evacuation centers in Typhoon Orphelia's destructive rampage across the northern Philippines, officials said Saturday.

The Manila Weather Bureau said in a bulletin Saturday afternoon Orpehlia, which slammed into the country Thursday night, had moved to Taiwan. Authorities lowered all storm signals on the main Philippines island of Luzon.

Forecaster Leonilo Millanes said the typhoon was located 250 miles north-northwest of Basco, Batanes on the northern tip of the country. It was packing center winds of 95 mph and was moving northwest at 16 mph.

Officials placed the death toll at 31, mostly from the northern province

of La Union, where 23 people were killed in landslides and flooding. Three were killed by landslides in the capital, two died of electrocution in Dagupan City and one perished in the mountain resort city of Baguio, the Red Cross said.

Two others were killed by lightning at the height of the typhoon in the southern province of Lanao.

The Department of Social Welfare and Development reported 13 people were injured, 12 missing and 1,173 houses either destroyed or damaged.

Department spokesperson Susan Argel said 85,944 people in 17,738 families fled to evacuation centers in the capital, Baguio and the provinces of Cavite, Pangasinan, La Union, Bulacan, Ilocos, Isabela, Cagayan and Pangasinan.

Argel said the refugees left their flooded homes and were temporarily housed in churches, health centers, schools and town halls. Many of the evacuees begun to return to their homes Saturday as the typhoon moved away and the weather improved, she said.

The extent of damage was not immediately known as remote areas without communications facilities have not reported to Manila.

As authorities began to assess the toll from Orphelia, the Manila weather bureau sighted yet another storm off Guam which could affect the Philippines next week.

#90174u0383 06/23/1990 ~United Press International

CAPE CANAVERAL, FL (JUNE 23) UPI - A Titan 3 rocket carrying a $150 million communications satellite thundered toward space Saturday in the booster's first flight since a failure in March that left an identical relay station stranded in space.

The $120 million commercially built Titan 3's twin solid-fuel boosters ignited on time at 7:19 a.m., instantly pushing the towering rocket away from launch complex 40 at the Cape Canaveral Air Force Station.

''We have ignition of the solid rocket motors and away we go!'' said a launch commentator in mission control.

Rumbling through the dawn sky atop twin jets of white-hot fire, the Titan 3, the most powerful U.S. rocket ever built as a commercial venture, arced east over the Atlantic Ocean, knifing through a thin layer of clouds as it streaked toward orbit.

Mounted in the Titan's protective nose cone was the third of five Intelsat 6 communications satellites built by Hughes Aircraft Co. and owned by the International Telecommunications Satellite Organization - Intelsat - a non-profit consortium of 118 member nations.

Ed Browne, president of Commercial Titan Inc., said Friday no stone was left unturned to prevent a repeat of an embarrassing failure in March that will require a space shuttle rescue mission to salvage an otherwise healthy satellite.

The flight plan Saturday called for the 5,600-pound drum-shaped satellite, capable of carrying 120,000 telephone calls at once, to be ejected from the Titan 3's second stage 25 minutes after liftoff into an egg-shaped orbit with a low point of about 109 miles and a high point of 247 miles.

An on-board solid-fuel booster was scheduled to fire one hour and 10 minutes after takeoff to begin the satellite's trip to a final orbit 22,300 miles above the equator over the Atlantic Ocean between Europe and North America.

The last Titan 3 launch, on March 14, put an identical Intelsat 6 satellite into a useless orbit because of a wiring error in the Titan second stage payload ejection mechanism that prevented the relay station's separation from the rocket.

It was a major failure for Titan-builder Martin Marietta Astronautics Group of Denver and for the infant American commercial space program in general, which is struggling to lure business away from the European Ariane rocket system.

''I have to tell you, we were embarrassed over that failure, we don't like to have failures,'' Browne said. ''Martin Marietta's reputation is one of mission success and we hold that foremost in our mind.''

Intelsat ground controllers ultimately sent commands that caused the stranded spacecraft to separate instead from its on-board rocket booster, leaving the satellite stranded in a safe-but-useless orbit.

Intelsat announced last week that it will pay NASA some $90 million to mount a space shuttle rescue mission in February 1992. The bold salvage plan calls for two spacewalking astronauts to attach a new rocket motor to the satellite so it can continue on its way to the high orbit required by communications stations.

The Intelsat 6 satellites cost around $150 million each. Like the one stranded in March, the latest in the series was not insured by Intelsat and under the terms of the launch contract, Martin Marietta's responsibility ended at the moment of liftoff.

With an expected lifetime of more than 13 years, the Intelsat 6 satellites are the largest and most powerful such communications stations ever built on a commercial basis.

Each spacecraft is equipped with 48 radio transponders, allowing them to carry a minimum of 24,000 simultaneous two-way telephone conversations and three simultaneous color television channels - a far cry from Intelsat's first ''Early Bird'' satellite, which carried just 240 telephone circuits or one TV channel.

By using digital equipment on the ground, the satellite's capacity can be increased to 120,000 simultaneous telephone calls.

#90174u0387 06/23/1990 ~United Press International

FRAMINGHAM, MA (JUNE 23) UPI - Four people were killed early Saturday in a single-car crash on the 100-acre grounds of the Cushing Hospital, state police said.

''It was a passenger (car) passing through an access road on an open public way,'' said Scott Lombard, a security officer at the state hospital for geriatric and chronic-care patients. ''They went off the road and hit a tree.''

Three of the four occupants were dead at the scene in the 2:50 a.m. accident, and the fourth died a short time later, officials said.

State police were investigating.

#90174u0411 06/23/1990 ~United Press International

JOHANNESBURG, SOUTH AFRICA (JUNE 23) UPI - Two explosions devastated offices of the ruling National Party a day after death threats to President Frederik de Klerk and black leader Nelson Mandela prompted a major tightening of security around national leaders.

No one claimed responsibility for the bombs.

It was not clear if the blasts were related to threats on the lives of de Klerk, several Cabinet members and Mandela believed made by a member of the white-separatist Afrikaner Resistance Movement reported Friday in the liberal Afrikaans weekly Vrye Weekblad.

One of of the bombs blew apart the National Party's Auckland Park office in suburban Johannesburg and the other exploded at party offices at

Helderkruin, a satellite town west of Johannesburg.

Vrye Weekblad reported that a former Nazi in the white-separatist Afrikaner Resistance Movement - known as the AWB - masterminded a plot to shoot Mandela on his return from a 14-nation tour July 18, to kill de Klerk and to take unspecified action against several Cabinet members as a prelude to a right-wing takeover of the government.

The weekly said the AWB intended to destroy major power stations and dams, blow up the giant Soccer City stadium in Johannesburg's Soweto township and revive a project to poison Soweto's drinking water, which could kill 1 million blacks.

Two extremist groups, the White Wolves and the Farmers' Army, late Friday placed a bounty of $7,600 on the head of the person they think leaked a story of the assassination plot to the Vrye Weekblad. The perceived source of the leak, retired security policeman Jan Johannes Smith, who said he had independently infiltrated the AWB out of concern for national security reportedly went into hiding as the newspaper report hit the streets Friday.

Police Friday released 11 right-wingers they had detained Thursday in relation to the plot. The Afrikaans Beeld newspaper said Saturday police searches of the homes of the 11 revealed so little they had to be released.

However, prosecutors said they have some evidence and must decide how to proceed.

''We're still taking this seriously. Everything will be done to ensure any plot is nipped in the bud,'' a Department of Justice official said.

The Vrye Weekblad report was denied Saturday by two of the 11, T.J. Ferreira, town councillor for ultra-conservative Boksburg, near Johannesburg, and Greyling Bezuidenhout, town councillor for neighboring Kempton Park. ''It's all a load of rubbish,'' Ferreira said.

Basing its story on the detailed account of Smith - who ''to avoid war'' independently infiltrated the AWB - Vrye Weekblad said a one-time Nazi and SS captain, Heinrich Beissner, now an AWB official, is responsible for the assassination plot.

The 77-year-old Beissner Saturday had no comment on the allegations, citing exhaustion after more than 12 hours of questioning by security police.

The AWB, which as South Africa's umbrella right-wing extremist group claims more than 20,000 active supporters, has been warning since de Klerk launched his sweeping racial reforms in February that whites will not

stand for an end to segregation or any threat to their 42 years of minority rule.

Security officials tightened security around de Klerk and Cabinet members Friday after the threats, a Law and Order Ministry spokesman said, noting, ''We are taking this seriously. These are very serious allegations.''

The Cabinet ministers reported named as targets were Foreign Minister Roelof ''Pik'' Botha, Law and Order Minister Adriaan Vlok and Defense Minister Magnus Malan.

Smith claimed that the underground movement hired sharpshooters and a chief assassin, reportedly a member of a secret military unit but acting as a freelance.

The newspaper said Smith spoke of his determination to stop ''the Boere Volk (Afrikaner people) taking up arms against one another'' on a video tape shown by Vrye Weekblad at a news conference.

The extremists could have caused the deaths of ''innocent children and women,'' he said.

A tape recording of a conversation between Smith and Ferreira has Ferreira saying, ''You must take the top five guys together ... and whatever else moves ... maybe a few niggers also, just to sink this country into bloody chaos, because that's what we need.''

The hit man is allegedly a former major in the South African Defense Force Gary Cornish, now reportedly a member of the shadowy army-sponsored Civil Cooperation Bureau counter-activist unit.

Vrye Weekblad editor Max du Preez questioned the release of the 11 who were detained for questioning, saying the state has ''tried and tested'' mechanisms to hold people without trial and has done so with those suspected of ''far less.''

#90174u0428 06/23/1990 ~United Press International

CINCINNATI (JUNE 24) UPI - A zoo where a keeper lost her right arm in a polar bear attack has been cited for safety violations that could cost it $4,400 in fines.

The Occupational Safety and Health Administration on Friday cited the Cincinnati Zoo for eight violations in its handling of bears and proposed a $4,440 fine.

Zoo keeper Laurie Stober lost her arm below the elbow March 28 when a

750-pound polar bear grabbed her fingers, which were outside the bars of the cage, as she tossed a grape into its cage.

Stober said she got too close to the bear but said the accident was also caused by other factors in which the zoo was deficient.

OSHA cited the lack of a safe work environment, inadequate procedures for feeding and moving bears and lack of supervision to ensure enforcement of safety procedures.

Susan Burgmann, zoo public relations manager, said the zoo will contest at least one of the allegations. She said new employees receive adequate training and safety instruction and work alongside experienced zoo keepers.

Burgmann said the zoo established a safety committee that will review procedures in every area of the zoo.

Zoo officials were reviewing the other violations OSHA found. They included unsafe window openings to the ''grottos'' where bears are displayed, through which an employee could fall. Burgmann said bars have been placed over those windows.

The agency also cited stairs in the bear area that failed to meet standards to minimize the risk of employees tripping; exposed electrical parts and equipment in the bear area; and failure to devise a training plan for bear workers on the use of hazardous chemicals such as muriated acid, chlorine and cleaning solvents.

Stober claimed zoo officials retaliated against a co-worker, Leigh Ann Haynes, who summoned help and probably saved her life.

Haynes, a bear and walrus keeper, was suspended when she refused a transfer after the bear incident. She sued the zoo, alleging she was demoted and suspended for helping federal officials investigate.

Haynes' suit in Hamilton County Common Pleas Court alleges the bear was deprived of the watering pool and ventilation it needed, had been separated from its mate and newborn cubs, and that lights inside and outside the den in the bear tunnel were broken, despite repeated requests for zoo maintenance to repair them.

HAMMOND, IN (JUNE 23) UPI - U.S. Attorney James G. Richmond of the Northern District of Indiana will organize the Justice Department's nationwide probe into savings and loan fraud.

Richmond was appointed Friday by Attorney General Dick Thornburgh at a meeting of the nation's 93 U.S. attorneys. The prosecutors had been called to Washington to discuss the government's investigation plans.

Richmond said his assignment as Special Counsel for Financial Institutions would last for about 90 days. Richmond said John F. Hoehner of Hammond, the first assistant U.S. attorney for northern Indiana, would serve as acting U.S. attorney during his absence.

He said the special Financial Fraud Coordinating Unit being created likely would be the leading element in the savings and loan investigation.

Richmond, 46, was chosen for the U.S. attorney post in northern Indiana in 1985. He is California native. He received an undergraduate degree from Indiana University in 1966 and a law degree from the school in 1969.

He also has served as an investigator for the Internal Revenue Service and as a special agent for the FBI.

''I have served Attorney General Thornburgh as the chairman of his Advisory Committee for United States Attorneys for the past year and a half, and during this period the committee has been very much involved in the department's efforts to combat financial institution fraud,'' Richmond said in an interview Friday.

#90174u0436 06/23/1990 ~United Press International

LOS ANGELES (JUNE 23) UPI - Songstress June Christy, whose big band vocals of the 1940s and '50s prompted one critic to dub her the ''grande dame of modern jazz singing,'' has died, officials said Saturday. She was 64.

She died Thursday from complications of kidney failure at the Sherman Oaks home where she lived with Bob Cooper, her husband of more than 40 years and a former tenor saxophonist with the Stan Kenton band.

Christy gained her greatest fame as vocalist with the Kenton orchestra and recorded more than 20 albums as an independent artist, including her popular, ''Something Cool.''

The singer, often called ''that misty Miss Christy'' because of her husky voice and because of her rendition of the popular standard, ''Misty,'' was to be remembered at a memorial service Sunday at Forest Law Church of the Hills, a spokesman said.

During one series of appearances at the Century Plaza Hotel, Christy was christened ''grand dame of modern jazz singing'' by Los Angeles Times jazz

critic Leonard Feather, who wrote, ''To the extent that the term connotes professional prestige, it certainly applies.''

A notation in the New Grove Dictionary of Jazz cited her ''breathy, husky sound and narrow vibrato ... ideally suited to the cool jazz of the 1950s.''

Born Nov. 20, 1925, in Decatur, Ill., Christy began singing with local bands as a teenager. She soon moved to Chicago to replace Anita O'Day in Kenton's orchestra and in 1945 recorded ''Tampico'' with the band, establishing her name as a singer.

Down Beat magazine named her ''best female vocalist with a big band'' in 1946, 1947, 1948 and 1950.

Christy toured frequently with the Kenton orchestra, appearing as recently as 1972 with the band at the Newport Jazz Festival in New York. She was unable to performance for the past five years because of illness.

In addition to her husband, Christy is survived by their daughter, Shay Cooper, and a brother, Jack Luster, of Illinois.

#90174u0452 06/23/1990 ~United Press International
NORFOLK, VA (JUNE 23) UPI - Navy search teams resumed rescue efforts Saturday for four missing sailors who went down in their CH-46 Sea Knight helicopter when it crashed Friday in the Atlantic Ocean within sight of its mother ship.

''Salvage operations are continuing this morning,'' Lt. j.g. Karl Johnson said. ''They have not recovered any of the bodies.''

Johnson said the four sailors, whose identities were not been released pending the notification of relatives, were still considered missing.

Johnson said Saturday's search began at daybreak, and he added it would continue until ''as much of the aircraft as possible has been recovered.''

He said search teams retrieved some of the wreckage Friday after the early afternoon crash.

All Sea Knight helicopters were grounded May 15 and May 25 ''for unrelated problems'' on specific parts, said Navy Lt. Russ Greer. ''All the aircraft both Marine and Navy, had those inspections and all either passed or had the appropriate parts replaced.''

Greer said no safety stand-down was ordered in the wake of Friday's incident.

To look for a cause, ''parts of the aircraft have already been recovered despite very bad weather,'' Greer said. ''We had a very intense storm late in the afternoon.''

The storm frustrated at least seven Navy and Coast Guard vessels and countless flyovers by search teams.

The helicopter, based aboard the fast-combat support ship USS Detroit, was returning to Naval Air Station Norfolk, as was the mother ship.

The CH-46 is used to transport troops and cargo. First flown in 1962, it has been out of production since 1971 but remains the Navy's primary helicopter for resupplying ships at sea.

The Navy has been having trouble with it's worldwide fleet of twin-engine CH-46 helicopters. All were grounded in mid-May due to transmission problems found in the aft rotor and the safety check affected 340 Navy and

Marine Corps helicopters.

At the end of May, Navy officials announced the second grounding of the helicopters to check a cracked connecting link in the forward rotor.

The first grounding was ordered following a May 4 crash of one of the helicopters in Twenty-Nine Palms, Calif. There were no fatalities in that crash, and investigators found excessive wear in a quill shaft inside the aft transmission of the twin-rotor helicopter.

The second grounding was ordered after a technician found a cracked connecting link during a routine inspection of a Marine helicopter at Cherry Point, N.C.

#90174u0464 06/23/1990 ~United Press International

BOSTON (JUNE 23) UPI - Civil rights leader Nelson Mandela brought his anti-apartheid message to Boston Saturday for a full day of appearances in a city with a checkered history of self-determination and racial turmoil.

Mandela praised Boston for establishing the fundamental principle of democracy for the world in December 1773 when an angry band of patriots sparked the American Revolution.

''I feel very honored and happy to be in this city,'' Mandela said. ''It was here that the Boston Tea Party served notice that the citizens of this country would not live under domination by the British.

''That was the establishment of a fundamental principle which has inspired democracies, freedom fighters, revolutionaries all over the world and right down the center of it.''

The 71-year-old deputy president of the African National Congress landed at Logan International Airport at 10:45 a.m. aboard a leased Trump Shuttle jet from New York, where his 12-day, eight-city visit to the United States opened with a hero's welcome.

Mandela's public schedule called for him to speak to students and community leaders at a vocational high school in Boston's predominantly black Roxbury neighborhood, visit the John F. Kennedy Library - spotlighting the strong bond between the anti-apartheid movement and America's most famous political family, and speak at a six-hour rally/concert at the picturesque Charles River Esplanade.

The day will be capped by a fund-raising reception with prominent area business leaders at the posh Copley Plaza hotel, where Mandela and his wife, Winnie, will spend the night.

Gov. Michael S. Dukakis, Mayor Raymond Flynn and Sen. Edward M. Kennedy, D-Mass., led the delegation that greeted Mandela at the airport. The airport crowd chanted the African word for ''power'' as Mandela and his delegation left the plane.

''You have brought hope and inspiration and a sense of what is possible when a love of freedom knows no fear,'' Dukakis told Mandela.

Rather than give Mandela a key to the city, Flynn presented him with a symbolic ''lantern of liberty'' to bring hope and opportunity to young people all over the world.

Dukakis noted that Massachusetts in 1983 became the first state to begin divesting from firms doing business in South Africa.

He said he hoped the Mandela visit will spur Massachusetts efforts to improve race relations and become ''an example of racial understanding.''

''One of the things we all have to understand is that racial difficulties are not the exclusive property of South Africa or for that matter, the Deep South before desegregation,'' the governor said. ''Every part of the world has these problems.''

Making Roxbury Mandela's first stop symbolized efforts to heal Boston's racial wounds, which included a bitter 1970s battle over court-ordered school desegregation.

The neighborhood, blighted by crime, drugs and poverty, tried without success in 1987 to secede from Boston on grounds the city was ignoring their needs. Community activists wanted to call their new community Mandela.

The biggest event of his daylong Boston schedule is the Esplanade concert expected to attract more than 250,000 people. Scheduled musicians included Paul Simon, Jackson Browne, Michelle Shocked, Bobby McFerrin and the South African group Ladysmith Black Mambazo, which interrupted its European tour to fly in for the Mandela appearance.

On Friday, Mandela capped his New York visit by meeting with Wall Street executives, speaking to United Nations diplomats and anti-apartheid activists and socializing with actors and rock stars.

He received a rousing, historic welcome Friday to the United Nations where he thanked the world body for its support in trying to abolish the ''crime'' of apartheid.

PONTIAC, MI (JUNE 23) UPI - Corinthian 'Kripp' Johnson, lead singer for the Del-Vikings rock group, died Friday night of prostate cancer at his home. He was 57.

Mili Lilley, manager of the group, said Johnson was diagnosed of having cancer following a prostate operation in October 1989.

Johnson was a founding member of the group, which was formed in 1955. The band put together a number of hits, most notably ''Come Go With Me'' and ''Whispering Bells.''

He last appeared with the group during a concert in Hollywood, Fla. on April 26. Johnson was noted for his rendition of ''How Can I Find True Love.''

Johnson is survived by his wife, Johnnie Mae, and eight children. Funeral arrangements were pending.

#90174u0501 06/23/1990 ~United Press International
(JUNE 23) UPI - Around the world... around the clock, U-P-I has the latest news.

Canadian Prime Minister Brian Mulroney says it is a ''sad day for Canada.'' Mulroney's remarks follow the collapse of a constitutional amendment aimed at preventing Quebec's secession. The amendment failed because the legislatures of Manitoba and Newfoundland adjourned yesterday without voting on the amendment.

Medical teams from Japan, Switzerland, France, and Turkey are in Iran helping with relief efforts. The Iranian mission to the United Nations says about 36-thousand people died in Thursday's devastating earthquake. A U-S aid official says the death toll probably will rise to 40-thousand.

There is some encouraging news from an AIDS conference being held in San Francisco. Scientists report progress is being made toward developing a vaccine for the deadly virus. Top researchers, including Dr. Jonas Salk, say recent animal and human studies indicate a vaccine may be ready by the year 2000.

Nelson Mandela thanked the United Nations yesterday for its help in fighting apartheid. U-N Secretary-General Javier Perez de Cuellar and other speakers heaped praise on the South African black nationalist and pledged continuing support.

Thousands of jobs in the Pacific Northwest may be on the line now that the federal government has designated the northern spotted owl a threatened species. At least one timber industry group vows to sue the U-S Fish and Wildlife Service, saying the decision will adversely affect thousands of families.

-30- 1716
#90174u0513 06/23/1990 ~United Press International
(JUNE 23) UPI - Navy rescue teams late last night suspended their search for four sailors missing since the crash of a Sea Knight helicopter in Chesapeake Bay yesterday. The CH-46 helicopter was returning to the Norfolk Naval Air Station in Virginia when it went down.

Authorities at the Grand Canyon in Arizona say a hiker from Pennsylvania who ran out of water in 110-degree heat has died. Police say 26-year-old William Styker and his wife were hiking in the canyon's basin Thursday when they were overcome by heat exhaustion. Styker's wife suffered delirium.

A federal judge in Washington sentenced a former Housing and Urban Development employee to four years in prison for bilking the government out of more than six and one-half Million dollars. Marilyn Harrell- dubbed ''Robin HUD''- said she gave the money to charities. But prosecutors say Harrell kept most of the money.

A Washington employee has testified he saw Mayor Marion Barry slumped in a hotel bathroom with a make-shift crack cocaine pipe and a bag containing drug residue. James McWilliams yesterday said he lied when he previously told police NO drugs were present in the hotel room that night.

Donald Trump has broken his silence regarding his financial woes. He says he is close to reaching an agreement on a bail-out plan with his creditors. In a statement released yesterday... Trump said under the new plan, he would get 65-Million dollars.

-30- 1602

#90174u0531 06/23/1990 ~United Press International

The United States and a dozen other countries have offered medicine, blood, doctors and food to help Iran meet the needs of an estimated 100,000 injured and at least that many left homeless by the massive earthquake.

Medical teams from Japan, Switzerland and France and Turkey are already in Tehran to assist with relief operations for victims of Thursday's quake, which measured 7.7 on the Richter scale and devastated northwestern Iran.

The United States Friday sent $300,000 worth of relief supplies to Iran through the American Red Cross and is planning more aid, State Department officials said.

Several U.S. relief-oriented groups - including Catholic Relief Services and Americares, as well as the Red Cross - say they are sending money or supplies to Iran.

A Soviet Aeroflot flight left for Tehran Friday with a team of physicians and rescue workers as well as a Soviet Red Cross cargo of tents, blankets, and bandages, the official Soviet news agency, Tass, reported Friday.

The European Community granted $1.2 million in emergency aid Friday to quake victims and Japan is reportedly sending between $500,000 and $1 million in cash as well as a 22-member medical and rescue squad.

In addition, Australia, Malaysia, Turkey, Poland, Bangladesh, Syria, Saudi Arabia and Soviet doctors in the Azerbaijan region of the Soviet Union have offered to help.

Sadreddin Sadr, of Iran's Red Crescent relief organization, the equivalent of the Red Cross, said in an interview on Cable News Network that besides some 100,000 wounded by the quake and its aftershocks, about 100,000 people are homeless. At least 30,000 people were killed by the temblor.

The Iranian news agency, IRNA, reported separately that Sadr said Iran needs such medical supplies as antibiotics and vitamins, surgical thread, orthopedic surgery material and bags for storing blood, as well as blankets and food.

Iran does not want more doctors, search dogs, or blood, Sadr reportedly said, because Iran has already mobilized 3,000 people to help with relief and the country has a sufficient number of blood donors.

In Geneva, the League of Red Cross Societies reported Friday Iran had said it seeks only certain types of aid ''conforming to Islamic rules.''

''It is clearly a human tragedy,'' State Department spokesman Richard Boucher said in Washington. ''We want to be helpful, without regard to our political differences with Iran.''

According to a situation report released late Friday, the U.S. government sent a relief flight carrying 1,000 hard hats, 1,000 pairs of leather gloves, 10,000 face masks, 2,940 wool blankets, and at least 500 tents.

The Iranian government told the State Department that it would welcome relief supplies through the American Red Cross or other humanitarian agencies, officials said Friday.

More than 900 people phoned the Red Cross headquarters in Washington by late afternoon asking how they could help quake victims, Red Cross spokesman Jim Cassell said.

Cassell called the response ''pretty good,'' adding, however, the 356 pledges of cash assistance recorded so far are not as many as came in during the early hours after the 1985 Mexican earthquake. He attributed the difference to the relationship the United States has with Mexico as a result of their common border and the high number of Hispanic Americans.

The Red Cross expects to send at least $31,000 in assistance through the League of Red Cross Societies, based in Geneva, in coordination with the Iranian Red Crescent relief group.

Catholic Relief Services is accepting donations to be channeled through the Red Cross and the Red Crescent, spokeswoman Karen Donovan said.

A team from the International Committee of the Red Cross, dispatched from

Switzerland and one from Doctors without Frontiers, an independent French medical group, was among the first to arrive in Tehran.

France sent 6 tons of medicine and food to Iran Thursday, and followed Friday with 20 doctors, 24 tons of equipment, 160 relief workers and 18 dogs trained to locate victims in wreckage.

The Italian Foreign Ministry said a shipment of supplies from the U.N. Disaster Relief Organization will be flown Saturday from Pisa.

Iran Airlines has flown 3,000 relief workers into the quake region, with the majority going to Gilan and Zanjun, the provinces hardest hit.

A spokesman for Minister of Roads and Transportation Mohammad Saeedi Kya said loaders, bulldozers, graders, trucks and vans have been mobilized from nine provinces to help provide access to the stricken regions.

Contributions can be sent to the following groups: American Red Cross, P.O. Box 37243, Washington, D.C. 20013, phone (800) 842-2200; Americares, 161 Cherry St., New Canaan, Conn., 06840, phone (203) 966-5195; Catholic Relief Services, 209 W. Fayette St., Baltimore, 21208, phone (301) 625-2220.

The Bank of Melli-Iran is also accepting donations for quake relief. Its address and phone are: Bank Melli-Iran, 628 Madison Ave., New York, NY 10022, phone (212) 759-4700.

-30- 5295

#90174u0561 06/23/1990 ~United Press International

(JUNE 23) UPI - Quebec fails to win a Canadian constitutional amendment that would keep it part of Canada.

The earthquake death count in Iran may exceed 40-thousand.

AIDS researchers expect a vaccine by the year 2000.

U-P-I has this and other top news today.

Canadian Prime Minister Brian Mulroney will address Canada today, one day after the collapse of a constitutional amendment aimed at preventing Quebec's seccession.

The amendment is known as the Meech Lake accord. It was declared dead yesterday by Canada's federal government after the provinces of Manitoba and Newfoundland adjourned their legislatures without voting on it.

Mulroney called it ''a sad day for Canada.''

The next step is up to the Francophone province of Quebec. Premier Robert Bourassa has said repeatedly the French-speaking province would secede if the amendment failed. He so far is NOT indicating what his next step will be. Bourassa plans to make a formal statement today on Quebec's future.

Upon hearing that the amendment was dead, Bourassa told Quebec's National Assembly... qouting here... ''In the name of all Quebecers I want to profess my profound disappointment.''

The amendment to Canada's constitution would have responded to the long-time separatist sentiment in Quebec. It would have conferred upon the province special powers to promote and preserve its French language and culture.

-30- 1569

#90174u0562 06/23/1990 ~United Press International

(JUNE 23) UPI - The director of U-S Foreign Disaster Assistance says the death toll from the powerful earthquake that rocked Iran probably will exceed 40-thousand. The Iranian mission to the United Nations currently estimates 36-thousand people died in the quake.

An official of The Iranian Red Crescent relief organization says ''whole towns were flattened like they were never there.'' And he adds rescue teams are NOT able to reach many stricken areas, about 175 miles northwest of Tehran.

He says for the next 10 days, search crews will be digging through the rubble trying to recover victims. About 100-thousand people are said to be injured and perhaps hundreds of thousands of others homeless.

Emergency teams from around the world are traveling to Iran to help with relief efforts. Iran is asking for specific types of aid- medicine, food, and blankets. Iranian officials say they have enough doctors and search dogs, but doctors from other countries already are on the scene to lend a helping hand.

-30- 1177

#90174u0563 06/23/1990 ~United Press International

(JUNE 23) UPI - Scientists attending the 6th International AIDS Conference report progress toward developing a vaccine against the deadly virus.

NO startling breakthroughs were announced... but nearly every top AIDS researcher, including polio vaccine pioneer Dr. Jonas Salk... agreed that results of recent studies pave the way for a vaccine by the year 2000.

Salk's collaborator... Dr. Alexandra Levine of the University of Southern California... said only four of 82 H-I-V-infected people receiving a test vaccine went on to develop AIDS over a period of about two years.

That compares with the 20 percent progression to AIDS seen over one year in other studies of H-I-V-infected people.

Although the Salk work does NOT appear to be a cure... Levine says the results indicate it may be a good idea to combine such immune boosters with AIDS drugs.

Officials told the conference in San Francisco that at least 250-thousand cases of AIDS from more than 150 countries have been reported to the World Health Organization... but they add the number of cases may actually be closer to 700-thousand.

(JUNE 23) UPI - The Bush administration is deciding whether to continue sanctions against the South African government of Pretoria as black leader Nelson Mandela tours the United States.

Mandela wants the United States to continue its sanctions. But the assistant secretary of state for African Affairs, Herman Cohen, says- ''We will make our own decisons.''

Cohen says the question of how to define a political prisoner and the lifting of the state of emergency in the Natal province are main sticking points with the government of President F-W de Klerk.

Cohen says Mandela and South African negotiators have reached some agreement regarding political prisoners. He adds that helps pave the way for the United States to move toward modifying or suspending restrictions against South Africa.

And on Capitol Hill, Senate Democratic leader George Mitchell of Maine says the Senate will vote on a major civil rights bill next week to coincide with Mandela's visit. The measure would reverse a number of Supreme Court rulings that civil rights leaders view as setbacks for non-discrimination in employment.

Mandela is scheduled to address Congress Tuesday.

#90174u0565 06/23/1990 ~United Press International

(JUNE 23) UPI - An international panel of experts says the danger from radiation is far worse than previously thought. The International Commission on Radiological Protection in Washington says it will recommend that governments reduce worker exposure limits by more than 50 percent.

The panel says new studies indicate radiation is a more potent cause of cancer and genetic damage than previously thought. The studies particulary focused on Japanese atomic bomb surivors.

The commission says it will NOT recommend a change in its current annual radiation exposure limit for the general public. But it says it will tighten guidelines applying to nuclear power plant workers, uranium miners medical personnel administering X-rays, and other workers routinely exposed to radiation on the job.

A nuclear expert with the Natural Resources Defense Council says the commision did NOT go far enough in recommending changes because of pressure from the nuclear industry. The U-S Nuclear Regulatory Commission has NOT commented on the panel's findings.

#90174u0567 06/23/1990 ~United Press International

LOS ANGELES (JUNE 23) UPI - A proposal to toughen city sanctions against South Africa languished for nine months in a City Council committee but resurfaced with a vengeance as city officials prepared to welcome Nelson Mandela.

The city's 4-year-old anti-apartheid ordinance forbids companies doing business in or with South Africa from contracting with the city, although there are numerous exemptions.

But a loophole requires that contracts for products worth $25,000 or more be offered to the lowest competitive bidder, even if the firm does business in South Africa.

''(The) anti-apartheid ordinance is on the cutting edge but it can be made stronger by tightening the provisions to affect all competitive bids,'' City Councilman Zev Yaroslavsky said.

Deputy Mayor Mark Fabiani said that, under the current policy, hundreds of millions of dollars a year in engineering, legal, design, bond underwriting and other service contracts are offered only to firms with no ties to the apartheid government.

Last September, council members Joan Milke Flores and Robert Farrell proposed a City Charter amendment that would allow city departments to chose an alternate bid if the lowest proposal comes from a firm doing

business in South Africa.

Yaroslavsky later joined the two lawmakers to call for the new provision, but the proposal has remained in the Governmental Efficiency Committee, attracting little attention and no action.

Until now.

Mandela is to arrive in Los Angeles Friday for two rallies and a $1,000-a-plate fund raiser.

As the visit approached, questions were raised about why no action had been taken on the sanctions measure. When Flores and committee chairman Michael Woo were asked about the measure, neither could say what its status was.

Following hurried consultations with their staff, however, they announced the committee would meet Monday to consider the proposal.

''We thought it was appropriate for the council to act affirmatively in the week Mandela is here and to reiterate the city's support for the anti-apartheid movement,'' Woo said.

Because of the delay in committee, the council missed Flores' original goal to have the measure on the June ballot. The lawmakers must now approve the proposal by July 18 to have it considered by voters in November.

Despite the need for quick action, Farrell was confident approval would be forthcoming.

''I think that the visit of Nelson Mandela will give additional life to the efforts we are making to strengthen our anti-apartheid activity,'' he said.

Mandela has made the continuation of economic sanctions against the South African government a major theme of his U.S. tour.

#90174u0593 06/23/1990 ~United Press International

BOSTON (JUNE 23) UPI - South African leader Nelson Mandela saw three of his grandchildren for the first time Saturday and praised the people of Boston for taking care of them while he was in prison.

''The people of the city of Boston stood behind our family and took over the task of being parents to my children,'' Mandela told dignitaries and supporters who greeted him upon his arrival at Logan International Airport.

''The city of Boston has been responsible for looking after my children - my daughter, son-in-law and their children are studying in Boston,'' he explained.

''We are happy that we should be connected with such a city,'' Mandela told the crowd. ''We respect you. We admire you and we love you all.''

As he approached the motorcade to leave the airport with his wife, Winnie, Mandela was pointed in the direction of three of his grandchildren, whom he had never seen.

Winnie was nearly in tears as she hugged the children. Her husband kept his composure and said, ''Hello, nice to see you.''

Mandela's daughter, Zenani Mandela-Dlamini, 31, one of two daughters from Mandela's marriage to Winnie, is an undergraduate at Boston University and lives in Boston with her husband and children. She joined her father in New York City, the first stop of his 12-day, eight-city U.S. tour.

Mandela was reunited with another daughter, Nakaziwe ''Maki'' Mandela-Amuah, 36, during his Boston visit. Mandela-Amuah, one of three children from Mandela's first marriage, is an anthropology doctoral candidate at the University of Massachusetts at Amherst.

She met her father shortly after his release in February after 27 years in prison.

#90174u0622 06/23/1990 ~United Press International

LOS ANGELES (JUNE 23) UPI - A UTA French Airlines DC-10 bound for Tahiti was forced to return to Los Angeles International Airport early Saturday because of a malfunctioning engine, but landed safely, authorities said.

Flight 503 landed at 5:07 a.m., more than an hour after the Federal Aviation Administration was notified the aircraft was flying with one engine shut down and was returning to the airport, an FAA spokesman said.

The pilot notified flight controllers of the engine shutdown about 3:45 a.m., nearly four hours after the flight's scheduled departure from Los Angeles.

It was not immediately clear whether the engine was shut down on its own and by the pilot after problems developed.

UTA French Airlines representatives could not immediately be reached for comment.

An airport operations spokesman said the 189 passengers would be put up in hotels for the night while the airplane was repaired, with another flight scheduled for Sunday.

#90174u0625 06/23/1990 ~United Press International

SAN FRANCISCO (JUNE 23) UPI - The Soviet Union and Eastern European nations face a growing threat from AIDS, but their governments are ill-prepared or unwilling to attack the problem, experts warned Saturday.

''In our country, we must painfully say that the government has failed to protect its citizens from AIDS. Now, we are running out of hope that we can avoid the global epidemic,'' said Elena Pankova, coordinator of an anti-AIDS charity fund in the Soviet Union.

Pankova said on the next-to-last day of the 6th International AIDS Conference that she thinks her government is concealing the extent of infections of Soviet citizens by the AIDS-causing human immunodeficiency, or HIV.

''We can only guess as to what the real figures are and how many times larger than 490 HIV carriers they are. For in 1988, we were told there were fewer than 50 carriers, and today we are told that we have 10 times more. Why is it that no one knows the true number infected with HIV?'' said Pankova, who also is a journalist for Ogonyok magazine.

Researchers at the Gamaleya Institute of Epidemiology have projected that, if the government does not take urgent measures now, the AIDS epidemic in the Soviet Union will peak in 16 years when there will be ''tens of millions'' of HIV-infected people, Pankova said.

Although government health officials have called those projections ''a fantasy,'' Pankova said she thinks the estimates may even be an understatement.

Factors that make the Soviet Union ripe for the spread of acquired immune deficiency syndrome are an undersupply of condoms, the reuse of syringes and other medical equipment, the lack of sterilization for dental instruments and the poor quality of HIV screening tests, Pankova said.

''Why is AIDS spreading in the USSR? Consider what would happen in your countries if condoms disappeared off (drugstore) shelves and there was not even the most simple protection against AIDS available. That is exactly the situation in the Soviet Union,'' she said, adding that she hoped revealing the ''real picture'' will move Soviet officials to action.

The World Health Organization estimates about 6 million to 8 million people worldwide, about one of every 400 adults, are infected with HIV. Surges in infection in developing nations and possibly Eastern Europe could push that toll up to 20 million by the year 2000, the WHO said.

The AIDS virus is spread by sexual contact or blood-to-blood contact, such as intravenous drug users sharing needles. It can also be passed on from an infected mother to her unborn baby.

In another speech delivered to the AIDS meeting, Sieghart Dittman, director of West Germany's Institute for Hygiene, Microbiology and Epidemiology, warned that some Eastern European nations face a growing threat from AIDS since the recent overthrow of restrictive Communist governments.

Currently, HIV-infection and AIDS rates in Eastern Europe are far lower than in Western European nations and the United States, Dittman said.

Eastern European nations currently do not exceed 5 AIDS cases per 1 million people, compared with 473 cases per million in the United States, he said.

However, Dittman warned: ''Now, when the borders between Eastern and Western European countries have become more open, when in Germany the walls are broken down completely, the problem of spread of HIV infection might become far more serious.''

For example, the rate of HIV infection intravenous among drug users in Poland has increased ''dramatically'' in the past year, he said.

Dittman also cited ''alarming'' incidents of children being infected by unsterilized needles and HIV-contaminated blood in Romania and the Soviet Union. On Wednesday, a Romanian health official reported 10 percent of about 10,000 children under age 3 in state-run orphanages and medical centers tested positive for the deadly AIDS virus.

''Some countries of Eastern Europe find themselves now in a situation where the incidence of HIV infection is increasing and they are not as well-prepared as perhaps needed at a time when major political and social changes are occurring,'' said Dittman. He called on the WHO to give special attention to AIDS prevention in that region of the world.

#90174u0654 06/23/1990 ~United Press International

WASHINGTON (JUNE 23) UPI - Upheaval in Eastern Europe, global warming and a possible breakdown in world trade will top the agenda of the seven-nation economic summit in Houston next month, U.S. officials say.

As American and other officials make preparations for the July 8-11 meeting, they predict there will be some serious disagreements that can only be dealt with by the seven heads of government.

''It's time for some statesmanship,'' one official said.

The annual summit is made up of the leaders of Britain, Canada, France, West Germany, Italy, Japan and the United States, with the European Community attending as an observer.

A senior American official directly involved with the preparations said the agenda will be completed this week in a final preparatory meeting in Washington by sub-Cabinet-level officials from the seven countries. The American official talked to a small group of wire service reporters last week on the basis of no further identification.

The agenda, he said, will include:

-Trade: The so-called Uruguay Round of trade talks between members of the General Agreement on Tariffs and Trade is stalled over the issue of government subsidies of agricultural exports. The United States claims that Japan and European countries unfairly subsidize their agricultural industries, effectively freezing the U.S. products out of some traditional markets.

The official said the trade negotiations ''are running out of time'' and unless the seven leaders make some courageous and possibly politically costly decisions at the summit, a punitive trade war could break out that could trigger a world-wide recession.

''The time has come for some political decisions by the people elected to run their countries,'' the official said.

-Environment: There is general agreement that the environment, and particularly the prospect of global warming, is a serious threat. But

there is almost total disagreement on what to do about it between the United States, on one hand, and the other industrial nations.

The official said, ''How fast do you make decisions involving the potential expenditure of trillions of dollars? We want further scientific evidence before we irrevocably commit ourselves. We know we will have pressure from the others to move faster.''

-The Soviet Union: Frenech President Francois Mitterrand has put forward a plan for a large-scale program of economic aid and technical assistance for the Soviet Union.

''We are skeptical,'' the U.S. official said, ''about how much you can do in the absence of major economic reforms that would move the Soviet Union toward a free-market economy.''

According to the American analysis, the Soviet economy is in such terrible shape that it is actually shrinking. The official said, ''The Soviets are experimenting with things with which they have had little experience, almost like they slipped out of a time warp, having missed the economic events and thinking of the last 70 years.''

He added, ''We wish them well and we don't want to see that place fall apart,'' but he said that pouring long-term aid money into an economy that is not functioning would be like pouring water into a sieve. The Germans and the French will argue that an immediate program of aid is required to avoid disastrous political disintegration in the Soviet Union.

The summit also will have to grapple with a continuing disagreement among Japan and the other six countries on how to deal with China. Another official said the Japanese want to open up the trade faucet, on the theory that more international connections will prevent the Chinese leadership from slipping back into isolation and repression of political opponents.

But the other six countries at the summit have strong political constituencies demanding that the Chinese be pressured into political reforms by economic sanctions.

#90174u0657 06/23/1990 ~United Press International

SAN FRANCISCO (JUNE 23) UPI - Most medical residents said they do not want to treat AIDS patients when they go into private practice, a nationwide survey showed Saturday.

A poll of 1,045 medical residents specializing in internal medicine at 41 training programs found 63 percent did not plan to care for people with acquired immune deficiency syndrome, 17 percent strongly favored treating

AIDS patients and 20 percent were somewhat in favor.

Furthermore, about half of the young doctors said they would not want their communities to know they were caring for AIDS patients.

About two-thirds of the residents questioned in the University of California-San Francisco survey said they worred about being infected with the AIDS virus while on the job.

Three-quarters of the residents said they would not give life-saving treatment to an AIDS-infected person, even if the chance they would get the deadly virus was one in 100. If the risk was one in 100,000, about 5 percent would still withhold treatment, the survey found.

''This is clearly an important issue for the medical profession. What does it mean when our young medical trainees say they don't want to have to deal with one of the most urgent health problems of this generation?'' said Dr. Molly Cooke, who directed the study presented at the 6th International AIDS Conference.

The written survey included questions about the residents' attitudes towards homosexuals, intravenous drug users and minorities - groups hard hit by the AIDS epidemic.

The virus is spread by sexual contact or blood-to-blood contact, including being pricked with contaminated needles. An infected woman can also pass the virus on to her baby.

Survey results indicate the young doctors' attitude hinged more on their feeling towards such groups and their sense of ethics than on their fear of getting AIDS on the job, Cooke said.

About 136,000 Americans have contracted AIDS since the disease was first recognized in 1981 and 83,145 of them have died - more than the total number of U.S. soldiers killed in battle in the Korean and Vietnam wars.

It is also estimated about 1 million Americans are infected with the AIDS virus. Earlier this week, the National Academy of Sciences issued a report warning that the epidemic appears to be broadening its attack to include more women and teenagers.

''For training in internal medicine, we should be developing programs to help people recognized and deal with their feelings and prejudice about the people who get AIDS,'' Cooke said.

#90174u0717 06/23/1990 ~United Press International

CAIRO, EGYPT (JUNE 23) UPI - President Bush contacted Egyptian President Hosni Mubarak Saturday on the eve of the departure of the foreign minister to Washington for the first direct contact between the nations since the suspension of the U.S.-PLO dialogue, news reports said.

''President Bush contacted President Mubarak by phone Saturday afternoon and their discussion dealt with current international developments and how to push the peace process in the Middle East forward,'' Cairo radio reported.

''And upon an agreement reached between President Mubarak and President Bush, President Mubarak is dispatching Foreign Minister Esmat abdel Meguid this week to the United States to meet President Bush,'' the report said.

White House spokesman Douglas Davidson said Bush had planned to call Mubarak Saturday from the Camp David presidential retreat in Maryland, where the president is spending the weekend, but added he had no details of the conversation between the two leaders.

Egypt's semi-official Middle East News Agency said abdel Meguid was scheduled to leave for Washington early Sunday.

The meeting will be the first direct contact between the two countries since Bush broke off diplomatic contact with the Palestine Liberation Organization because it did not condemn the May 30 sea attack on Israel by a radical PLO faction.

Israeli Prime Minister Yitzhak Shamir said Friday he will not propose a new peace initiative and predicted Israeli relations with the United States would improve following the break in the U.S.-PLO dialogue.

The decision sparked unfavorable reaction in the Arab world.

The Egyptian government expressed hope that Washington would soon restore the U.S.-PLO dialogue, which began in December 1988.

Saudi Arabia on Friday expressed deep regret over the move and urged Washington to reconsider the decision.

#90174u0739 06/23/1990 ~United Press International

CAPE CANAVERAL, FL (JUNE 23) UPI - A Titan 3 rocket kicked an uninsured $150 million communications satellite into orbit Saturday in the booster's first flight since a March failure that left an identical relay station stranded in space.

As the costly Intelsat 6 satellite was ejected into its preliminary orbit about 25 minutes after liftoff, engineers with Titan-builder Martin Marietta Astronautics Group of Denver burst into cheers.

''From the standpoint of the problem we had on the last launch, we were all very anxious to see this mission totally successful,'' said Ed Browne, president of Commercial Titan Inc. ''We were all very happy and we naturally let our emotions show that.''

An identical Intelsat 6 relay station was stranded in a useless low-Earth orbit March 14 when it failed to separate properly from its Titan 3 launcher because of a miswired second stage ejection system.

Browne said Martin Marietta engineers left no stone unturned to correct the problem and to ensure a safe launch Saturday. The result, he said, was a ''totally flawless launch.''

''We're very proud of this mission,'' he said at a post-launch news conference. ''It was a good day.''

Frederick Ormsby, spacecraft mission director for the International Telecommunications Satellite Organization - Intelsat - said data from the spacecraft indicated the relay station sailed through the rigors of launch in good condition and ''we're very satisfied.''

The $120 million commercially built Titan 3 blasted off on time at 7:19 a.m. and majestically climbed away from launch complex 40 at the Cape Canaveral Air Force Station.

''We have ignition of the solid rocket motors and away we go!'' launch commentator Robert Gordon said from the Titan control center as the big rocket thundered toward space on only its third flight.

The Intelsat 6 on board was the third of five high-power communications

satellites built by Hughes Aircraft Co. for Intelsat, a non-profit consortium of 118 member nations. Each satellite can handle up to 120,000 telephone conversations at once.

Rumbling through the morning sky atop twin jets of white-hot fire, the Titan 3, the most powerful U.S. rocket ever built as a commercial venture, arced east over the Atlantic Ocean, knifed through a thin layer of clouds and quickly disappeared from view.

Twenty-five minutes after launch, the satellite was safely kicked away from the spent Titan second stage and 45 minutes after that an on-board solid-fuel booster fired to begin the satellite's trip to a final orbit 22,300 miles above the equator.

Engineers plan to spend about a month and a half testing the satellite's systems before putting it into operation over the Atlantic Ocean between Europe and North America, freeing up an older satellite for use elsewhere.

The last Titan 3 launch, March 14, put an identical Intelsat 6 satellite into a useless orbit because of a wiring error in the Titan second stage payload ejection mechanism that prevented the relay station's separation from the rocket.

It was a major failure for Martin Marietta and for the infant American commercial space program in general, which is struggling to lure business away from the European Ariane rocket system.

''I have to tell you, we were embarrassed over that failure. We don't like to have failures,'' Browne said Friday.

Intelsat ground controllers ultimately sent commands that caused the stranded spacecraft to separate instead from its on-board rocket booster, leaving the satellite stranded in a safe-but-useless orbit.

Intelsat announced last week it will pay NASA some $90 million to mount a space shuttle rescue mission in February 1992. The bold salvage plan calls for two spacewalking astronauts to attach a new rocket motor to the satellite so it can continue to the high orbit required by communications stations.

The Intelsat 6 satellites cost around $150 million each. Like the one stranded in March, the latest in the series is not insured by Intelsat and under the terms of the launch contract, Martin Marietta's responsibility ended at the moment of liftoff.

With an expected lifetime of more than 13 years, the Intelsat 6 satellites are the largest and most powerful such communications stations ever built on a commercial basis.

Each spacecraft is equipped with 48 radio transponders allowing them to carry a minimum of 24,000 simultaneous two-way telephone conversations and three simultaneous color television channels - a far cry from Intelsat's first ''Early Bird'' satellite, which carried just 240 telephone circuits or one TV channel.

By using digital equipment on the ground, the satellite's capacity can be increased to 120,000 simultaneous telephone calls.

#90174u0845 06/23/1990 ~United Press International

(JUNE 23) UPI - A TitanMillion-dollar communications satellite into orbit today. The Titan blasted off from Cape Canaveral earlier this morning. It was the booster's first launch since a March flight that left an identical relay station stranded in space. The president of Commercial Titan Incorporated says the Martin-Marietta Astronautics Group of Denver left NO stone unturned to make sure today's launch was successful.

South African police say an explosion devastated an office belonging to the ruling National Party in a suburb of Johannesburg today. Authorities

say there were NO injuries in the blast. The incident follows yesterday's report of a plot to assassinate President F-W de Klerk and African National Congress leader Nelson Mandela . Police detained 11 right-wing activists but later released them because of a lack of evidence against them.

Nelson Mandela leaves the Big Apple today and continues his swing through the United States. The South African black leader will go to Boston today where he'll visit Madison Park High School in the city's Roxbury neighborhood. Along with public appearances, Mandela will be reunited with his daughter, a graduate student at the University of Massachusetts at Amherst. It will be the first time father and daughter have seen each other since Mandela was released from prison.

Canada's fate is uncertain today following the collapse of a constitutional amendment that would have given Quebec special powers and prevented it from seceding. The measure failed yesterday when the legislatures of Manitoba and Newfoundland refused to hold a vote. Canadian Prime Minister Brian Mulroney and Quebec Premier Robert Bourassa both are expected to make separate statements regarding the crisis later today.

#90174u0847 06/23/1990 ~United Press International

WINDSOR LOCKS, CT (JUNE 23) UPI - A plane carrying about 85,000 pounds of supplies gathered by the Americares Foundation of New Canaan took off for earthquake-shattered Iran Saturday to aid survivors of the disaster.

Fears mounted Saturday that the death toll would exceed 40,000 in the massive earthquake that devastated northwestern Iran. About 100,000 were injured and at least that many were left homeless, officals said.

The Boeing 707 cargo plane carrying aid from AmeriCares, an international disaster relief organization, departed from Bradley International Airport at early in the afternoon, officials said. At least one doctor and one nurse were on board the plane heading for Tehran, which is about 170 miles from the quake's epicenter.

AmeriCares sent non-perishable food, medicine, tents, bedding, shovels, cash and other supplies, said Stephen R. Norman, spokesman for the disaster relief agency.

Volunteers worked around the clock since hearing about the earthquake early Thursday to collect the supplies from AmeriCares' warehouse in Stamford and from donors, said Norman.

He said the flight proceeded despite a few complaints from callers angry that aid is being given to a country that has taken U.S. citizens hostage

and supported terrorism.

Norman said AmeriCares would continue accepting donations for the earthquake victims and would likely send more shipments to the devastated area.

The AmeriCares airlift is part of an international effort to bring relief to the quake victims.

The United States and a dozen other countries have offered medicine, blood doctors and food to help Iran meet the needs the injured and homeless.

#90174u0848 06/23/1990 ~United Press International

(JUNE 23) UPI - An official with the Iranian Red Crescent relief organization says rescue teams are having a difficult time reaching some of the areas devastated by the earthquake in northwestern Iran. He tells U-P-I whole towns have been leveled by the quake and search crews will spend the next 10 days trying to recover victims. Iran says the death toll stands at about 36-thousand. A U-S official predicts it will top 40-thousand. Relief is pouring into Iran from around the world.

There is some positive news from the sixth International Conference on AIDS in San Francisco. Scientists say a vaccine to protect the general public from the deadly virus may be available by the end of the decade. Dr. Jonas Salk, a pioneer in developing the polio vaccine, is optimistic about developing an AIDS vaccine. In Salk's words... ''we will NOT be outwitted for long.''

Republican leader Robert Dole is pushing the Senate to hold a symbolic vote on a constitutional amendment banning flag desecration. The Kansas senator says the House rejected the ''will of the American people'' and turned its back on the Constitution and the flag by refusing to approve the measure. But Dole admits his personal count shows a Senate vote will be close and adds ''we will probably lose.''

A federal appeals court in Philadelphia ruled yesterday public schools which allow their facilities to be used for public events canNOT bar groups wishing to discuss religion. The court said schools also must allow the groups to hold worship services or distribute religious literature. The case stemmed from the school district's refusal to allow a church group to rent a school auditorium for a magic show.

#90174u0883 06/23/1990 ~United Press International

ABILENE, TX (JUNE 23) UPI - A vintage airplane performing at an air show

at Dyess Air Force Base crashed Saturday, killing the pilot, authorities said.

The unidentified pilot was flying a P-51 airplane in a demonstration when it crashed at 1:05 p.m. Witnesses said there were sparks flying from the plane prior to the accident.

There were no immediate reports of injury to anyone on the ground.

The air base was hosting the ''Dyess Open House,'' an event that allows the public on base and includes an air show.

The remainder of the show was canceled and the base was closed following the crash.

#90174u0904 06/23/1990 ~United Press International

(JUNE 23) UPI - Canadian Prime Minister Brian Mulroney is to address the nation on television today in an attempt to keep the country united. The move comes after the collapse yesterday of a proposed constitutional amendment aimed at keeping Quebec in Canada. The government declared the Meech Lake Accord amendment dead after Manitoba and Newfoundland adjourned their legislatures without voting on it. Mulroney calls it ''a sad day for Canada.''

Nelson Mandela winds up a three-day visit to New York City today and flies to Boston, where he's to speak at a high school in the city's mostly black Roxbury section. The South African leader also is to have lunch with Massachusetts Senator Edward Kennedy and is to appear at a rally and concert at the Charles River Esplanade. Yesterday, Mandela got a rousing welcome when he addressed the U-N General Assembly in New York.

Some encouraging word from the Sixth International AIDS Conference in San Francisco. Dr. Jonas Salk... the pioneer of the polio vaccine... says he's making progress on developing an inoculation against AIDS. Salk told a packed seminar yesterday that while NO break-throughs have been made yet, he and other top scientists agree that a vaccine may be possible by the year 2000.

#90174u0905 06/23/1990 ~United Press International

(JUNE 23) UPI - Medical teams from Japan, Switzerland, France and Turkey have arrived in Tehran to aid survivors of one of the worst earthquakes to hit the country this century. Officials now fear the death toll from Thursday's quake will exceed 40-thousand, making it the deadliest since a 1976 temblor killed some 250-thousand people in Tangshan, China. More help

from abroad is expected.

Thunderstorms soaked the Pacific Northwest early today, with nearly two inches of rain falling in eastern Washington state. Heavy rain also fell in the Gulf Coast region, particularly eastern Louisiana and southern Mississippi and Alabama. In the Midwest last night, thunderstorms triggered flooding in Wisconsin that forced evacuation of 20 families from a trailer park in Green Bay.

#90174u0910 06/23/1990 ~United Press International

BOSTON (JUNE 23) UPI - Civil rights leader Nelson Mandela brought his anti-apartheid message to Boston Saturday for a full day of appearances in a city with a checkered history of self-determination and racial turmoil.

Mandela praised Boston for setting a precedent for democratic rebellion in December 1773 when an angry band of patriots sparked the American Revolution.

''I feel very honored and happy to be in this city,'' Mandela said. ''It was here that the Boston Tea Party served notice that the citizens of this country would not live under domination by the British.

''That was the establishment of a fundamental principle which has inspired democracies, freedom fighters, revolutionaries all over the world and right down the center of it.''

The 71-year-old deputy president of the African National Congress flew to Logan International Airport from New York, where his 12-day, eight-city visit to the United States opened with a hero's welcome.

Congo drums rumbled when Mandela arrived at Madison Park High School, a vocational school in predominantly black Roxbury, the neighborhood that was a focus of Boston's bitter school desegregation fight in the 1970s.

He urged community leaders, students and parents packed into a sweltering hot gymnasium to continue supporting sanctions against South Africa until apartheid is dismantled.

At the school football field, Mandela told a cheering crowd of about 1,500 people that education should be a priority despite poverty and frustration.

''If there is any appeal I could make, it is that the young people in Boston, and the young people from the United States, must take it upon themselves that they attain the highest education possible so they can represent us as future leaders,'' he said.

Mandela visited the John F. Kennedy Library, spotlighting the bond between the anti-apartheid movement and America's most famous political family.

Sen. Edward Kennedy, D-Mass., accompanied by Jacqueline Kennedy Onassis and other family members, called Mandela the ''statesman of our time'' and gave him a bust of the late president. President Kennedy imposed the first U.S. sanctions against South Africa in 1963.

Singer Stevie Wonder paid tribute to Mandela at the library with his first performance of a new song, ''Keep Love Alive,'' which he wrote on the day Mandela was released from prison.

Mandela was also slated to speak at a six-hour rally and concert at the picturesque Charles River Esplanade.

The day was to be be capped by a fund-raising reception with prominent area business leaders at the posh Copley Plaza hotel, where Mandela and his wife, Winnie, were to spend the night before leaving Sunday for Washington, D.C.

Gov. Michael S. Dukakis, Mayor Raymond Flynn and Kennedy led the delegation that greeted Mandela at the airport. The airport crowd chanted the African word for ''power'' as Mandela and his delegation left the plane.

''You have brought hope and inspiration and a sense of what is possible when a love of freedom knows no fear,'' Dukakis told Mandela.

Rather than give Mandela a key to the city, Flynn presented him with a symbolic ''lantern of liberty'' to bring hope and opportunity to young people all over the world.

Dukakis noted that Massachusetts in 1983 became the first state to begin divesting from firms doing business in South Africa and said he hoped Mandela's visit will spur the state's efforts to improve race relations and become ''an example of racial understanding.''

''One of the things we all have to understand is that racial difficulties are not the exclusive property of South Africa or for that matter, the Deep South before desegregation,'' the governor said. ''Every part of the world has these problems.''

Making Roxbury Mandela's first stop symbolized efforts to heal Boston's racial wounds, which incuded a bitter 1970s battle over court-ordered school desegregation.

The neighborhood, blighted by crime, drugs and poverty, tried without success in 1987 to secede from Boston on grounds the city was ignoring

their needs. Community activists wated to call their new community Mandela.

The biggest event of his daylong Boston schedule was the Esplanade concert expected to attract more than 250,000 people. Scheduled performers included Paul Simon, Jackson Browne, Michelle Shocked, Bobby McFerrin and the South African group Ladysmith Black Mambazo, which interrupted its European tour to fly in for the Mandela appearance.

#90174u0947 06/23/1990 ~United Press International

MOSCOW (JUNE 23) UPI - A rescue team formed in the aftermath of the devastating December 1988 Armenian earthquake left for the Iranian quake zone Saturday to offer its expertise.

The Spitak Rescue Party, made up of students and faculty from the Yerevan Physics Institute who helped in rescue efforts after the Armeian quake, has since undergone training as a professional rescue organization.

The official Soviet news agency Tass said the group left Saturday for northern Iran, where tens of thousands were killed in a quake that flattened small villages much like those devastated by the Armenian quake to the north that killed an estimated 25,000.

#90174u0976 06/23/1990 ~United Press International

WASHINGTON (JUNE 23) UPI - Seventy-five percent of Americans polled think adults should have the right to decide for themselves what is offensive, a survey showed Saturday.

The poll by The Gallup Organization for Newsweek magazine's July 2 issue asked adults to choose which is more important: society's right to enact laws to prohibit material that may be offensive to some, or adults having the right to decide what to see and hear.

An overwhelming 75 percent said the right to choose was more important, while only 21 percent said the laws were more important.

The survey found, however, that Americans are concerned about the affects of obscene material and its proliferation in society. Seventy-five percent of those polled said they believe potentially obscene material could have a harmful effect on children, and 62 percent said the effect on children is the most serious consideration in the debate over obscenity.

In addition, the survey found that 71 percent believe the amount of ''obscenity or indecency in the arts and entertainment'' has increased over the past few years, and 22 percent said they thought it has remained about the same. Only 3 percent said it had decreased.

Asked who should take stricter measures to protect children - parents or the government - 78 percent said the responsibility rests with parents.

Regarding libararies, 65 percent said it is more important that librarians be allowed to stock the fullest selection of books possible, while 30 percent said books officials feel violate local obscenity standards should be eliminated.

On federal funding of art projects, 63 percent said an independent panel of experts in each field should judge who gets funding, while 30 percent said there should be more official control.

The nationwide telephone survey of 605 adults was conducted June 20-21 and has a margin of error of 4 percent.

#90174u0978 06/23/1990 ~United Press International
(JUNE 23) UPI - Canadian Prime Minister Brian Mulroney will go on television tonight to talk about the failure of an amendment aimed at preventing Quebec's seccession. Manitoba and Newfoundland torpedoed the Meech Lake Accord yesterday when their legislatures adjourned without voting on it.

One of China's hard-line Communist leaders says the country will do whatever it takes to defend socialism against what he calls ''hostile forces.'' The official People's Daily today quotes Vice President Wang Zhen as saying that reform-minded moderates ''at home and abroad'' will be put down ''NO matter what the cost.''

Staggering reports of devastation continue to filter in from Iran, where survivors are digging through the rubble of one of the country's deadliest earthquakes this century. The official Iran new agency now says about 30-thousand people died from Thursday's temblor. A U-S official says the toll may exceed 40-thousand.

Police in South Africa are investigating two explosions that ripped through offices of the ruling National Party today in Johannesburg. They say it is NOT clear if the blasts are related to earlier threats on the lives of President F-W de Klerk and Nelson Mandela. NO one has claimed responsibility.

Nelson Mandela left New York for Boston today, where he will be reunited with his eldest daughter, a graduate student at the University of Massachusetts at Amherst. Mandela capped off his three-day visit to the Big Apple with a speech to the United Nations General Assembly yesterday, where he thanked the world for its support.

An uninsured 150-Million-dollar communications satellite got a lift into space from a Titan-3 rocket, which blasted off from Cape Canaveral, Florida, earlier today. An identical relay station was stranded in a useless orbit last March when it failed to separate properly from its Titan-3 launcher.

-30- 2060
#90174u1235 06/23/1990 ~United Press International
(JUNE 23) UPI - West Berlin Mayor Walter Momper today rejected a Soviet proposal that Western military forces leave West Berlin within six months of German reunification. Momper told a Munich newspaper that the American, British and French forces in West Berlin... which lies 110 miles inside East Germany... must remain as long as Soviet troops are in East Germany.

Former U-S Secretary of State Henry Kissinger is winding up a visit to Poland today to open discussion on his proposal to create a neutral security zone between the East and West. Kissinger has suggested that Poland, Czechoslovakia and Hungary be unarmed while a united Germany and the Soviet Union retain limited arms. The plan guarantees that other nations would help the neutral nations if they are attacked.

A federal appeals court in Florida today indefinitely postponed the execution of the woman known as the ''black widow'' killer. The 11th U-S Court of Appeals is set to rule on defense petitions that sending Judi Buenoano to an electric chair known to be malfunctioning is ''cruel and unusual punishment.'' Buenoano was convicted for poisoning her husband for insurance money in 1971.

A sign of warming relations between Taiwan and The People's Republic of China. Taiwan says China has agreed to send giant pandas to Taiwan as a ''token of friendship'' as soon as Taipei revokes a law barring visits by members of China's Communist Party. The official says he will do what he can to lift the ban before Beijing holds the Asian Games in September.

South African activist Nelson Mandela has left New York for Boston. Massachusetts Governor Michael Dukakis was among many to greet the civil rights leader upon his arrival earlier today at Logan International Airport. Dukakis praised Mandela for having- QUOTE- ''hope and inspirations and a sense of what is possible when a love of freedom knows NO fear.''

#90174u1316 06/23/1990 ~United Press International
(JUNE 23) UPI - A family reunion for Nelson Mandela in Boston. The black nationalist South African leader saw three of his grandchildren for the first time today upon his arrival at Logan International Airport. Mandela praised the people of Boston, thanking them for taking care of his relatives while he was in prison.

Two explosions hit offices of South Africa's ruling National Party today. However, it was NOT immediately clear if the blasts were related to death threats against President De Klerk and black leader Nelson Mandela. Two white separatists questioned by police denied any involvement, with one calling the reported plot ''a load of rubbish.''

The super-powers are dropping their differences with Iran to help relieve the misery caused by Thursday's deadly earthquake. The United States sent 300-thousand dollars worth of relief supplies to Iran and is planning more aid. The Soviet Union sent a team of physicians and rescue workers.

A federal appeals court has agreed to decide if death in an electric chair that has malfunctioned is unconstitutionally cruel and unusual punishment. The 11th U-S Circuit Court of Appeals today indefinitely delayed the execution of Florida's so-called ''black widow'' killer to make a ruling in the case.

-30- 1423

#90174u1494 06/23/1990 ~United Press International

(JUNE 23) UPI - Civil rights activist Nelson Mandela takes his message to Boston... international sympathy and supplies arrive in Iran... and Canadian Prime Minister Brian Mulroney speculates about his country's cloudy future... those and other stories next from U-P-I.

Nelson Mandela is in Boston today. The black nationalist leader was given a hero's welcome at Logan International Airport, with a crowd chanting the African word for power as Mandela arrived.

Governor Michael Dukakis, Mayor Raymond Flynn and Democratic Senator Edward Kennedy were all on hand to greet the 71-year-old African National Congress leader.

Kennedy... calling Mandela the ''statesman of our time''... handed him a bust of his brother, the late President John F. Kennedy. The move is especially symbolic as Kennedy was the first president to impose U-S sanctions against South Africa.

Mandela urged in a speech in the predominantly black Roxbury neighborhood that U-S sanctions continue until apartheid is abolished.

The Nobel Peace Prize winner will appear at a concert expected to attract more than 250-thousand people later today.

The City of Los Angeles is preparing for Mandela's coming visit by considering a plan to toughen sanctions against South Africa. An L-A City Council committee will meet on Monday to consider the proposal that has been languishing for nine months. Mandela is scheduled to travel to Los

Angeles Friday.

-30- 1599
#90174u1508 06/23/1990 ~United Press International
(JUNE 23) UPI - South Africa's ruling National Party was the target of bombings today that devastated two offices but did NOT cause any injuries.

NO one claimed responsibility for the blasts, which came as authorities investigate an alleged plot against President Frederik de Klerk and Nelson Mandela.

Police yesterday released 11 right-wingers they had detained for questioning in the reported plot, saying they didn't have enough evidence to hold them.

But prosecutors say they do have some evidence and are trying to decide how to proceed. In the words of one official- ''We're still taking this seriously.''

A newspaper report says the plot was hatched by a former Nazi and current member of the white-separatist Afrikaner Resistance Movement.

The report is based on information from a retired security policeman who independently infiltrated the group... and is now in hiding.

Today's bombings blew apart the national Party's Auckland Park office in suburban Johannesburg and another at a satellite town west of Johannesburg.

Canadian Prime Minister Brian Mulroney says he is certain that ''the idea of a united Canada'' will prevail. But if that does NOT prove true, Mulroney sought to reassure international investors that Canada will still be financially sound.

Mulroney spoke about the possibility of a Quebec secession during a televised address today. The prime minister has spent months campaigning for an amendment to keep the province a part of the nation. Today, he focused on what the stock market may do on Monday.

Mulroney is urging investors and Canada's trading allies to keep the situation in perspective. He says Canada remains the world's eighth most powerful economy and enjoys a high standard of living.

The amendment that would have recognized Quebec's French culture was declared dead yesterday when two provinces adjourned their legislatures without voting on it. The amendment required the approval of all 10 of Canada's provinces by midnight tonight. Quebec has warned that it would secede if the amendment failed.

-30- 2262
#90174u1524 06/23/1990 ~United Press International
BOSTON (JUNE 24) UPI - South African black leader Nelson Mandela praised Boston Saturday as a beacon of democracy, and called on its people to help finish the dismantling of apartheid in his homeland.

''Your love and enthusiasm as well as your pioneering role in taking positive measures against apartheid betray the kinship you hold for our people,'' Mandela told a crowd estimated at 325,000 at a six-hour music-filled rally.

Smiling broadly and energized by the vibrant crowd, he broke into dancing in place at the end of his speech, thrusting his fist into the air to the infectious beat of the South African song ''Mandela'' by Hugh Masekela.

''It was you who rallied around our cause at a time when we struggled on and on by ourselves and thus you became the conscience of American society a treasured beacon within and beyond the boundaries of this great nation '' he told the crowd. ''We are very grateful to you.''

The rally, the highlight of Mandela's visit to Boston, followed a six-hour concert by Paul Simon, Jackson Browne, Michelle Shocked, Bobby McFerrin and the South African group Ladysmith Black Mambazo.

''My dear friends, because of you, apartheid is falling into pieces,'' Mandela said.

''We invite you again to join hands with us as we walk this last mile. We have no illusion that it might be the most difficult mile of our long and challenging walk to freedom. Nothing will stop our destiny.''

Mandela painted a picture of a post-apartheid South Africa.

''We refuse to accept anything less than full democracy,'' he said. ''In so doing, we do not seek to dominate the white population of our country.

''Our vision of a democratic South Africa is a society free of all forms of racism and sexism. We intend to have an economy which is able to satisfy the needs of all of our people.''

Upon his arrival Saturday morning, Mandela praised Boston for setting a precedent for democratic rebellion in December 1773 when an angry band of patriots sparked the American Revolution.

''I feel very honored and happy to be in this city,'' Mandela said. ''It was here that the Boston Tea Party served notice that the citizens of this

country would not live under domination by the British.

''That was the establishment of a fundamental principle which has inspired democracies, freedom fighters, revolutionaries all over the world and right down the center of it.''

The 71-year-old deputy president of the African National Congress flew to Logan International Airport from New York, where his 12-day, eight-city visit to the United States opened with a hero's welcome.

Conga drums rumbled when Mandela arrived at Madison Park High School, a vocational school in predominantly black Roxbury, the neighborhood that was a focus of Boston's bitter school desegregation fight in the 1970s.

He urged community leaders, students and parents who were packed into a sweltering gymnasium to keep supporting sanctions against South Africa until apartheid is gone.

He also told the cheering crowd that education should be a priority despite poverty and frustration. He said young people should stay in school no matter how much sacrifice it requires, and dropouts should find a way to return.

''If there is any appeal I could make, it is that the young people in Boston, and the young people from the United States, must take it upon themselves that they attain the highest education possible so they can represent us as future leaders,'' he said.

Mandela visited the John F. Kennedy Library, spotlighting the bond between the anti-apartheid movement and America's most famous political family.

Sen. Edward Kennedy, D-Mass., accompanied by Jacqueline Kennedy Onassis and other family members, gave Mandela a bust of President Kennedy, who imposed the first U.S. sanctions against South Africa in 1963.

Mandela praised Senator Kennedy for trying to visit him in prison.

''We are aware of the fact that he traveled all the way to South Africa to study the situation on the spot, and he even tried to reach us in prison '' he said. ''It was indeed very frustrating to know that he was at the gates ... but was unable to come in to give us the message of hope. But that attempt gave us a lot of strength and hope.''

-30- 4511

#90174u1527 06/23/1990 ~United Press International

(JUNE 23) UPI - The world is responding to Iran's call for help following its disastrous earthquake.

The private relief group Americares today sent medical supplies and a medical team to Iran to assess whether such help is welcomed. Iran today said it welcomed the aid, raising questions about reports that the country did NOT want foreign doctors.

The State Department says the United States sent 300-thousand dollars worth of relief supplies to Iran yesterday through the American Red Cross and is planning more aid. The government sent thousands of hard hats, leather gloves, wool blankets and tents.

Several U-S groups... including Catholic Relief Services, Americares and the Red Cross... are accepting contributions to send money or supplies to Iran.

Iranian officials say more than 30-thousand people died in Thursday's quake. But the director of U-S Foreign Disaster Assistance said that the death toll probably will exceed 40-thousand.

Medical teams from Japan, Switzerland, France and Turkey are in Tehran. The Soviet Union has sent physicians, rescue workers and supplies. The European Community and Japan also are pitching in with emergency aid.

AIDS activists and experts warned today that as Eastern Europe opens up to the West, it faces a growing threat from AIDS.

At the Sixth International AIDS Conference in San Francisco, one West German expert said AIDS rates in Eastern Europe are far lower than in Western Europe and the United States. But with the new influx of Westerners, the East European rate is expected to rise.

A journalist who is the co-ordinator of an AIDS charity fund in the Soviet Union said her country is ill-prepared or unwilling to attack the problem.

The journalist says she thinks her government is concealing the extent of infections of Soviet citizens.

Researchers have projected that if the Soviet government does NOT take urgent measures now, there will be ''tens of Millions'' of AIDS-infected people in 16 years.

AIDS reportedly is spreading in the Soviet Union because of a lack of condoms, the re-use of syringes and other medical equipment, and poor AIDS screening tests.

-30- 2342
#90174u1538 06/23/1990 ~United Press International

(JUNE 23) UPI - New York police say a gunman in the city apparently is shooting people based on their astrological signs.

Police say the ''Zodiac'' shooter knew the signs of his four victims... and asked the latest one for his date of birth several days before shooting him in Central Park.

Each victim's birth date corresponds to the astrological signs listed in notes apparently written by the shooter and sent to police and news organizations.

The most recent attack left a 30-year-old homeless man critically wounded in Central Park on Thursday. None of the gunman's targets died, but investigators said it seems the gunman thinks his shootings were fatal.

An early cryptic threat to kill 12 people was sent to police last November but NOT taken seriously until an officer remembered it and prompted detectives to dig it out of files.

Investigators have ruled out any link with a San Francisco killer known as ''The Zodiac.'' That person was never captured but claimed as many as 40 murders in notes sent to San Francisco-area newspapers from 1968 to 1987.

A Soviet newspaper today confirmed something Moscow was denying just one month ago- that two cosmonauts are stuck in space.

The official Izvestia newspaper reports that the two cosmonauts aboard the Mir space station must repair their Soyuz -9 transport rocket before they can return to Earth. The report confirms a dispatch last month by the U-S aerospace magazine Aviation Week and Space Technology.

Izvestia says the lives of the crew are NOT threatened by the problem, which involves an outer heat shield that was torn off the ship while in flight.

The paper says the cosmonauts will need about 10 days to perform the repairs, including a space walk next month.

#90174u1546 06/23/1990 ~United Press International

(JUNE 23) UPI - A federal appeals court today gave a convicted husband-killer a reprieve from Florida's electric chair.

The 11th U-S Circuit Court of Appeals issued an indefinite stay of Monday's scheduled execution of Judi Buenoano for the 1971 poisoning murder of her husband.

The judges agreed to decide if death in an electric chair that has malfunctioned is unconstitutionally cruel and unusual punishment. A court spokesman said it probably will take several months for the court to decide the matter.

Buenoano also has been convicted or suspected in three other killings and an attempted murder. The state says her motive was to collect on insurance policies. One prosecutor dubbed her the ''black widow'' killer for preying on her loved ones.

Last night, a U-S District Court judge in Orlando refused to halt the execution after hearing 11 witnesses and deciding that the electric chair is working properly.

Defense attorneys immediately filed appeals. They contend that the chair has NOT been properly repaired since it forced officials to use three surges of electricity for a May execution.

#90174u1562 06/23/1990 ~United Press International

JERUSALEM (JUNE 24) UPI - Israel's navy destroyed a speedboat off the coast of Lebanon Saturday night that a military spokesman said was manned by guerrillas planning to attack a target in northern Israel.

The aborted seaborne attack came three weeks after a larger assault on the Tel Aviv coast was broken up by Israeli forces, which led to the collapse of talks between the United States and the Palestine Liberation Organization.

An Israeli military spokesman said a navy patrol boat was on a routine mission Saturday just north of the Israeli town of Rosh Hanikra on the Lebanese border when it spotted the guerrilla vessel at about 10 p.m.

''Aboard the speedboat were at least two terrorists who opened fire with small arms,'' said the spokesman. He said the boat was destroyed because it was planning an attack on a target in northern Israel.

He did not say whether those aboard were killed or captured. The affiliation of those in the boat was unknown.

Earlier in the day, a pipe bomb exploded at the Dead Sea resort of Ein Gedi, injuring four people, Israel radio said. It was not known who planted the bomb.

The sea attack Saturday was the first since May 30 when Israeli forces foiled a larger assault by several boats headed for a Tel Aviv beach. Four guerrillas were killed and 12 were captured in the attack, which was

organized by the Palestine Liberation Front, a PLO faction led by Abul Abbas.

President Bush ordered talks between the United States and the PLO broken off Thursday because Palestinian leader Yasser Arafat refused to condemn the beach attack. The dialogue, begun in late 1988 against Israeli objections, was aimed at working out a means for Israel and the Palestinians to engage in direct peace talks.

#90174u1622 06/23/1990 ~United Press International

(JUNE 23) UPI - The mayor of West Berlin doesn't like the idea of Western military forces leaving the city within six months of German unification. Mayor Walter Momper rejected the Soviet plan... telling a Munich newspaper that NATO forces must remain as long as Soviet troops are stationed in what is now East Germany.

A federal appeals court in Atlanta today indefinitely postponed the execution of Florida's ''black widow'' killer. The court will decide in several months if it is cruel and unusual punishment to execute Judi Buenoano in an electric chair that has malfunctioned. Buenoano has been sentenced to death for the 1971 arsenic poisoning of her husband.

A U-T-A French Airlines D-C-10 was forced to return to Los Angeles International Airport this morning because of a malfunctioning engine. But authorities say the plane landed safely. The flight bound for Tahiti landed more than an hour after the pilot told air controllers that the aircraft had one engine shut down and was returning to the airport.

#90174u1680 06/23/1990 ~United Press International

BOSTON (JUNE 24) UPI - A security ''foul-up'' forced the cancellation Saturday of an afternoon appearance by Winnie Mandela at St. Paul's Cathedral, organizers said.

According to officials with the Fund for a Free South Africa, State Department security personnel were falsely informed the event had been canceled three hours before it was slated to begin, prompting them to leave.

By the time the information was found to be erroneous, it was too late to resecure the building, officials said. The process takes two to three hours.

''We don't know who told the State Department to pull out,'' said Judie Blair, director of special operations for the fund. ''We just don't know

where that information came from. It's a foul-up. Mrs. Mandela was as surprised as I was.''

Authorities said a bomb threat had been received about noon, but the cathedral was subsequently secured by the Boston Police bomb squad and it played no role in the cancellation.

The invitation-only appearance was organized several months ago by a coalition of women's, peace and anti-apartheid groups. Guests waited two hours for Mrs. Mandela in sweltering heat as entertainers performed.

When the announcement was made that Mandela would not attend, a disappointed sigh went up, but the crowd quickly grew animated as organizers urged them to appreciate the spirit of the event.

#90174u1855 06/23/1990 ~United Press International
(JUNE 23) UPI - A Gallup poll shows Americans think adults should decide for themselves what is offensive. A survey asked adults to choose what is more important... society's right to enact laws to ban material offensive to some, or adults having the right to choose. 75 percent of the 605 adults queried said the right to choose is more important.

The White House says President Bush telephoned Egyptian President Hosni Mubarak today to talk about moving along the peace process in the Middle East. The conversation comes on the eve of the departure of Egypt's foreign minister to Washington. His meeting with Bush will be the first direct contact between the nations since the United States suspended its dialogue with the Palestine Liberation Organization.

A group of intellectuals in Poland today declared its support for Solidarity founder Lech Walesa to replace General Wojciech Jaruzelski as president this fall. The 400-member group called Center Agreement proposed ''radical personnel changes'' in the composition of the Solidarity-led government. That endorsement is the latest reflection of a split in Solidarity over the pace of reform.

Boston officials say more than 100-thousand people turned out today for a musical party honoring South African black leader Nelson Mandela . Blacks, whites, Asians and Hispanics jammed an area near Boston's Charles River to hear scores of musicians... including Tracy Chapman and Bobby McFerrin, as

well as the African rhymes of Johnny Clegg and his band, Savuka. Clegg is a white South African who formed the first integrated band in his country.

#90174u1904 06/23/1990 ~United Press International

(JUNE 23) UPI - In El Salvador, thousands of people marched in the streets of the capital today... demanding an end to the 10-year-old civil war and called on the army to accept rebel calls for military cutbacks. The marchers included labor unions, human rights groups and opposition parties. Rebel leaders are holding peace talks this week in Mexico with Salvadoran government representatives. The U-N-mediated talks began Tuesday.

Investigators are trying to determine the cause of the latest crash involving the Navy's aging Sea Knight fleet. A Navy helicopter went down yesterday within sight of its mother ship, the U-S-S Detroit, while on manuevers off the coast of Virginia Beach, Virginia. The four-member crew was declared missing and presumed dead today. Navy officials are UNwilling to link the crash to the recent grounding of the C-H-46 Sea Knights for safety inspections.

The homosexual community is trying to step up pressure against anti-gay violence while celebrating Gay Pride this weekend in New York City. One sign of this is a new militant group called ''Queer Nation,'' which sponsored an anti-violence march last Saturday. Marchers jeered back at hecklers and even chased some who threw bottles and firecrackers into their ranks. Gay militants also want to draw more attention to the AIDS crisis.

-30- 1497

#90174u2006 06/23/1990 ~United Press International

(JUNE 23) UPI - Quebec's premier today announced a compromise step in Quebec's thoughts of independence. Premier Robert Bourassa says he will seek control for Quebec's immigration and communications from Canada's federal government. The move would give the province greater sovereignty but fall short of full independence. The announcement comes one day after the demise of a constitutional amendment designed to prevent Quebec's secession.

Scientists and health workers left the annual AIDS conference in San Francisco today to march in the streets with protesters. Both co-chairmen of the conference marched with hundreds of delegates to a downtown rally to demand more access to experimental AIDS drugs and treatments. One co-chairman called the event a ''breakthrough'' in the experts' attempt to reach out to the homosexual community.

Two explosions today in Johannesburg, South Africa, destroyed offices of the ruling National Party. The blasts come one day after reported death threats to President Frederik de Klerk and black leader Nelson Mandela prompted a tightening of security around national leaders. NO one claimed responsibility for the bombings, and NO one was hurt.

Residents of Boston's Roxbury neighborhood say Nelson Mandela brought emotions rarely felt in the community that often suffers from feelings of neglect. As one resident noticed- ''There were all kinds of gangs here today and there was NO kind of violence.'' As Derrick Ambrose sees it- ''For at least one minute, the fighting stopped and that's a start.''

-30- 1719

#90174u2021 06/23/1990 ~United Press International

(JUNE 23) UPI - Nicaragua's Sandinista Front is hoping to pick up steam during upcoming festivities celebrating the 11th anniversary of the Nicaraguan revolution. The Front is calling on supporters to help the party boost morale during the 21 days of celebrations that begin next Friday. This year will be the first anniversary that will be celebrated while the Sandinistas are NOT in power.

Florida will NOT be executing a convicted killer as scheduled Monday, with a federal appeals court ruling delaying the execution for what appears to be at least several months. The 11th U-S Circuit Court of Appeals in Atlanta today agreed to decide whether death in an electric chair that has malfunctioned in the past constitues cruel and unusual punishment.

Doctors from at least six nations are in Iran to help an estimated 100-thousand people injured in the earthquake that killed tens of thousands. Tehran is welcoming the international help... a change from reports yesterday that had Iran requesting material aid but NOT foreign doctors or relief workers. Iran's official news agency IRNA says an estimated 35-thousand bodies have been buried in mass graves... and the death toll is expected to rise.

U-S officials say they have their work cut out for the seven-nation economic summit in Houston next month. Topping the agenda will be upheaval in Eastern Europe, global warming and a possible breakdown in world trade. Some officials predict serious disagreement. The annual summit is made up of the leaders of Britain, Canada, France, West Germany, Italy, Japan and the United States.

-30- 1763

#90174u2129 06/23/1990 ~United Press International

(JUNE 23) UPI - Massachusetts Governor Michael Dukakis hopes Nelson Mandela will inspire the state to improve its own race relations.

Dukakis was among the crowd that greeted the black nationalist leader today in Boston. The one-time Democratic presidential contender told Mandela he brought with him- quoting here- ''a sense of what is possible when a love of freedom knows NO fear.''

Dukakis also said racial problems are NOT the exclusive property of South Africa. As he put it- ''Every part of the world has these problems.''

Mandela seemed all too aware of that fact, making the city's Roxbury section the first stop of his Boston visit. The neighborhood's history includes a bitter 1970's battle over court-ordered school desegration.

The African National Congress leader urged community leaders and students to continue supporting sanctions against South Africa until apartheid is abolished.

Later, Mandela praised Boston as a beacon of democracy at a rally at the Charles River Esplanade attended by an estimated 325-thousand people. He broke into dancing in place at the end of his speech... thrusting his fist into the air to the infectious beat of the South African song ''Mandela'' by Hugh Masekela.

The rally was the highlight of Mandela's visit to Boston. It followed a six-hour concert by Paul Simon, Jackson Browne, Michelle Shocked, Bobby McFerrin and the South African group Ladysmith Black Mambazo.

Mandela's day will be capped by a fund-raising reception at the posh Copley Plaza hotel... where he and his wife, Winnie, will spend the night before leaving tomorrow for Washington, D-C.

-30- 1802

#90174u2143 06/23/1990 ~United Press International

(JUNE 23) UPI - Activists are NOT the only people frustrated by the government's handling of the AIDS crisis.

Scientists and health workers at a major AIDS conference in San Francisco left the meeting today to join a street demonstration.

Both co-chairmen of the Sixth Conference on AIDS marched with hundreds of delegates from the convention hall to a rally attended by an estimated 10-thousand people. The protest was held to demand more access to experimental AIDS drugs and treatment.

One conference co-chairman, Dr. John Ziegler, told the crowd- ''We're all in this together.'' The University of California-San Francisco researcher then echoed a slogan from an activist group, saying- ''Action Equals

Life.''

The protest was a peaceful one, with NONE of the acts of civil disobedience that have resulted in 150 arrests in the city in the past few days.

Tomorrow, about 100-thousand people are expected to march through downtown San Francisco during the annual Gay Freedom Day parade. The march will coincide with the closing of the AIDS conference.

Thousands of people marched through the capital of El Salvador today to call for an end to the country's decade-long civil war.

Members of labor unions, human rights groups and opposition parties strode through San Salvador. They urged the army to accept rebel proposals for military reductions.

Marchers chanted ''purge and reduction.'' One union leader at the head of the march said there could be NO peace in El Salvador without an end to repression against the working class.

The situation was calm but tense. The army has stepped up security in the face of a threatened rebel offensive if the military refuses to accept reforms at the on-going U-N-mediated peace talks.

The leftist rebels are meeting this week in Mexico with representatives of the right-wing government. A government representative has said if the rebels want military reforms, they have to make some reforms too.

-30- 2145
#90174u2154 06/23/1990 ~United Press International
(JUNE 23) UPI - Communists in Russia got a warning today from Soviet President Gorbachev. The message in Moscow is that it's do or die for the Russian Comunist Party.

Gorbachev says unless the party reforms, it will remain on what he called ''the sidelines of history.''

Gorbachev's rebuke came only hours after the party elected conservative standard-bearer Ivan Polozkov to head the Russian Republic's new Communist Party.

Conservatives hope Polozkov will lead the charge against Gorbachev's policies at the crucial Soviet Communist Party Congress early next month.

Gorbachev warned the party is heading for a split that ''would lead to the greatest possible polarization of the country''... as well as be ''a gift

to all those who want to bury perestroika .'' The Soviet president drew only tepid applause as he gathered up his notes and returned to his seat.

-30- 1029

#90174u2173 06/23/1990 ~United Press International

(JUNE 23) UPI - A recent poll on obscenity finds 75 percent of those Americans surveyed doN'T want the government meddling with their reading and entertainment material. And three-quarters of those questioned say they want to decide for themselves what is offensive.

21 percent of those polled said society's right to prohibit material that may be offensive to some is more important than and individual's choice.

But the findings were NOT completely clear-cut... with Americans expressing concern about the effects of obscene material on society.

71 percent of those surveyed said they believe the amount of obscenity in the arts and entertainment has increased during the past few years. When it came to federal funding of the arts, 63 percent of those polled said an independent panel of experts should decide who gets funding.

The mayor of Green Bay, Wisconsin, today declared a state of disaster in the wake of severe flooding.

Thunderstorms over Green Bay yesterday dumped almost five inches of rain on the city. The East River overflowed in four towns.

Rescuers used boats- including hovercraft- to evacuate about a dozen families, but said there were NO life-threatening situations.

The rain stopped today, but strong wind continued to blow water from Green Bay into the mouth of the Fox River and its East River tributary. But a Brown County Sheriff's Captain says things seem to be under control.

Elsewhere, thunderstorms and rain showers soaked the Gulf Coast, New England and New York. Precipitation continued to plague the Central Plains.

Dry weather and sunny skies prevailed west of the Mississippi River.

-30- 1816

#90174u2206 06/23/1990 ~United Press International

(JUNE 23) UPI - Some 10-thousand protesters in San Francisco were joined by delegates and officials from the sixth annual International AIDS Conference as they marched through the Bay City today. The rally was held to demand greater accessibility of experimental AIDS treatments.

Four Navy airmen who went down with their Sea Knight helicopter into the Chesapeake Bay yesterday were declared dead today by naval officials. A second day of searching for the crew yielded NO results today.

Quebec says it wants partial separation from Canada following the collapse of a constitutional amendment that would have provided the province special status. The quaisi-independence steps include control over immigration and communications policy.

According to a new survey, an overwhelming majority of Americans do NOT think it should be up to the government to determine what is obscene. Three out of four adults surveyed think they- NOT the government- should determine what is offensive.

A group of 400 Polish scientists, politicians and academics today voiced their support for Lech Walesa as the next president of the economically ailing country. The move is the latest and most graphic split between Walesa and his former top Solidarity advisers.

-30- 1421

#90174u2212 06/23/1990 ~United Press International

(JUNE 23) UPI - Some 325-thousand people turned out at a Boston rally to honor visiting black South African nationalist Nelson Mandela. Mandela praised the throng, saying its efforts are the ''conscience of American society.''

The federal appeals court in Atlanta today issued an indefinite stay of Monday's scheduled execution of Florida death row inmate Judi Buenoano. Buenoano's lawyers argued that a faulty electric chair would inflict cruel and unusual punishment.

Cairo radio says a phone conversation today between President Bush and Egyptian leader Hosni Mubarak concerned how to restart the stagnant Middle East peace process. Egypt's foreign minister is slated to arrive in Washington tomorrow.

New York's so-called ''Zodiac'' shooter has renewed claims of being San Francisco's Zodiac killer. The mysterious gunman has gunned down four New Yorkers, NONE fatally, and claims to have killed at least six people in San Francisco in the late 1960's.

-30- 1124

#90174u2306 06/23/1990 ~United Press International

(JUNE 23) UPI - An Israeli military spokesman says a navy patrol boat destroyed a guerrilla-driven speedboat near the Israel-Lebanon border tonight. The spokesman did NOT say if those aboard the destroyed vessel

were killed or captured. But he did say the craft was planning a seaborne attack on Israel. Tonight's activities follow a similar aborted attack which occurred three weeks ago.

Scientists and health workers joined protesters in San Francisco today to demand greater access to experimental AIDS drugs and treatments. Hundreds of delegates from the Sixth Conference on AIDS joined marchers who boycotted the convention. Conference co-chairman and AIDS researcher Doctor John Ziegler hailed the show of unity at a downtown rally. The crowd of ten-thousand broke into frequent chants.

The estimated 325-thousand people who flocked to a Boston park today listened to a legend as well as to some of the world's best pop musicians. The crowd rose to a roar when Nelson Mandela appeared on stage. The black nationalist leader urged the crowd to continue supporting sanctions against South Africa, then danced in place as the crowd sang an anti-apartheid song. Jackson Browne, Paul Simon and Tracy Chapman were among the many musicians performing.

Soviet President Gorbachev in Moscow today warned that a split in the new Russian Communist Party could polarize the country like NEVER before. The struggle between conservatives and reformers was evident in the party's election of a new leader just before Gorbachev spoke. The new party chief is conservative Ivan Polzkov ... best known for closing down of all cooperative businesses in his region.

-30- 1827

#90175d1470 06/24/1990 ~French/German News Agency

ALBITA, Romania (JUNE 24) - Tens of thousands of Romanians burst across the border into the Soviet Union here on Sunday and fraternised with Moldavians on the other side, an AFP correspondent here reported.

The crowds pushed past Romanian and Soviet guards at the Albita frontier post and swarmed over. They were met by Moldavians who had come from several towns, including the Soviet Republic's capital Kishinev.

In a similar incident on May 6, tens of thousands of Romanians crossed a railway bridge linking the Romanian province of Moldavia and the Soviet republic.

#90175d1530 06/24/1990 ~French/German News Agency

KORHOGO, Ivory Coast (JUNE 24) - The leaders of four opposition parties meeting here late Saturday demanded the resignation of Ivory Coast President Felix Houphouet-Boigny.

The leaders of the Ivorian People's Front (FPI), the Ivorian Workers Party,

the Union of Social Democrats and the Ivorian Socialist Party also called for the resignation of the ruling Democratic party government, the designation of a transitional government and freedom for all political groups to operate within the country.

If these minimal conditions are not met, the change of the single party system to multiparty system "is nothing but a delusion," the leaders warned in a joint communique called the Korhogo declaration.

The multiparty system was officially legalised on April 30 in Ivory Coast, and 14 opposition groups were made legal on May 31. Six other parties are waiting for official recognition.

The Korhogo declaration was read to a crowd of more than 1,000 gathered in front of the house of FPI supporter Lancine Gon Coulibaly, a deputy from Korhogo.

The gathering Saturday was calm as more than 100 police looked on, but clashes on Friday between FPI supporters and opponents left two injured.

Elections are scheduled to be held in October.

-30- 1452

#90175d1580 06/24/1990 ~French/German News Agency

DHAKA (JUNE 24) - Army troops Sunday stormed a Bangladesh university campus in an attempt to end fighting between rival student groups, police said.

Soldiers were called in after police failed to quell rioting at Rajshahi city, about 400 kilometres northwest of Dhaka, which left two students dead and 50 injured Saturday.

Police said the clashes involved supporters of the fundamentalist Islamic Chatra Shibir (Islamic Student Camp) and of the left-wing National Socialist Party. The rival groups used guns, axes and self-made bombs.

Earlier this year, the university was the scene of student riots in which three people were killed.

#90175d1620 06/24/1990 ~French/German News Agency

AMRITSAR, India (JUNE 24) - Four Sikh militants and four civilians died in Punjab as the separatists launched a rocket attack on a federal security outpost in this northern state, officials here said Sunday.

A group of 24 Sikh militants fired rocket-propelled grenades (RPG) at the headquarters of a paramilitary Central Reserve Police Force (CRPF) headquarters in Patti county in a bid to destroy the fortified complex, police said.

The attackers launched seven Soviet-made RPGs, destroying a sandbagged watch tower of the CRPF 66th battalion headquarters, police said, adding a civilian woman was hurt in the attack which was later repulsed.

The rocket attack was the second since June 13 when Sikh separatists for a attacked another CRPF headquarters in this frontier district.

Indian security forces shot dead a Sikh militant wanted by the authorities, Sukha Singh of the ultra-militant Khalistan Commando Force, late Saturday in Ferozepur's Mallanwala village during a gun battle, police said.

A second suspected Sikh separatist was killed in another gunfight with the police Sunday in Ropar's Khanpur village. Two other militants died in internecine feuds in Amritsar and in Majitha.

Militants also shot dead a Hindu priest in a village in Ludhiana Sunday and injured one of his disciples, while six militants murdered a Sikh woman in her home in Batala, press reports said.

The Amritsar district police said Sikh militants abducted two sons of a Sikh farmer in Ferozepur on Saturday and later shot them dead. The victims were men suspected of being police spies.

Meanwhile, the police on Sunday arrested All India Sikh Students' Federation (AISSF) President Manjit Singh on Sunday and charged him with sheltering to wanted Sikh militants and recruiting young Sikhs for weapons training.

The AISSF is considered the "sword" arm of Sikh political parties and has been accused of running a parallel administration in Punjab.

#90175d2030 06/24/1990 ~French/German News Agency

MOSCOW (JUNE 24) - Conservatives flexed their muscles at the first congress of the Russian Communist Party here last week and exposed the weaknesses of Mikhail Gorbachev ahead of the 28th congress of the Soviet Communist Party, analysts said Sunday.

During the five-day Russian Communist Party congress, the 2,700 delegates rained criticism on President Gorbachev's perestroika policies with a consistency and virulence never before seen in five years of reforms.

It was nonetheless a relaxed and smiling Mr. Gorbachev who closed the congress Saturday, reinforced by the support of some new voices in the conservative wing of the party.

Mr. Gorbachev announced Saturday that he intended to remain "for the moment" at the head of the Soviet Communist Party, which holds its 28th congress here beginning July 2.

He said he will continue to simultaneously hold the post of president because the Soviet Union "is undergoing a difficult process which is not currently working out for the best."

Mr. Gorbachev nonetheless put forth the idea of a "different form" of leadership for the party, with responsibilities being divided between a

president and a general secretary.

Mr. Gorbachev may intend to become party president and leave administrative duties to a newly elected general secretary, preferably one of his trusted allies, according to a scenario presented by several officials at the congress.

Mr. Gorbachev asserted Saturday that "the Communist Party is currently the most powerful organization in society," and expressed concern at the danger of a split which "would weaken all of the country's constructive forces."

By this statement, Mr. Gorbachev himself revealed one of his weaknesses, which is that the party is increasingly escaping his authority, as demonstrated by last week's Russian Communist Party congress.

Forced to recognize the reconstitution of the Russian Communist Party, which was absorbed by the Soviet Communist Party in 1925, the Soviet leader received an idea at the congress of the degree of opposition to his policies among the apparatchiks who made up the majority of the delegates.

Mr. Gorbachev was subjected to unprecedented challenges to his personal leadership and many speakers demanded his resignation from the post of party chief.

The congress exposed Mr. Gorbachev's political isolation, observers said.

Lacking popular legitimacy due to his failure to put his presidential candidature to a universal vote, and increasingly challenged by hostile public opinion aroused by proposed price increases, Mr. Gorbachev is progressively losing control over the party.

Unable to find new sources of political support, he has looked for backing among conservatives. He assured delegates Saturday of his commitment "to the internationalist traditions, to socialist ideals and to Leninist principles," terms which he has not used for some time.

He also made statements calculated to reassure the military, expressing his faith in the defenders of the country, but his comments left the large military delegation unmoved.

A rising member of the conservative wing, Ivan Polozkov, 55, was named to head the Russian party. Conservatives controlled a bare majority at the congress (1,396 votes for Mr. Polozkov against 1,066 for Oleg Lobov, a supporter of Mr. Gorbachev.)

This is undoubtedly the principal reason that, in the absence of an alternative to perestroika, the rising stars of the conservatives, Mr.

Polozkov and Leningrad party chief Boris Guidaspov, unexpectedly gave their suport to Mr. Gorbachev.

This alliance with the "civilized conservatives," as one senior official called the new conservative leaders, confirmed the decline of old guard conservatives such as Yegor Ligachev.

Isolated but victorious, Mr. Gorbachev will confront an equally conservative majority at the 28th Congress, which will "not decide the future of perestroika -- which will continue in any case -- but the future of the party, which has been hit by the forces of reaction," Mr. Gorbachev's Politburo ally Alexander Iakovlev said Saturday in Pravda.

A total of 4,384 delegates will attend the 28th Soviet Communist Party congress, which is expected to adopt a wide range of democratizing measures within the party, including the election of the general secretary.

JERUSALEM (JUNE 24) - Mayor Teddy Kollek appealed Sunday to Jerusalem police to lift curfews imposed since Friday on three Arab communities in east Jerusalem, a statement from his office said.

Mr. Kollek made the appeal after municipal representatives toured the Silwan, Abu Tor and Ras al-Ammoud communities to ensure that order had been restored, the statement said.

Israeli border guards clashed with hundreds of masked Palestinian demonstrators in Silwan on Wednesday, Thursday and Friday after an Arab youth was shot dead by border guards in east Jerusalem.

Police then slapped curfews on the three communities.

VATICAN CITY (JUNE 24) - A two-day summit of bishops and Pope John Paul II to open here Monday will mark the first time Ukrainian bishops have been allowed to leave the Soviet Union.

Moscow granted permission to the 11 bishops following the personal intervention of the pope to Soviet leaders through Yuri Karlov, the first Soviet envoy to the Vatican.

Some of the Ukrainian bishops did not even know the pontiff when he was a bishop in his native Poland, Vatican spokesman Joaquin Navarro said.

At the Roman Catholic summit, the 11 Ukrainian bishops will be joined by bishops from Canada, the United States, Argentina, Australia, Britain, France,
West Germany, Poland, and Yugoslavia to discuss the legalisation of the Catholic Church in the Soviet Union and the restitution of church property.

Specifically, the pontiff and the bishops will be discussing new Soviet measures currently being studied in the Supreme Soviet on liberty of conscience and religious association.

BANGKOK (JUNE 24) - Cambodian resistance leader Son Sann has urged the Phnom Penh government to free political prisoners, including five senior officials whose arrests were reported earlier in June.

The clandestine Voice of the Khmer, monitored here Sunday, said Mr. Son Sann, president of the Khmer People's National Liberation Front (KPNLF), had asked humanitarian organizations to help obtain their release.

It said he had sent letters to London-based Amnesty International and the International Red Cross in Bangkok urging them to help get Phnom Penh to free those jailed since Vietnam invaded Cambodia in late 1978.

Hanoi's troops toppled the Chinese-backed Khmer Rouge rulers and installed a client government in Phnom Penh.

The Khmer Rouge, radical Marxists blamed for the deaths of hundreds of thousands of Cambodians between 1975 and 1979, currently forms the military muscle of a tripartite coalition along with the KPNLF and another non-communist faction led by Prince Norodom Sihanouk.

In his letters, Mr. Son Sann, Cambodia's former prime minister, called on the two organizations to assist all political prisoners arrested and imprisoned without a fair trial, including those arrested and jailed in early June.

It was reported June 7 that Ung Phan, Cambodia's communications, transport and post minister, had been arrested along with two colonels and two civilian officials. An official Phnom Penh source said they had "tried to found a liberal social democratic party."

According to the Voice of the Khmer, Mr. Son Sann had also appealed to Phnom Penh Prime Minister Hun Sen in a press communique on June 16 for the release of all political prisoners.

Mr. Son Sann said the International Red Cross had informed him many times

in the past that its requests to visit detention centers were rejected by the Phnom Penh government.

FORMOSA, Argentina (JUNE 24) - The Paraguay river in northern Argentina continued to rise Sunday as some 1,500 people were evacuated from the area, authorities said.

Flooding was worst 950 kilometers (570 miles) north of Buenos Aires but waters from the same river further north were steady, the Civil Defense said.

More evacuations were anticipated for Monday, as well as Tuesday when the river was expected to stabilize.

FREETOWN (JUNE 24) - An Organization of African Unity (OAU) delegation arrived here Sunday on the eve of the second round of peace talks between the Liberian government and National Patriotic Front (NPFL) rebels.

OAU assistant secretary-general Ahmed Haggag, who is leading the delegation,

said the pan-African organization was "very concerned about the situation in Liberia, especially the great loss of life."

"We believe there can be an African solution to this problem," he told journalists shortly after his arrival from neighboring Guinea on a Ghana Airways flight.

He said the OAU was not in Freetown as an observer to the talks but rather "to have some contacts with the Sierra Leone government, to get acquainted with its views and its role.''

"The OAU cannot be on any mediating mission unless it is specifically mandated to do so and at the request of the concerned parties," he said.

Mr. Haggag said he and OAU politcal advisor Etul Mpwotsh Ngung went to Monrovia last week on the request of Liberian President Samuel Doe to discuss the peace process.

He said they would leave Freetown late Monday for Accra after meeting with Sierra Leone Foreign Ministry officials.

The OAU official added that they were "consulting all officials" in the region "because we want to see all the countries surrounding Liberia take an active role in finding a solution" to the insurgency launched in December by Charles Taylor's NPFL rebels.

He said the OAU welcomed Nigeria's offer to mediate in the talks "since Nigeria is an important country ... and they can contribute positively to finding a solution."

Mr. Haggag stressed however the "positive role" played by the impartial inter-faith mediating committee of Liberian religious leaders who "have the trust of both sides."

The OAU leader also commended Sierra Leone for hosting the talks, which adjouned June 16 without a cease-fire agreement.

TEHERAN (JUNE 24) - Foreign doctors have begun to leave quake-stricken areas of northwestern Iran as hopes fade of finding any more survivors under the rubble of a massive earthquake that devastated the region last Thursday.

Relief coordinators here Sunday put the death toll in Gilan and Zanjan provinces at 36,907, with 35,693 injured.

But an unnamed official quoted by The Teheran Times newspaper earlier Sunday said at least 50,000 had died and some 200,000 had been hurt in the quake, which came to 7.3 on the Richter scale.

As Iranian and international rescue teams retrieve only cadavers, several foreign physicians and surgeons were Sunday returning to Teheran to assist Iranian doctors treating the injured survivors in hospitals here.

Streams of victims continued to arrive in the capital Sunday, including a number of Iranian rescue workers hurt in a new earthquake that struck the Roudbar valley in Gilan province in the early afternoon.

Witnesses said the entire region trembled for several seconds, destroying roads and knocking down the remains of many homes and buildings that had survived the initial quake.

In Teheran scientists said Sunday's tremor registered 5.7 on the Richter scale.

Last Thursday's tremor proved particularly deadly, said a member of a French rescue team, because homes in the area were made of brick. When

such structures are shaken, he said, "everything collapses."

"Concrete leaves pockets where people who are trapped have a chance to survive, which is not the case with brick," he explained.

Foreign experts say there are likely to be many more bodies under the rubble of dozens of flattened mountain villages that Iranian relief teams are no longer trying to retrieve.

The priority instead is to bury those corpses that have already been pulled out in order to prevent the spread of disease. In the town of Mandjil bulldozers have dug trenches to serve as mass graves.

#90175d3670 06/24/1990 ~French/German News Agency

BERLIN (JUNE 24) - Twenty-one police and six far-left extremists were injured in East Berlin when some 400 far-left militants threw objects at police following an "anti-fascist" demonstration, official East German sources said Sunday.

Four police vehicles were gutted in the violence.

Fearing incidents after a peaceful demonstration of some 4,000 people Saturday, police cordoned off the headquarters of the far-right National Alternative movement and several houses illegally occupied by NA militants.

About 400 far-left militants, some masked, then attacked police with stones, bolts, and incendiary devices. Police dispersed the mob with water cannon and tear gas. Four people were arrested.

ADN news agency said a hard core of extremists was known to have lived in West Berlin for several years.

Before clashing with the police, they had pillaged a cigarette stand, damaged several cars and attacked a car driver.

The violence was the worst in East Berlin since East German authorities breached the Wall in November last year.

JERUSALEM (JUNE 24) - Israeli police lifted a curfew Sunday that had been imposed Friday on three Arab communities in east Jerusalem.

Police Chief Yaacov Turner said the measure was taken after "after calm had returned" to Silwan, Abu Tor and Ras al-Ammoud.

Israeli border guards clashed last week with hundreds of masked Palestinian demonstrators in the three communities, leaving two dead and 20 wounded, after an Arab youth was shot dead by security forces in east Jerusalem.

Mayor Teddy Kollek appealed to police earlier Sunday to lift the curfew.

RIYADH (JUNE 24) - A thousand Soviet Moslems have arrived in Saudi Arabia to take part in the annual pilgrimage to Islamic holy sites in Mecca and Medina, religious sources said here Sunday.

They are part of an estimated 1,500 Moslems from the Soviet Union expected to take part in the pilgrimage, or hajj, scheduled to start June 30.

It will be the largest contingent of Soviet Moslems to participate in the hajj for 60 years.

Moslems from China, Bulgaria, Romania, Poland and Yugoslavia are also expected.

Saudi Arabia currently has no diplomatic relations with the Soviet Union, nor with any East European state.

#90175d4840 06/24/1990 ~French/German News Agency

SAN FRANCISCO, CA (JUNE 24) - AIDS is a growing problem in many Asian nations, which used to view the disease as coming from abroad and tried to fight it with strict immigration laws, a Hong Kong health official said here Sunday.

Eng-Kiong Yeoh, speaking at the closing session of the Sixth International AIDS Conference, said Asia had only 0.2 percent of the number of AIDS cases reported to the World Health Organization. Asia had reported 647 cases as

of June of this year, he said.

But the incidence of acquired immune deficiency syndrome was rising dramatically among certain Asian population groups such as intravenous drug users in Thailand and prostitutes in India, Mr. Yeoh said.

According to official statistics, Hong Kong has 62,250 drug addicts, of whom 20,000 are on heroin, he said. Most of the latter say they do not generally follow the two key recommendations for curbing the spread of AIDS -- disinfecting their syringes with bleach and avoiding sharing needles.

Because there were "significant levels" of high-risk behavior in Asia, he said, "it was only a matter of time" before the AIDS virus started spreading.

In a study of 15 Asian nations, 13 countries said they had detected the AIDS virus among gay and bisexual men, eight among intravenous drug users and six among prostitutes.

"The greatest challenge will be to design effective strategies to change behavior," Mr. Yeoh said.

BELFAST (JUNE 25) - The Church of Ireland, Northern Ireland's Anglican church, ordained its first two women priests in a ceremony at St. Anne's Cathedral here Sunday.

The Rev. Irene Templeton, 49, from south Belfast, and the Rev. Kathleen Young, 50, from Country Antrim, were ordained in the Anglican cathedral by the Bishop of Connor, the Rt. Rev. Dr. Samuel Poyntz.

The issue of women priests had caused a deep split within the Church of England, which has put off any final decision on the issue until 1992.

But the General Synod of the much smaller Church of Ireland decided last month to allow women to become both priests and bishops.

During the ceremony, the Rev. Canon Professor John Bartlett, the principal of the Church of Ireland Theological College here, called it the event a "historic occasion", but said the happiness was "tempered with concern for other faithful servants of the church who in conscience find this a difficult piece of history".

#90175d4940 06/24/1990 ~French/German News Agency

PARIS (JUNE 25) - French farmers who transformed the Champs Elysees into a vast wheatfield for one day harvested their crop Sunday night after drawing tens of thousands of curious onlookers to the heart of the capital.

The controversial publicity stunt, which cost 20 million francs (3.5 million dollars), was designed to draw attention to agriculture and promote dialogue between country and city dwellers.

Traffic had been halted along the capital's most famous avenue as of Saturday night, when 560 huge trailer trucks moved in to lay down some 1,500 pallets of wheat weighing 250 kilograms (550 pounds) each.

The operation created a curious scene Sunday. Scores of farmers, many in traditional dress with horse-drawn carts, worked along a pastoral, one-hectare (2.5-acres) stretch while visitors crowded for a view or a photograph along sideline barricades.

Though the farm groups that organized the stunt said it was 98-percent privately funded, others criticized it as a waste of money that could have been better spent sending city children to the countryside.

Jacques Delors, the French president of the European Economic Community Commission, came out in support of farmers at a nearby roundtable talk linked to the event.

With the number of French farmers declining and growing pressure within the EEC to cut back on agricultural spending, Mr. Delors stressed that "agriculture represents a vital interest for France, and it must not give up any ground."

He noted that France's grain trade surplus in 1989 was 38 billion francs (6.4 billion dollars), twice as much as the surpluses on trade in either automobiles or aeronautics.

Mr. Delors also said Europe, which still has many smaller farms, must not compromise with the United States on its style of farming in international trade talks.

Delegations from the 11 other EEC counries and Poland also took part in the unorthodox wheat harvest.

BUENOS AIRES (JUNE 24) EFE - Argentine President Carlos Menem announced Sunday that the government would provide free medical care to soldiers who fought in the 1982 Falklands War and their families.

Menem said the aid would also extend to the families of servicemen killed by British soldiers during the war for control of the South Atlantic islands, which Britain won.

The president was speaking at an inauguration ceremony for a monument in Buenos Aires to the victims of the 10-week war.

The construction of the monument was ordered when Britain and Argentina renewed diplomatic ties in February.

Menem thanked Argentine Falklands War veterans for taking part in "the most glorious epic of our recent history" and said the reassertion of Argentina's sovereignty over the islands should be "positive, creative and constructive".

(JUNE 24) UPI - The Expos grabbed the NL East lead from the Pirates but cannot afford to be complacent.

With their 6-1 victory over Pittsburgh Saturday night, Montreal moved only one-half game in front of the Pirates while leading the surging New York Mets by a mere 2 1-2. The third-place Mets have won five straight and 12 of their last 14. Expos Manager Buck Rodgers is hesitant to celebrate too much.

''A lot of people didn't expect us to be in first place,'' said Rodgers. ''But this is only the end of June so we won't get carried away with it. I just want to play solid baseball from now till the end of the season.''

Pirates Manager Jim Leyland remains optimistic despite his team's recent nose dive.

''We didn't play very well tonight either offensively or defensively,'' said Leyland. ''But the pennant race doesn't start until August 15th and I hope we are the team that is involved at that time.''

Despite his team's move into first, shortstop Spike Owen was deflated. Owen made an error trying to throw out R.J. Reynolds in the fourth inning, snapping his NL single-season errorless record for a shortstop at 63 games.

''I knew my streak had to end sometime,'' said Owen. ''But I am disappointed that it ended on such a routine play. The ball just got away from me.''

Zane Smith, 4-5, scattered six hits over seven innings en route to his fourth victory. Smith allowed one run while giving up just one walk and striking out six.

Doug Drabek, 8-3, took the loss.

--- AROUND THE NL ---

In other NL action, St. Louis nipped Chicago 8-7, Houston beat San Francisco 4-2, San Diego defeated Atlanta 7-5, New York blanked Philadelphia 3-0, and Cincinnati pummeled Los Angeles 11-6.

Cardinals 8, Cubs 7

At Chicago, Terry Pendleton hit a two-run single and two-run triple and Jose Oquendo added three RBI to lift St. Louis. Bob Tewksbury, 2-0, won his second start of the year, scattering seven hits over six innings. He walked one and struck out four. Mike Bielecki, 3-7, dropped his fourth straight, giving up seven hits and five runs in 3 1-3 innings.

Astros 4, Giants 2

At Houston, Craig Biggio scored from first base on left fielder Kevin Mitchell's two-base error in the eighth inning to help Houston snap a seven-game losing streak. Mark Portugal 2-7, went eight innings to pick up the win. Steve Bedrosian, 3-5, allowed three runs in only one-third of an inning, allowing one hit and two walks.

Padres 7, Braves 5

At Atlanta, Jack Clark snapped an 0-for-27 slump with a home run and added a two-run single to spoil the return of Braves Manager Bobby Cox. Ed Whitson, 6-5, allowed nine hits over six innings, walking one and striking out four. Tom Glavine, 3-5, allowed eight hits over five innings.

Mets 3, Phillies 0

At New York, Dwight Gooden tossed a two-hit shutout and Darryl Strawberry ripped a two-run home run to lead the surging Mets. Gooden, 6-5, struck out seven and walked two en route to his first shutout and complete game of the season. Pat Combs, 3-6, took the loss, allowing three runs and four hits in five-plus innings.

Reds 11, Dodgers 6

At Cincinnati, Eric Davis singled twice in the fourth inning to key an eight-run outburst and also homered to power Cincinnati. Tom Browning, 7-4 gave up 11 hits in five innings, walking none and striking out one. Reliever Tim Layana pitched the last four innings for his first major league save.

Loser Tim Belcher dropped to 5-5.

#90175u0135 06/24/1990 ~United Press International
(JUNE 24) UPI - An Israeli military spokesman says a navy patrol boat Saturday destroyed a boat carrying guerrillas. There's NO word on the fate of those aboard the craft, which was destroyed off the Israel-Lebanon coast. The spokesman said the vessel was sunk because it was planning a seaborne attack on Israel.

A nationwide survey announced Saturday at the sixth International AIDS Conference in San Francisco revealed most medical residents do NOT want to treat AIDS patients when they go into private practice. More than six out of 10 doctors-to-be questioned said they doN'T intend to provide service for people infected with the deadly virus.

The magnitude of last week's earthquake in northwestern Iran has prompted Tehran to soften its stance against international aid. The foreign ministry Saturday announced the revised attitude by welcoming international relief forces who've arrived to help deal with the estimated 100-thousand people injured in the temblor. Some 40-thousand people died.

Officials who organized an invitation-only speech featuring Winnie Mandela say a security ''foul-up'' forced cancellation of her appearance Saturday in Boston. A spokeswoman for the Fund for a Free South Africa said security personnel were falsely told the event had been called off three hours before it was slated to get under way. By the time the mistake was realized, it was too late to re-secure the building.

#90175u0138 06/24/1990 ~United Press International
(JUNE 24) UPI - Thousands of Salvadorans marched through their capital city Saturday to demand an end to the country's decade-long civil war. The marchers- whose ranks were populated by members of labor unions, human rights groups and opposition parties- expressed solidarity with rebel demands that insist the military reduce its size.

Authorities expect a Florida man and his two young sons to be released from a Harrisonburg, Virginia, hospital Sunday. The three are being treated for dehydration after being rescued Saturday from a West Virginia cave where they were trapped since Monday. The trio became lost after the batteries in their flashlight died.

#90175u0166 06/24/1990 ~United Press International
(JUNE 24) UPI - Dave West had waited a long time for a win and when he finally got one Saturday night he made the Kansas City Royals wait a long time for a hit.

West, 3-5, flirted with a no-hitter for six innings, before Bo Jackson singled leading off the seventh. West then gave up two more hits and a run in the inning before giving way in the eighth to Jack Savage, who closed

out the 5-1 victory.

''I really wasn't thinking about it,'' West said. ''I was just trying to keep them off base.''

West had been winless in eight straight starts (0-2, six no decisions) since May 2, but the 26-year-old lefty made it look easy against the Royals, recording nine strikeouts and allowing four walks in 7 1-3 innings.

''It was the best results I've had in a while,'' West said. ''You have to go out with the same mental frame, just be agressive. We played good defense and we got out of a situation or two.''

West, acquired last July from the Mets in the Frank Viola trade, threw 115 pitches before leaving the game. ''I started to feel a little bit tired but it wasn't important for me to finish the game. You can't expect to throw a no-hitter.''

When he was in the Mets organization, getting to the majors seemed to be just about the only thing West couldn't do. Repeatedly touted as the prize jewel in New York's minor league system, where he compiled a 61-46 record in seven seasons, West couldn't crack the parent club's rotation. But in Minnesota he's finally gotten his shot, and Twins manager Tom Kelly liked what he saw last night.

West got all the offensive help he needed in the fifth inning on a Greg Gagne two-run double. Dan Gladden and Kirby Puckett also contributed insurance RBI in the fifth for the Twins.

Mark Gubicza, 4-7, took the loss, giving up seven hits in seven innings, striking out seven and walking two.

--- AROUND THE AL ---

Elsewhere in the American League, Toronto ripped New York 8-4, Boston nipped Baltimore 4-3 in 10 innings, Chicago rapped Oakland 5-3, Milwaukee crushed Cleveland 11-1, Seattle edged Texas 8-6 in 11 innings and Detroit bouncedCalifornia 9-4.

Blue Jays 8, Yankees 4

At Toronto, Glenallen Hill drove in three runs with a bases-loaded double to snap Toronto's three-game losing streak and New York's four-game winning streak. Todd Stottlemyre, 8-6, picked up his fourth consecutive victory. Tom Henke notched his 12th save. Tim Leary, 3-10, lost his sixth straight.

Red Sox 4, Orioles 3 (10 innings)

At Boston, Dwight Evans belted a two-run homer with two out in the 10th inning after hitting the tying solo shot in the eighth to lift Boston. Gregg Olson, 3-2, took the loss. Jeff Gray, 1-0, escaped a jam in the ninth inning to gain his first American League victory.

White Sox 5, A's 3

At Oakland, Ron Karkovice snapped a sixth-inning tie with a home run to pull Chicago to within two games of Oakland, which has dropped four of its last five. Jack McDowell, pitched six innings to even his record at 4-4. Bobby Thigpen notched his major-league leading 23rd save. Mike Moore, 5-7, took the loss.

Brewers 11, Indians 1

At Milwaukee, Rob Deer's two-run home run and Dave Parker's three-run double highlighted a seven-run second inning to power the Brewers. Newly acquired Ron Robinson, 1-1, picked up his first AL win, allowing one run and seven hits over eight innings. Al Nipper, 0-1, took the loss, lasting only 1 2-3 innings.

Mariners 8, Rangers 6, 11 innings

At Arlington, Edgar Martinez's two-out two-run single in the 11th inning paced Seattle. Mike Jackson, 2-3, hurled two hitless innings for the win, walking one and striking out two. Mike Schooler pitched the 11th for his 17th save. Kenny Rogers, 2-3, took the loss.

Tigers 9, Angels 4

At Anaheim, Alan Trammell drove in three runs with three singles to powerDetroit. Jeff Robinson, 6-5, scattered seven hits over the first 5 2-3 innings, walking one and striking out one. Jim Abbott, 4-6, allowed five runs, seven hits and three walks in 4 2-3 innings.

#90175u0178 06/24/1990 ~United Press International

TOKYO (JUNE 24) UPI - On the eve of the final round of U.S.-Japanese talks on eliminating trade obstacles, the two sides appear to be haggling over money - about $3.2 trillion, to be specific.

That's the amount the United States wants Japan to spend on public works over the next 10 years to stimulate demand within the nation and trim its $45 billion trade surplus with the United States.

Japan, says Prime Minister Toshiki Kaifu, thinks $2.7 trillion would be a

more realistic public works budget.

Going into the last round of the so-called Structural Impediments Initiative talks, slated for Monday and Tuesday in Tokyo, the United States appears ready to drop its demand that Japan peg its public works spending to 9 percent of its gross national product.

Many Japanese acknowledge the need for more public works spending in a country where less than half of all homes are connected to sewer mains. Even Shintaro Ishihara, a hawkish politician known for his confrontational stance against the United States, said in a news conference Friday that Japan should spend more to improve the quality of urban life.

But the Japanese term the U.S. demand for a percentage of GNP commitment an intrusion into their sovereignty.

Over the weekend, the two sides talked money to each other through the press. Kaifu, speaking to reporters in Japan's southernmost prefecture (state) of Okinawa, restated his refusal to tie spending to GNP but said Japan would be willing to commit itself to the $2.7 trillion figure.

U.S. Deputy Trade Representative Linn Williams, head of the U.S. negotiating team in Tokyo, said in interviews with the Japanese media he wants Japan to agree to spend $3.2 trillion.

Anything less, he suggested, would not be effective in reducing Japan's current account surplus, the broadest measure of its overseas trade.

Williams told Kyodo News Service the ratio of public works spending to GNP was not as important as the amount spent.

The two sides have met every two months since last September and made hundreds of suggestions to each other about economic reforms to promote more balanced trade.

In a 32-page interim report produced in April, Japan promised to ease the entry of large stores into communities now dominated by mom-and-pop shops tied to Japanese manufacturers. It also promised, among other things, to beef up prosecution of illegal collusion among businesses and to address the problem of high land prices.

Japanese corporations have used surplus cash to speculate in land, driving prices so high that Tokyo is now nominally worth more than the entire United States, according to some reports. This makes entry of foreign firms into Tokyo and other Japanese cities too expensive, the United States argues.

For its part, the United States has promised among other things to reduce

its budget deficit and address the nation's chronically low savings rate.

Although major disagreements have been resolved in principle, much difficult work awaits the final round.

U.S. officials have already accused Japan of backsliding, while Japan says the United States misinterpreted some of its promises.

A senior Foreign Ministry official said the United States had ''overexpectations'' as a result.

''Japan will carry out its promises,'' said Taizo Watanabe, chief spokesman for the ministry. But the United States must understand the limitations of Japan's commitments, he added.

Chief U.S. negotiator Williams said he would be surprised if the talks could be wrapped up on schedule in just two days.

The previous round, held in Washington in April, ran two days longer than expected as negotiators struggled to hammer out the interim report.

President Bush proposed the SII talks to then Prime Minister Sousuke Uno in Paris last July at the annual summit of leaders of advanced industrialized nations. A final joint report is due to be produced in time for this year's summit, which begins July 9 in Houston.

TOKYO (JUNE 24) UPI - A Panamanian tanker struck and sank a Japanese freighter Sunday off the coast of Japan, killing one seaman and leaving another missing, Japanese officials said.

The 449-ton Japanese freighter Ryuzan Maru No. 28 sank shortly after it was hit by the 5,266-ton chemical tanker Hegg just before noon Sunday, said a spokesman for Japan's Maritime Safety Agency.

The accident occurred about two miles off the coast of Shikoku Island, some 400 miles southwest of Tokyo, he said.

Four of the six crew aboard the Ryuzan Maru were rescued, but one died and one was still missing, the spokesman said.

There were no casualties reported aboard the Panamanian-registered Hegg, he added.

An investigation into the accident was under way, he said.

AMARILLO, TX (JUNE 24) UPI - A brush fire that erupted in the Texas Panhandle only an hour after another blaze was contained a mile away consumed at least 1,500 acres and was about 75 percent contained, officials said Sunday.

At least 100 firefighters, including crews that had been fighting the first blaze, known as the ''Big Canyon Fire,'' until it was contained Saturday morning, were battling the new fire as it spread through Rock Creek Canyon into the Plum Creek drainage, said U.S. Forest Service spokeswoman Peggy Broersma.

The ''Big Canyon Fire'' charred at least 7,300 acres in deep Panhandle canyons near Lake Meredith about 30 miles north of Amarillo.

Several firetrucks, a helicopter for dropping water and three airtankers were sent to the second ''Plum Fire,'' said Forest Service spokesman Ken Palmrose.

He said the ''Plum Fire'' had covered an estimated 1,500 acres by Saturday evening.

Palmrose said officials were not sure what started the ''Plum Fire.''

A lightning strike ignited the ''Big Canyon Fire'' late Tuesday on National Park Service land on the north side of the lake.

#90175u0182 06/24/1990 ~United Press International
GREEN BAY, WI (JUNE 24) UPI - A canoe carrying three people overturned in a raging river, trapping a teenage girl in an air pocket beneath a bridge and forcing rescuers to cut through the bridge to save her, police said Sunday.

The girl, whose two male companions were quickly rescued from the flooded East River by a passing police officer, was pulled under the bridge and became caught in debris in the girders underneath, police said.

Rescuers cut an air hole in the bridge and then used a special saw to slice through the deck to pull the girl, who was trapped for three hours, to safety, police said.

The rescue came late Saturday as extensive flooding in Southeast Green Bay and nearby towns continued a day after the region was hit by 5 inches of rain accompanied by strong northeast winds.

The three people had been canoeing in the flooded river when their boat was caught in the strong current and flipped over near the bridge, said Sgt. Matt Tochterman, a Green Bay police officer who supervised the rescue.

''When I first got there I didn't think there was any chance there could be a survivor,'' Tochterman said.

''Fortunately a bystander could just barely hear the screams. With the water rushing so fast I don't know how he could hear her,'' Tochterman said. ''We had to press our ears against the railing. The metal railing carried the vibrations of her voice up. That's how we found her.''

Scuba divers then tried to free the girl, identified as Carol Jicha, 14, but she was trapped by the debris.

''We had to drill a hole in the bridge to rescue her,'' Tochterman said. ''She got hung up on one of the girders, fortunately, instead of getting swept down the river.''

Rescuers used a special saw to cut through the concrete and were cheered by onlookers when they pulled Jicha to safety. She was treated and released at a local hospital, said Lt. Mike Heraly, a Green Bay police spokesman.

''There was definitely a lot of luck involved,'' said Tochterman.

''It was really nice to have a lot of people standing around and applauding the police for once,'' he added.

The girl's companions, Gerodo Balli, 14, and Daniel Timm, 24, also suffered only minor injuries.

The rescue was the most dramatic moment in a day of floods and evacuations caused by Friday's storms. Green Bay Mayor Sam Halloin declared a state of disaster in the city as flood waters shut down several roads.

Rain had stopped Saturday, but strong northeast wind continued to blow water from the bay of Green Bay into the mouth of the Fox River and its East River tributary, said Brown County Sheriff's Captain Ted VanRossum, county emergency government director.

''We seem to have things under control at this point,'' VanRossum said Saturday.

#90175u0183 06/24/1990 ~United Press International

BEIRUT, Lebanon (JUNE 24) UPI - A car bomb exploded in a southern Lebanese town early Sunday, killing a Shiite militia official and wounding three other people, police said.

Police said a car packed with 44 pounds of explosives blew up in the coastal town of Ghaziyeh, about 28 miles south of Beirut.

A Shiite Amal official identified as Ahmed Hijazi was killed and three other people were wounded, police said. The injured were transferred to hospitals in the nearby southern port city of Sidon.

Meanwhile, in the Christian enclave northeast of Beirut, random shelling during the night left one person dead and two wounded.

Security sources said troops loyal to Christian military leader Gen. Michel Aoun blasted positions of Samir Geagea's Lebanese Forces militia in four neighborhoods in east Beirut with heavy artillery and machine guns.

Police said a civilian was killed and two others were wounded in some three hours of fighting.

The battle was another in a string of violations of a truce arranged by the Vatican on May 26 to end nearly five months of bitter fighting between the Christian rivals that left more than 1,050 people dead and 3,000 others wounded.

#90175u0188 06/24/1990 ~United Press International

TAIPEI, Taiwan (JUNE 24) UPI - Typhoon Orphelia weakened and headed into China Saturday after a destructive sweep of the Philippines and Taiwan that left at least 43 people dead and caused millions of dollars in crop damage, officials said.

In Taiwan, at least seven people died and 30 others were missing in the typhoon, which caused $45 million in crop damage in a destructive dash across the country.

The Central Weather Bureau said Orphelia, which left 36 dead and 85,000 homeless in the Philippines last week, was located 150 miles south of Shanghai, China, in Zhejiang Province Sunday afternoon.

Packing center winds of 55 mph, the storm was moving north-northwest at 18 mph, forecasters said. The weather bureau downgraded Orphelia to a light typhoon after mountains in Ilan County in eastern Taiwan weakened its advance.

Most of the damage occured in the eastern county of Hualien, where six

people were killed and 30 were reported missing, the National Police Administration said. Another 10 people were injured.

The storm caused some $45 million in damage to Taiwanese crops, mostly to produce and fruit farms along the eastern coast, according to estimates by the Department of Agriculture and Forestry.

Some 400 people were stranded when a dike was destroyed in Hualien, but police had rescued all of them by Saturday evening.

A Panamanian-registered freighter, the Juliana, went aground on a reef after breaking its mooring in Hualien Harbor, while another Panamanian vessel, the Cahaya, broke into three piecesa fter being battered by strong waves and winds outside the harbor.

Police said all 49 crew members aboard the two boats were rescued, with three sustaining minor injuries.

#90175u0189 06/24/1990 ~United Press International

MOSCOW (JUNE 24) UPI - A passenger claiming he had a bomb hijacked a Soviet airliner with 78 people aboard to Helsinki Sunday, the fourth hijacking of a Soviet plane in less than a month, the official Tass news agency said.

Tass said the Tupolev-134 airliner, carrying 72 passengers and a crew of six, was detoured only five minutes after it left Tallinn, Estonia, on a flight to Lvov in the Ukraine.

''One of the passengers, M. Varfolomeyev, said he had a bomb in his briefcase and demanded that the crew divert the plane to Stockholm'' in Sweden, Tass reported.

The co-pilot, identified by Tass only as Sharymov, said he had only enough fuel to reach Helsinki, Finland, and the ''hijacker agreed the plane could land there,'' Tass said.

''All the necessary measures are being taken to return the plane to the Soviet Union,'' Tass said.

It said the plane's captain, identified as I. Belyavtsev, complied with the demands of the hijacker to protect the lives of the persons aboard.

Sunday's hijacking was the third to the Nordic region and the fourth of a Soviet airliner since June 9.

On June 9, 17-year-old Dmitri Semyonov hijacked a Soviet airliner with 135

passengers and crew on a flight from the Byelorussian capital of Minsk to Murmansk, forcing it to land in Stockholm. No one was hurt, and the young man is still in custody in Sweden.

Last Monday, a pilot hijacked a a single-engine Soviet plane from Izmail in the southwestern Ukraine and flew the 12-seater craft to Turkey. The hijacker, Valery Yurevic, 29, has asked for political asylum.

On Tuesday, a young Soviet citizen saying he had a grenade and wanted to go to Israel through Sweden, forced a Tupolev-134 with 50 persons aboard to land in Helsinki. He surrendered there to Finnish police.

The recent rash of Soviet hijackings landing in the West appeared to underline a Soviet policy to end hijackings peacefully rather than force a landing in the Soviet Union.

Until 1988, the Soviets relied on forcing a hijacked aircraft down and then storming the aircraft.

But following a March 1988 incident in which Soviet commandos stormed a hijacked plane and left nine persons dead and 19 wounded, Soviet authorities changed their procedures and began demanding the extradition of hijackers from foreign countries.

#90175u0209 06/24/1990 ~United Press International

NEW YORK (JUNE 24) UPI - Sources close to negotiations aimed at rescuing beleaguered developer Donald Trump say a West German bank that has declined so far to join a critical bailout plan could force him into default.

Trump, who was unable on June 15 to meet nearly $43 million in payments on bond issues for the Trump Castle casino in Atlantic City, N.J., had a 10-day grace period - expiring Monday - to raise the funds or be found in default.

Trump has hoped to raise $65 million in fresh capital, which would allow him to meet the bonds payments, in a complex and broad-ranging bailout plan negotiated among his multiple lenders.

''The Dresdner Bank is still not sure that this agreement is sensible as far as they are concerned,'' the banking source, who asked not to be identified, said Saturday. ''The plan is to resume discussions with this bank on Monday.''

Dresdner Bank, a leading West German bank, is among four foreign lenders whose agreement is key to the bailout plan to help Trump restructure $2

billion in bank loans and $1.3 billion in publicly traded debt.

''Without the backing of the Dresdner Bank, the plan to bail out the Trump empire would fail,'' the source said, adding that the approval was crucial ''to stay off bankruptcy on Tuesday.''

''Without it (Dresdner's backing), Trump won't have the money to pay the casino bonds,'' the source said.

Dresdner and Japan's Mitsubishi Trust & Banking Corp., Sumitomo Bank Ltd., and Dai-Ichi Kangyo Bank Ltd., bought portions of loans extended by Chase Manhattan Bank Corp. to Trump.

The four foreign banks' secured loans amount to a total $75 million and are in the form of first mortgages on the Trump Tower in New York. The three Japanese banks have not said whether they agreed to the rescue plan either.

The Frankfurt-based Dresdner Bank wanted the other lenders to buy out its $15 million share in the Trump Tower, the developer's headquarters, but the other banks have been so far unwilling to do so.

Meetings between Dresdner Bank executives and officials from U.S. banks which lent money to Trump are to resume Monday in a bid to secure an 11th-hour agreement to prevent Trump from being in default by Tuesday.

''Maybe the senior executives of some of the banks may call on their counterparts at Dresdner,'' the source said.

The Japanese, German and Canadian banks holding liens on Trump assets refused to allow other liens to be attached to the properties. The secondary claims were part of the complex deal to refloat Trump's empire.

A default and ensuing foreclosure on the Trump's Castle casino could send a line of financial dominoes toppling, ending in bankruptcy.

On Friday, Trump broke his silence about his financial plight to voice confidence he will survive.

Trump, who has been scrambling for weeks to restructure $2 billion in bank debt in order to keep up interest and principal payments on another $1.3 billion in publicly traded bonds, said Friday more than his personal fortune is at stake.

In a one-page statement released in his name by the Trump Organization, his holding company, he warned that thousands of employees and suppliers of his real estate, hotel and casino holdings would also suffer if he went under.

''The banks we have been working with are very close to coming together in support of a restructuring plan,'' Trump said in the statement.

''A final agreement would benefit all of us, but perhaps most important are the 25,000 employees and thousands of family firms and other suppliers - spanning the hotel, construction, development and travel industries, that are dependent upon the Trump Organization,'' he said.

''There is a dramatic multiplier effect - take one person out of a hotel and six service people are affected,'' said Trump, who owns the Plaza Hotel in Manhattan and three Atlantic City hotel-casinos.

#90175u0217 06/24/1990 ~United Press International

NORFOLK, VA (JUNE 24) UPI - Rescue teams resumed the search Sunday for the last two crewmembers missing from a Navy supply helicopter that plunged into the Atlantic, the most recent crash involving the Navy's aging Sea Knight chopper fleet.

Searchers on Saturday recovered the bodies of the other two crewmembers, Petty Officer 1st Class Norman H. Geisel, 29, of St. Mary's, Md., and Airman John W. Burkhardt Jr., 21, of Boyleston, Mass., a Navy spokesman said.

Navy Lt. j.g. Karl Johnson identified the two crewmen still missing and presumed dead as Lt. Jane T. Paradeis, 26, of Rice, Minn., and Lt. j.g. Jason K. Skubi, 24, of Sandpoint, Idaho.

The search, which picked up at dawn, was concentrated in the ocean about 6 miles off Virginia Beach, Johnson said.

The helicopter, carrying only the four-member crew, crashed Friday within sight of its mother ship, the USS Detroit, while on maneuvers off Virginia Beach.

Rescuers got to the site rapidly, and though they were able to recover parts of the helicopter, they found no trace of the crew before a summer storm rolled in and the search was suspended for darkness.

Salvage efforts resumed Saturday morning, and the bodies of Geisel and Burkhardt were recovered late in the afternoon.

While the search for a cause continued, the Navy was unwilling to link Friday's accident to the recent grounding of the CH-46 Sea Knights for safety inspections.

The CH-46 is used to transport troops and cargo. First flown in 1962, it has been out of production since 1971, but remains the Navy's primary helicopter for resupplying ships at sea.

All the helicopters were grounded May 15 because of transmission problems in the rear rotors. On May 25, the Navy announced a second grounding to check a cracked connecting link in the forward rotor.

The first grounding was ordered after a May 4 crash of one of the helicopters in Twenty-Nine Palms, Calif. There were no fatalities in that crash, and investigators found excessive wear in a rear transmission gear shaft.

The second grounding was ordered after a technician found a cracked connecting link during a routine inspection of a Marine helicopter at Cherry Point, N.C.

Navy spokesman Lt. Russ Greer said that ''all the aircraft, both Marine and Navy, had those inspections and all either passed or had the appropriate parts replaced.'' He said no safety stand-down or grounding was ordered because of Friday's accident.

#90175u0239 06/24/1990 ~United Press International

EAST BERLIN (JUNE 24) UPI - Twenty-one East German police were injured during violent clashes with masked demonstrators who tried to storm a building occupied by an ultra-rightist party, authorities said Sunday.

Four police vehicles were destroyed, several other automobiles were damaged, one bystander was beaten up, a police dog was killed and a kiosk was looted, authorities said.

Four of the 21 police officers injured in Saturday night's riot sustained serious injuries, police said.

An estimated 4,000 people had gathered near East Berlin's Weitlingstrasse to protest the presence there of the extreme right-wing ''National Alternative.''

The party, often described as neo-Nazi, occupies several buildings on the street.

About 400 people split off from the main demonstration and attempted to storm the houses used by the party, but were barred access by police.

Police officials said that the protesters then threw various objects at them.

On Sunday morning, broken glass and burned tires littered the street. A sign spraypainted on a wall said, ''It was only a beginning. We'll be back.''

#90175u0256 06/24/1990 ~United Press International

LITTLE ROCK, AK (JUNE 24) UPI - Something snapped in Ronald Gene Simmons in December 1987.

Over the Christmas holidays, he methodically killed 14 members of his family - bludgeoning them, shooting them with a .22-caliber pistol or strangling them with cord - and disposed of their bodies.

Then he took revenge on others he thought had mistreated him. He drove from his home near Dover, Ark., to four businesses in nearby Russellville, where he shot to death two people and wounded four others.

It was the largest mass slaying of a family in the United States and the worst mass slaying of any kind in Arkansas.

Simmons surrendered on the morning of Dec. 28 and initially was jailed for the Russellville rampage.

The horror of his rage and the magnitude of his crime became apparent over the next two days, though his motive is not yet fully explained.

Authorities searched his home and found the bodies of his wife, children and other family members in the house, buried in a shallow grave and in the trunks of two cars.

Simmons, 49, is scheduled to be executed for all 16 killings at 9 p.m. Monday in the state's death chamber at Cummins prison, about 20 miles southeast of Pine Bluff. Death will be by lethal injection. Simmons has refused all appeals.

''I only ask for what I deserve,'' Simmons said after the first of his two murder trials. ''Let the torture and suffering in me end. Please allow me the right to be at peace.''

He will be the second Arkansas death row inmate executed in seven days. John Edward Swindler was electrocuted last Monday for killing a Fort Smith police officer. His was the first execution in Arkansas in 26 years.

Prosecuting Attorney John Bynum of Russellville said he believed Simmons killed members of his family from Dec. 22-26, 1987, some as they arrived at his home for Christmas visits.

He first allegedly struck his wife Becky, 46, and son, Ronald Gene Simmons Jr., 26, of San Antonio, Texas, with a blunt object, apparently as they slept Dec. 22. He also shot them.

Simmons' son had come to the house to pick up his daughter, Barbara, 3, who had been living with her grandparents. The child was strangled.

Others of Simmons' children - Loretta, 17, Eddie, 14, Marianne, 11, and Becky, 8 - were strangled, apparently as they came in from school later Dec. 22, the last day of school before the Christmas holidays.

Simmons put those seven family members in a shallow grave.

On Dec. 26, other relatives started arriving at the home to celebrate the holidays. Simmons shot his son, William H. Simmons II, 23, of Fordyce and his daughter-in-law, Renata Simmons, 22, and strangled their 1-year-old child.

Later the same day, he shot his daughter, Sheila McNulty, 24, of Camden, and her husband, Dennis McNulty, 33, as they arrived, and strangled their two children, Michael, 1, and Sylvia, 6.

All those shot were shot at least once in the head. Sheila McNulty was shot six times in the head and Renata Simmons was shot seven times in the head and neck.

The bodies of the four adults shot Dec. 26 and Sylvia McNulty were found in the house. The bodies of Michael McNulty and William Simmons, a grandson, were found wrapped in plastic garbage bags in the trunks of cars behind the house.

Bynum said he believed Simmons stayed in the house two nights with some of the bodies, then drove to Russellville where he shot and killed Kathy Kendrick, 24, and J.D. Chaffin, 33, and wounded four other people before surrendering.

Simmons has never said why he embarked on the slaughter, but authorities have speculated the motive was related to an incestuous relationship with daughter Sheila McNulty. It also has been suggested he killed Kendrick because she had rejected his amorous advances. Authorities said Chaffin apparently was not a target, but was simply in the wrong place at the wrong time.

Bynum said he thought Simmons's primary aim was to kill Sheila and Dennis McNulty.

#90175u0261 06/24/1990 ~United Press International

WASHINGTON (JUNE 24) UPI - Marla Hanson needs only to look at herself in the mirror for a visible reminder of the brutality she suffered.

The 29-year-old former New York fashion model's face was left permanently scarred after two thugs, hired by her landlord in a dispute over a security deposit, attacked her one early morning on a Manhattan street. Using razor blades, the men inflicted wounds that required 150 stitches to close.

But, Hanson points out, all physical wounds heal in time. It's the emotional scarring that she will carry for the rest of her life.

''I have flashbacks sometimes,'' Hanson said. ''You never know when something's going to trigger a memory and cause you to be paralyzed. Sometimes a sound or a noise or a smell or a sight triggers a memory and I just become completely paralyzed. I can't function that day. I've learned that's part of living through a trauma, and those days I just have to get through. The next day might be better.

''It's had devastating effects on me, long-term effects,'' Hanson continued. ''I think it's changed the way I look at the world forever. It's not a safe place any more.

''I think I've gained a lot of perspective on it in the last four years, but it's one of those things you never get over. It's always there.''

Hanson has tried to come to grips with the attack and the stigma society attaches to victims of violent crime, particularly women. Hanson, whose experience generated national attention, has recounted the attack hundreds and hundreds of times, privately and publicly.

The most recent time was last week to the Senate Judiciary Committee as she sought to persuade Congress to back legislation aimed at cracking down on the nation's escalating violence against women, both in the home and on the street.

FBI and Justice Department statistics reveal an alarming pattern of violence against women in the United States:

-During the past decade, rape rates have risen nearly four times as fast as the total crime rate.

-A woman is raped in this country every 6 minutes.

-A woman is beaten every 18 seconds, and 4 million women are battered by husbands or boyfriends every year.

-Since 1974, the rate of assaults against women aged 20-24 has increased 48.1 percent, while the rate against men in the same age group dropped 11.8 percent during the same period.

-Since 1974, the rate of murder of women 65 or older has increased 29.9 percent, while the rate for men of the same age group fell 5.6 percent.

Hanson and Nancy Ziegenmeyer, an Iowa housewife whose 1988 rape drew national attention after a series of articles about her in the Des Moines Register, were the first two witnesses testifying in a hearing on new legislation, introduced by Sen. Joseph Biden, D-Del., considered the first comprehensive package of federal initiatives designed to combat violence against women.

''It's difficult to keep talking about my experience because that keeps me in the same place,'' Hanson said in an interview. ''But to think that I might, in some way, help another woman or save her from going through the same thing makes it all worth it.''

Biden's legislation attacks violence against women from several sides.

It declares that rape and other gender-motivated crimes are a ''bias'' or ''hate'' crime, thus making sexual assaults a civils rights violation that enables victims to recover compensatory and punitive damages. The measure mandates interstate enforcement of court-imposed spouse protection orders.

The legislation also doubles federal funding for shelters supporting abused women and establishes a national commission on violent crimes against women. In addition, Biden is seeking $300 million in federal aid to state and local law enforcement agencies to develop and implement programs designed to fight street crime against women.

Women's groups have indicated support for the legislation.

''Just as a democratic society cannot tolerate crimes motivated by the victim's membership in a minority racial group and must pass special laws to combat such oppression, so too we must put into place effective laws to prevent and redress violent crimes motivated by the victim's sex,'' said Helen Neuborne, executive director of the National Organization for Women's legal defense and education fund.

#90175u0288 06/24/1990 ~United Press International

DALLAS (JUNE 24) UPI - A sheriff and a bail bondsman have been implicated by sworn documents, former officers and narcotics traffickers in a drug dealing operation that flourished in a rural North Texas county, a Dallas

newspaper reported Sunday.

Wise County Sheriff Leroy Burch and his close associate, bondsman David Box, already were under investigation by state and federal grand juries in connection with an alleged bond scheme that resulted in hundreds of questionable arrests on sex charges at a roadside park, The Dallas Morning News reported in a copyright story.

In addition, the newspaper's investigation found evidence that unchecked narcotics operations had undermined Wise County's criminal justice system.

Sheriff Burch denied the allegations and said the charges come from narcotics traffickers who want him removed from office.

''If anybody thinks I'm crooked, why haven't they already went up and got a warrant and arrested me?. Because it's bull,'' he told the Morning News.

''Why aren't all these ex-deputies not coming forth and saying and giving any proof to what they're saying? Because I'll tell you why, because it's not going on.''

Box declined comment through a spokesman.

In a segment of an ongoing statewide investigation into civil rights violations by Texas law officers, the Morning News also discovered that documents show Internal Revenue Service agents were examining financial records recently seized from the home of Box's mother as part of an ''income tax evasion, conspiracy and money laundering'' investigation targeting David Box.

In addition to the bail bond records, agents seized a jar of marijuana seeds, drug paraphernalia, ''a cocaine kit...and a white powdery substane '' according to an inventory of items seized in the search.

Mary Box said she and her son have done nothing wrong, but she declined further comment.

A former Wise County deputy said he saw David Box give envelopes of cash to Sheriff Burch on at least six occasions, the newspaper reported.

''He paid him 10 percent of everything he made (in the bond business),'' the former deputy said.

Sheriff Burch appointed a convicted felon, who falsified his application for police certification, to head his department's property room. Confiscated evidence stored in that room, including chemicals used to make amphetamine, is missing, two former deputies said.

Earlier this year, state and federal narcotics officers found that $900,000 worth of amphetamine products that had been stored outside the evidence room in a refrigerator, the Morning News reported. The officers said the evidence had not been recorded in the sheriff's official inventories or evidence logs.

Fort Worth police officers, concerned about the influx of illicit drugs allegedly manufactured in Wise County, compiled a confidential investigative file of more than 100 pages, which Fort Worth police Chief Thomas Windham turned over to the FBI more than a year ago, the newspaper said.

Chief Windham declined to discuss specifics of the file.

Three narcotics manufacturers, or ''speed cooks,'' said they were released from Wise County Jail to produce illicit drugs in labs they believed were ''protected'' by the sheriff's department.

One of the manufacturers, Gary Lindley, said he routinely delivered drugs to David Box and said that during a trip with Box to a clandestine lab site, former Sheriff C.L. ''Ray'' Aaron Jr. and Burch, who was chief deputy at the time, followed in a patrol car to ensure ''that no one was following us.''

Two former Wise County deputies, who requested anonymity, corroborated Lindley's story.

Aaron, who resigned as sheriff in 1986 because of ''politics,'' said he does not know Lindley and has never been involved with drugs.

Another admitted drug trafficker, Glenn ''Toky'' Cotton, who is serving a 99-year drug sentence in the Texas Department of Criminal Justice, said Box, Aaron and Burch told him they would ''let me out for $10,000 and they had a place where we could cook without getting into trouble.''

#90175u0293 06/24/1990 ~United Press International

(JUNE 24) UPI - TODAY'S PEOPLE:

TRUMP, THE DOWNFALL: How far have Donald Trump's fortunes fallen? So far that Bloomingdales has slashed the price of Trump: The Game, the board game of wheeling and dealing, from $35 to $17.50. So far that prospects for sales of his upcoming book, the ironically titled ''Trump: Surviving at the Top,'' are gloomy. The New York Daily News also says that a deal to put the Trump name on a line of desk accessories and leather goods has gone bad in the wake of his marital and financial problems. Professional celebrity watchers are practically saying eulogies over the marketability

of the Trump name. ''The Trump name is almost laughable,'' Paine Webber analyst Stan Trilling said. ''It has about as much value as the name 'Watergate' after the scandal.'' The News quoted a Trump spokesman as saying, ''The Trump name across the country and probably worldwide is still synonomous with quality and extravagance.'' But, he conceded, ''One would be fooling oneself if they thought that the recent problems did not have a negative effect.''

CS&N AND PR, TOO: Crosby, Still & Nash didn't score well with their last album, ''American Dream,'' in 1989. So now they're not shy about promoting their new one, ''Live It Up,'' from the stage. The group is in the middle of a 60-city tour, their first extended outing in more than a decade. During a weekend stop in Atlanta, Graham Nash told the crowd, ''In about three days, you can go to your local record store and buy the new CS&N album.'' David Crosby added, ''Do you love CS&N? If you do, tell your local radio station.''

KID ACTOR: Charlie Korsmo, who plays the kid opposite Warren Beatty and Madonna in ''Dick Tracy,'' got interested in acting four years ago when he and his family took a tour of a TV set in Los Angeles. ''In the middle of the show,I told Mom, 'I could do this sort of stuff. Look into it,' the 11-year-old Minneapolis resident said. ''So we went back to Minneapolis and I signed up with a talent agency. After about 25 auditions, I got my first local TV commercial.'' Charlie doesn't want to make a career out of acting, however. ''I want to act while I'm growing up, because I hate school,'' he said. ''It's boring and a waste of time. Tutoring on the set is much better, because I can go at my own speed. After I get out of school, I might direct. But I'd rather be something like an inventor.''

MUSIC FOR MANDELA: Nelson Mandela's Saturday appearance in Boston took on the aspect of a music festival. Some 325,000 people showed up at a park along the Charles River to hear Paul Simon, Bobby McFerrin, Tracy Chapman, Livingston Taylor and Michelle Shocked, who all altered their tour schedules to appear for Mandela without compensation. Jackson Browne also was there, along with the South African group Ladysmith Black Mombazo, which flew in from London, and white South African Johnny Clegg and his band, Savuka.

GLIMPSES: Tina Turner's tour takes her to the Palace of Versailles Wednesday. Some 50,000 people are expected for the show, which will be the

first rock concert at the palace other than Pink Floyd's 1988 appearance ... Country star Clint Black is the new owner of a cranberry red 1987 Porsche, a gift from his producer, James Stroud. Stroud had promised to give Black the car if his album ''Killin' Time'' went gold, which it did ... Willie Nelson Jr. has pleaded guilty in Nashville, Tenn., to two counts of drunken driving. The 32-year-old son of the country music superstar was ordered to serve 20 days in jail, pay $1,000 in fines and perform 160 hours of community service work. The younger Nelson was charged with four counts of drunken driving from November 1987 to December 1989, but two counts were dismissed. He recently completed a 30-day in-patient alcohol abuse program.

#90175u0301 06/24/1990 ~United Press International

MEDELLIN, Colombia (JUNE 24) UPI - A group of about 25 armed men burst into a restaurant early Sunday morning and opened fire on customers, killing 19 and wounding seven others, police sources said.

Four other people were killed when an unspecified number of gunmen attacked them in the residencial Enciso neighborhood in the eastern part of the city.

Colombian RCN Radio cited police sources as saying the attack by the 25 gunmen, who fled in several cars, took place about 6 miles south of Medellin.

The wounded were taken to several hospitals in Medellin, 160 miles (260 km) northwest of Bogota, but additional details were not immediately available.

Authorities said they were baffled by the attacks, which occurred despite increased vigilance in the city - headquarters city of the Medellin drug cartel.

Police sources said three policemen were also killed in different parts of the city Sunday night, bringing to 145 the number of policemen killed this year in Antioquia province. Most of them were victims of assassins working for organized crime.

(JUNE 24) UPI - Around the world... around the clock... the latest news from U-P-I.

Black South African nationalist Nelson Mandela heads to the nation's capital Sunday on the third leg of his U-S visit. On Saturday, the city of

Boston rolled out the red carpet for 71-year-old Mandela, treating him to a sincere outpouring of emotion. Mandela praised the city as the beacon of democracy and urged continued pressure to dismantle apartheid.

Experts and activists in San Francisco Saturday warned the AIDS epidemic will reach Eastern Europe and the Soviet Union. Although the incidence of AIDS is much lower in those areas than in the West, the coordinator of an AIDS charity fund in the Soviet Union says the deadly virus is spreading. She said the primary reasons are because of a lack of condoms and the medical re-use of syringes.

Flooding worsened Saturday in Green Bay, Wisconsin, and the surrounding area. Mayor Sam Halloin declared a disaster. Heavy rain has stopped at the five-inch mark... but strong northeast winds are blowing water from the bay of Green Bay into the mouth of the Fox River and its East River tributary. The Green Bay fire department called for help in evacuating residents from their homes.

An air show at the Dyess Air Force Base in Abilene, Texas, turned tragic Saturday when a World War Two era airplane crashed during its performance. The crash killed the craft's pilot. Witnesses say they saw sparks fly from the P-51 Mustang before it crashed nose first just west of a runway. 17-thousand-500 people were on hand for the show.

Navy investigators are trying to figure out what caused one of its helicopters to plunge into the Chesapeake Bay Friday. The bodies of two of the four crew members were found Saturday. The helicopter crashed while performing maneuvers within sight of the mother ship, the U-S-S Detroit. Last month, the Navy twice grounded the chopper involved in the crash... a C-H-46 Sea Knight.

Federal inspectors gave the Milwaukee-based Fred Usinger sausage line a clean bill of health Saturday. Company officials removed 80-thousand pounds of sausage from Milwaukee-area supermarkets starting Friday after a politician received a phone call saying a militant group tainted the meat with rat poison.

Witnesses say hundreds of people watched silently Saturday as Moslem rebels bound a suspected police informer and tossed him from a bridge in India's Kashmir Valley. Witnesses say NO one went to the aid of the victim one of nine people reported killed in ongoing violence in the region where rebels are fighting for indepependence from India.

#90175u0319 06/24/1990 ~United Press International

TUNIS, Tunisia (JUNE 24) UPI - The PLO called Sunday for an extraordinary meeting of Arab League foreign ministers ''because of the war of

extermination Israel is waging against the Palestinians of the occupied territories,'' the official Palestinian News Agency WAFA said.

The agency quoted Hakam Balaoui, the Palestine Liberation Organization's representative to Tunis, as saying the ''war'' aims at ''striking the Intifadah,'' the Palestinian uprising in the occupied Arab West Bank and Gaza Strip.

''The flagrant Israeli threats have expansionist and aggressive aims after the American decision to suspend dialogue with the PLO,'' Balaoui said.

He said the Tunis-based Arab League should hold an extraordinary session ''because of the war of extermination Israel is waging against the Palestinians of the occupied territories.''

Balaoui added that the decsion by Washington to suspend the dialogue begun in December 1988 ''encourages the Israeli government to increase its organized state terrorism and exposes Arab security to dangers.''

''The Arab countries must take efficacious measures to confront these Israeli threats,'' he said.

Arab League officials in the North African capital confirmed the PLO request had been made.

On Saturday, foreign ministers of the five-nation Arab Maghreb Union - Mauritania, Morocco, Algeria, Tunisia and Libya - met in Tunis and urged the United States to reconsider its decision to suspend dialogue with the PLO.

In a statement published after their meeting the envoys asked Washington ''to assume its responsibilities by forcing Israel to respect international legality and to recognize the legitimate national rights of the Palestinian people.''

The American decision to suspend its dialogue with the PLO ''is contrary to the declared intentions of Washington to give impulse to the peace process in the Middle East, the statement said.'' It said the decision '' reduces the hopes placed by the Palestinian people - and by all people who value peace and justice - in the American attitude.''

#90175u0322 06/24/1990 ~United Press International

BARI, Italy (JUNE 24) UPI - Czechoslovakia's national soccer team has shown it can conquer lesser opponents. The Czechoslovaks must now prove they can do the same against stronger competition.

Czechoslovakia reached the quarterfinals of the World Cup with a convincing 4-1 second-round victory Saturday night over Costa Rica.

Tomas Skuhravy scored the first-ever World Cup headed hat-trick, moving him to the top of the tournament scoring list with five goals to spark the win that earned the Czechoslovak's a quarterfinal match against either West Germany or Holland.

''We had to win against an opponent that was dangerous,'' Czechoslovak Coach Josef Venglos said of Costa Rica. ''We used our experience, especially after the score was tied 1-1. We are happy to have that game behind us. It was not easy, but the team showed it had the determination and effort to win again.''

Czechoslovakia's two other wins were over the United States (5-1) and Austria (1-0), two teams that did not survive past the first round.

The lone loss was to World Cup favorite Italy 2-0, a match played at Rome's Olympic Stadium, and the outcome may have been different had Czechslovakia fielded the same team it did against Costa Rica.

The team Saturday included Lubos Kubik, who was suspended for the Italy match after receiving two cautionss. He scored the other Czechoslovak goal Saturday.

Also back in the lineup, appearing fully recovered from minor injuries, were Frantisek Straka and Jan Kocian.

The lineup was solid against Costa Rica. Czechoslovakia used its massive size advantage to force the tempo. Skuhravy's 11th minute header was the only goal in the first-half, which did not please Venglos.

''At the beginning, we did not settle down properly,'' he said. ''The players did not work together as well as in previous games. Some players needed to settle down. In the second half, the defense was more stable and consistent.

''We had seen that they were a very good team when they are facing the opponent. We wanted to turn them around and make them change their defense. In the second half, our players did a good job understanding the opponent.''

Venglos said the weather - hot and dry - affected his team.

''Changing from Florence to here was more difficult because the humidity in that place is a little different,'' he said.

The real jolt, though, came when Costa Rica's Ronald Gonzalez tied the

score 1-1 in the 55th minute. But the Czechoslovak's bounced back with three goals - another two Skuhravy headers and a perfectly-placed free kick by Kubik over an eight-man wall, sending Costa Rica home.

''I actually practice a lot for those kinds of kicks, so I have confidence in myself when I have to take a free kick,'' Kubik said.

Czechoslovakia now has nearly a week to prepare to its next match, and Venglos said he will take advantage of the break.

''We now have time to recover and analyze our performance,'' Venglos said. ''I think we have plenty of room for improvement. We must play better defense. Maybe some changes will have to be done.

''I do hope our peformance will go up against a stronger opponent.''

Another win by Czechoslovakia will also keep alive the potential 28-year cycle of success. Czechoslovakia reached the final of the World Cup in 1934, losing to Italy. Twenty eight years later, the Czechoslovaks again reached the final, losing to Brazil. And now, 28 years later, they are in the quarterfinals.

#90175u0337 06/24/1990 ~United Press International

WASHINGTON (JUNE 24) UPI - South African black leader Nelson Mandela, having charmed the masses in New York and Boston, focused his anti-apartheid mission Sunday on the powerful few in Washington, including an uncertain ally, President Bush.

The world's most celebrated political prisoner, in the middle of a 12-day, eight city tour of the United States, has attracted throngs of well-wishers at every stop, from a hero-style ticker-tape parade in New York to a music-filled rally in Boston Sunday where he praised the city as a beacon of democracy.

''Your love and enthusiasm as well as your pioneering role in taking positive measures against apartheid betray the kinship you hold for our people,'' Mandela told a crowd of jubilant Bostonians estimated at 325,000. ''My dear friends, because of you, apartheid is falling into pieces.''

Although the U.S. visit of the 71-year-old deputy president of the African National Congress has so far been more a celebration than a state visit, his Washington trip is the cornerstone of the ANC's effort to shape U.S. foreign policy on South Africa.

Following his scheduled arrival in Washington Sunday afternoon, Mandela's

three-day visit includes a meeting with President Bush, an address to a joint session of Congress and appearances before the Congressional Black Caucus as well as with the top leadership of the AFL-CIO.

His one major public event is a rally at the Washington Convention Center.

During Mandela's Washington visit the focus will be on policy, especially the the African National Congress' desire that the United States maintain - or even strengthen - economic sanctions against South Africa.

The role of Bush, who has sharply denounced apartheid but dismissed sanctions, is critical but not necessarily essential to the political success of the Mandela mission.

While there has been some sentiment within the administration that the United States should relax sanctions - first imposed in 1986 over a veto by President Reagan - Mandela will press at least for continuation of the current penalties, arguing it is only such pressure that has made the government of State President F.W. de Klerk ease the harsh apartheid rules and regulations.

The 1986 sanctions imposed by Congress limit the amount and kinds of trade U.S. companies can have with South Africa, including bans on technology that can be used by the police and military to enforce apartheid, and on new lending and investment.

Democratic-led efforts to tighten and broaden the sanctions by banning virtually all trade and investment in South Africa have been introduced in Congress.

Bush's position on the issue has evolved from qualified opposition to qualified support. During his presidential campaign in 1988, Bush supported Reagan's veto of the 1986 sanctions, saying, ''The political and economic effects of sanctions have been marginal to negative.''

On Feb. 2, just before Mandela's Feb. 11 release from prison, Bush said he would consider lifting sanctions if de Klerk followed through on Mandela's release and eased restrictions on the black population.

''I am one who has not favored additional sanctions, and so I'm perfectly willing to review things as new developments take place,'' Bush said.

Yet last week, the president said more reforms in South Africa are needed, saying: ''The sanctions under the law cannot be lifted until certain additional steps are taken by South Africa.''

And Bush came as close as he ever has to acknowledging the sanctions have had a political effect, saying: ''I had some original reservations about

(the) sanction approach. But I will say that if you can credit sanctions with the evolution towards democracy in South Africa, I'd have to say, well, it seems there are some good things to it.''

The administration says de Klerk has fulfilled only one of at least four conditions Congress set for relaxing or repealing the sanctions: The legalization of political parties and political activity.

Under the law, the sanctions remain in place until all political prisoners are released and two of three other conditions are met: lifting of the state of emergency, dismantlement of key apartheid laws and agreement to begin good-faith negotiations. Pretoria has virtually met most of those conditions.

Mandela and the African National Congress see easing of the overt elements of apartheid - the rules that enforce racial separation - as only the first step toward their ultimate goal: black majority rule based on a one-person, one-vote principle.

-30- 4816

#90175u0403 06/24/1990 ~United Press International

WARSAW, Poland (JUNE 24) UPI - Several top advisers of Solidarity leader Lech Walesa, citing a ''breach of confidence'' with their long-time leader resigned Sunday from the Civic Committee he founded to steer Poland toward democracy.

The resignations of such veteran Solidarity activists as Adam Michnik, Zbigniew Bujak and Henryk Wujec occurred during a stormy meeting of the 200-member committee.

The session ended in disarray, with Walesa asking those who resigned to stay on. Another meeting is expected to be held in a month.

The meeting was called by Walesa to discuss the growing split within Solidarity's ranks over the pace of political and economic reform in Poland.

Walesa, who is struggling to remain in the political power loop in Poland, opposes efforts to use the Civic Committee movement as a base of support for the tough reforms of the government of Solidarity Prime Minister Tadeusz Mazowiecki.

''I am accused of being leftist and a crypto-Communist, and in this situation I want to tell my respected adversaries: you are simply pigs,'' Michnik, Solidarity's chief ideologist and editor-in-chief of the Solidarity newspaper Gazeta Wyborcza, told the packed auditorium as the meeting degenerated into a name-calling session.

''With such attacks, I dont see a place for myself,'' he continued. ''And I want to tell you something, Lech: If something isn't changed, then I fear that bad times are coming for Poland.''

''The time has already come,'' Walesa snapped back.

On the eve of the crucial meeting, some 60 committee members had signed a letter accusing Walesa of a breach of confidence for his recent decision to fire Wujec, the committee's secretary, as his aide and for demanding Michnik's resignation for criticizing the sacking.

''We cooperated with you on the basis of mutual respect and confidence,'' said the letter, whose signatories included Walesa's former top adviser, Solidarity Parliamentary Caucus leader Bronislaw Geremek. ''Your decisions considering hiring and firing of members of the committee breached this principle.''

The group suggested the Civic Committee, established in 1987, should be dissolved because it has fulfilled its role of leading the fight against the 40-year-old communist monopoly. That monopoly ceased with the June 1989 elections that followed historic roundtable talks with the government and the subsequent installation of a Solidarity-led government.

The first to resign was Wujec himself. He accused Walesa of packing the committee, which originally had 100 members, in order to retain control and to prevent a possible decision to form a federation of local civic committees that would support the government program.

''The committees are not a party but a movement which can be basis of democratic changes,'' Wujec said. ''This movement cannot be imposed by anything from the top.''

Another founding Solidarity activist who was in hiding for many years during communist rule, Zbigniew Bujak, referred to a Walesa comment that forming a federation would be ''a crime committed on a living body.''

''It is not good to sit in company with a criminal,'' he said satirically. ''I understand this and therefore I am quitting the Civic Committee.''

Walesa's firing of Wujec last month triggered a storm of protest by many other long-time Solidarity activists - particularly intellectuals - who considered the decision autocratic and expressed concern he was sowing divisiveness at the precise time the country must be united under Mazowiecki.

Last week, the prime minister had sought the support of the same movement to serve as a political power base to support his reforms. Walesa argues

his own creation should not be used to create a ''monoparty'' giving unquestioned support to the government.

''I'm warning you, things are bad in Poland,'' Walesa told the crowd. ''It's not so sweet as it's shown on television.''

At a separate meeting of Walesa supporters Saturday, economists released figures showing industrial production has slumped 40 percent since the government plan when into effect Jan. 1. Real income is down 30 percent and unemployment has hit 500,000 in this nation of 38 million.

-30- 4469

#90175u0416 06/24/1990 ~United Press International

OTTAWA (JUNE 24) UPI - Canada's Liberal Party, promising to find a way to unite French-speaking Quebec and English-speaking regions of the country if it is returned to power in the next election, ended its national convention Sunday with a Quebec native as its new leader.

Jean Chretien, 56, a lawyer and for many years a cabinet minister in the Liberal government of Pierre Trudeau, swept to victory late Saturday night on the first ballot in Calgary, Alberta. He received more than twice the votes than his nearest rival, Paul Martin, a wealthy businessman and also a native Quebecer.

Chretien, who lost the last Liberal leadership race to John Turner in 1984 has been away from politics for several years. Before he can return to Parliament, he must win one of Quebec's seats in the elected House of Commons.

The two-day Liberal leadership convention was overshadowed by the collapse of the Meech Lake accord, a constitutional amendment negotiated by Conservative Prime Minister Brian Mulroney and leaders of Canada's ten provinces. The amendment, which expired Saturday without the required unanimous ratification of the provinces, was designed to keep Quebec from seceding by recognizing it as a distinct French-speaking society.

Although Chretien was personally opposed to the accord, he had the overwhelming support of Quebec delegates.

But his stand drew hostility from rival leadership candidates who supported the amendment and created deep divisions within the Liberal Party ranks which will be difficult to repair. As soon as the vote was tallied, two Quebec members of Parliament said they would leave the Liberal party rather than betray Quebec.

Chretien, flanked on stage by Trudeau, Turner and other leadership candidates, told the 5,000 delegates the collapse of the Meech Lake accord

had created ''difficult times'' for the country, but Canadians should not lose hope for the future.

''We can be proud francophones and proud Canadians at the same time,'' he said.

Political analysts said Chretien's victory would return the party to an American-style of liberalism favored by Trudeau.

Unlike Trudeau, Chretien is neither an intellectual nor an ideologue. As a populist, however, he has enormous public appeal in most regions of the country, including the heavily populated provinces of Quebec and Ontario, which account for most of the seats in the elected House of Commons.

''He's not a good thinker. He's a pleaser and a negotiator,'' said University of Toronto political scientist Stephen Clarkson.

He said Chretien, who favors foreign investment and free trade with the United States, would have little trouble winning support from the business community, something it lost under Trudeau and Turner, who was opposed to the U.S.-Canada free trade agreement.

Under Trudeau, the Liberals grew more analogous to the U.S. Democrats, alienated from business and more closely aligned with the disadvantaged. Under Turner, the party became much more nationalistic and opposed the U.S.-Canada free trade agreement.

The Liberals governed Canada for most of the last half-century, but were outsted by Mulroney's Conservatives in 1984. Recent public opinion polls indicate the vast majority of Canadians support the Liberals and would return the party to power if an election were called. The next general election is expected to be held in 1991 or 1992.

Quebec Premier Robert Bourassa said Saturday he would seek provincial control over immigration and communications from the federal government, giving the province more sovereignty but falling short of full independence.

Earlier Saturday, Mulroney warned that Canada would pay the price for failing to approve the amendment, but reassured international investors the nation was still sound.

The amendment was declared dead Friday after two provinces, Manitoba and Newfoundland, adjourned their legislatures without voting on the measure. The federal government had lobbied intensely to get the amendment passed by each of the 10 provinces and suggested it would ask the Supreme Court to waive the June 23 deadline.

But when Newfoundland Premier Clyde Wells heard that suggestion, he immediately canceled the vote in his province, effectively killing the amendment.

#90175u0443 06/24/1990 ~United Press International

TURIN, Italy (JUNE 24) UPI - Defending champion Argentina needed an 80th minute breakaway goal by Claudio Caniggia Sunday to edge Brazil 1-0 and reach the World Cup quarterfinals.

Caniggia broke the deadlock with 10 minutes remaining when team captain Diego Maradona ran the ball from midfield, eluding two defenders before finding the striker.

Brazilian keeper Taffarel came out to narrow the angle, but Caniggia sidestepped him and fired into an open goal. A minute later Brazilian captain Ricardo Gomez was sent off for tripping Jose Basualdo.

Argentina will play either Spain or Yugoslavia in the quarterfinals in Florence on June 30.

Until Caniggia's goal, the Brazilians had outplayed the champions in theirsecond round match. Brazil hit the woodwork three times and had 11 goal attempts to Argentina's four. Two of those Brazilian attempts came in the 51st minute when Brazil hit the left hand post twice in the space of a minute.

First Argentinian goalkeeper Sergio Goycochea tipped Careca's high cross onto the post. Seconds later the ball rolled wide to Alemao on the left and he cut in to shoot against the post again.

In the 60th minute Jorge Burruchaga broke free from midfield and fired hard from outside the penalty area, forcing a diving save from Taffarel.

Brazil responded three minutes later as Careca collected a cross only to head it over the righthand post.

After Argentina went ahead, Maradona tested Taffarel with a superb swerving freekick in the 83rd minute which the goalkeeper tipped over the bar. Muller squandered Brazil's last bid to send the match into extra time when he blasted the ball high and wide from close range two minutes from the end with only Goycochea to beat.

It was the first time Argentina had beaten Brazil in four World Cup clashes. Brazil won 2-1 in West Germany in 1974, the teams drew 0-0 four years later in Argentina and Brazil won 3-1 in Spain in 1982.

Argentine coach Carlos Bilardo was pleased with his team's performance following a poor first round.

''This was like a final. Argentina is coming back,'' he said. ''Some players are only at 50 percent, like Maradona. Other played better than we expected. This was a classic South American match. I'd have preferred to remain in Naples for this match, but seeing we've won, we'll go on.''

Brazilian coach Sebastaio Lazaroni was philosphical in defeat.

''That's soccer. At times, it leaves you very sad,'' he said. ''This was Brazil's best game of the tournament. We had a lot of chances, but the only chance Argentina had they scored. That was the victory right there. We just lacked a goal. We didn't give them many chances. It was always a continuous attack on our part. We kept losing chances and the only chance they had, they scored. This is the object of winning. We played better, but we didn't win.''

Brazil had four clear-cut scoring chances, and at the same time denied Argentina any serious attempt in the first half. Brazil almost took the lead in the opening minute when Alemao found Careca with a superb ball out of midfield.

Careca broke clear of the chasing defenders, and rounded Juan Simon and Pedro Monzon. But before he could shoot past goalkeeper Sergio Goycoechea, Monzon recovered to knock the ball away.

Brazil nearly went ahead in the 18th minute, when a loose ball by Argentina's Jorge Burruchaga set up another Brazilian attack which ended when Dunga headed the ball against Goyochechea's right post. Ricrado Rocha went close following a corner by Branco, and Careca had another chance when he seized on a bad pass by Giusti, but again the ball went for a corner.

Pedro Monzon of Argentina had his name taken in the 27th minute for a foul on Muller It was his second yellow card of the tournament and he will miss Argentina's quarterfinal match.

(JUNE 24) UPI - A Soviet expert attending the AIDS conference in San Francisco says the Soviet Union and Eastern Europe face a growing threat from the disease. But she admits government officials are NOT prepared or willing to attack the virus. The coordinator for a Soviet anti-AIDs charity fund also says she thinks her government is concealing the real number of Soviets injected with the H-I-V virus.

About 325-thousand people turned out for a rally to honor South African black nationalist Nelson Mandela last night. Musicians Paul Simon, Jackson Browne, and Tracy Chapman were just a few of the celebrities who performed at the Charles River Esplanade. Mandela delivered a 20-minute speech to the chants of ''We love you'' by thousands waving yellow and green streamers, symbolizing the African National Congress.

Iran is welcoming earthquake relief aid from all over the world. Doctors from France, Britain, the Soviet Union, Belgium and Ireland are on the scene to help tend to some 100-thousand injured in the devastating quake. The U-S government is supplying blankets, tents, and hard hats through the Red Cross. And a private U-S relief group, Americares, has airlifted 85-hundred pounds of medical supplies.

Canadian Prime Minister Brian Mulroney is assuring international investors that his nation is stable. This, despite a failed constitutional amendment that would have given Quebec special powers. Quebec Premier Robert Bourassa says he will seek to gain provincial control over immigration and communications. He also says Quebec will NO longer participate in talks with other provincial leaders.

#90175u0445 06/24/1990 ~United Press International

(JUNE 24) UPI - An Israeli military spokesman says the navy destroyed a speedboat off the Lebanese coast last night as it was preparing to attack a target in northern Israel. It's NOT known if those aboard the guerrilla vessel were killed or captured. The aborted seaborne attack follows a similar attempt three weeks ago on an Israeli beach. That failed attack led to the break-down in talks between the United States and the Palestine Liberation Organization.

The Navy has recovered the bodies of two crewmembers of a helicopter that crashed off the coast of Virginia Beach. The search for two more bodies will resume later this morning. The Navy is investigating Friday's crash of the CH-46 Sea Knight helicopter and will NOT link the accident to the recent grounding of the aircraft for safety inspections.

Spokesmen at Dyess Air Force Base in Abilene, Texas, say a pilot was killed yesterday when his World War Two era plan crashed nose-first during an air show at the base. There were NO injuries on the ground. About 17-thousand people saw the plane go down and some say they saw sparks coming from the aircraft before the crash.

A Florida man and his two young sons are recovering in a Virginia hospital after being rescued yesterday from a cave where they had been trapped in total darkness without food or water for five days. Pendelton County authorities say Gary William Lutes, and his sons, ages 13 and nine,

intended to explore the New Trout Cave for two hours, but got lost when their lamps went out.

#90175u0508 06/24/1990 ~United Press International

COLOMBO, Sri Lanka (JUNE 24) UPI - Tamil rebels detonated a land mine beneath a military vehicle in northeastern Sri Lanka, in one of at least three encounters with government forces that left 10 soldiers dead and 6 others wounded, a Defense Ministry official said Sunday.

The encounters came as government forces made plans to rescue some 400 police officers and soldiers trapped in an army camp inside an old Dutch fort on the Jaffna Peninsula, about 190 miles north of the capital.

A Defense Ministry official said Liberation Tigers of Tamil Eelam guerrillas, who are fighting to establish an independent homeland in northern and eastern Sri Lanka, have kept the base under attack since fighting erupted about two weeks ago.

Rebels blasted the camp with mortars, machine gun fire and explosives, preventing more troops and fresh supplies from reaching the area, the official said.

He said government helicopters on Saturday dropped leaflets asking civilians to evacuate the area, but added the Tigers prevented families from leaving.

''We are finding it difficult to carry out aerial attacks because of the enormous casualties it would cause to the heavily-concentrated civilian homes in the outer areas,'' the official said.

In northeastern Sri Lanka, rebels on Saturday evening detonated a land mine beneath a military vehicle about 45 miles north of the strategic port town of Trincomalee, killing at least 9 soldiers and wounding 3 others who were part of a military convoy, the official said.

One soldier was killed and another wounded Saturday during a separate encounter between soldiers and rebels about 55 miles south of the eastern provincial capital of Batticaloa, the official said.

Another encounter on Saturday in the same district left another 2 soldiers wounded.

Nearly 1,000 soldiers, police officers, rebels and civilians have been killed since fighting erupted June 11, and some 200,000 civilians have been left homeless.

#90175u0518 06/24/1990 ~United Press International

WINDSOR LOCKS, CT (JUNE 24) UPI - AmeriCares Foundation has sent 85,000 pounds of supplies to earthquake-ravaged sections of Iran despite complaints from some people upset with the country's stands on the United States.

The Boeing 707 cargo plane carrying aid from AmeriCares, an international disaster relief organization, left Bradley International Airport for Iran Saturday.

AmeriCares sent non-perishable food, medicine, tents, bedding, shovels, cash and other supplies, said foundation spokesman Stephen R. Norman.

He said the flight proceeded despite a few complaints from callers angry that aid is being given to a country that has taken U.S. citizens hostage and supported terrorism.

Norman said AmeriCares would continue accepting donations for the earthquake victims and would likely send more shipments to the devastated area.

Fears mounted that the death toll would exceed 40,000 in the massive earthquake that devastated northwestern Iran. About 100,000 were injured and at least that many were left homeless, officals said.

At least one doctor and one nurse were on board the plane to Tehran Airport, which is about 170 miles from the quake's epicenter, AmeriCares officials said.

Volunteers worked around the clock since hearing about the earthquake early Thursday to collect the supplies from AmeriCares' warehouse in Stamford and from donors, said Norman.

The AmeriCares airlift is part of an international effort to bring relief to the quake victims.

The United States and a dozen other countries have offered medicine, blood doctors and food to help Iran meet the needs the injured and homeless.

Medical teams from Japan, Switzerland and France and Turkey are already in Tehran to assist with relief operations for victims.

The United States Friday sent $300,000 worth of relief supplies to Iran through the American Red Cross and is planning more aid, State Department officials said.

#90175u0586 06/24/1990 ~United Press International
(JUNE 24) UPI - Japanese officials say a Panamanian tanker slammed into a Japanese freighter today off the coast of Japan. The vessel sank, killing one seaman and leaving one other missing. The remaining four seamen were rescued. There are NO reports of any injuries aboard the Panamanian-registered tanker. Officials are investigating the cause of the accident.

The United States and Japan are preparing to start the final round of talks aimed at eliminating trade obstacles. But negotiatiors in Tokyo are haggling over money- three-point-two-TRILLION dollars to be specific. The United States wants Japan to spend that amount on public works during the next 10 years in order to stimulate demand within the nation and trim the Japanese trade surplus with the United States.

New York police are warning people NOT to tell strangers their birthdate because of a mystery gunman who keeps track of the astrological sign of his victims. The man has shot four people, but none have died. The gunman claims to be the so-called ''Zodiac'' killer that terrorized San Francisco 20 years ago... killing at least six people and wounding three others.

A source close to negotiations between Donald Trump and his creditors says a West German bank could force the real estate developer into default. The source say the Dresdner Bank still has NOT agreed to a key bailout plan that would keep Trump's empire intact. Negotiations are set to resume tomorrow. The West German bank is one of four foreign lenders whose agreement to a 65-Million-dollar bailout plan is essential.

#90175u0700 06/24/1990 ~United Press International
(JUNE 24) UPI - The Iranian news agency reports a severe aftershock has rocked the already devastated region in northwest Iran. Today's earthquake was the strongest of more than 300 aftershocks and measured five-point-seven on the Richter scale. There are NO reports of any new damage or casualties. But the news agency says there was a landslide and one main road that had just been cleared and reopened is now blocked once again.

The fourth Soviet airplane to be hijacked in less than one month headed toward Helsinki, Finland, today. The Soviet news agency Tass says the plane carrying 72 passengers and took off from Tallinn, Estonia. The news agency says just five minutes after take-off a passenger said he had a bomb in his briefcase and wanted to go to Stockholm, Sweden. But the co-pilot said he only had enough fuel to go to Helsinki.

Nelson Mandela heads to Washington today where he will hold a series of private meetings and later meet with African National Congress exiles. Winnie Mandela will attend a church tribute to South African women. And this evening the Mandelas will meet with the African diplomatic corps. Some city council members say Mandela will be too isolated from the masses during this three-day visit to Washington.

Canada's special government envoy for provincial relations says there are ''ways outside the constitutional discussions to respect the distinctiveness of Quebec.'' The premier of the French-speaking province, Robert Bourassa, says he will try to establish provincial control over immigration and communications in Quebec. This would give Quebec more sovereignty without full independence.

-30- 1817

#90175u0703 06/24/1990 ~United Press International

(JUNE 24) UPI - About 500-thousand people are expected to take part in a holiday celebration recognizing Quebec's distinct culture in Montreal today. Almost every nationalist group in Quebec will be represented in a three-mile parade and other festivities. Canadian Prime Minister Brian Mulroney will spend the day in his Quebec hometown, but says the day is ''tinged with sadness'' because of the failure of the constitutional amendment that would have ensured that Quebec remained part of Canada.

Lebanese police say a car bomb exploded in a coastal town south of Beirut today, killing a Shiite militia official and wounding three other people. At the same time, rival Christian forces continue their battle for control of the Christian enclave in Beirut. Random shelling overnight left one person dead and two others wounded.

A new Gallup poll asked adults to choose which is more important- society's right to pass laws barring certain material that may be offensive to some or adults having the right to decide what they see and hear. The survey finds 75 percent of Americans think adults should have the right to decide for themselves what is offensive. But 75 percent say they think potentially obscene material can have a harmful effect on children.

Songstress June Christy will be remembered today at a memorial service at the Forest Lawn Church of the Hills in Los Angeles. Christy gained fame as a singer with the Stan Kenton band in the 40's and 50's. She recorded more than 20 albums as an independent artist, including the popular ''Something Cool.'' 64-year-old Christy died of kidney failure at her Sherman Oaks home Thursday.

#90175u0747 06/24/1990 ~United Press International
(JUNE 24) UPI - DIGEST:

Boxing

Eddie Cotton, a former prize fighter, who underwent two liver transplants in less than two months, died Sunday in Seattle from an infection contracted from the second operation. He was 64. Cotton was once called the ''greatest uncrowned light-heavyweight'' fighter in the world. He had 83 bouts during his 20-year career, winning 34 by a knockout and 24 by decision.

Golf

Spanish Ryder Cup player Jose Maria Olazabal, coasted to a three-stroke victory with a par-72 final round in the Irish Open in Dublin. Olazabal finished at 6-under 282 for the tournament and earned $100,000, with British Open champion Mark Calcavecchia and New Zealander Frank Nobilo tied for second at 285. Calcavecchia also fired a final-round 72, while Nobilo, seeking his second European Tour win, had a 73.

Olympics

The United States Olympic Committee appointed Thomas Wilkinson assistant executive director.

Soccer

Colombian soccer coach Francisco Maturana announced his resignation after three years of running the national team which was defeated 2-1 and knocked out of the World Cup by Cameroon Saturday. ... Thousands of Argentine soccer fans took to the streets of Buenos Aires to celebrate their team's 1-0 victory over Brazil and qualification for the quarterfinals of the World Cup. The defending Cup champions will play either Spain or Yugoslavia. ... Milan's San Siro soccer stadium resembled a heavily guarded prison as Milanese authorities prepared for an influx of 55,000 German and Dutch fans for a World Cup second round match. German and Dutch police were stationed in Milan, accompanying Italian police patrols including a newly-formed anti-hooligan force.

Tennis

Top-seed Ivan Lendl will begin his quest for his first Wimbledon title when play begins Monday at the all-England lawn and tennis club. Lendl has won every Grand Slam title except Wimbledon at least once. Lendl passed up the French Open earlier this month in order to train on grass for Wimbledon. ... Steffi Graf, defending her Wimbledon title, will be challenged by Martina Navratilova, 16-year-old Monica Seles, and

14-year-old Jennifer Capriati.

#90175u0777 06/24/1990 ~United Press International
(JUNE 24) UPI - More problems for earthquake-stricken Iran. The official Iranian news agency says an aftershock measuring five-point-seven on the Richter scale shook northern Iran today, triggering at least one major landslide. A road that had just been cleared is now blocked again by a mountain slide. There's NO word on building damage or casualties from today's tremor, the strongest of more than 300 aftershocks following a quake Thursday that killed an estimated 40-thousand people.

Another Soviet airliner was hijacked today. The official Tass news agency says a jetliner carrying 78 people was hijacked shortly after it took off from Estonia... by a passenger claiming he had a bomb. Tass says the passenger wanted the plane to go to Sweden, but agreed it could land at Helsinki, Finland, when the co-pilot said he had only enough fuel to reach Helsinki. It's the fourth hijacking of a Soviet plane since June 9th.

South African black leader Nelson Mandela winds up his visit to Boston today before heading for Washington, D-C. Yesterday, he appeared at a six-hour, music-filled rally in Boston and called on the audience to help finish the dismantling of apartheid in his homeland. An estimated 325-thousand people attended the rally and concert that featured performances by Paul Simon, Bobby McFerrin and other artists.

#90175u0782 06/24/1990 ~United Press International
(JUNE 24) UPI - The Soviet Union and Eastern European nations face a growing threat from AIDS. That's the warning issued yesterday by experts at the Sixth International AIDS Conference in San Francisco. A spokeswoman for a Soviet anti-AIDS charity fund says her government ''has failed to protect its citizens from AIDS,'' and says people are running out of hope that they can avoid ''the global epidemic.''

A nation-wide survey indicates most medical residents do NOT want to treat AIDS patients when they go into private practice. The poll of more than one-thousand medical residents at 41 training programs found that 63 percent did NOT plan to care for people with acquired immune deficiency syndrome. About two-thirds of the residents questioned in the University of California-San Francisco survey said they worried about being infected with the AIDS virus while on the job.

#90175u0810 06/24/1990 ~United Press International

(JUNE 24) UPI - Iran's news agency reports a severe aftershock from last week's earthquake. Today's tremor caused at least one major landslide... blocking a major roadway that had just been cleared. There is NO immediate word on casualties. The quake that struck on Thursday killed an estimated 40-thousand people.

A passenger who claimed to be carrying a bomb in a briefcase hijacked a Soviet airliner with 78 people aboard to Helsinki today... the fourth hijacking of a Soviet plane in less than one month. The Soviet news agency Tass says the hijacker originally wanted to fly from Estonia to Sweden, but the plane had only enough fuel to make it to Finland.

A disagreement over money is standing between U-S and Japanese negotiators in Tokyo today on the eve of the final round of talks on eliminating trade obstacles. The U-S officials want Japan to spend three-point-two-TRILLION dollars on public works over the next decade to trim its 45-BILLION-dollar trade surplus with the United States.

A West German bank that doesN'T want to go along with a complex bailout plan to rescue Donald Trump could force the beleaguered developer into default. Sources say negotiations will continue tomorrow with the Dresdner Bank in an attempt to raise 65-Million dollars to help Trump meet payments on bond issues for his Trump Castle casino in Atlantic City.

-30- 1526

#90175u1038 06/24/1990 ~United Press International

(JUNE 24) UPI - Colombian police sources say 19 people were killed and seven others wounded early today when a group of about 25 gunmen burst into a restaurant near Medellin and began shooting. Four other people were killed by gunmen in an attack in another part of the city... and three police officers were killed in separate attacks. Authorities say they're baffled by the incidents.

The Navy today received word that searchers have recovered the bodies of all four crew members missing from a Navy supply helicopter that plunged into the Atlantic Ocean Friday near Virginia Beach, Virginia. The helicopter was carrying a four-person crew when it went down during maneuvers. Authorities say all of the bodies were recovered yesterday.

The official Palestinian news agency reports the Palestine Liberation Organization is calling for an extraordinary meeting of Arab League foreign ministers. The agency says the P-L-O is calling for the meeting because of the- quote- ''war of extermination Israel is waging against Palestinians of the occupied territories.''

An aid package for the Soviet Union will top the agenda when European Coummunity leaders open a two-day meeting tomorrow at a medieval castle in

Ireland. France and West Germany are expected to push for quick release of the Soviet aid package. E-C sources say other topics will include European security and political union, and a relaxation of sanctions on South Africa.

Opening statements begin tomorrow in the New York trial of the first group of youths charged with the infamous ''wilding'' gang rape of a woman jogger in Central Park last year. Prosecutors hinted during jury selection last week that the victim will take the witness stand. Three youths are being tried tomorrow for rape and attempted murder in the case... and three others are to be tried at a later date.

-30- 2034

#90175u1105 06/24/1990 ~United Press International

LOS ANGELES (JUNE 25) UPI - Gasoline pump prices nationwide dipped slightly in mid-June because of lower prices on the wholesale market, a fuel pricing analyst said Sunday.

Trilby Lundberg, director of the Lundberg Survey, said the most recent survey conducted Friday indicated average consumer gasoline prices fell .42 cents a gallon from the last survey June 8.

The average price per gallon in the latest survey of 13,000 retail gas outlets across the country was 117.68 cents including taxes, Lundberg said.

The reduced pump prices were a direct result of retailers passing along savings from lower wholesale prices, Lundberg said.

But she said it is too soon to tell if the price declines will continue. Pump price drops triggered by lower crude oil prices could be balanced by higher demand in the coming peak driving months, July and August.

Another factor expected to buoy the average price in upcoming months is the nickel-a-gallon state tax approved by California voters June 5, Lundberg said.

Because California consumes more gasoline than any other state, the tax, which goes into effect Aug. 1, is expected to have some impact on the weighted nationwide average, she said.

At the self-serve pump, the average price for regular unleaded, the biggest-selling grade, was 105.83 cents. A gallon of premium unleaded cost 123.08 cents, while regular leaded was priced at 106.44 cents.

For full service, regular unleaded cost 132.31 cents a gallon, premium unleaded cost 145.97 cents and regular leaded was priced at 129.31 cents.

-30- 1737
#90175u1139 06/24/1990 ~United Press International
(JUNE 24) UPI - South African black leader Nelson Mandela left Boston for Washington, D-C, today. His three-day visit includes a meeting with President Bush tomorrow, and an address to a joint session of Congress on Tuesday. His one major public event is a rally at the Washington Convention Center.

The Soviet news agency Tass says a passenger claiming he had a bomb in his briefcase hijacked a Soviet airliner to Helsinki today. The hijacker surrendered and asked Finland for political asylum, but was immediately taken into custody and charged with hijacking. It's the fourth hijacking of a Soviet plane this month.

Another bloodbath in Colombia. Police in Medellin say about 25 armed men burst into a restaurant early today and opened fire on customers, killing 19 people and wounding seven others. Four other people reportedly were killed when an UNspecified number of gunmen attacked them in a nearby residential section.

Hundreds of thousands of Soviet Moldavians gathered today on the border with Romania to show support for the Moldavian republic's proclamation of sovereignty that was issued last night. Witnesses say Soviet frontier guards had to erect iron fences to keep some of the demonstrators from being trampled.

Several top advisers to Poland's Solidarity leader Lech Walesa quit the Civic Committee today, the organization founded to steer the country to democracy. The advisers reportedly bailed out during a stormy Warsaw session called to address the growing split within Solidarity's ranks over the pace of political and economic reform.

-30- 1747
#90175u1145 06/24/1990 ~United Press International
(JUNE 24) UPI - Arab League officials say the Palestine Liberation Organization today requested that the league's foreign ministers hold a meeting to discuss Israel's treatment of Palestinians. The official Palestinian news agency reports the P-L-O accuses Israel of a ''war of extermination'' against Palestinians in the occupied territories.

East Berlin authorities say 21 police officers were hurt... four of them seriously... when they tried to stop demonstrators from storming a building occupied by an ultra-right wing party overnight. About four-hundred people reportedly tried to break into the building, which houses a party described as neo-Nazi.

Searchers today recovered the bodies of the two remaining crew members missing from a Navy supply helicopter that plunged into the Atlantic off the coast of Virginia Beach on Friday. The bodies of the other two crew members were found earlier. Officials say they're investigating the cause of the accident.

Opening arguments are set for tomorrow for the first trial in the case of a jogger who was gang-raped and brutally beaten in New York's Central Park last year. The prosecution gave strong hints last week that the victim will testify. One prosecutor asked if jury members would feel negatively about a witness who could NOT recall all the details of an incident.

European Community sources say the E-C's leaders are about to debate some potentially hot topics. The group's two-day summit begins tomorrow in Dublin, Ireland. On the agenda are an aid package for the Soviet Union... European security and political union... and a relaxation of sanctions on South Africa.

-30- 1815

#90175u1194 06/24/1990 ~United Press International

HARRISON, NY (JUNE 24) UPI - Following a jubilant encore performance, Hale Irwin has no plans to exhibit his new trademark victory lap in the near future.

Twice in the space of six days Irwin astounded the golfing fraternity with improbable victories. Winless since 1985, the 45-year-old Irwin became the oldest man to win the U.S. Open championship by capturing a playoff last Monday, and he followed that up Sunday with a victory in the $1 million Buick Classic.

Just as he did last Sunday at Medinah, after sinking a 45-foot birdie putt on the 72nd hole to create a playoff with Mike Donald, Irwin jogged part way around the green of the Westchester Country Club following a 6-foot birdie putt on No. 18, exchanging high-fives with the gallery.

''Everybody has been wanting it all week, but I said it wasn't time,'' Irwin said after shooting a 5-under-par 66 for a two-shot victory over Paul Azinger. ''Today was the time. I don't know if you'll see that again.''

Irwin accomplished his rare double despite an extended case of exhaustion, not getting more than 4 hours of sleep any night this week. And so his reward is to go home and rest.

''The most obvious thing to say is I'm extremely excited about the double '' Irwin said. ''I'm sorry it won't be at least an effort for a triple, but there are other more important, pressing things to do.''

These things, Irwin said, include ''going home (to Frontenac, Mo.), and being with relatives, family and friends who have been overwhelming with their congratulations and praise.

''Yes, I've proven I can play, yes, I know I can play, and no, I'm not going to go out and kill myself to prove it.''

Irwin, who tied for third at the Kemper the first week of June, said his next tournament probably would be the British Open at St Andrews, Scotland starting July 19.

Irwin, calling on the last of his physical and emotional reserves, became the first player since Billy Casper in 1966 to win a PGA event the week after capturing the national championship.

''You look forward to these days,'' he said. ''They're a lot of fun at the time, but they're also a lot of work. I'm extremely proud of myself, the way I reacted after winning last week.

''This serves up notice there'a a lot of life left, there's a lot of fun left.''

Azinger, who had only two bogeys all week, produced a sizzling 65 but still had to settle for second place at 271.

''I'm very happy,'' said Azinger, who finished second for the third time this year after winning the Tournament of Champions. ''I did as good as I could. I needed to shoot 63 to tie this guy, and I shot 65. My hat's off to Hale Irwin.''

Irwin collected four birdies on the front nine, then parred eight holes in a row before his final birdie.

The victory was Irwin's 19th since joining the PGA Tour in 1968, and brought him top prize of $180,000. With $571,694 in 1990, this is already Irwin's most profitable year.

Irwin led Azinger by four shots at the turn, but Azinger picked up birdies on the 10th, 13th and 15th holes to close to within one shot. On the 18th, the easiest birdie hole on the Westchester Country Club course, Azinger sent his drive into the rough on the right.

He still had an 8-foot putt for birdie, but missed it by inches.

Kirk Triplett, the first round leader, came up with a 66 to finish third at 272, and another stroke farther back was Ken Green, who shot 67.

Blaine McCallister, after starting the day tied for the lead with Irwin, faded to a 71 to tie for fifth place at 274 with Jim Gallagher (68). McCallister quickly fell out of contention with a bogey on the third hole and a double bogey at No. 5, where his second shot went into the trees and he three-putted.

Raymond Floyd, following his third round of 65, closed with a 68 to tie at 276 with Craig Stadler (70), Loren Roberts (69) and Lee Janzen (68).

Phil Blackmar registered the fourth hole-in-one of the competition, using a pitching wedge on the 132-yard sixth hole.

#90175u1278 06/24/1990 ~United Press International

(JUNE 24) UPI - Nelson Mandela moves on to Washington, D-C, the next stop on his U-S tour... a Soviet jetliner is hijacked to Finland... and a strong aftershock hits northern Iran three days after last week's earthquake. Those and other stories, next, from U-P-I.

South African black leader Nelson Mandela's U-S tour moves on to the halls of power today.

Mandela left Boston's Logan International Airport this afternoon for Washington, D-C.

The African National Congress leader is in the midst of an eight-city tour of the United States. He has attracted throngs of well-wishers at every stop, from a ticker-tape parade in New York to a music-filled rally in Boston yesterday.

But his trip to Washington is a central part of an African National Congress effort to get the United States to maintain economic sanctions against South Africa.

Mandela's three-day visit includes a meeting with President Bush, who has opposed sanctions in the past. But last week Bush said the U-S sanctions must stand until South Africa makes further reforms to end apartheid.

Mandela will also address a joint session of Congress and will appear before the Congressional Black Caucus and leaders of the A-F-L C-I-O. His one major public event is a rally at the Washington Convention Center.

-30- 1452

#90175u1302 06/24/1990 ~United Press International

(JUNE 24) UPI - Iranians still struggling to recover from Thursday's earthquake were hit by a strong aftershock today.

The tremor... the most severe of more than 300 aftershocks... reportedly measured five-point-seven on the Richter scale and triggered at least one major landslide.

The Iranian state news agency says the epicenter was about 125 miles northwest of Tehran... essentially the same area struck by a massive earthquake last week.

There is NO word of casualties or damage.

The jolt comes as international relief supplies are beginning to arrive to help survivors of Thursday's quake, which killed an estimated 40-thousand people.

The U-S-based AmeriCares Foundation has sent some 85-thousand pounds of supplies.

Washington has sent 300-thousand dollars worth of relief supplies through the American Red Cross. A State Department official says more help is on the way.

Moldavia has joined the growing list of Soviet republics to put in its bid for sovereignty.

In celebration, thousands of Moldavians gathered at the republic's border with Romania in a show of support for re-unification.

The sovereignty declaration... adopted late last night... appears similar to the one issued by the Russian Republic. It calls for Moldavia- NOT Moscow- to control Moldavian natural resources.

It also requires that all national Soviet laws be ratifed by the republic's Supreme Soviet.

Representatives of the Romanian Movement for Reunification of Soviet Moldavia and Romania appealed to people to form a human chain on the border to mourn the day Moldavia was annexed by the Soviet Union- June 28th, 1939.

More than half of Moldavia's four-Million people are ethnic Romanians.

Witnesses say Soviet frontier guards had to erect iron fences to keep some of the demonstrators from being trampled today.

-30- 2019

#90175u1327 06/24/1990 ~United Press International

(JUNE 24) UPI - European Community leaders have a long day ahead of them tomorrow.

They're set to gather at a medieval castle near Dublin, Ireland, to debate a laundry list of topics headlined by whether they should help bail out the sinking Soviet economy.

E-C sources say France and West Germany are expected to press for quick launching of a Soviet aid package from the West.

French President Mitterrand says the West must help Soviet President Gorbachev because a collapse of the Soviet reform movement could create what Mitterrand calls a ''cycle of confrontation and violence.''

But Britain... frequently the odd man out in E-C meetings... wants to hold off on Soviet aid until Moscow implements deeper economic reforms.

As one senior British official says- ''simply signing a large check is NOT going to be useful to anyone, including the Soviet Union.''

The E-C leaders also are expected to debate European security and political union... and another divisive topic... whether to relax economic sanctions on South Africa.

It appears a woman jogger who was gang-raped and beaten in Central Park last year might testify in the first trial in the case.

Opening arguments are set for tomorrow in New York City for three defendants.

The prosecution last week asked potential jurors if they would be prejudiced against a witness who could NOT remember details of an incident.

The victim in this case was raped, beaten and left lying in the park in April of last year. She languished for two weeks in a coma, and canNOT remember her beating.

Six youths are charged with second-degree attempted murder, first-degree rape and other offenses in the case. Each also is charged in separate attacks on two male joggers.

Because tomorrow's defendants were under 16 when the crime occurred, they face a maximum of four to 10 years behind bars if convicted of the most serious charge... attempted murder.

Defense lawyers say the suspects are innocent and were rounded up by racially prejudiced police... simply because the youths were black and Hispanic and the victims were all white.

FORT WORTH, Texas (JUNE 25) UPI - Members of the union representing about 700 office and clerical workers at Bell Helicopter Textron have approved a new three-year contract, company officials announced Sunday.

The agreement was accepted in a Sunday afternoon vote among members of the United Auto Workers Local 317, officials said.

The agreement includes pay raises in each year of the contract, along with a comprehensive health care plan to take effect Oct. 1 and additional life and dental insurance benefits, said company officials.

Members of UAW Local 218, representing about 2,900 maintenance and production workers, approved a new agreement with Bell Helicopter two weeks ago.

(JUNE 24) UPI - The charity group AmeriCares Foundation says it will probably send more relief shipments to areas of Iran devastated by last week's earthquake. The group sent a Boeing 707 yesterday carrying food, medicine, tents, bedding, shovels and cash. A spokesman says the group got a few complaints that aid is going to a country that has taken U-S citizens hostage.

A Defense Ministry official says Tamil rebels exploded a land mine under a military vehicle in northeast Sri Lanka... killing at least nine soldiers and wounding three others. Two other clashes in another part of Sri Lanka left one soldier dead and two others wounded.

One of Nelson Mandela's daughters was NOT among the thousands who celebrated his visit to Boston. The South African black leader met three of his grandchildren this weekend, but NOT one ''disappointed'' daughter by a previous marriage. The daughter says she got a message that made her decide NOT to join her father.

Police say a prominent Soviet doctor vacationing in New York City was shot to death today when he stepped between his wife and a gunman who mugged them in the lobby of a Queens apartment building. The well-known Moscow cardiologist and his wife were returning from a night on the town when they were attacked.

Canada's Liberal Party ended its national convention today with a Quebec native as its new leader. The winner swept to an easy victory last night

in Calgary, Alberta. The Liberal Party promises to unite French-speaking Quebec and English-speaking regions of the country if it is returned to power in the next election.

#90175u1390 06/24/1990 ~United Press International

(JUNE 24) UPI - Israel's Housing Minister says Soviet Jewish immigrants will NOT be settled in the occupied terrorities. Today's announcement follows a pledge by Soviet President Gorbachev to reconsider the number of Soviet Jews allowed to emigrate unless Israel guarantees they will NOT be settled on the West Bank and Gaza Strip.

A 60-year-old Connecticut grandmother goes to court tomorrow to face drug dealing charges. Police arrested Elizabeth Fleming and six others in a raid on her Waterbury home on Friday... in front of her three grandchildren. Police say Fleming was caught with 356 packets of crack cocaine and intended to sell them.

#90175u1665 06/24/1990 ~United Press International

(JUNE 24) UPI - Nelson Mandela is ready to get down to business. The South African leader arrived today in Washington, D-C, where he will meet President Bush tomorrow to press for tougher U-S sanctions against Pretoria. Mandela told a welcoming party at Washington National Airport he has ''NO doubt'' Washington will back his cause. Mandela will also address a joint session of Congress.

Miami's N-double-A-C-P president says she is ''appalled and embarrassed'' city officials plan to snub Mandela. Johnnie McMillian calls the move an insult to blacks. The Miami City Commission says it may withdraw a proclamation honoring Mandela's arrival on Thursday because of his expressions of solidarity with Cuba, Libya and the Palestine Liberation Organization.

The head of the federal government's Health and Human Services department was nearly drowned out by booing protesters in San Francisco at the close of the Sixth International AIDS Conference today. Hundreds of activists whistled to protest Bush administration policies on AIDS... including travel restrictions on people with the AIDS virus. Health and Human Services Secretary Louis Sullivan asked the protesters to work with the government.

Quake-devastated northwestern Iran was hit by a violent aftershock today that reportedly triggered a landslide. The jolt... five-point-seven on the Richter scale... was one of the strongest of the more than 300 aftershocks that've followed Thursday's massive earthquake. Upwards of 40-thousand people are feared dead. A deputy speaker in the Iranian parliament says the damage is too great for the government to handle, and asked volunteers to rescue and help victims.

-30- 1841

#90175u1814 06/24/1990 ~United Press International

(JUNE 24) UPI - People across the nation today voiced their unity with the gay community by taking part in Gay Pride celebrations. Police estimate 200-thousand to 300-thousand people attended the San Francisco Lesbian-Gay Freedom Day Parade near the AIDS Conference. Large numbers also turned out in New York, Chicago. and Los Angeles... where hundreds of thousands of people watched a procession of floats and mingled through the L-A Gay Pride Festival.

Booing and whistling activists nearly drowned out a speech by Health

Secretary Louis Sullivan that closed the International AIDS Conference in San Francisco. Sullivan responded by noting that unity among those battling the disease will bode positively for the future. The protesters demanded quicker action in the war on AIDS... more spending for research and care... and an easing of U-S immigration policies against people with the deadly virus.

One of the victims of New York City's Zodiac gunman died today of complications from his wounds. The 78-year-old victim... who was pistol whipped and shot last month... is now considered by police to be the UNknown assailant's first homicide. The gunman has written notes to police and news sources, listing the astrological signs of his four victims. A police source says investigators are considering a published theory that the shooting sites correspond to the Orion star constellation.

A man who killed 14 members of his family and two other people faces execution tomorrow night in Arkansas. Slated for death by lethal injection is Ronald Gene Simmons... the perpetrator of the largest mass slaying of a family in the United States. Authorities suspect Simmons went on the 1987 Christmas-time murder spree because his daughter had broken off an incestuous relationship with him.

-30- 1969

#90175u1825 06/24/1990 ~United Press International

(JUNE 24) UPI - South African black leader Nelson Mandela arrived in Washington, D-C, today... the third stop in his eight-city tour of the United States. His visit to the nation's capital is scheduled to include a meeting with President Bush and an address before a joint session of Congress. Mandela says he expects Washington to come through with tougher sanctions against South Africa's white-minority government.

A provincial holiday in Quebec today turned into a cry for secession after a scheduled parade was rained out. Despite the poor weather, thousands of people in Montreal marked St. Jean Baptiste day with chants and banners proclaiming Quebec's independence from Canada. The protests follow the collapse Friday of a proposed constitutional amendment aimed at keeping Quebec in Canada.

-30- 954

#90175u1904 06/24/1990 ~United Press International

(JUNE 24) UPI - Health Secretary Louis Sullivan is heckled in San Francisco...

Hundreds of thousands of people nationwide celebrate gay pride...

And, New York's Zodiac gunman is now a killer...

These stories... and the latest on Nelson Mandela's visit... next, from United Press International:

Health Secretary Louis Sullivan received a hostile greeting from AIDS activists in San Francisco today.

Sullivan's speech to the closing session of the Sixth International AIDS Conference was almost drowned out by boos and whistles from protesters angered by Bush administration policies on AIDS.

The demonstrators want more federal money for AIDS research and care, greater access to experimental drugs, and relaxed immigration rules for people with the AIDS virus.

A coalition of more than 30 groups... including the American Public Health Association... also sent an open letter to Sullivan, calling on him for better leadership.

Straining to be heard, Sullivan urged researchers and activists to avoid divisive theatrics and ''stand together'' to fight the AIDS epidemic. He also reiterated support for including food workers with the AIDS virus in a pending anti-discrimination bill.

Afterwards, the protesters marched noisily out of the hall to join the city's annual Lesbian-Gay Freedom Day Parade.

San Francisco's gay pride parade drew a police-estimated 200-thousand to 300-thousand people.

The parade featured fans of the rock group the Grateful Dead with a sign reading ''Jerry's Ferries''... a condom corps... and a group called the ''Sisters of Perpetual Indulgence,'' wearing nun's habits. And there was a group dubbed ''Gays for Gorby.''

The Bay City procession was one of a number of gay rallies in cities around the nation. An estimated 200-thousand people attended a gay parade in New York City. Members of the militant gay rights group known as ACT-UP staged a ''kiss-in'' involving homosexual couples.

There also were parades in Los Angeles, Chicago, Atlanta... Lansing, Michigan... and Norfolk, Virginia.

Speakers addressed issues such as gay bashing, domestic partnership legislation and ''outing''... the exposure of the sexual preferences of prominent gays without their consent.

#90175u1929 06/24/1990 ~United Press International
(JUNE 24) UPI - New York City police say the so-called Zodiac gunman is now the focus of an intense homocide investigation.

The gunman's third victim... an elderly man who was pistol whipped and shot last month... died today of complications from his wounds. Joseph Proce is the first person to die at the hands of the gunman, who has shot and wounded three other people whose astrological signs he somehow knew.

A police source says detectives are seriously weighing a recently published theory about the shootings.

The theory reportedly is based on cryptic notes written by the gunman to news organizations and to the police... including one note which says- quote- ''Orion is the one that can stop the Zodiac.''

The theory says the gunman's other victims will be shot in other parts of the city that correspond to stars in the Orion constellation. Those include South Brooklyn and sections of Queens.

The first letter from the New York Zodiac... postmarked June 4th... warned he would kill 12 people according to their astrological signs.

South African black leader Nelson Mandela... having charmed huge crowds in New York and Boston... arrived today in Washington, D-C, where he's expected to push hard for tougher sanctions against Pretoria.

The world's most celebrated political prisoner told a cheering welcoming party at Washington National Airport that he has ''NO doubt'' the U-S government will keep up the pressure on South Africa until it ends apartheid.

But whether Bush will agree to maintain or strengthen sanctions is in doubt.

During his presidential bid, Bush supported President Reagan's veto of the 1986 sanctions... saying the effect was marginal to negative.

But just prior to Mandela's February 11th release, Bush said he would consider lifting sanctions if de Klerk followed through on Mandela's release and eased restrictions on the black population.

Yet last week, the president said more reforms in South Africa are needed... and noted that under the law, the sanctions canNOT be lifted until Pretoria takes certain additional steps.

#90175u1959 06/24/1990 ~United Press International
(JUNE 24) UPI - A grisly scene of collapsed buildings, roads covered by landslides, and dead bodies is taking shape in earthquake-battered northwestern Iran.

An aftershock measuring five-point-seven on the Richter scale struck the devastated region today. It's the strongest of 360 aftershocks following Thursday's killer earthquake. The new jolt reportedly triggered at least one landslide.

Last week's quake was much more powerful than the one that struck northern California last October. Iranians now consider it the worst in the country's history. Upwards of 40-thousand people are feared dead.

A rescue worker told U-P-I the stench of decomposing bodies is so bad that workers are beginning to consider it UNsafe to touch the dead.

Aid is arriving from around the world. One cleric said with tears in his eyes that Iranians did NOT know they had so many friends. He voiced hope Iran could resume broken international relations.

But a hard-line Tehran newspaper said aid from what it called the ''criminal'' U-S government is ''deceitful.''

Canada's opposition Liberal Party says it will somehow find a way to mend the growing rift between Canada and its French-speaking province, Quebec, if it is elected to power.

The campaign pledge follows last night's election of a Quebec native to head the party.

Jean Chretien... who served for years as a cabinet minister in the Liberal government under Pierre Trudeau ... swept to victory on the first of a two-day convention.

Although Chretien has gone on the record opposing the lapsed Meech Lake accord... which granted constitutional privileges to Quebec... he has drawn support from delegates from the province.

Chretien says Quebecers can- in his words- ''be proud Francophones and proud Canadians at the same time.''

In Montreal, thousands of Quebecers demonstrated today for independence.

Festivities orginally planned to celebrate St. Jean Baptiste Day turned political when throngs of people took to the street carrying banners and proclaiming soverignty.

One demonstrator says that ''everybody knows is going to happen.''

-30- 2307
#90175u1964 06/24/1990 ~United Press International
(JUNE 24) UPI - International experts say mysterious rings appearing in crops have a down-to-Earth explanation, and are NOT signs of aliens from space.

A published report from London today quotes experts saying weather and topography cause the flattened circles which suddenly appear in fields around the world.

150 scientists and U-F-O enthusiasts gathered at Oxford for the first international conference on the phenomena of crop circles.

The circles are nearly perfectly round and range from a few yards wide to half the length of a football field. They appear overnight during the crop-growing season. Some witnesses say their arrival is accompanied by noises and lights.

The head of Britain's Tornado and Storm Research Organizaion said the circles seem to form after warm days and cold nights create a temperature inversion. The theory is that a layer of cool air becomes trapped under warmer air, and develops a column of spinning air which sweeps out a ring of damage in a field.

-30- 1161
#90175u2015 06/24/1990 ~United Press International
(JUNE 24) UPI - Health Secretary Louis Sullivan used the closing session of the Sixth International AIDS Conference to call on researchers and activists to join together to battle the deadly virus. But his comments fell on many deaf ears as hundreds of activists tried to drown out Sullivan's speech with shouts.

Hundreds of thousands of Americans across the country attended events marking Gay Pride Day today. The largest turnouts occurred in some of the nation's largest cities... such as New York, Los Angeles and Chicago. Events in San Francisco also attracted several hundred thousand people.

Northwest Iran was rocked again today, three days after a massive earthquake roared through the region. Today's aftershock... one of more than 300 since Thursday... measured five-point-seven on the Richter scale. Upwards of 40-thousand people are believed to have died in the seismic activity.

50 New York police detectives are exploring leads that range from the factual to the seemingly outlandish as they hunt for the city's so-called Zodiac killer. The UNidentified gunman claimed his first fatality today, when an elderly victim he shot last month died of injuries incurred during the attack.

Nelson Mandela swept into Washington today and vowed to press the Bush administration to step up its efforts to force the white-minority government in Pretoria to dismantle the system of apartheid.

-30- 1573

#90175u2098 06/24/1990 ~United Press International

(JUNE 24) UPI - Liberian rebel and government negotiators are scheduled to return to the bargaining table tomorrow. But sources say a settlement is UNlikely unless President Samuel Doe resigns. The rebels have gained new leverage with last week's capture of the town of Careysburg, only some 20 miles north of the nation's capital. Rebel leader Charles Taylor says he'll attack Monrovia if the new talks fail.

Rabbis representing one-Million American Jews in reform congregations today began a five-day meeting in Seattle to consider their religious future. 500 representatives will attend the 101st annual Central Conference of American Rabbis. They'll vote tomorrow on a panel's study on homosexuality in Reform Judaism. The report ''strongly endorses'' the view that all Jews are religously equal regardless of their sexual orientation.

The drug and perjury trial of Washington, D-C, Mayor Marion Barry resumes tomorrow. The proceedings take place amid criticism by Barry of the tack taken by the prosecuting counsel. Yesterday, Barry accused the news media of coddling witnesses against him. Barry warned that his witnesses- quote- ''can lie and often do.'' He added that current news coverage is based on his having to prove his innocence rather than presuming it.

Residents in Green Bay, Wisconsin, are back in their homes today to try to assess the damage from two days of heavy flooding. The city's mayor declared Green Bay a state of disaster and is lobbying for state support for clean-up efforts. Police say nearly 300 people were evacuated from their homes when river waters swollen by five inches of rain on Friday invaded homes and collapsed basements.

-30- 1849

#90175u2108 06/24/1990 ~United Press International

(JUNE 24) UPI - In southeastern Illinois, residents who suffered severe losses or property damage from recent flooding and tornadoes will be able to apply for federal and state aid. A federal coordinating officer says seven storm-ravaged counties hit hard by flooding may be eligible for

housing grants and loans to repair homes, personal property and businesses.

It's NOT costing as much to fill up gas tanks these days. A fuel pricing analyst today said gasoline pump prices dipped slightly in mid-June because of lower prices on the wholesale market. The most recent survey... conducted Friday... indicates gas prices fell just under half-a-cent a gallon in the past few weeks. The study does NOT say how long the price break will last.

Loggers in the Pacific Northwest want the rest of the United States to know they will NOT give in to the northern spotted owl without a fight. Some 10-thousand loggers and their families gathered yesterday in the Oregon timber town of Roseburg. The demonstration follows Friday's federal decision to list the owl as a threatened species. That ruling will likely protect the owl and much forest-land... but it will cost thousands of logging jobs.

The world's most populous nation is gearing up for its first-ever door-to-door census. But the Chinese government faces a problem. China penalizes couples for having more than one or two children. Farm families value children in part as laborers, and sometimes send them to relatives to avoid surveys. Thousands of workers were sent into Beijing today to encourage cooperation when the census starts July 1st.

-30- 1774

#90176b0019 06/25/1990 ~Business Wire

SANTA CLARA, CA (JUNE 25) BUSINESS WIRE - Catalyst Semiconductor Inc. announced Monday the introduction of the CAT28F010, a CMOS 1 Megabit (128Kx8) Flash erasable and electrically reprogrammable memory, ideally suited for systems requiring on-board code updates.

The CAT28F010 has fast access times of 120, 150 and 200ns and features ''Speed Programming'' capability, by which four bytes of the same data can be programmed simultaneously. By using this mode, the total erase time is reduced. Product highlights include:

-- Fast access time: 120,150,200ns

-- Low current requirements: Active: 30mA max (CMOS levels) Standby: 100uA max (CMOS levels) Standby: 1mA max (TTL levels)

-- High speed programming: 10 us/Byte typical

-- 12.0V programming

-- TTL Compatible Input/Output

-- Electronic Signature

-- 1,000 cycle; 10,000 cycle endurance

-- 10 year data retention

-- JEDEC approved 32-pin DIP or 32-pin PLCC

The CAT28F010 is pin compatible with EPROM devices and Read timings are fully compatible with EPROM operation. Programming and Erase are performed through an operation and verify algorithm. The instructions are input via the I/O bus, using a two write cycle scheme. Address and Data are latched to free the I/O bus and address bus during write operation.

According to Krish Panu, Catalyst vice president of worldwide marketing. ''The CAT28F010 is the first in a family of Flash Memory products planned for 1990. Catalyst Flash memories offer a highly reliable and a cost-effective solution to the rapidly growing market of high density memory systems which require both nonvolatility an in-system reprogramming features.

Catalyst Semiconductor Inc., a privately held company founded in 1985, is a technology leader in CMOS nonvolatile memories and is dedicated to the development of next generation memory products and their applications. The company's innovative products include: Smart Card microcomputers, CMOS NVRAMs, CMOS E2PROMs, CMOS EPROMs, CMOS SRAMs and CMOS Flash Memories.

#90176b0020 06/25/1990 ~Business Wire

WASHINGTON (JUNE 25) BUSINESS WIRE - Three of the four busiest airports in the world use Dobbs Houses Inc. for food and beverage concessions.

According to a report just released by the Airport Operators Council International, Chicago's O'Hare International Airport remained the busiest airport with more than 59 million passengers boarding airplanes there last year.

Dallas/Fort Worth International was ranked second busiest, Los Angeles International was third and Atlanta's Hartsfield International was fourth.

Memphis-based Dobbs Houses, a subsidiary of Greyhound Dial Corp., operates food and beverage concessions in the airports at Chicago, Dallas/Fort Worth and Atlanta.

One of the leading companies in the industry, Dobbs Houses operates 380 food and beverage and general merchandise concessions in 30 airports, four Amtrak stations, 13 hotels and six office buildings throughout the country.

     #90176b0027 06/25/1990 ~Business Wire
PALO ALTO, CA (JUNE 25) BUSINESS WIRE - Southwall Technologies Inc. (NASDAQ:SWTX) Monday announced it has entered into an alliance agreement with General Electric Co. to utilize thin film coatings for aerospace applications.

Under the agreement, the two companies will negotiate definitive terms of a proposed joint venture to enhance, manufacture and market thin film products.

Southwall will design production equipment for the joint venture and the two companies will also design, produce, test and market prototype thin film products under the agreement.

''This is an excellent alliance for Southwall,'' said Bruce J. Alexander, president and chief executive officer. ''Our strength is thin film coating technology. GE is a leader in the aerospace market. We will benefit from their size and marketing strength.

''They, in turn, could become increasingly competitive by using Southwall's technology in current and future aerospace applications.''

Alexander said both companies hope to have a formal joint venture agreement in place by the end of the year.

Southwall Technologies Inc. designs and produces thin film coatings. Southwall products are sold into the architectural, automotive and electronics markets.

     #90176b0031 06/25/1990 ~Business Wire
ORLANDO, FLA. (JUNE 25) BUSINESS WIRE - Quad Design Technology Inc., a pioneer of advanced digital circuit timing-analysis software, Monday introduced Release 2.0 of its XTK (Crosstalk Tool Kit) package offering enhanced signal analysis and simulation capabilities for

ultra-high-frequency, ultra-high-density printed circuit board designs at the Design Automation Conference in Orlando.

The new upgrade represents the first CAE software product that not only calculates signal distortions and simulates their effects on system timing for PCBs with operating frequencies as high as 2 GHz, but also performs those tasks at both the board and net levels.

Using XTK 2.0, system developers can rapidly pinpoint and eliminate timing errors for extremely high-performance PCBs before fabricating their designs, and so vastly reduce both development times and costs, according to Larry Rubin, president of Quad Design.

Founded in 1987 and based in Camarillo, Quad Design Technology is the pioneer of digital circuit timing-analysis software for complex, high-performance circuits.

The company's family of software tools provides manufacturers with accurate and detailed system timing information early in the electronic design cycle.

#90176b0032 06/25/1990 ~Business Wire

LOS ALTOS, CA (JUNE 25) BUSINESS WIRE - The Silicon Valley Chapter of the National Association of Women Business Owners announced Monday that Silicon Graphics Inc. has become a new corporate partner.

As the first step in this partnership, Silicon Graphics presented chapter president, Mary Cardoza, with a check and will place one person on NAWBO's corporate partners advisory board which assists the organization with on-going programs and special events.

Silicon Graphics joins Hewlett-Packard, Tandem Computers, Wells Fargo Bank and Gold Coast Couriers as corporate partners of the 62-member Silicon Valley chapter. Under the program, corporate partners donate funds, sponsor special events, and provide business advice to NAWBO.

NAWBO, in turn, provides the corporate partners with qualified business resource information in the form of approved vendor lists. These lists are then circulated throughout their companies and purchasing decision-makers are encouraged to consider using women-owned businesses.

As its first formal act as a corporate partner, Silicon Graphics will host a luncheon in July for the Silicon Valley chapter's NAWBO board of directors.

Silicon Graphics Inc. is a leading manufacturer of the broadest binary compatible family of high performance workstations and computer systems for visual processing applications. These computer systems are used by engineers, scientists and creative professionals in the design, manufacturing and marketing of products and services.

NAWBO's objective is to encourage the continued success of women business owners. Currently one quarter of the nation's businesses are owned by women, NAWBO, through its 42 chapters, seeks to accelerate the growth and stability of women entrepreneurs.

NAWBO, traces its origins to a group of Washington D.C. business women who began meeting informally in the Spring of 1974 to talk about mutual experiences, exchange information and develop business skills. Recognizing the value of the group, they incorporated as the National Association of Women Business Owners on Dec. 19, 1974. Two years later they began recruiting members from across the country and in 1978 the first chapters were formed. The Silicon Valley chapter, chartered in February 1989, is the nation's fastest-growing chapter.

CHICAGO (JUNE 25) BUSINESS WIRE - Sears, Roebuck and Co. and its wholly owned subsidiary, Sears Receivables Financing Group Inc., announced that the subsidiary filed Monday with the Securities and Exchange Commission a registration statement for the issuance and sale of $250 million of Sears Credit Account Trust 1990 C Pass-Through Certificates through an underwriting syndicate to be managed by Dean Witter Reynolds Inc., Lehman Brothers and Merrill Lynch Capital Markets.

Sears will sell receivables arising from a portion of its Merchandise Group credit accounts to the subsidiary, which in turn will transfer the receivables to a trust which will issue the certificates. Discover Card receivables will not be included in the trust. The certificates will represent undivided ownership interests in the trust.

A registration statement relating to these securities has been filed with the Securities and Exchange Commission but has not yet become effective. These securities may not be sold nor may offers to buy be accepted prior to the time the registration statement becomes effective.

This release shall not constitute an offer to sell or the solicitation of an offer to buy, nor shall there be any sale of the certificates in any state in which such offer, solicitation or sale would be unlawful prior to registration or qualification under the securities laws of any such state.

A copy of the prospectus, when available, may be obtained from Dean Witter Reynolds Inc., 2 World Trade Center, New York, N.Y. 10048, Lehman Brothers Syndicate Department, American Express Tower, 200 Vesey Street, New York, N.Y. 10285, or Merrill Lynch Capital Markets, Syndicate Department, World Financial Center, North Tower, 7th Floor, New York, N.Y. 10281.

HAGERSTOWN, MD (JUNE 25) BUSINESS WIRE - Jay R. Howe has been appointed general manager of the Rohr Industries' plant here.

Howe, 38, is responsible for all operations of Rohr's Hagerstown composite bonding and final assembly facility. Previously, he was manager of resource planning.

Rohr acquired the Hagerstown plant in 1987. At that time, Howe was plant manager of the facility, then known as the Fairchild Composite Bonding Center.

A native of Chambersburg, Pa., Howe received a bachelor of science degree in business administration from Shippensburg, Pa., State University in 1974.

He replaces T. L. Stewart, who has accepted a position with another company.

Rohr designs, integrates, manufactures and supports aircraft engine nacelle systems and components for commercial, military and business aircraft. Rohr, with headquarters in Chula Vista, Calif., has facilities in the United States and Europe.

SANTA CRUZ, CA (JUNE 25) BUSINESS WIRE - The Henry Wine Group has announced that the GRC Wine Exchange of San Luis Obispo has become the newest member of The Henry Wine Group of Companies.

The Wine Exchange joins Central Coast Wine Co. of Northern California and Vintage House Distributors of Southern California, further linking The Henry Wine Group's network of premium wine distributors in California.

Founded in 1971, the Wine Exchange distributes premium California wines in the tri-county communities of San Luis Obispo, Santa Barbara, and Ventura Counties. Norman Beko, former owner of GRC Wine Exchange, commented on the sale to The Henry Wine Group: ''We had achieved our goal of offering the finest selection of wines to the discriminating clientele of our marketing area.

''Tri-county restaurants, hotels, retail chains, and fine wine shops will now be able to access the finest wines of the world through The Henry Wine Group.''

The Henry Wine Group president, Robert W. Prough, is pleased with the addition of the GRC Wine Exchange: ''The Wine Exchange has achieved a fine reputation for quality products and top flight service to its customers in the tri-county area.

''We are pleased to welcome the Wine Exchange's first-rate family of quality wine producers, customers, and staff to our organization.'' Further information on the GRC Wine Exchange and The Henry Wine Group's broad range of domestic and imported wines can be obtained by contacting Greg Gillooly, executive vice president, at 213/589-3000.

WILLOUGHBY, OH (JUNE 25) BUSINESS WIRE - Stockholders at the Annual Meeting of Figgie International Inc. reelected the following five directors to the Board of Directors.

Their new terms will expire at the 1993 Annual Meeting of Stockholders: F. Rush McKnight, a director since 1985 and managing partner of Calfee, Halter & Griswold (law firm);

John S. Lanahan, a director since 1985 and president and managing director

Strategic Enterprises, Inc. (consulting firm); former senior vice president-commercial, Chessie System Railroads; former president and managing director, the Greenbrier Resort Hotel;

Alfred V. Gangnes, a director since 1972. Former president, Figgie International Inc.; former director, Evaluation Research Corporation;

Harrison Nesbit, II, a director since 1969 and president, Godine, Nesbit, McCabe & Co. (insurance brokerage firm); former general agent, State of Virginia, Massachusetts Mutual Life Insurance Co.; director, St. George Metals, Inc.;

A. A. Sommer, Jr., a director since 1986 and partner, Morgan, Lewis & Bockius (law firm); director, Consolidated Gas Co.; chairman, Public Oversight Board of the American Institute of Certified Public Accountants; member, Board of Governors, American Bar Association.

Stockholders also approved the selection of Arthur Andersen & Company as independent public accountants of Figgie International Inc.

Stockholders rejected two stockholder proposals: one proposal would have required the Company to disseminate a report on women in its employ in the First and Third Worlds, and the other would have required the adoption of a confidential balloting policy.

Figgie International Inc. is a diversified Fortune 500 company serving consumer, industrial, technical and service markets worldwide.

LOS ANGELES (JUNE 25) BUSINESS WIRE - Bishop Inc. (NASDAQ:BISH) Monday announced a $1.5 million revolving line of credit arranged with CoastFed Business Credit Corp., Los Angeles.

The latest step in a long-range strategic plan, this funding will be used to improve further the company's competitive position in the engineering design marketplace.

John J. Theiss, president and chief executive officer, stated, ''These funds will allow us to maximize our strong working capital position, providing additional flexibility for implementing our strategy for renewed growth.''

As part of this program, the company recently announced that the marketing and customer service functions for both the traditional engineering design

products and the advanced computer aided design systems have been fully integrated in its Northern California operations.

Bishop can now offer ''one-stop shopping'' for all of the design needs of its engineering, architectural, and drafting customers, a capability which is unique in the industry.

Bishop Inc. founded in 1965 with headquarters near Los Angeles in Agoura Hills, Calif., supplies a complete line of design products and services through its manufacturing, marketing, and distribution operations. The company serves the engineering, architectural, and drafting markets in the United States and in 72 countries throughout the world.

HILLSBORO, OR (JUNE 25) BUSINESS WIRE - OrCAD announced Monday that Joseph Tanous has joined the company as vice president of marketing and sales.

Tanous comes to OrCAD from Mentor Graphics Corp. where he was a director of marketing.

In this newly created position, Tanous will be responsible for all marketing and sales efforts, including strategic product planning, marketing strategy and distributor support.

Before joining Mentor Graphics, Tanous was a founder and vice president of marketing and sales at Contour Designs Systems Inc., which merged with Mentor Graphics in May 1988. Prior to that, Tanous was manager of international sales at Autodesk Inc. Before Autodesk, Tanous was a founder and chief executive office of BNW Inc., a manufacturer of CAE graphics products.

OrCAD, founded in 1985, is a leader in developing and marketing accessible design automation tools that make real-time concurrent engineering a reality to entire engineering groups. The company's line of IBM-PC based CAE tools provides a complete design solution, from schematic capture through simulation to PCB layout, at a price point six to 10 times lower than the other industry leaders.

OrCAD has an installed base of more than 50,000 users, making it the largest supplier of electronic design automation tools in the world. The company is headquartered in Hillsboro, and is a subsidiary of Intelligent Systems Master, L.P., a diversified partnership.

LAS VEGAS (JUNE 25) BUSINESS WIRE - Beginning August 16, transcontinental business travelers will be able to fly in a style and comfort comparable to first class service but pay a standard coach class fare.

MGM Grand Air, the luxury coast-to-coast airline, Monday announced it will introduce a new class of premium service, heretofore unavailable from domestic airlines, called ''Grand Class Coach.''

Grand Class Coach will be available on MGM Grand Air's larger, newly reconfigured fleet of DC-8 Super 62 aircraft. The new planes will serve 79 passengers, 40 in Grand Class Coach and 39 in Grand Class First.

Grand Class Coach travelers will enjoy amenities unmatched by any other airline's coach service: 10 rows of two-by-two aisle or window section; oversized leather seats; legroom comparable to ordinary domestic first class; convenient GTE Airfones and video monitors at every row of seats; free movie screenings; oversized dining trays perfect for dining and working; choice of gourmet entrees served on china with linen, silverware and stemware; spacious overhead stowage and complimentary cocktails and stereo headsets.

MGM Grand Air will provide Grand Class First and Grand Class Coach travelers with separate lounges, both offering spacious, private seating and conference rooms or work areas. Passengers will continue to receive unsurpassed service with curbside/valet baggage check-in and concierge seating, advance seat selection and boarding passes, and pampering by an in-flight service staff of eight.

MGM Grand Air currently flies 727's twice daily to and from JFK and LAX. MGM Grand Air is a transcontinental airline for the executive business travel market. MGM Grand Air, the Marina Hotel, the Desert Inn Hotel and Casino in Las Vegas, and the newly announced MGM Hotel and Theme Park are subsidiaries of MGM Grand.

#90176b0083 06/25/1990 ~Business Wire

NEWPORT BEACH, CA (JUNE 25) BUSINESS WIRE - In a unique and highly

profitable "East Meets West" turnaround last week, an American manufacturer of a revolutionary health diagnostic system capable of measuring electrical conductivity at acupuncture points, signed a $50 million Asian distribution deal with a major Korean firm.

Health Tech Inc. (dba Weltek, a subsidiary of Welcom Inc. of Newport Beach) developed an agreement with Technology Research Bank (TRB) of Seoul, Korea, to repackage, manufacture and distribute its Interro (TM) diagnostic system in Asia over the next three years.

In the letter of intent signed June 15, TRB agreed to pursue a marketing program targeted at $10 million in license revenues within the first 12 months and an additional $40 million over the remaining two years of the contract. TRB will also manufacture units to be sold by Weltek in the United States and other countries.

Health Tech's agreement was particularly good medicine for its Over-The-Counter stock (listed as Legacy Capital Corp.) as well. In addition to the distribution deal, TRB also agreed to purchase a $100,000 subordinated convertible debenture to be issued in Welcom (OTC: LCPC) convertible to common stock.

The Interro system is an advanced diagnostic and health screening computer-based unit capable of conducting several thousand individual medical tests through a non-invasive probe which measures electrical conductivity at specific acupuncture points on the patient's hands and feet. The Interro system has undergone evaluation in over 200 clinical sites throughout Europe and the United States.

According to Welcom Chairman Emery A. Rose, "This agreement substantially affirms the acceptance by the Asian medical community of the Interro technology which has its roots in acupuncture.

"However, the Interro system was developed in the West and this agreement validates the benefits of combining our diagnostic approaches for both Eastern and Western medicine."

#90176b0088 06/25/1990 ~Business Wire

SEATTLE (JUNE 25) BUSINESS WIRE - Aldus Corp. Monday announced shipment of Aldus PrePrint, a software program for producing color separations of entire Aldus PageMaker publications -- including text, graphics and photographs.

PrePrint provides a desktop color solution designed specifically to work with PageMaker 4.0, Color Extension, and individual TIFF (tag image file format) files. The product offers users a number of image enhancements and color controls, as well as a range of output options.

With PrePrint's image features, users can enhance their photographs before setting up PageMaker files for color separations. PrePrint enables them to soften or sharpen an image; improve its tonal range; enhance highlights, midtones and shadows; adjust lightness, darkness, contrast, and saturation levels; and remove dominant colors casts. Many of the adjustments can be made either automatically or with user control over each change.

Once the photograph has been adjusted, the user can review the changes on a PostScript-language color laser printer, or print color separations to an imagesetter. As another option, the user can separate the entire PageMaker publication -- complete with the newly enhanced photography -- or ask PrePrint to selectively mask all or individual photo images. This convenient masking feature enables a high-end prepress vendor or printer to strip in the images later for the best possible color and resolution. Or users can choose to print their PageMaker publication to disk and have separations prepared by any commercial prepress house or printer that uses the OPI (open prepress interface) standard compatible with PageMaker.

PrePrint also acknowledges the different features and capabilities of commercial printing presses by incorporating a number of printing controls. Working closely with the printer to understand special printing requirements, a user can designate printer marks, check image options (negative/positive, emulsion up/down), select screen angles and rulings for each ink, overprint selected inks, choose from four paper stock options, control the GCR (grey-component replacement), and compensate for dot gain.

Aldus Corp. (NASDAQ: ALDC) creates computer software that helps people throughout the world effectively communicate information and ideas. In addition to PrePrint and PageMaker, the Aldus product line includes Aldus FreeHand and Aldus Persuasion. Products from Aldus' subsidiary, Silicon Beach Software, include SuperPaint, SuperCard, Super 3D, Digital Darkroom, and the forthcoming Personal Press, which is expected to ship this summer. Aldus distributes both product lines through an international network of more than 16,000 dealers and distributors.

BEVERLY HILLS, CA (JUNE 25) BUSINESS WIRE - Arthur L. Price, Kenin Spivak

and Lorin Maazel were elected as new members of the board of directors of Baker Communications Inc. (NASDAQ:BAKR) at the company's annual meeting of stockholders held Friday, June 20.

Price is president and chief executive officer of Arthur Price Enterprises Inc., which is involved in television production and general business management. His company will handle the new Bob Newhart show. From 1970 to 1989, he was with MTM Enterprises Inc., serving as president from 1981 to 1989.

Spivak has been executive vice president of MGM/UA Communications Co. since October 1988. Prior to that he was vice president of Merrill Lynch Capital Markets in Westwood for three years and before that vice president of LCA/Highgate Pictures.

Maazel has been music director of the Pittsburgh Symphony Society since 1988. He conducts the Pittsburgh Symphony Orchestra in both live performances and recordings of classical music. From 1982 to 1984, Maazel was general manager of the Vienna State Opera, responsible for 1,100 employees and a yearly budget of $25 million. He served as music director of the Cleveland Orchestra from 1972 to 1982. He is a graduate of the University of Pittsburgh. Maazel currently makes his home in Monaco.

The three new members join Seth Baker, president and chairman of the board of Baker Communications, John J. Prior Jr. and Anthony Lanese on the board.

Baker Communications, founded in 1983, publishes newspapers serving Rancho Palos Verdes, Rolling Hills Estates, Rolling Hills, Palos Verdes Estates, Manhattan Beach, Hermosa Beach, El Segundo, Redondo Beach, Beverly Hills, Brentwood, Bel Air, Agoura Hills, Westlake Village and North Ranch in Los Angeles County, and Newport Beach, Huntington Harbour, Laguna Beach, Corona del Mar and Villa Park in Orange County.

NEWARK, CA (JUNE 25) BUSINESS WIRE - Margaux Inc. (NASD:MRGX), maker of advanced refrigeration systems for supermarkets, Monday reported a loss of $2,353,000 (35 cents a share) on revenue of $9,666,000 for its fiscal year ended March 31.

This compared to a loss of $5,442,000 (81 cents a share) on revenue of $17,406,000 for the previous fiscal year ended March 31, 1989.

The company successfully emerged from Chapter 11 bankruptcy in October 1989. In January 1990, Margaux began volume shipments to the Food Lion supermarket chain.

Margaux President Stephen H. Clark said that sales of Margaux's CVC continuously variable capacity refrigeration systems continued strong and that customer interest in Margaux's single stage R22 refrigeration systems seems to be growing.

R22 is a refrigerant that is less harmful to the ozone layer than other refrigerants commonly used in the supermarket industry.

UNIVERSAL CITY, CA (JUNE 25) BUSINESS WIRE - Cine-Source Inc. announced that its securities offering declared effective by the Securities and Exchange Commission on June 13, 1990, closed on June 22, 1990 for the full amount of $1.5 million.

The offering provides new financing to the company through the sale of 200,000 preferred units (NASDAQ: FILM) at $7.50 per unit. Each preferred unit consists of two Class B preferred shares and two preferred warrants each entitling the holder to purchase one Class B share at a price of $4. A copy of the company's prospectus for the offering can be obtained from J. Edmund & Co., 1431 Brush Hill Road, Milton, Mass., 02186.

Also, on June 13, 1990, the company's registration statement on Form S-18 registering the shares underlying the company's insider warrants and the Class A and Class B common stock warrants was declared effective by the Securities and Exchange Commission. A copy of the prospectus for this offering may be obtained from the company at 10 Universal City Plaza, Suite 1950, Universal City, Calif., 91608.

The company, through one of its wholly owned subsidiaries, Cine-Source Entertainment Inc. (CSE), is engaged in the acquisition of various rights to motion picture and television production properties and related entertainment products which it intends to develop, produce, distribute, and market to both domestic and foreign markets for theatrical motion picture release, home video release and network, cable, and syndicated television broadcast.

The company, through its wholly owned subsidiary, Texasville Inc. (T.I.), is currently co-producing the full length feature film "Texasville" which is the sequel to the Academy Award winning 1970 motion picture "The Last Picture Show." "Texasville" reunites director Peter Bogdanovich with the original cast members of "The Last Picture Show" including Jeff Bridges, Cybill Shepherd, Timothy Bottoms, Eileen Brennen, Cloris Leachman, and Randy Quaid.

Cine-Source is in development of three films, (1) "Black Orpheus," a feature length film inspired by the Academy Award winning foreign film "Black Orpheus" which was originally filmed in Brazil; (2) "Three Part Harmony," a new theatrical motion picture that combines mystery, music, and magic in a psychological thriller in which Irene Cara ("Fame" and "Flashdance") has agreed to star pursuant to a verbal agreement presently reduced to a written contract; and (3) "Five-O", a music driven story combining action, poignant drama and extraordinary rap music performances which will star RCA multi-platinum rap recording star, Kool Moe Dee, and will be directed by M. Neema Barnette based on a treatment by Richard Wesley.

NEW YORK (JUNE 25) BUSINESS WIRE - Based on a 1989 profit margin of 22.9 percent, LIN Broadcasting captured the No. 1 spot among 80 companies in ''Channels'' magazine's fifth annual financial ranking of TV's publicly traded corporations.

In the June 25 issue, editor-in-chief John Flinn notes that while LIN owns seven network-affiliated TV stations, its cellular phone operations actually drive the company.

A tug of war over LIN's cellular holdings, between BellSouth Corp. and McCaw Cellular Communications Inc., cost LIN almost $77 million and lowered its 1989 net income to $57.4 million, down from 1988's $82.1 ''But

clearly, the company is on a growth curve; it's now up to McCaw Cellular's Craig McCaw to keep it there,'' said Flinn.

''We've used other gauges in the past -- revenue growth, cash flow growth and net income growth -- but a ranking by profit margin (net income as a percentage of revenue) allows for a fully objective analysis and is an especially relevant tool, '' Flinn said.

The top 10 Achievers are:

	Profit Margin	Revenue	Net Income
LIN Broadcasting, New York	22.9 pct	$ 250.7	$ 57.4
King World Productions, New York	19.2	396.4	76.1
Lee Enterprises, Davenport, Iowa	16.0	269.4	43.0
Walt Disney, Burbank, Calif.	15.3	4,594.3	703.3
Washington Post, Washington, D.C.	13.7	1,444.1	197.9
TCA Cable TV, Tyler, Texas	13.5	79.1	10.7
Park Communications, Ithaca, N.Y.	12.3	152.5	18.7
Jefferson-Pilot, Greensboro, N.C.	12.1	1,140.2	137.7
Gannett, Arlington, Va.	11.3	3,518.2	397.5
Gray Communications, Albany, Ga.	10.2	28.5	2.9

NILES, IL (JUNE 25) BUSINESS WIRE - Midwesco Filter Resources Inc. (NASDAQ:MFRI) Monday announced it has signed a memorandum of understanding with United Fabricants Inc., of Agawam, Mass.

This preliminary agreement in principle calls for the purchase of certain assets and the business of United Fabricants for an undisclosed amount of cash.

United Fabricants, with recent annual sales in excess of $3 million, manufactures fabric filter bags used in baghouse industrial pollution control systems.

United Fabricants' current owners -- Frances ''Doc'' Blanchard and Emil Roymans -- will join Midwesco Filter Resources.

David Unger, chairman of Midwesco Filter Resources, said, ''We believe this move will add marketing strength. Doc Blanchard and Emil Roymans are both experienced in our industry and will benefit the Midwesco Filter marketing and management team.''

With locations in Niles, Ill., and Winchester, Va., MFRI is a vertically integrated manufacturer and marketer of filter bags, including its proprietary Seamless Tube filter bag, as well as related parts, accessories and services. The company's products and services are used primarily by operators of utility and industrial coal-fired boilers, incinerators and cogeneration plants and by producers of metals, cement, chemicals and other industrial products.

#90176b0194 06/25/1990 ~Business Wire
SAN JOSE, CA (JUNE 25) BUSINESS WIRE - Zentec Corp. (OTC:ZENT) Monday introduced a high-performance desktop computing and communications platform that can be configured as a DOS-compatible microcomputer, a graphics or Unix terminal and an X Windows-capable network device.

The new Genisys 9000 offers OEMs, VARs and system integrators a single

platform that supports a wide range of application design options.

The Genisys architecture is based on a ''wedge'' module containing logic, power supply and industry-standard keyboard and video interfaces. Any PC-compatible VGA analog monitor (monochrome or color) and AT-compatible keyboard work with the wedge. Operating system software and software to support four simultaneous DOS sessions is provided in nonvolatile memory.

Genisys 9000 uses the 16MHz Intel 80386SX processor and an extended VGA adapter for high performance. The platform includes up to 8MBytes of main memory for local processing of data, expandable to 16MBytes with an option card. One MByte of silicon disk in floppy disk format. Two RS-232C serial ports and one parallel port support applications that require connections to more than one host computer.

The unit accommodates two AT-style option cards. A numeric coprocessor, SCSI controller, and floppy disk controller are available as options.

Resellers can configure Genisys 9000 with custom firmware and standard hardware to support multiple sessions, multiple network connections, and multiple functions.

The wedge module contains up to 1MByte of nonvolatile solid-state memory to support local processing and mass storage without requiring a separate disk unit. This storage appears to the system as a floppy disk, and can be used to store DOS applications.

Because the silicon disk is nonvolatile memory-resident processing can continue even when the Genisys 9000 is operating in a standalone configuration, without network access.

Zentec ZM386 firmware embedded in the Genisys 9000 allows up to four DOS sessions to run concurrently. For example, X workstation, graphics terminal emulation, DOS word processing, and spreadsheet applications can run at once. In ZM386 mode, the user can hot-key one session at a time to the foreground, where it is available to the keyboard, mouse and monitor.

When a session is brought to the foreground, the monitor displays the current state of that application. The ZM386 user can assign communication channels, printers or add-in boards to a single session.

Zentec Corp. designs and manufactures modular terminal and desktop computing and communications platforms.

NEW YORK (JUNE 25) BUSINESS WIRE - Harold J. Krebs, the executive vice president of KB Communications Inc., a public Nevada corporation, Monday announced that the company will establish a new Class C warrant, which will be issued on a one-for-one basis for each outstanding Class A warrant that is exercised before the close of business on June 30, when the Class A warrants will expire.

The new Class C warrants and the common stock underlying the Class C warrants shall be registered with the Securities and Exchange Commission and shall expire two years from the effective date of their registration statement.

Each Class C warrant, when issued, shall be exercisable at a price of $7.00 per warrant into one share of the company's common stock and will be callable on 30 days' notice in writing to the holders of record thereof at a price of 1 cent per Class C warrant.

#90176b0266 06/25/1990 ~Business Wire
BEVERLY HILLS, Calif.- (JUNE 26) BUSINESS WIRE - International Lease Finance Corp. (NASDAQ:ILFC) Monday announced its fiscal year 1990 second quarter results including all-time high quarterly revenues and substantial

year-to-year gains in net income and earnings per share.

For the three months ended May 31, total revenues reached a quarterly record of $111.7 million, an increase of 28 percent versus the 1989 second quarter level of $87.1 million. The advance was due principally to strong gains in the rentals of flight equipment and interest and other categories. Second quarter pretax income rose to $39.4 million, up 58 percent. Net income climbed 57 percent to $24.7 million compared with $15.7 million in 1989.

Primary and fully diluted earnings per share, after giving effect to the preferred dividend requirements, were 64 cents and 62 cents, respectively, in the 1990 quarter versus 41 cents for each in the similar 1989 period, gains of 56 percent and 51 percent. Average shares outstanding during the quarter were 36,044,476 primary, up 10 percent, and 38,623,576 fully diluted, up seven percent, versus 32,756,160 shares primary and 35,997,471 fully diluted in 1989. Year to year, the effective tax rate dropped slightly to 37.4 percent from 37.5 percent.

For the current quarter, ILFC posted revenues from the rentals of flight equipment (operating leases) of $77.6 million versus $61.1 million in 1989 an increase of 27 percent. The gain was due to the continuing substantial growth in ILFC's aircraft fleet under operating lease between the two periods from 73 to 93 planes, up 27 percent, and to higher average monthly lease rates on the new rentals resulting from the on-going strength of the aircraft leasing market. Flight equipment marketing, coming off a particularly strong prior two quarters, fell 31 percent year to year to $13.5 million from $19.7 million. A major factor, however, in the quarter's revenue gain was the surge in interest and other, which rose 223 percent to $20.7 million from 1989's levels of $6.4 million. The jump included the earlier-indicated $12.6 million defeasance gains on Japanese leveraged leases.

The Company's second quarter composite interest rate was 8.75 percent on a May 31st debt financing level of $2.266 billion. Comparatively, the second quarter 1989 figures were 9.36 percent and $1.710 billion. At quarter-end 59.7 percent of ILFC's total debt was booked at fixed rates. For the quarter, annualized depreciation and amortization as a percent of average net flight equipment under operating lease also declined to 5.08 percent in 1990 versus 5.35 percent in 1989.

Six-month revenues for 1990 were $204.4 million versus $146.0 million in 1989, up 40 percent. Cumulative pre-tax income for the 1990 first half was $64.9 million versus $34.1 million, up 90 percent. Net income rose 91 percent from $21.5 million to $41.0 million. Earnings per share were $1.04 versus 53 cents primary, a gain of 96 percent, and $1.02 versus 53 cents fully diluted, up 92 percent. By segment for the first halves, operating lease revenues climbed 34 percent, flight equipment sales rose 6

percent and interest and other jumped 111 percent.

As of May 31, 1990, shareholders' equity for the company reached $535.0 million compared with the year-earlier level of $432.8 million, a rise of 24 percent. Year-over-year total assets climbed 34 percent to $3.139 billion.

In the 1990 second quarter, total aircraft in the ILFC fleet reached 96, up 16 percent with the net addition of 13 planes.

Said ILFC Chairman and Chief Executive Officer Leslie L. Gonda: ''Our business continues to move ahead on all fronts. We are particularly pleased with the sustained high level of demand for our aircraft which we are witnessing and which translates into more lease contracts, higher monthly rates and increased residual values.

''As of today, we are fully sold out through 1992 and have signed lease commitments covering 75 percent of our 1993 and 25 percent of our 1994 scheduled deliveries. We look for sustained results for the remainder of the year and going forward.''

As announced, ILFC has executed a definitive agreement to be acquired by American International Group Inc.

Based in Beverly Hills, Calif., International Lease Finance Corp. is the world's premier lessor and remarketer of advanced-technology jet aircraft.

LONG BEACH, CA (JUNE 25) BUSINESS WIRE - HQ Office Supplies Warehouse Inc. (OTC:HQOSA; Class A common stock/PSE:HQO) announced Monday that the underwriter for the company's recently completed public offering has exercised its option to purchase an additional 1,500 units at the initial offering price of $1,000 per unit to cover over-allotments.

Each unit consists of $1,000 principal amount of a 9.25 percent automatically convertible subordinated debenture, due June 1, 1995, and 200 Class C warrants to purchase 200 shares of Class A common stock. The closing of this transaction occurred Monday, June 25.

Robert J. McNulty, chairman, stated: ''HQ Office Supplies Warehouse will receive additional net proceeds of $1.35 million from the exercise of the over-allotment option. This amount, combined with the $8,635,000 already received from the offering, gives the company an excellent source of

capital to move ahead with the company's marketing strategy.

''In addition, if all Class C warrants are exercised, the company would receive additional net proceeds of approximately $14 million.''

Brad Tukey, president and chief executive officer, added: ''We are pleased with the high level of investor interest in HQ Office Supplies Warehouse. The success of our offering is a positive sign that the company's direction is on target with our current and new stockholders.

''I am confident that as we progress through 1990 and into 1991, our long-range goals will reward our stockholders with increased value.''

HQ Office Supplies Warehouse's merchandising strategy is to offer a wide selection of quality, brand-name office products, including general office supplies, business machines, office furniture and other business-related products at discount prices primarily to small- and medium-sized businesses.

The stores average at least 25,000 square feet of selling space with an inventory of approximately 8,000 stock-keeping units.

PORTLAND, OR (JUNE 25) BUSINESS WIRE - CMC ReSearch Inc., which develops specialized software for text and visual information retrieval, Monday introduced its newest product -- a CD-ROM compact disc containing John James Audubon's ''Birds of America,'' complete with bird calls and famous full color lithographs.

Called ''Multi-Media Birds of America,'' the single CD-ROM (compact disc-read only memory) includes the complete text -- 1,800 pages -- of the 1840 first edition ''Octavio'' set of Audubon's ''Birds of America.'' Also included are graphics of all original plates, including 500 full color bird lithographs, and high fidelity recordings of bird calls -- even of birds that have become extinct. The CD-ROM is designed for users of the IBM PC and compatibles and is designed for educational, entertainment and historical use.

''Multi-Media Birds of America'' utilizes CMC ReSearch Inc.'s DiscPassage indexing and retrieval software. A proprietary search routine that rapidly sifts through masses of data on a CD-ROM, DiscPassage allows nature and bird enthusiasts, students, teachers, libraries and history buffs to search the CD-ROM disc for words or phrases and locate them in

seconds in the author's original text.

In all its CD-ROM applications, DiscPassage's ability to perform high-speed searches allows it to put at the user's fingertips volumes of information containing charts, graphs, photographs and text. Time-consuming searches of printed information and microfilm can be reduced or eliminated. DiscPassage also allows users to display and print text, tables and images from the documents located, and the mulit-media aspect of CD-ROM allows the use of high fidelity audio.

CMC ReSearch Inc., Portland, develops and markets personal information retrieval products for personal computer CD-ROMs.

FORT WORTH (JUNE 25) BUSINESS WIRE - June 25, 1990--Paul I. Stevens, chairman and chief executive officer of Stevens Graphics Corp. (AMEX:SVGA & SVGB), announced Friday that the company has completed its acquisition of Post Machinery Co. Inc.

Post Machinery, located in Portsmouth, N.H., manufactures folding carton and corrugated box forming machinery and had sales in 1989 of $15 million. The terms of the acquisition were not disclosed, but it is non-dilutive to Stevens' earnings.

Stevens Graphics Corp., headquartered in Fort Worth, is the only U.S.-based company that designs, manufactures, markets, and services web-fed offset, gravure, flexographic and intaglio printing and packaging systems, collators, and related pre-press, printing and post-press equipment on a worldwide basis.

The company serves the packaging, commercial, business forms, and currency/securities segments of the U.S./North American and international printing and packaging industries.

Corporate strategy is to create, a larger company, by internal growth and by acquisition, of industry-related companies, that provide ''complete systems solution'' lines of products.

HOUSTON (JUNE 25) BUSINESS WIRE - Rice University, host of President Bush's 1990 Economic Summit, has selected Apple Computer Inc. as a partner in helping it to prepare for the media coverage and related whirlwind of activities that will coincide with the arrival in July of the commission chairman from the Common Market, and delegates from seven democratic nations.

Apple will provide the university with computers, printers and peripherals for customizing an on-campus computer system. This will provide summit participants and visitors access to information, as well as create a communications link between the international delegates attending the summit and their coordinating offices.

The Apple Macintosh IIci computer will be used in setting up the campus information centers and will provide linkage with both the Washington Summit Committee and the Houston Host Committee.

HyperCard program, Apple's powerful software tool that uses an index card method to store, connect and navigate through information, will be employed at centers throughout the university and at the George R. Brown Convention Center.

HyperCard will offer a number of functions, such as providing the media and other visitors with summit meeting agendas, background information about Rice University, Houston and the state of Texas.

The Economic Summit will offer an opportunity for Apple to showcase the ability of the Macintosh to successfully coexist in a multivendor environment.

In addition to Apple, the following companies are involved in the on-campus computer system: QuickMail (electronic mail system), provided by CE Software, will be installed in each Macintosh, which will then be the local hub for that particular site.

Shiva Corp. will supply Telebridge, which will link the various hubs to each other; and Liaison, provided by Infosphere Inc., will handle routing from the Telebridges (LocalTalk devices) to the Compaq Computers connected via Ethernet.

Farrallon Computing Inc. will provide Timbuktu Remote Access Pack w/V.32 Modem, which will allow remote trouble shooting at the various stations.

The Economic Summit will be held July 9-11 and will be attended by President Bush, the chairman of the commission of the European Community -- the 12-nation organization known as the Common Market -- and leaders from seven democratic countries, including the United States, Canada, Britain, France, West Germany, Italy and Japan.

Apple Computer Inc. has headquarters in Cupertino, Calif. Its Southern Operations unit is based in Atlanta and its Gulf Coast Region is based in Houston. The company develops, manufactures and markets personal computer systems for use in business, education, science and engineering, government and the home.

A recognized pioneer and innovator in the personal computer industry, Apple does business in more than 120 countries.

Rice University and Apple have maintained a long-standing relationship, with Rice being a member of Apple's consortium on education.

QUINCY, MA (JUNE 25) BUSINESS WIRE - Clean Harbors Inc. (NASDAQ:CLHB) Monday announced its results for the first quarter ended May 31, 1990.

Revenues for the first quarter were $34,536,000 with net income of $619,000, or 7 cents per common and common equivalent share, as compared to revenues of $33,049,000 with net income of $421,000, or 5 cents per common and common equivalent share, for the first quarter last year.

Alan S. McKim, chairman and CEO, said, ''We're very encouraged by the increase in demand for our services during the first quarter as compared to the winter quarter, and the progress we've made in connection with our plans to construct and operate a hazardous waste incinerator at our Braintree, Mass., treatment facility.''

During May, the company received favorable decisions from the Massachusetts Secretary of Environmental Affairs and the Massachusetts Hazardous Waste Facility Site Safety Council regarding its reports on the environmental, social and economic impacts of the proposed project. A

draft decision by the Massachusetts Department of Environmental Protection regarding the suitability of the site for hazardous waste incineration is expected in September.

CUPERTINO, CA (JUNE 25) BUSINESS WIRE - Tandem Computers Inc. (NYSE:TDM) and Systems Center Inc. (NYSE:SMX) Monday announced an agreement to jointly provide system and network management products for Tandem NonStop systems.

The new products will provide Tandem users with sophisticated automation services, thereby enabling increased efficiency and reduced operations costs. Based on NET/MASTER Network Control Language (NCL), an advanced management language, the new family of products will enable Tandem users to participate in a multivendor systems and network management environment.

Systems Center recently announced the acquisition of Software Developments International Pty. Ltd. (SDI) of Chatswood, New South Wales, Australia, and its NET/MASTER family of management products. Additionally, Systems Center acquired the distribution rights for NET/MASTER in March 1990.

The new products will extend Tandem's Distributed Systems Management family of products that consolidate network management functions into a single, unified view of a distributed online network.

Systems Center offers a variety of products for operating in multivendor environments, including NDM-Tandem, a product that enables NET/MASTER users to exchange Tandem data with IBM systems.

Financial terms of the agreement and product availability were not disclosed.

Systems Center Inc., founded in 1981, currently develops, markets, and supports network, systems and relational database software. Company headquarters are located at 1800 Alexander Bell Drive, Reston, Va. 22091. The telephone number is 703/264-8000.

Tandem Computers Inc. manufactures and markets computer systems and networks for online transaction processing, large database and UNIX applications. Company headquarters are located at 19333 Vallco Parkway, Cupertino, Calif. 95014. The telephone number is 408/285-6000.

NEW YORK (JUNE 25) BUSINESS WIRE - Hamilton Robinson & Co. Inc. Monday announced that it has completed the acquisition of Deutz-Allis Corp. from Cologne, West Germany-based Klockner-Humboldt-Deutz (KHD) for approximately $100 million.

With $300 million is sales, Atlanta-based Deutz-Allis Corp. manufactures and markets the well-known ''Gleaner'' combine and distributes a broad line of farm tractors, implements and parts. The company serves a network of approximately 800 dealers. Prior to its acquisition in 1985, the company was part of Allis Chalmers Corp.

The transaction was financed through equity funds provided by Hamilton Robinson and the sale of Deutz-Allis' receivables to Whirlpool Financial Corp. No senior or mezzanine financing was required. In addition to Hamilton Robinson, a group of Deutz-Allis managers will have an equity interest in the new, private company.

Deutz-Allis has approximately 1,000 employees at facilities in Norcross, Ga. (an Atlanta suburb), Independence, Mo. and Batavia, Ill. Management has emphasized that the company will continue business as usual, with the only significant change being the return of the firm to U.S. ownership.

Hamilton Robinson & Co. Inc. is a New York-based private investment firm. It manages a $40 million fund for management buyouts and other investments in middle-market growth companies.

ATLANTA (JUNE 25) BUSINESS WIRE - First Financial Management Corp. (NYSE:FFM) Monday announced that it has completed the acquisition of Nationwide Credit (Nationwide) of Atlanta.

Under the terms of the agreement, Nationwide shareholders received 1.3 million FFMC common shares and cash of $32 million. There is additional potential consideration of $30 million based on earnings achieved through 1994.

Nationwide is one of the largest debt collection and accounts receivable management companies in the United States. Nationwide provides a full range of customized debt collection services to many of the nation's largest financial institutions, retailers, government agencies and healthcare providers, and had revenues of over $30 million in 1989.

Its technological innovation in data/telecommunications and software development allows it to be a low cost provider of high quality collection services.

The acquisition of Online Financial Communications Systems Inc. (Online) of Atlanta, has also been completed. Online develops, markets and maintains computer software systems, as well as providing related services. It develops technological solutions for a variety of business communication needs.

The acquisition of the merchant credit card contracts of Bank of Boston by FFMC's susidiary, NaBANCO, was completed last week. Bank of Boston and its affiliates in five New England states provide Visa and MasterCard merchant services throughout New England, with a portfolio of approximately $500 million in annual credit card volume.

FFMC is an information services company which offers a broad range of data processing and related services to a large and diverse customer base. The company provides products and services to financial institutions, retail merchants, governments and other industries.

It is a leader in data imaging, micrographics, electronic data base services, and health and pharmaceutical claims processing, and is one of the largest merchant credit card processors in the country.

FFMC also owns Georgia Federal Bank FSB, the largest savings institution and one of the largest retail banks based in Georgia, and its subsidiary, First Family Financial Services, a major regional consumer finance company. Its common stock is currently traded on the NYSE under the symbol FFM. Its debentures are quoted through NASDAQ under the symbol FFMCG.

#90176b0650 06/25/1990 ~Business Wire

MILPITAS, CA (JUNE 25) BUSINESS WIRE - Cirrus Logic Inc. (NASDAQ:CRUS) Monday unveiled the CL-SH360 Integrated PC XT/AT Disk Controller, an

integrated circuit that allows manufacturers of Winchester, or 'hard' disk drives for personal computers to more than double the capacity of their drives without significantly increasing costs.

The single-chip CL-SH360 represents an enabling technology that will bring mainframe computer-level storage density and performance to the personal computer arena. It will, for example, allow the density of a single-platter 3-1/2 inch drive to go to 80 million bytes from the current high of 40 million bytes with no change in heads or media.

This increase in capacity will be required in the next generation IBM PC AT-compatible desktop, laptop, and notebook computer markets.

According to Cirrus Logic president Michael L. Hackworth: ''The CL-SH360 design is compatible with our industry-standard CL-SH260 and CL-SH265 controller chips, which preserves our customers' firmware investments.

The CL-SH360 is the first PC AT-compatible disk drive controller to implement ''on-the-fly'' Reed-Solomon code error correction. Error correction based on Reed-Solomon methodologies has been widely used in mainframe computer drives, and is recognized as the most advanced of such techniques. Traditional implementations require separate controller and error correction chips.

Cirrus Logic has been able to integrate both complete functions into a single-chip controller without sacrificing any performance, for the first time making it practical for small-form-factor embedded-intelligence drive applications.

Dataquest forecasts that more than 17 million 3-1/2 inch disk drives will be shipped in 1990, which is approximately 50 percent greater than 1989 shipments. Up to 80 percent of these disk drives are estimated to include an embedded disk controller.

The CL-SH360 Integrated PC XT/AT Disk Controller will be offered in a 100-lead quad flat pack (QFP). Samples will be available in the third quarter, with volume production planned before the end of calendar year 1990. In quantities of up to 1000, the CL-SH360 will be priced at less than $24.

Headquartered in Milpitas, Cirrus Logic develops and markets innovative, advanced standard and semi-standard semiconductors. Its products perform complex data communication, display graphic, mass storage, and printer peripheral control functions in high-performance personal computers, workstations, and other office automation products.

Cirrus Logic is the largest producer of controllers for the 3-1/2 inch and sub-3-1/2 inch hard disk drives used in PC/AT-compatible personal

computers, and is a leader in the SCSI disk drive interface controller chip market.

PHOENIX (JUNE 25) BUSINESS WIRE - America West Airlines (NASDAQ:AWAL/ PSE:AWA), in conjuction with the American Express Travel Related Services Co. Inc., is offering travelers the opportunity to purchase ''Fare Share'' certificates to help the Juvenile Diabetes Foundation International (JDF).

America West will donate $5 to JDF for each ''Fare Share'' certificate purchased with the American Express Card. ''Fare Share'' certificates allow travelers to purchase America West Airlines roundtrip coach tickets at a special, reduced price. ''Fair Share'' certificates must be ordered by July 31, 1990 and certain restrictions apply toward their purchase and redemption.

''America West is pleased to be able to contribute to an organization as worthy as the Juvenile Diabetes Foundation International,'' said Mark Coleman, senior vice president of sales and product development for the airline. ''With the help of American Express we're able to offer substantial savings to prospective travelers while providing needed research funds to find a cure for diabetes.''

The Juvenile Diabetes Foundation International, a non-profit organization founded in 1970, is the world's foremost non-governmental source of funding for diabetes research.

''Funds generated from programs such as this will help sponsor vital research that will further the great strides JDF has made in understanding the causes of diabetes and treating many of its complications,'' said Gloria Pennington, executive director of JDF.

''This year marks the beginning of JDF's 'Decade for the Cure,' a 10-year drive to win its fight against diabetes. The contributions from America West Airlines and American Express will greatly help JDF reach this goal.''

America West Airlines is the nation's 10th largest carrier, serving 60 destinations from coast-to-coast with daily service to Hawaii and Western Canada. The carrier operates a modern, fuel efficient all-Boeing fleet of over 90 aircraft including 747s, 757s 737s and de Havilland Dash 8s. The average age of the airline's fleet is approximately six years.

NASHVILLE, TN (JUNE 25) BUSINESS WIRE - The Hospital Alliance of Tennessee Inc., an organization representing the state's not-for-profit hospitals, has appointed Elliott Moore to the position of executive director.

Moore, of Bristol, Tenn., has been active in a variety of state and national health care public affairs activities for several years. In her new position, which she will assume July 1, Moore will direct all legislative, regulatory, financial, and public relations activities of the 8-year-old organization -- whose member institutions represent more than 55 percent of all licensed hospital beds in Tennessee.

In announcing Moore's selection, Alliance Chairman J.D. Elliott, the president of Nashville Memorial Hospital, said, ''We are simply delighted that the Alliance was fortunate enough to secure an individual with such a thorough understanding of and commitment to health care issues. There are a great many challenges confronting our institutions and we're confident Elliott Moore's experience and dedication will help us meet them.''

Moore, who has represented various health care groups before the Tennessee General Assembly through her own Nashville-based firm since 1985, previously served as executive director of the Tennessee Chapter of the National Association of Social Workers, currently is a member of that organization's national legislative committee, and was the administrator of Catholic Social Services in Knoxville.

''I'm extremely honored,'' she said of her selection. ''We have many important public policy concerns and priorities in Tennessee, but none is more important than affordable and accessible quality health care. Not-for-profit facilities historically have been the backbone of our hospital system. Every Tennessean has a stake in their well-being.''

Moore succeeds Peaches Simpkins in the position. Moore is married to former State Senate Majority Leader Carl Moore, a principal in The Fulton Group, Nashville.

#90176b0654 06/25/1990 ~Business Wire

FORT LAUDERDALE, FL (JUNE 25) BUSINESS WIRE - Encore Computer Corp., created as a result of the merger of real-time and parallel processing computer technologies, announces volume shipments of its CONCEPT 32/2000 high-end real-time systems.

Simultaneously, Encore announces significant price/performance enhancements based on performance accelerators and pricing incentives. The increased performance, lower price 32/2000s, stem from a tradition of providing 25 years of fully deterministic, real-time systems from real-time computing leader, Encore.

Performance enhancements such as the new scientific accelerator, optimizer toolset, and memory mapped controllers are highlights of the 32/2000.

George Teixeira, vice president, product planning and management said, ''Encore's focus is real-time and with the 32/2000's new accelerators, we have further strengthened our leadership role in meeting critical real-time needs. CONCEPT 32/2000 performance is up over 20 percent in selected applications, while prices have been reduced by as much as 30 percent.

The new memory mapped high-speed data interface (HSD) accelerates performance through memory mapping and by processing I/O directly to memory without CPU intervention for I/O servicing or interrupts. Memory mapping guarantees real-time applications.

The scientific accelerator is a product which accelerates the common transcendental functions (such as sine, cosine, etc.), thereby improving overall system performance in computationally intensive real-time applications. And the optimizer toolset improves performance by utilizing global optimizing technology at the object code level.

Encore's CONCEPT 32/2000 systems are designed for high intensity real-time applications and focus on deterministic (guaranteed, consistent performance of real-time tasks) computational and I/O power, memory bandwidth, fast interrupt response and context switch times.

Encore's innovative Memory-Centric design provides separate dedicated pathways for CPU/memory access and I/O processing, enabling real-time applications, such as flight simulators, to operate with guaranteed, deterministic response times by eliminating cache misses and data contention bottlenecks.

Encore's unique Reflective Memory System (patent pending) allows up to eight CPUs to work together as a tightly coupled, shared memory system which results in faster throughput and data turnaround time, increased performance, and greater flexibility.

Depending on application configuration, CONCEPT 32/2000 systems start at $125K.

Headquartered in Fort Lauderdale, Fla., Encore Computer Corp. designs, manufactures, markets, and supports a broad range of parallel real-time and information processing systems and solutions for commercial, technical and government markets worldwide.

GARDEN CITY, N.Y. (JUNE 25) BUSINESS WIRE - America gets one step closer to achieving an environmentally-sound workplace with the national introduction of Esselte EarthWise by Esselte Pendaflex Corp.

EarthWise is the first complete filing supplies system with paper manufactured from 100 percent recycled fibers. Most importantly, EarthWise Filing Supplies contain a minimum of 10 percent post-consumer material, best addressing today's recycling concerns.

The line also features a unique multilayered construction that delivers performance equal to that of standard grade filing supplies.

''We are extremely proud of the research and development efforts that produced the EarthWise line,'' said Theodore V. Kachel, president of Esselte Pendaflex Corp. ''This represents the first step in our commitment to develop filing supplies that contribute to America's efforts to preserve the natural environment.''

EarthWise will be marketed to environmentally-conscious businesses, retailers, consumers and government agencies. National distribution will being in August.

Today's heightened awareness of environmental issues has led consumers to seek products that in some way contribute to the preservation of the earth's natural resources. Since an enormous amount of these resources are consumed in the workplace, the introduction of the EarthWise line is regarded as a major innovation in the $100 billion office supplies industry.

The EarthWise line consists of the following products: hanging file folders; interior file folders (used inside hanging file folders); and standard file folders (used in non-hanging filing systems). All EarthWise folders will be available in five earth-tone hues: natural

brown; standard green; blue; red; and violet.

Esselte Pendaflex Corp. is a leading North American manufacturer and marketer of office supplies. The company offers many of the best known brand names in the industry, including: Pendaflex hanging file folders; Oxford general office supplies; Dymo labelmaking tools and tape; Boorum & Pease ring binders and bound books; and Amberg report covers and portfolios.

ORLANDO, FLA. (JUNE 25) BUSINESS WIRE - CrossCheck Technology Inc., San Jose, Calif., and the Advanced CAE division of Cadence Design Systems Inc. (NASDAQ:CDNC), Lowell, Mass., announced Monday that they have entered into a technology development and licensing agreement.

The agreement is aimed at integrating Cadence's Verilog hardware description language and the Verilog-XL digital logic simulation technology with CrossCheck's future test generation and fault simulation software products.

According to David Burow, president of CrossCheck, the technology agreement will allow Verilog users to take advantage of existing design descriptions and logic libraries, thereby eliminating the need for translations or the creation of new libraries when using the CrossCheck approach.

''The combination of Verilog and CrossCheck provides ASIC designers with a comprehensive solution to ASIC simulation, test and diagnostics,'' said Burow.

''Cadence recognizes that the CrossCheck technology is a significant breakthrough for handling test in the 1990s,'' said Prabhu Goel, president of Cadence's Advanced CAE Division. ''By offering users the capability to leverage the proven strengths of Verilog in conjunction with the CrossCheck approach, we feel we have addressed the needs of an emerging segment of ASIC designers.''

Verilog's large installed base of system- and ASIC-level designers includes more than 2,000 licenses and 10,000 users.

Cadence Design Systems Inc. is a leader in the design, development and marketing of software solutions for the design of integrated circuits and electronics systems. Cadence operates throughout the United States, Europe and Asia. The company is headquartered in San Jose.

CrossCheck Technology Inc. is a design automation company offering a breakthrough solution to two of the most serious problems facing ASIC users and suppliers: test and diagnostics.

CrossCheck's on-chip hardware structures and electronic design automation software produce highly testable ASICs with no performance penalty while significantly reducing development effort and time to market. CrossCheck is headquartered in San Jose.

REDMOND, WA (JUNE 25) BUSINESS WIRE - Microsoft Corp. Monday announced a program for extending and enhancing its support services for the Microsoft Windows graphical environment version 3.0.

Product sales of version 3.0 have outpaced even Microsoft's most aggressive sales predictions. To support the rapidly growing user base, Microsoft is inaugurating a 24-hour automated hotline, expanding support hours, adding phone lines, adding support staff and increasing electronic support. These changes will enable the company to handle up to 6,500 customer support calls a day.

Microsoft's Expanded Product Support Services

24-hour automated hotline. Effective immediately, Microsoft is launching a 24-hour support hotline service that is made efficient through the use of automated call-handling equipment. Callers are given a selection of support information that they can access by using the keys on a touch-tone phone for taped answers to commonly asked questions about Version 3.0. For the majority of callers, this offers a quick, convenient route for assistance. During normal business hours users can elect to be transferred to a support technician.

Expanded hours for support. Beginning July 9th, Microsoft Product Support Services will expand its hours of operation for Windows support. New hours will be from 5 a.m. to 7 p.m. Pacific time (8 a.m. to 10 p.m. Eastern time).

New support numbers and lines. Microsoft is adding two more support phones dedicated to Windows. The numbers are: 206/637-7098 for Windows interface support and 206/637-7099 for Windows applications support. These will be active beginning July 9th. During the next two weeks, Microsoft is also adding phone lines to Microsoft Support Centers to bring the total number of incoming lines to 271.

More support staff. Microsoft is also increasing the size of the support staff by about 60 people over the next 12 weeks to better serve Windows customers. This will bring the number of people supporting Windows customers to 210.

Electronic channels. Finally, Microsoft is making new electronic forums available, on CompuServe and GEnie, as alternative support channels for Windows customers.

Microsoft Corp. (NASDAQ:MSFT) develops, markets and supports a wide range of software for business and professional use, including operating systems languages and application programs, as well as books, hardware and CD-ROM products for the microcomputer marketplace.

MARLBORO, MA (JUNE 25) BUSINESS WIRE - Stratus Computer Inc. Monday announced that its fault-tolerant XA2000 Continuous Processing Systems will play a central role in Lloyd's of London's long-term business strategy to boost the overall efficiency and worldwide competitiveness of the Lloyd's insurance market.

Lloyd's of London has initially placed a $1.1 million order for the Stratus systems. The order represents the first phase of an estimated $3.4 million Stratus-based project, a comprehensive technology initiative to streamline insurance placement, reinsurance, and claims processing as well as to dramatically cut the cost of paper processing and redundant computer processing.

The Stratus XA2000 Systems will play a central role in building a new business infrastructure -- leveraging the well-established face-to-face methods of doing business at Lloyd's. Lloyd's will use the Stratus systems to link together the computer systems of the underwriters, brokers and third party processing bureaus who participate in its insurance market.

Lloyd's will then build and run advanced online transaction processing applications on the Stratus systems to streamline and assist the entire market's operations. Applications are under development now, with plans to go online later this year and in 1991.

The Stratus systems will provide online relational database and communications services to hundreds of Lloyd's brokers and underwriters who participate in the Lloyd's insurance market. The systems will link together the Lloyd's market participants in London via the London Insurance Market Network (LIMNET). LIMNET can also be accessed by Lloyd's brokers worldwide for the global interchange of information.

Lloyd's of London, which dates back three centuries to Edward Lloyd's coffee house, is a society whose 28,000 plus members accept insurance risks for their own account and risk.

Members are grouped into syndicates, and their worldwide business represents a premium income of more than $34.3 million every working day. Lloyd's business primarily includes marine, nonmarine, aviation, motor, and new technology insurance. Lloyd's is represented by brokers in 143 countries.

Stratus Computer Inc., is a leading supplier of fault-tolerant systems for critical online applications, such as online transaction processing and online data communication and telecommunication applications. The company offers the broadest range of fault-tolerant systems and maintains the highest standard for computer reliability. One of the fastest-growing companies in the industry, Stratus reported revenues of $341.3 million for fiscal year 1989, up 29 percent from $265.3 million in 1988.

#90176b0670 06/25/1990 ~Business Wire

STAMFORD. CT (JUNE 25) BUSINESS WIRE - Dr. Leonard Tow has been elected chairman of the board and chief executive officer of Citizens Utilities

Co. (NASDAQ:CITUA/CITUB) by the board of directors it was announced Monday by Ishier Jacobson, the company's president and chief executive officer, who is retiring June 30.

Dr. Tow is currently chairman, chief executive officer and a director of Century Communications Corp. (AMEX:CTY), and will continue in such offices with Century.

Dr. Tow, commenting upon his election, said, ''I accept with enthusiasm the challenge of following the brillant record set by Ishier Jacobson over the past 35 years.

Jacobson, Citizens' retiring chief executive officer, in congragulating Dr. Tow on his selection by the company's board of directors stated that, ''Leonard Tow combines the intellect, drive, quality of leadership, financial acumen and hands-on operating experience traditional to our comapny's top management. I'm confident that he will advance the record of Citizens as a premiere solid growth company.''

Dr. Tow was graduated from Brooklyn College and earned an MA and PhD from Columbia University.

As was announced previously, Daryl A. Ferguson has been named president and chief operating officer of Citizens, effective July 1.

Citizens Utilities, which in 1989 achieved its 45th consecutive year of record earnings, is a diversified operating public utility providing telecommunications - including cellular and paging - electric, water, wastewater and gas services in 12 states: Arizona, California, Colorado, Hawaii, Idaho, Indiana Illinois, Nevada, Ohio, Pennsylvania, Utah and Vermont.

The company is headquartered in Stamford.

#90176b0674 06/25/1990 ~Business Wire

ORLANDO, FL (JUNE 25) BUSINESS WIRE - Sony Microsystems Co., of San Jose, Calif., Monday introduced the most recent addition to its family of NEWS workstations - the NEWS 3710, which is based on the MIPS R3000 RISC (reduced instruction set computing) microprocessor from MIPS Computer Systems Inc. Sony Microsystems is in attendance in Orlando at the 27th ACM/IEEE Design Automation Conference.

The NEWS 3710 is a UNIX-based system ideal for use in electronic design

automation (EDA) applications and, because of its full support of Kanji ideograms, for software development and user interfaces that require the Japanese language.

Other key applications include electronic computer-aided design and engineering (CAD/CAE), computer-aided software engineering (CASE), molecular modeling and the modeling of physical processes, and sophisticated image processing. The system is also designed for use as a network server, particularly in Apple Macintosh computer networks using uShare Plus network communication software.

The NEWS 3710 offers the Motif graphical user interface (GUI) from the Open Software Foundation (OSF) and the set of X Window System windowing protocols from M.I.T., two basic standards for application software integration selected by the CAD Framework Initiative Inc. (CFI), a U.S.-based consortium of EDA vendors.

The NEWS 3710, utilizing the 20-MHz R3000 as its central processing unit (CPU), delivers 17 million instructions per second (MIPS) processing power. A 20-MHz R3010 co-processor provides 2.3 million floating-point operations per second (MFLOPS).

"This very affordable, high-performance RISC-based workstation provides users with the speed and power needed for the most demanding EDA applications, everything from chip design and simulation to PCB layout," said Kazuo Imai, Sony Microsystems president. "We've incorporated the R3000 architecture from MIPS Computer Systems because of the company's technology leadership in the rapidly expanding RISC marketplace."

Imai also cited the growing worldwide acceptance and availability of the MIPS Computer Systems microprocessors for Sony's decision to use them in its RISC workstations.

"Basing NEWS on MIPS RISC microprocessors, in combination with MIPS compiler software, is consistent with our strategy for expanding our market share in high-performance computing," he added.

Sony Microsystems Co., with headquarters in San Jose, Calif., is a division of Sony Corporation of America. Sony Microsystems markets a complete line of workstations and associated peripherals in the United States.

#90176b0676 06/25/1990 ~Business Wire

PALO ALTO, CA (JUNE 25) BUSINESS WIRE - Southwall Technologies Inc.

(NASDAQ:SWTX) Monday announced it has entered into an alliance agreement with General Electric Co. to utilize thin film coatings for aerospace applications.

Under the agreement, the two companies will negotiate definitive terms of a proposed joint venture to enhance, manufacture and market thin film products. Southwall will design production equipment for the joint venture and the two companies will also design, produce, test and market prototype thin film products under the agreement.

''This is an excellent alliance for Southwall,'' said Bruce J. Alexander, president and chief executive officer. ''Our strength is thin film coating technology. GE is a leader in the aerospace market. We will benefit from their size and marketing strength. They, in turn, could become increasingly competitive by using Southwall's technology in current and future aerospace applications.''

Alexander said both companies hope to have a formal joint venture agreement in place by the end of the year.

Southwall Technologies Inc. designs and produces thin film coatings. Southwall products are sold into the architectural, automotive and electronics markets.

#90176b0680 06/25/1990 ~Business Wire

ALAMEDA, CA (JUNE 25) BUSINESS WIRE - Ingres Corp. (NASDAQ:RELY) Monday provided Macintosh users with easy access to INGRES database engines by offering Graphical Query Language (GQL) and announcing its support for Apple Computer Inc.'s Data Access Language (DAL, formerly CL/1).

The announcement is a major component of Ingres Corp.'s desktop computing strategy for integrating the INGRES Relational Database Management System (RDBMS) with microcomputers, including Macintosh computers.

The GQL graphical query and decision support tool provides point-and-click access to INGRES Release 5 and Release 6 data from the Macintosh computer. GQL enables end users to integrate INGRES data with the decision support products they already use, including Microsoft Excel, Acius 4th Dimension, Claris Filemaker and Aldus Persuasion. GQL is available immediately from Ingres Corp.

DAL, Apple Computer's standard connectivity language for linking Macintosh

applications to host data, combines a standardized query language with network communication protocols. With the DAL server for VAX/VMS, many off-the-shelf Macintosh applications can immediately access INGRES Release 6.2 databases residing on DEC VAX/VMS hosts.

Ingres will distribute and support the DAL server for VAX/VMS. Personnel at Ingres and Apple field offices will be trained to demonstrate Macintosh-to-Ingres database connectivity through DAL.

Polaroid Corp.'s customer service group already employs Macintosh computers using Hypercard front ends communicating through DAL to an INGRES RDBMS running on a DEC VAX minicomputer. From a Macintosh, customer service agents can rapidly and easily access information from the INGRES RDBMS.

GQL is a graphical tool enabling Macintosh users to perform ad-hoc queries against INGRES Release 5 or Release 6 databases on VAX/VMS or UNIX-based host computers. GQL insulates Macintosh users from cryptic field names and SQL statements by building queries from a pictorial view of the database and its relational links.

With GQL, the MIS department can rapidly create a graphic template that provides access to corporate data. With that template, executives can easily create their own queries to fit their needs, and then integrate the data with desktop applications such as spreadsheets and charts.

GQL consists of three components: GQL/User, which allows end users to execute database queries to retrieve information from host computers; GQL/Admin, which allows MIS personnel to develop the graphical models used by GQL/User; and GQL/Design, a rapid prototyping tool for database designers. Ingres will distribute and provide customer support for GQL, which was originally developed by Andyne Computing Ltd. of Canada. Data Access Language

Data Access Language (DAL) now supports the INGRES Release 6.2 relational database.

DAL, a connectivity language that bridges the gap between SQL-literate host databases and the Macintosh, also enables Macintosh users to query the Ingres RDBMS Release 6.2 from Macintosh programs they already know and use, such as Hypercard, Acius 4th Dimension, Microsoft Excel and Odesta GeoQuery, and to integrate those applications with data on the host computer.

DAL enables in-house and third-party software developers to make the Macintosh a front end for the INGRES database, letting the Macintosh applications process queries and transactions while the host database supplies and stores the information. GQL System Requirements, Pricing and

Availability

GQL applications require a Macintosh system with one megabyte (MB) of RAM or more. All GQL applications are Multifinder-compatible. There are four components: GQL/Admin (require one administrator per workstation), priced at $1,995; GQL/Design (require one per designer workstation) for $995; and GQL/User (require one per query workstation) for $395.

A GQL Starter Set, which includes one Admin, five Users and one Design, is priced at $3,995. All are available immediately from Ingres Corp.

#90176b0681 06/25/1990 ~Business Wire

VANCOUVER, BC (JUNE 25) BUSINESS WIRE - TOTAL Energold Corp. (TSE: TGD, NASDAQ: TGDGF) announced Monday the completion of the previously announced equity placement in Plexus Resources Corp.

The transaction included the acquisition by TOTAL Energold of 6 million common shares of Plexus at CDN $3.00 per share and warrants to purchase up to an additional 2,150,000 common shares of Plexus at an exercise price of CDN $3.00 per share in exchange for CDN $16,500,000 and all of the issued and outstanding shares of Sovereign Explorations Inc.

As a result of this acquisition, TOTAL Energold holds approximately 51 percent of the outstanding shares of Plexus.

In connection with the transaction, Raymond C. F. Leeks, James H. Coleman, Frederick W. Davidson and H. Walter Sellmer of TOTAL Energold have been appointed to the board of directors of Plexus.

Salt Lake City-based Plexus has interests in several advanced mineral projects, including a 2.45 percent royalty and a 24.01 percent participating interest in the 2 million ton per year Denton-Rawhide heap leach operation, located 50 miles southeast of Fallon, Nev.

The Denton-Rawhide Project is in the start-up phase and has commenced precious metal production. The project is forecast to produce an average of 80,000 ounces of gold and 399,000 ounces of silver annually in the first five years of production. The potential for expanding reserves at Denton-Rawhide is considered excellent.

Other Plexus assets include a 51 percent interest in the Western World open-pittable copper deposit in Northern California and a significant equity interest in Crown Butte Resources Ltd., which owns the promising New World gold-copper-silver property in Montana.

TOTAL Energold Corp. is engaged in mineral exploration in Canada and the Western United States, and in oil and gas exploration and production in Canada through Ranchmen's Resources Ltd., a 56.2 percent owned subsidiary of TOTAL Energold.

TOTAL Compagnie Francaise des Petroles, one of the world's largest producers and marketers of energy, holds 69 percent of TOTAL Energold's common shares. TOTAL Energold's common shares are traded on The Toronto Stock Exchange (TGD) and through NASDAQ (TGDGF).

#90176b0688 06/25/1990 ~Business Wire

MEMPHIS, TN (JUNE 25) BUSINESS WIRE - Response Technologies Inc. (NASDAQ/NMS:BITXP, ASE:RTK) announced the opening of its IMPACT Center of South Broward, Hollywood, Fla., and the sale of its Franklin, Tenn., laboratory building.

On June 19, the IMPACT Center of South Broward started operations. The IMPACT (IMPlementation of Advanced Cancer Technology) Centers provide private practicing oncologists with the resources necessary to deliver advanced cancer treatments, principally through licensed pharmacies, laboratories and blood banks.

The company also operates IMPACT Centers in Memphis, Tenn., and Tampa, Fla., with a fourth center scheduled to open in Columbia, Mo., in July 1990.

Dr. William West, president, stated that he is ''extremely pleased with the early success of the Memphis and Tampa centers, and confident that the direction of the company is providing a valuable dimension in advanced cancer treatment.'' The company operates the Tampa and Hollywood centers under a joint venture agreement with Cancer Treatment Holdings Inc. (NASDAQ:CTHI).

On June 12, the company completed a transaction whereby the Franklin laboratory building and equipment were sold for $1.3 million under certain terms and conditions, none of which resulted in the receipt of immediate cash proceeds.

The company suffered a loss on the sale, which will be recognized in the quarter ended April 30, 1990. The loss is primarily attributable to the limited marketability of the building due to its specialized single-purpose design. The sale will relieve the company from bearing the substantial costs of operating the building.

The sale of the building represents the completion of one of the final major steps towards restructuring the company's operations away from patient funded research services to outpatient pharmacy and blood bank services in support of advanced cancer treatments.

Response Technologies Inc. common stock is traded on the American Stock Exchange (AMEX) under the symbol RTK, and its preferred stock is traded on the NASDAQ/NMS under the symbol BITXP.

CTHI's stock is traded on NASDAQ under the symbol CTHI.

NASHVILLE, TN (JUNE 25) BUSINESS WIRE - Truckstops Corporation of America (TA) joins the Comdata Alliance Fuel Network effective July 1, 1990.

Truckstops of America has 43 truck stops, 39 of which are full service locations, making it the largest centrally operated truck stop network in the nation. The operation covers 21 states and is characterized by consistently high customer service standards. TA intends to significantly expand both its geographic coverage and its customer base in the next decade.

The Comdata Comchek Alliance Network is a network of 1,700 truck stop locations across the United States. This exclusive network of high volume high visibility truck stops represents more than 60 percent of the fuel pumped by the more than 8,000 stops which accept the Comchek card.

Alliance truck stops provide trucking companies with a wide variety of facilities and fuel program options. Using this network, trucking companies have the freedom to choose facilities that best support their needs.

Truck stops that are members of the network participate in marketing support programs, such as the Alliance Network Directory, and receive comprehensive monthly management reports.

Comdata Corp. provides a variety of products and services to the

transporation industry, including fuel management, money transfer, phone services, load matching, permits and legalization services, fuel tax reporting, log auditing and audio and video safety training materials.

SEATTLE (JUNE 25) BUSINESS WIRE - The board of directors of Plum Creek Timber Company L.P. (''Plum Creek'') (NYSE:PCL) Monday announced that it has authorized the purchase by the company of up to one million units, or approximately 7 percent of Plum Creek's outstanding units.

''This action reflects the confidence of Plum Creek's directors and management in the prospects for the company,'' said David D. Leland, president and chief executive officer.

''Our decision is based on the company's continuing profitability, our strong financial position, and our commitment to maximize our unitholder's investment.''

The units may be purchased from time to time in the open market or in negotiated transactions. Any purchase will be made, as appropriate, over an indefinite period, depending on market conditions and other factors.

The purchases are expected to be funded from the company's current funds and additional internally generated funds.

Plum Creek is the second largest private timberland owner in the Pacific Northwest and one of the largest in the nation overseeing more than 1.4 million acres.

ITASCA, IL (JUNE 25) BUSINESS WIRE - Data General Corp. Monday announced its largest insurance industry reseller agreement, a three-year, $60 million agreement with Resource Information Management Systems (RIMS) for AViiON workstations and servers.

The announcement to offer RIMS' UNIX systems-based health benefits administration software, QicClaim/2, was made in a ceremony held at the annual conference of the QicClaim Client Association, a 150-member organization for QicClaim and QicClaim/2 users.

QicClaim/2, the newest claims processing system from RIMS, joins QicClaim, which is the most widely-used employee benefits software in the United States. QicClaim/2 runs on Data General's DG/UX version of the UNIX operating system. It is available for immediate shipment.

RIMS is a privately held company supplying software solutions and consulting services for the employee benefits and managed care markets. Founded in 1982, RIMS has ranked among Inc. magazine's top 200 fastest-growing privately held companies in the United States, and has consistently enjoyed record product sales each fiscal year.

Data General is the third-largest provider of computers for hospital information systems. It is also the fastest growing HIS hardware vendor, with 14 percent growth in annual sales, according to a study published last year by Sheldon I. Dorenfest & Associates. The company reported revenues of $1.3 billion in 1989.

#90176b0709 06/25/1990 ~Business Wire

MOLALLA, OR (JUNE 25) BUSINESS WIRE - Molalla Telephone Cooperative, as the first operatiing company to implement CCS7 capabilities on a small switch, has set the stage for the deployment of advanced telecommunications into rural America.

The cooperative completed a field trial this week of Northern Telecom's DMS-10 Enhanced 800 (E800) Services. Molalla Telephone Cooperative has contracted with Independent Telecommunications Network Inc. (ITN) located in Kansas City, Mo., to be its CCS7 network provider.

Common Channel Signaling System 7 (CCS7) is an intelligent network architecture which uses ''out-of-band'' signaling for call setup and routing. It improves the efficiency of the network and provides telephone operating companies with new revenue-generating opportunities.

E800 uses a database in the CCS7 network to allow end offices to translate and process originating 1+800 calls. Call routing and interexchange carrier information are provided to the DMS-10 for each call. With E800, telephone companies such as Molalla Telephone Cooperative can collect additional revenues for providing this service. E800 is expected to be deployed nationwide in 1991.

Future services will allow Molalla Telephone to offer its customers automated credit card and collect calling and third-number billing. The cooperative also plans to implement enhanced 911 service.

To implement E800, Molalla Telephone upgraded its switch to the DMS-10 404.2 software release, added CCS7 Message Processing Unit hardware, and leased facilities to access the ITN signal transfer point (STP).

ITN, a leading CCS7 network company, provides its switching to Independent Telephone Companies, RBOCs, OSPs and Cellular Telephone Companies. ITN's network became operational this spring, with Signal Transfer Points and colocated Service Control Points (SCP) at Matoon, Ill., and Rock Hill, S.C.

The incoming 800 call set-up messages are routed to the ITN STP pair. The 800 number is then translated at the ITN SCP into a number assigned to the Molalla serving area. This micro-second transaction then routes the call to its destination.

Molalla Telephone is a member of the Oregon Telephone Association, a group of 21 rural operating companies joining together to offer CCS7 and other sophisticated telecommunications to their rural serving areas.

#90176b0710 06/25/1990 ~Business Wire

NEEDHAM, MA (JUNE 25) BUSINESS WIRE - Cognex Corp., a leading manufacturer of machine vision systems, today announced that Dr. Robert J. Shillman, chief executive officer and founder of the company, was named New England's ''Entrepreneur of the Year'' in High Technology during a regional ceremony co-sponsored by Ernst & Young's Entrepreneurial Services Divison Inc. magazine and Merrill Lynch.

Dr. Shillman was chosen from more than 150 New England entrepreneurs for his company's success in the field of machine vision -- computers that can ''see.''

Starting in 1981 from a small office in Boston, Dr. Shillman invested his life's savings to develop computers that could replace human eyesight in factory environments by recognizing, identifying, measuring and inspecting objects.

The company began by selling and installing custom vision systems to end users, which required Cognex engineers to spend a considerable amount of time customizing each system to meet the needs of the individual customer. Within four years, it became clear to Cognex, and the more than 100 vision companies that had entered the market, that the strategy was not profitable.

In 1986, therefore, Cognex launched a new marketing strategy. It began developing and selling standard ''vision engines'' for system integrators and large OEMs to adapt to their own products, thus eliminating the need for substantial service and support.

Today, only nine years after its start, Cognex is recognized as the world's leading supplier of machine vision systems. Record sales and earnings in Cognex's most recent quarter represented the company's twelfth consecutive period of profitability and increased revenues.

Sales in 1989 were $15.9 million, up 50 percent from 1988. Cognex's stock, which began trading publicly in July 1989 at $11.00 per share, currently trades at approximately $30.00 per share, up 173 percent. The company has also made successful in-roads to the European and Japanese markets.

Dr. Shillman will be inducted into the Hall of Fame of the Institute of American Entrepreneurs during a national ceremony scheduled for November 2-4 in Scottsdale, Arizona.

Cognex Corp. designs, develops, manufactures and markets a family of machine vision systems -- computers that can ''see.'' The company's products are used to replace human vision in a wide range of manufacturing

processes in the semiconductor, electronics, pharmaceutical and aerospace industries.

BELLEVILLE, Ill. (JUNE 25) BUSINESS WIRE - William S. Badgley, chairman of the board of Magna Group Inc., and Warren L. Martin, chairman of the board and president of Magna Bank of Springfield, announced that Magna Bank of Springfield had been successful in bidding for the insured deposits of Citizens Savings & Loan Association FA, Springfield, Ill.

The failed institution will operate on Saturday, June 23, 1990, as offices of Magna Bank of Springfield, with their normal hours of operation. ''We look forward to serving the customers of Citizens Savings and pledge to deliver quality products and services.

''We are delighted to welcome the Citizens Savings customers to Magna Bank of Springfield, which is an affiliate of Magna Group, Inc., one of the strongest and safest bank groups in Illinois,'' said Martin.

''Citizens Savings has two strategic locations, one in downtown Springfield and the other on the west side of Springfield in the White Oaks Mall. Both of these locations will enhance Magna's ability to service its customers in the Springfield area,'' said Martin.

Magna consummated the transaction as of the close of business on Friday, June 22. The insured deposits of Citizens Savings have been transferred to Magna Bank of Springfield. Magna Bank will have options to acquire certain assets of Citizens Savings.

As of March 31, 1990, Citizens Savings had total assets of approximately $71 million. The resulting combination will make Magna Bank of Springfield's assets approximately $290 million.

Magna Group Inc., a multi-bank holding company headquartered in Belleville owns 8 banks, now with 50 locations throughout central and southern Illinois, a trust company and a data processing company.

The common stock of Magna Group is traded in the over-the-counter market and its quotations are reported in the National Market System of the National Association of Securities Dealers Inc. Automated Quotation

system (NASDAQ) under the symbol MAGI.

MANSFIELD, Mass. (JUNE 25) BUSINESS WIRE - Codex Corp. Monday announced new products, packaging, pricing strategies, and industry relationships, expanding even further its ability to provide network management solutions to organizations of all sizes.

''Codex's goal is to offer quality products that provide superior network management functionality at an affordable price, while giving customers flexibility in purchasing optional features,'' said Ray Moore, general manager of network management systems.

''We are not hindered by an alliance to a particular computer product or carrier. Therefore, we can focus on the broader issue of managing the entire spectrum of wide area network technologies for operational and planning information, while at the same time providing functional interfaces to the industry's enterprise management systems.''

The following announcements were made by Codex;

-- A new packaging and pricing structure for the 9800 Series Integrated Network Management System. Now companies with medium- and large-sized networks can get high-level integrated network management functionality from 9800 systems configured to meet their specific requirements, and expand the systems incrementally as their networks grow.

-- The introduction of Release 4 of the 9300 Series Integrated Network Management System. With the new release, Codex dramatically reduces the entry price and adds remote access capabilities to meet the needs of companies with small- and medium-sized networks.

-- The introduction of the 9110 Dial Monitoring System, the first in a family of Codex systems for management of dial modem networks.

-- Membership in the OSI/Network Management Forum, a group of leading industry vendors with the goal of insuring the development of compatible network management products based on OSI standards. Codex will represent itself and its parent company, Motorola Inc., in Forum activities. Both companies have led in the development of OSI-based products and network management standards.

-- Commitment to develop an interface to AT&T's Unified Network Management

Architecture (UNMA). Codex already is developing an interface to Digital Equipment Corp.'s Enterprise Management Program and has delivered an interface from the Codex 9800 to IBM's NetView.

''In most cases, Codex already provides all the network management functionally required to manage a wide area network. If the customer chooses an enterprise management system, we will do what we do best -- collect information from multiple locations and products in a wide area network, and supply it to the enterprise manager,'' Moore said. ''By building quality products that support both open and de facto standards and enhance IBM, Digital, and AT&T systems, Codex will give customers the tools they need to manage all physical and logical network domains in a multi-vendor environment.''

Codex Corp., a subsidiary of Motorola Inc., is a leading supplier of network products and integrated network solutions. Offerings include network management systems, T1/E1 switches, X.25 networks, multiplexers, DSU/CSUs, modems, LAN internetworking devices, and professional services.

NEW YORK (JUNE 25) BUSINESS WIRE - Community National Bancorp Inc. (AMEX:CNB), at its annual shareholders meeting on Saturday, announced that its board of directors had declared a five percent common stock dividend.

The dividend, the first paid by the company since a cash dividend in 1975, is payable July 25 to shareholders of record July 3.

Also at the annual meeting, held in Staten Island, shareholders approved a proposal to reduce the company's authorized shares of common stock from 50 million to 15 million. The company had approximately three million issued shares of common stock as of June 22.

Community National Bancorp is the holding company for Staten Island-based Community National Bank and Trust Co. of New York.

Howard R. Curd, chairman of the board of Community National Bancorp, said the dividend payment reflected the board's confidence in the company's continuing growth and was an expression of appreciation to loyal shareholders for their support over the years.

''This common stock dividend is yet another positive sign of our company's substantial progress and sound financial condition,'' said Curd. ''We are extremely pleased to provide this dividend to our loyal shareholders.''

John J. Amodio, president and chief executive officer of Community National Bancorp, said the reduction in authorized common stock will result in tax savings for the company since, with fewer authorized shares, it will pay a lower franchise tax to the state of Delaware, where the company is incorporated. The franchise tax is calculated using a formula based in part on the number of shares of capital common stock authorized by a company.

In addition, Amodio said the company's board believes 15 million authorized shares of common stock is sufficient should there be a need to issue additional shares for corporate purposes.

In another action, shareholders re-elected its seven current directors to one-year terms.

Re-elected as directors were Curd, chairman of the board and chairman and chief executive officer of The Jesup Group Inc.; J. Stanley Shaw, vice chairman of the board and senior partner, Shaw, Licitra, Esernio & Schwartz, P.C.; Amodio, president and chief executive officer of Community National Bancorp; Thomas E. Constance, partner, Shea & Gould; Herbert Fisher, chairman and chief executive officer, Jamesway Corp.; Robert J. Hasday, partner, Shea & Gould; and Albert V. Maniscalco, consultant for education and hospital information and former Staten Island borough president.

At a directors' meeting following the shareholders' meeting, the re-elected board re-appointed Amodio president and chief executive officer.

LOS ANGELES (JUNE 25) BUSINESS WIRE - Occidental Petroleum Corp. announced Monday that a step-out well in the Saltire field in the British North Sea tested at stabilized daily rates of 9,635 barrels of high-quality oil (43 degrees API) and 13 million cubic feet of gas through a 72/64-inch choke.

Occidental said the well, 15/17-22Z, expands the size of the Saltire field and increases estimated reserves by more than 30 percent to 130 million barrels.

Dr. Armand Hammer, chairman and chief executive officer, stated, ''I am delighted by the latest well test results at our Satire field. This is a clear indication of the high potential of our North Sea blocks and we expect to continue to find more oil.''

It is proposed that the $600 million Saltire field development will involve a new platform linked via the Piper production facilities to the existing pipeline system leading to the Flotta oil handling terminal in Orkney. Production is due to commence in the second half of 1992.

Saltire is located 120 miles northeast of Aberdeen on block 15/17 in the UK Sector of the North Sea.

Occidental is operator and has 36.5 percent interest in the field. In addition, Texaco Britian Ltd. has 23.5 percent, and LASMO North Sea PLC and Union Texas Petroleum Ltd. each have 20 percent.

GREENWICH, CT (JUNE 25) BUSINESS WIRE - Texas Instruments (TI) has entered into an agreement with Control Data Corp. to acquire Control Data's insurance investment system business and related technology.

This includes the current product line, customer base and the people responsible for marketing, customer support and new product development.

The new product development-related work, business, employees and technology will transfer to TI immediately upon closing, expected by the end of June. The current Investment Management Information System product business and employees are scheduled to transfer to TI at year end.

On schedule for delivery by Control Data to customers in July is the major functional enhancement to the current Investment Management Information System product. Work on the system's annual schedule D regulatory enhancement, which is scheduled for delivery in the fourth quarter of 1990 also proceeds on schedule.

The new business will become a part of TI's Information Technology Group (ITG), which markets Texas Instruments' Information Engineering Facility computer-aided software engineering product.

The Investment Management Information System, currently marketed by Control Date's Business Information Services business unit, integrates portfolio management and investment accounting functions. The system is used by

leading insurance companies.

Texas Instruments Inc. headquartered in Dallas, is a high-technology company with sales and manufacturing operations in more than 30 countries. TI develops, manufactures and markets semiconductors, defense electronics systems, software productivity tools, computer systems and peripheral products, industrial automation and control systems, electrical controls, metallurgical materials, and consumer electronic products.

Business Information Services, headquartered in Greenwich, is a leading provider of decision-support software and services for financial institutions, government agencies and Fortune 500 companies.

Control Data Corp. is a provider of data solutions that integrate hardware software and services to meet customers' complex data collection, processing and communications needs. Its businesses include the Arbitron Co., Automated Wagering, Business Management Services, Computer Products, Data Services, Empros Systems International, Government Systems and Microgrosis.

INDIANA, PA (JUNE 25) BUSINESS WIRE - Biocontrol Technology Inc. (NASDAQ: BICO), a developer and manufacturer of biomedical devices, announced Monday that the company will have a working prototype of its new noninvasive glucose sensor in August of this year.

Management at the company said the device is a major breakthrough in the management of diabetes, a disease that afflicts 70 million persons worldwide.

To make life easier for diabetics, the company's sensor will measure glucose levels simply by being held against a person's skin, replacing the current method of finger pricking for blood glucose testing. The device operates by omitting a flow of energy directly into the patient's body tissue.

The sensing device registers numerically how the energy flow interacts with the tissue, indicating the glucose level in the body. An unlimited number of readings could be taken daily, according to the company, since no blood sampling is required.

Two models of the glucose sensor are planned. The first model, scheduled to be put into production at the company's Indiana, Pa., facility in late 1990 or early 1991, is a desktop unit appropriate for clinical use. A smaller, more portable device for patient self-testing will go into production late in 1991.

Diasense Inc., a subsidiary of Biocontrol also located in Indiana, Pa., will coordinate the marketing of the devices.

MCLEAN, VA (JUNE 25) BUSINESS WIRE - Unisys Corp. announced Monday that the Systems Support Division of its Systems Management Group (SMG) has been awarded a contract for data processing operations and software support services by the U.S. Department of State Office of Operations.

Unisys SMG will support the State Department's computer network, which links four regional offices and three overseas sites to headquarters in Washington, DC. The contract calls for SMG to deliver services as specified by task orders that the State Department will issue. The value of the three-year contract could reach $1.5 million.

Unisys SMG also provides support services to the Department of State Office of Foreign Missions. Headquartered in McLean, Va., SMG provides professional services, systems and network integration, and facilities management to users of large information systems in government and commercial enterprises.

HOUSTON (JUNE 25) BUSINESS WIRE - The creators of the first line of fresh, vacuum-packed, nutritionally-labeled lite beef, marketed as Golden Trim, America's Lite Beef, Monday announced that they are forming a new company to produce and market lite beef as well as case-ready cuts of other grades of beef.

This action follows the recent termination of a two-year joint venture with Sun Land Beef Co.

Vernon J. Swanson, who has been the principal developer of the lite-beef

program, will head the new company as chairman and chief executive officer. Swanson said that the management group is in the process of raising capital and expects to be in operation before year-end under the corporate name CR Limited.

Swanson said that when the introduction of Golden Trim was announced last fall, it was the subject of massive press coverage in the United States and overseas, prompting a flood of consumer calls to the company and to supermarkets all over the country. The reaction from consumers, in turn, spurred a succession of supermarket chains to offer the product line.

The strong response, he said, confirmed that there is enormous public interest in a good-tasting, fresh lite beef arising out of growing health concerns over high levels of dietary fat. He said that since 1976 these concerns have resulted in a 30-pound per-capita drop in U.S. beef consumption, representing a market gap now totaling more than $1.5 billion per year.

According to Swanson, CR Limited will embark on a two-tier strategy. Lite beef, for consumers who have reduced beef consumption because of health concerns, will initially form the nucleus of the company's product line.

#90176b0747 06/25/1990 ~Business Wire

NEW YORK (JUNE 25) BUSINESS WIRE - Lescarden Inc., a biomedical research company, announced certain corporate managerial changes on June 19.

The announcement was made in the course of a company sponsored conference reporting upon various on-going clinical trials of the company's Catrix material in the treatment of patients with renal cell carcinoma and in individual's with non-healing wounds of long duration.

Dr. John F. Prudden announced at the conference that he had recommended to the company's board of directors that he be replaced as president and chief executive officer by the company's general counsel (and director) Gerard A. Dupuis. Prudden expressed a desire to devote more of his time to the company's scientific endeavors. Prudden remains chairman of the board.

Dupuis, age 52, has been associated with Lescarden in various capacities

since 1980, most recently as General counsel and chief financial officer. He has been a director since 1986. In this period he has become thoroughly familiar with the company's operations and with the scientific studies being conducted.

At the same time, Prudden announced that Martin J. Rosenberg, Ph.D., who has been employed by Lescarden since November of 1988, has been formally appointed as senior vice president for research and development.

He will oversee all laboratory research being conducted on Catrix by various university contract laboratories.

Rosenberg, 54 years old, received his Ph.D. from New York University where he also became Associate Research Professor, in the Department of Dermatology. Since joining Lescarden, Rosenberg has retained an adjunct appointment at N.Y.U.

The company also announced the addition of a new board member in the person of Dr. Abraham Mittelman who is a professor and attending physician at the Westchester County Medical Center and the New York Medical College in Valhalla, N.Y. where is director of Experimental Oncology. Mittelman is also adjunct attending physician for Chemotherapy Development at Memorial Sloan-Kettering in New York City. Mittelman will be responsible for the conduct and oversight of all of Lescarden's Catrix clinical trials and regulatory affairs in Canada and the United States.

Lescarden was also pleased to announce the addition of Robert Gracy, Ph.D. to its Scientific Advisory Board. Gracy is chairman of the Department of Biochemistry at North Texas State University in Forth Worth, Texas. Gracy brings an exceptionally broad background in the separation of biologically active molecular entities from biological tissues such as cartilage to Lescarden's Advisory Committee. Catrix fractionation work will continue under Gracy's supervision at North Texas State.

The Lescarden sponsored conference on June 19th consisted of presentations by those clinicians investigating Catrix efficacy in renal cell carcinoma, the acceleration of wound healing, and the modulation of Retin-A irritation.

MURRAY HILL, NJ (JUNE 25) BUSINESS WIRE - C. R. Bard Inc. (NYSE-BCR) announced Monday that it will submit to the Food and Drug Administration an application for approval of the next generation Solo balloon angioplasty catheter.

It expects to submit the application by the end of 1990. Bard notified the FDA that it would pursue approval of the newer product rather than conduct a clinical test on the previously marketed Solo catheter.

On June 1, Bard announced it had been notified by the FDA that a prospective clinical trial would be needed for approval of the existing Solo device.

The company intends to conduct a clinical trial in the United States under an approved investigational device exemption (IDE) as part of the application to the FDA. Separately, Bard said that on June 22 it received as expected aletter from the FDA requesting a prospective clinical trial on its Sprint balloon angioplasty catheter.

The company is currently reviewing the Sprint letter to determine what action to take. Both the Solo and Sprint catheters had been withdrawn from the market voluntarily in March 1990, after an internal Bard investigation found that modifications had been made without FDA approval. C.R. Bard Inc., headquartered in Murray Hill, N.J., is a leading multinational developer, manufacturer and marketer of health careproducts.

RADNOR, PA (JUNE 25) BUSINESS WIRE - After more than 18 months of discussions, the major television networks have decided to pool their Election Day research and exit polling.

Under the direction of the Voter Research and Surveys (VRS) board, all data collection and survey research work will now be performed by Radnor, Pa.-based Chilton Research Services.

In the past, each network had to fund its own polling efforts. Under the new procedure, the four major news networks -- ABC, CBS, NBC and CNN -- will share the cost and research data.

Warren J. Mitofsky, formerly the executive director of the election and survey unit at CBS News, is head of VRS, an independent organization designed to oversee and manage the election polls for the networks.

According to Mitofsky, as reported in the May/June 1990 issue of The Public Perspective, ''The new arrangement will be good for the public. They are going to get one high quality product and they're going to get it on a continuing basis because now the cost is reasonable.''

Mitofsky thinks that pooling the research will result in a ''much more concentration on analytical work.'' With the election results made available to all networks at the same time, ''they will be competing on the quality of their analysis.''

Representatives from each of the networks serve on the VRS board, which voted to award the survey contract to Chilton. Under the terms of the contract, Chilton Research Services will have exclusive responsibility for all data collection for Election Day and exit polling that takes place from June 1990 through December 1992.

Dan E. Hagan, vice president and group manager for Chilton Research Services, cited Chilton's experience as the prime consideration in the VRS board's decision to award the contract to Chilton.

''During the 10 years that we've been doing the exit polls for ABC, we have produced an enviable track record in performing this immense survey effort,'' Hagan said.

In the most recent 1988 General Election, Chilton collected and processed more than 91,500 ballots on Election Day so the results could be used by ABC News in its Election Day coverage.

Marjorie Michitti, vice president and general manager of Chilton Research Services, described the Election Day polling project as a ''challenging and rewarding one'' that poses unique demands for accuracy and fast turnaround.

''With success measured in terms of delivering such a vast amount of data with precision and speed, the exit polls are a real test of even a large

research organization such as ours,'' Michitti said. ''We are honored that the VRS board selected us to perform this important work.''

Chilton Research Services, a full-service research firm headquartered in Radnor, is an operating unit of Capital Cities/ABC Publishing, a division of Capital Cities/ABC Inc.

NEW YORK (JUNE 25) BUSINESS WIRE - CMP Publications Inc. Monday announced the launch of Network Computing, the first magazine devoted exclusively to the use of networked computers to solve business problems.

Network Computing responds to the overwhelming movement by businesses to network their diverse computer resources -- including personal computers, workstations, minicomputers, mainframes, software and peripherals -- in order to use information more strategically.

''The days when mainframes, minis and PCs served in isolation are over,'' said CMP vice president and group publisher Jack Dolce. ''Network Computing is targeted at computing's next generation that already sees integrated computing as a quantum leap in productivity.''

Al Perlman, vice president and editorial director of CMP Communications and Information Systems Group, who is associate publisher of Network Computing, said ''In the 1990s, nearly every new computer product -- from applications software of even mainframes -- will be designed for use in a network environment.''

The monthly will debut in October with an expected 100 pages, according to Perlman.

David Strom, executive editor of PC Week, has been named editor and Tony Rizzo, formerly senior technical editor of PC Magazine, has been appointed as executive editor.

Monthly columnists will include two nationally recognized industry authorities: Craig Burton, one of the founders of Novell Inc., who currently is chief executive officer and principal analyst for Salt Lake City-based Clarke Burton Corp. and Mark D. Stahlman, research analyst responsible for desktop computer systems at Alex. Brown & Sons in New York.

Timothy Haight, West Coast bureau chief of CMP's CommunicationsWeek, has been named editor-at-large.

Pete Maclean, a well-known freelance writer on computer networking, will be a contributing editor.

Beth A. Haggerty, West Coast regional sales manager for CMP's InformationWeek, has been named national sales manager.

The prototype, designed by Peter Deutsch of New York-based Deutsch Design Inc. will be unveiled July 2.

Network Computing will have a controlled circulation of 175,000 professionals involved in the purchase of computers, peripherals and software used in a network environment.

CMP Publications Inc. with headquarters at 600 Community Drive, Manhasset, N.Y., is a leading business-to-business publisher. The company publishes 14 other newspapers and magazines in high technology, travel and health.

#90176b0764 06/25/1990 ~Business Wire

NEW YORK (JUNE 25) BUSINESS WIRE - BidNet, the nationwide government bid service, has been purchased from Dun & Bradstreet by International Data Base Corp.

Financial terms of the purchase were not disclosed.

BidNet is the only comprehensive source for bids from local and state governments, as well as schools, colleges and other non-profit purchasers nationwide.

When an invitation for bid issued by a purchasing agency is matched through a computer data base with a subscriber's product, the service transmits a ''Bid Alert'' notifying the vendor of the opportunity, he said.

International Data Base is offering an enhanced BidNet service priced so that it will be particularly attractive to small and medium-size businesses, according to Newman. ''By doing this, more companies will be able to get involved in the important government business with a very limited investment,'' he said.

BidNet will track contract opportunities for a subscriber's products on a

regional or nationwide basis. As an added service, BidNet will provide subscribers, free of charge, with Bid Alerts on Federal government contracts.

Subscribers and participating purchasing agencies will receive ''BidNet Link,'' a quarterly newsletter with helpful articles by purchasing experts. Purchasing agents will also be able to use an electronic information exchange dedicated to their needs and will have access to a national database of minority and women-owned businesses.

International Data Base Corp. has extensive experience in data base management and government procurement. Stanley Newman, president, served as director of the International Division of the New York State Department of Economic Development for 16 years.

Programs under his direction included the gathering and publishing of sales leads from all over the world for distribution to New York State companies. Peter Ansell, executive vice president and operations manager, was formerly deputy commissioner of New York State's Division of Economic Research and Statisitics.

He has wide experience in data base and computer network development, and developed New York State's highly-regarded computer-based international trade and referral system.

Interested vendors and purchasing agencies may obtain further information on BidNet by writing to BidNet, 435 New Karner Road, Albany, N.Y. 12205, or calling 1/800/677-1997.

International Data base Corp. is a developer and marketer of product-oriented data bases for companies worldwide.

POMPANO BEACH, FL (JUNE 25) BUSINESS WIRE - South Floridian William H. Haulsee, a long-term resident of Vero Beach, Fla., and a retired U.S. Army staff sergeant, made a simple phone call and set a milestone in the development of Sure Card Inc., which is one of the nation's fastest growing credit card companies and which is headquartered in South Florida.

Haulsee's phone call made him the 2,000,000th person to request the Sure

Credit Card. Sure Card, which advertises nationally, has cardholders in all 50 states. The company, based in Pompano Beach, acquires new members through TV and print.

To recognize William Haulsee's role in helping the company achieve its 2,000,000th credit-card-request milestone, Sure Card Inc. is making a contribution in his name to the Vero Beach Center For The Arts; has presented him with a color television set from the Sure Card catalog; and has given him a no-cost, lifetime Sure Card membership.

''When Mr. Haulsee's call came in, everyone in the company was excited to see that it was from a Florida resident,'' said Renee Hammond, who handles customer relations for Sure Card. ''Other calls close to Mr. Haulsee's 2,000,000th milestone were from people in New Jersey, California, New York and Pennsylvania.''

Haulsee has lived in Florida since 1972. In addition to his home in Vero Beach, he owns a house in Ft. Pierce and is building another one there.

Born in Sugar Grove, Va., Haulsee grew up in Maryland, joined the Army in 1956 and completed a career in the military that lasted 26 years.

During that period he was stationed in the United States in Biloxi, Miss.; Leavenworth, Kan.; Fork River, Ala.; and Fort Belvor, Va. Overseas, he was a Certification Officer in Vietnam for eight years. Throughout most of his career, he worked as an Air Traffic Controller, often fulfilling the responsibilities of an Air Field Commander.

Haulsee's wife, Dolly Haulsee, works in an administrative position at Indian River Memorial Hospital in Ft. Pierce.

Haulsee, who enjoys fishing as a principal pastime, commented on the recognition he is receiving from Sure Card Inc. He said, ''I wasn't fishing when I made that phone call, but it looks like I landed a big one anyway.''

Sure Card Inc. has achieved rapid growth in the 2 1/2 years since it was founded. The company recognized a market niche that was not being served. It determined that it is possible to succeed in today's business world with an old-fashioned concept: trusting people.

The company's management decided to issue a credit card to anyone - whether or not they had an established credit record. Sure Card Inc. offers unquestioned credit to anyone who requests it.

By giving everyone credit, Sure card is providing a unique opportunity in the area of personal credit. As cardholders build their credit history with Sure Card, they receive automatic increases in their credit limit and

can use Sure Card as a credit reference when applying for credit elsewhere.

This has proven to be ideal for persons who have never had credit before, recently graduated students, divorced or widowed women, and even those who simply want additional credit.

In addition to being a credit card company, Sure Card Inc. is also a catalog merchandiser.

As a catalog merchandiser, Sure Card Inc. provides its cardholders with the opportunity to purchase directly from Sure Card catalogs which contain a diverse array of products, priced very competitively with other catalogers.

Additionally, cardholders may pay for their Sure Card catalog purchases in manageable, incremental payments over time; and the payments remain interest free.

PORTLAND, ME (JUNE 25) BUSINESS WIRE - Maine Savings Bank, a subsidiary of The One Bancorp (NASDAQ:TONE), based in Portland, has signed agreements in principle for the sale of its Bath and Camden banking offices to Casco Northern Bank, a subsidiary of Bank of Boston Corp. (NYSE:BKB), Roy P. Hibyan, president and chief operating officer of Maine Savings, announced Monday.

Maine Savings announced agreements in principle to sell four other offices on June 1 -- its Brewer, Bucksport and North Windham offices to Peoples Heritage Bank, and its South Paris office to Androscoggin Savings Bank.

Definitive agreements on all six transactions are expected shortly with completion expected prior to year end. Terms of the agreements were not disclosed, and all sales require regulatory approvals.

''Completion of these transactions will reduce assets of Maine Savings Bank by approximately $180 million,'' Hibyan said, ''in line with the objectives of our capital plan to downsize Maine Savings and increase its capital ratio.'' At March 31, 1990, Maine Savings had total assets of $1.5 billion.

''The decision to sell our Bath office arose out of negotiations on other branches,'' Hibyan said. ''As with our North Windham sale, announced June 1, it was not among the nine originally offered on Jan. 11.''

Maine Savings has withdrawn its plans to sell five other offices offered in January: Bangor Mall, Bangor Main Street, Orono, Old Town and Waterville.

Hibyan repeated that current staff will continue at all offices. ''Customers want our people to stay, and the purchasing banks know the value of keeping staff with the service standards practiced at our bank,'' he said.

''We are pleased that these offices will be sold to well-established, Maine banking institutions.''

Maine Savings Bank is a state-chartered, FDIC-insured savings bank currently with 29 banking offices throughout Maine and $1.5 billion in assets.

The One Bancorp is a $2.3 billion, Maine-based bank holding company with banking subsidiaries in Maine, Connecticut and Massachusetts.

SPARTANBURG, SC (JUNE 25) BUSINESS WIRE - TW Holdings Inc. (NASDAQ: TWFS) announced Monday that it has completed the sale of its Milnot Company subsidiary to a corporation formed by Eli S. Jacobs and Engles Capital Corp., a Dallas-based investment firm, for approximately $25 million in cash.

As previously announced, the sale is part of TW Holdings' plan to divest several non-strategic assets. Proceeds will be used to reduce bank debt outstanding. Milnot produces and sells a variety of canned milk products and meat-based products.

TW Services, which became a wholly owned subsidiary of TW Holdings on Dec. 6, 1989, is the fourth-largest food service company in the United States based on 1989 revenues of $3.5 billion.

The company is engaged in contract food and vending services, recreational services and restaurant operations through its Canteen, Hardee's, Quincy's Denny's, and El Pollo Loco business units.

#90176b0795 06/25/1990 ~Business Wire

HOUSTON (JUNE 25) BUSINESS WIRE - Union Texas Petroleum Holdings Inc. said Monday that its Union Texas Petroleum Limited subsidiary has a 20 percent interest in the U.K. North Sea's Saltire field, where operator Occidental Petroleum (Caledonia) Ltd. has boosted estimated oil reserves by more than 30 percent to approximately 130 million gross barrels following the success of appraisal well No. 15/17-22z. The Saltire field is located 120 northeast of Aberdeen on Block 15/17 in the U.K. sector of the North Sea.

When tested, the appraisal well flowed at a stabilized daily rate of 9,635 barrels of high-quality oil (43 degrees API) and 13 million standard cubic feet of gas through a 72/64-inch choke. The flow rate was restricted by the fluid-handling capacity of the semi-submersible drilling rig, Kingsnorth Explorer, which conducted the test.

Occidental's U.K. President Glenn Shurtz said, ''We are very encouraged by the latest well results which have confirmed the potential of the Saltire field. We will seek formal government approval to develop the field in the autumn of this year.''

It is proposed that the Saltire field development will involve a new platform linked via the new Piper production facilities to the existing pipeline system leading to the Flotta oil handling terminal in Orkney. The Saltire development, which is estimated to cost about 350 million pounds, is expected to create jobs for about 1,000 people in the U.K. Production from Saltire is due to commence in the second half of 1992.

Occidental Petroleum (Caledonia) Ltd. has a 36.5 percent interest in Saltire. The remaining interest is held by Texaco Britain Ltd. with 23.5 percent and LASMO North Sea Ltd. with 20 percent.

SOMERVILLE, MA (JUNE 25) BUSINESS WIRE - Central Cooperative Bank (NASDAQ:CEBK) announced Monday that the board of directors has approved the adoption of an Employee Stock Ownership Program (''ESOP'') and the purchase of shares of outstanding common stock of the bank by the ESOP from time to time in the open market or in negotiated transactions.

The actual level of stock purchases to be made by the ESOP will depend on market conditions. The bank's charter currently limits ownership of the bank's common stock by any stockholder, including the ESOP, to a maximum of 10 percent.

The ESOP is a tax-qualified, defined contribution retirement plan established for the exclusive benefit of the bank's employees. Under the program approved by the board of directors, the ESOP will borrow funds from the bank to purchase shares of the bank's common stock in the open market or in negotiated transactions. The bank has obtained a loan of $1 million from an independent lending institution to fund its proposed borrowing to the ESOP.

This loan is secured by GNMA securities held in the bank's investment portfolio. The bank may also choose to fund the ESOP by making annual contributions to the ESOP.

Shares purchased by the ESOP will be allocated to employee ESOP accounts as contributions by the bank are made during the next several years. The costs associated with providing the bank's employees with benefits under the ESOP are not fixed.

The bank anticipates reducing expenses associated with its other benefit plans, including its current retirement plan, in order to offset expenses related to the ESOP program. The board of directors of the bank believes that such stock purchases to be made by the ESOP will provide participants under the ESOP with an excellent investment opportunity for their retirement savings based on the current market price levels of the bank's stock.

#90176b0808 06/25/1990 ~Business Wire

FORT WORTH, TX (JUNE 25) BUSINESS WIRE - Tandy Corp. (NYSE:TAN) announced Monday that its board of directors has approved the adoption of amendments to update Tandy's shareholder rights plan, which was adopted in 1986 and amended in 1988.

The amendments are not being adopted in response to any specific effort to acquire control of the company and the board is not aware of any such effort.

The major amendments to the plan specify that (i) the percentage of ownership which a person must acquire before the rights will permit the holders (other than the acquiring person) to purchase additional shares of common stock at a reduced price will be 15 percent (compared with the prior level of 25 percent, which could be lowered to 10 percent under certain circumstances); (ii) certain approved transactions can be excepted by the board of directors from the plan's operation; (iii) the rights can be redeemed under additional circumstances, and redemption of the rights and amendment of the plan is deferred for 180 days under certain circumstances; and (iv) the rights will expire on June 22, 2000.

A company spokesman said, ''The amendments to the plan are intended to maintain the ability of all Tandy shareholders to realize the long-term value of their investment in the company.

''The program is not aimed at preventing a takeover, but to encourage a buyer to negotiate appropriately with the board prior to attempting a takeover. In addition, the amendments should maintain the flexibility of our board of directors in responding to the negative effects of abusive share-accumulation tactics and tender offers that do not offer an adequate price to most shareholders.''

The plan amendments are described in more detail in an enclosure to a letter that is being mailed to all Tandy shareholders.

Tandy with fiscal 1989 sales and operating revenues of over $4.1 billion, is a premier manufacturer and marketer of personal computers and audio, video, telephonic and other electronic products.

#90176b0811 06/25/1990 ~Business Wire
CHATTANOOGA, TN (JUNE 25) BUSINESS WIRE - It was announced that Inter Federal Savings Bank (NASDAQ/NMS:IFED) has acquired First Federal of Summerville, Ga., with deposits totaling $31.7 million, through the Resolution Trust Corp. and has been granted Georgia statewide branching rights.

Inter Fed was the successful bidder and will initially purchase $24.1 million of First Federal's assets with liberal put back options.

First Federal had total assets of $26.5 million, and total liabilities of $32 million, including $31.7 million in approximately 6,000 deposit accounts. Its core, or local retail, deposit base is estimated to be $27.4 million. The premium of $512,225, paid to the RTC by Inter Federal, represents 1.9 percent of the failed institution's core deposits.

Vernon Cox, Inter Fed chairman, stated, ''This forward step is part of our long-range strategic plan, and gives Inter Fed our first out-of-state office. Our management team is very capable and we feel we can fold this acquisition into our program very well. We look forward with anticipation to making available all the banking services that we have to offer to Summerville and the surrounding North Georgia area.

''With total combined assets of $370 million, this new addition gives Inter Fed an excellent opportunity to expand our varied financial services '' he added.

Inter Fed is a 50-year-old, locally owned institution which received accolades last month in an article featured in the National Mortgage News which stated that Inter Fed ''is revered by analysts for holding down costs and focusing on profitability.''

All deposits at Inter Fed are insured by the Federal Deposit Insurance Corp. (FDIC). Inter Federal now has nine offices in Chattanooga, Signal Mountain, Rossville, South Pittsburg and Summerville. The stock of Inter

Fed is traded in the NASDAQ National Market System under the symbol IFED.

WALTHAM, MASS (JUNE 25) BUSINESS WIRE - IPL Systems Inc. Monday announced the signing of an agreement with XL/Datacomp Inc. to provide IPL's 6860, 8 mm tape subsytems for disaster recovery applications for IBM's S/38 and AS/400 products.

Initital locations for the 6860s will include XL Datacomp's regional hot sites in Alsip, Ill. and Springfield, N.J. The service commenced June 15, 1990.

In addition to the Disaster Recovery agreement, XL/Datacomp has agreed to distribute the IPL 6860 8 mm tape subsystem. XL/Datacomp Service will provide installation and maintenance support for the 6860 units.

XL/Datacomp Inc. was established in 1975, became a public company in early 1985 and has over 60 offices in metropolitan areas across the United States, the United Kingdom and Japan. XL/Datacomp is a world leader in IBM midrange computer systems and selected other manufacturers' peripheral equipment, providing a full range of customer services and support. The company has multiple disaster centers throughout the United States which make available disaster recovery services 24 hours a day, 7 days a week.

IPL Systems Inc. designs, manufactures and markets IBM compatible tape drive subsystems and memory products for IBM Systems/3X, 43XX, 30XX and AS/400 computers. The company was founded in 1973 and is located at 60 Hickory Dr., Waltham, Mass. IPL Systems Inc. stock is quoted on the NASDAQ national market system and is traded in the OTC market under the symbol IPLSA.

#90176b0819 06/25/1990 ~Business Wire

HOUSTON (JUNE 25) BUSINESS WIRE - Transwestern Pipeline Co. (NYSE:ENE) announced Monday that it has filed a rate case settlement with the Federal Energy Regulatory Commission (FERC) and has signed a related customer agreement that will significantly enhance the company's role in the California marketplace.

''The settlement completes Transwestern's conversion to a transportation pipeline, and negotiations with Southern California Gas Company (SoCalGas) have resulted in an extension of the service agreement through 2005,'' said Terence H. Thorn, president of Transwestern.

The rate case settlement incorporates a firm transportation capacity brokering program, along with zone rates and other tariff changes to facilitate Transwestern's mission as a transporter of natural gas. According to Thorn, these are the next logical steps in the company's transition from a traditional merchant to its new role as a transportation pipeline.

''Capacity brokering will allow more efficient allocation of existing firm transport capacity to those end user, local distribution company, marketer or supply customers who desire the security of service that firm transportation provides,'' he said.

''It's because Transwestern is comfortable in its role as a transporter

and SoCalGas in its role as shipper that we have been able to extend our service agreement through at least 2005,'' Thorn added. ''The extension solidifies the relationship between the two companies.''

Transwestern Pipeline Co., a wholly owned subsidiary of Enron Corp., is a 4,500-mile natural gas transmission system extending from west Texas and southern Oklahoma to the California border.

Enron Corp., America's leading natural gas company with approximately $10 billion in revenues and $9 billion in assets, operates the nation's largest natural gas transmission system; markets natural gas, gas liquids, crude oil and refined products nationally and worldwide; owns 84 percent of Enron Oil & Gas Co., one of the country's largest independent (non-integrated) natural gas exploration and production companies; and also is one of the largest independent producers of electricity in the United States, with extensive experience in combined heat and power installations.

#90176b0832 06/25/1990 ~Business Wire

MILPITAS, CALIF. (JUNE 25) BUSINESS WIRE - GenRad Inc. Monday announced the introduction of SINE software for the GR2530 Vibration Control System.

The new package, in conjunction with already available RANDOM software, enables the GR2530 to perform a full range of sine and random vibration tests in both production and laboratory environments, including the demanding MIL-STD requirements.

The GR2530 is now capable of conducting swept sine tests over a range of 2Hz to 10,000Hz with up to 8 channels for control, limit, or measurement. The system offers a menu-driven interface, color display and hard copies in color, plus numerous individual safety checks to prevent damage to the unit under test.

The GR2530 is designed for ease-of-use and guaranteed test repeatability in a cost-conscious production environment. In a more demanding environmental testing lab, the GR2530 has the performance to be an ideal complement to more expensive controllers. It is capable of handling nearly all of the sine and random tests which account for approximately 80 percent of the work in most test laboratories. The GR2530 is, therefore, a practical alternative 'second system' to more expensive systems.

GenRad's Structural Test Products (STP) group in Milpitas, Calif., is a leading developer of multi-channel systems for environmental, vibration, and structural testing and analysis in developmental laboratories. GenRad STP systems are also used by manufacturers of electronic and mechanical equipment for reliability testing and screening in production.

GenRad Inc. is a leading worldwide supplier of integrated software systems and automatic test equipment to manufacturers and users of electronic and mechanical equipment, for design verification, product testing and process quality management. The company's stock is traded on the New York Stock Exchange; its trading symbol is GEN.

#90176b0833 06/25/1990 ~Business Wire

MILPITAS, CA (JUNE 25) BUSINESS WIRE - GenRad Inc. Monday announced the release of the GR2518 Vibration Control System which is designed to handle all environmental testing needs from product design to final delivery.

The GR2518 system consists of a high-performance hardware platform and a suite of applications software responding to specific requirements in the development laboratory and on the production floor.

In the test lab, the GR2518 validates design quality by subjecting prototypes to vibration tests. On the production floor, the system conducts acceptance tests to assure manufacturing quality. Before shipment, the GR2518 runs package and fragility tests to make sure that products withstand the stress of transportation.

The GR2518 is capable of running a wide range of software. RANDOM, GenRad's broadband vibration control package, comes with the system. Among the other software packages available for the GR2518 are:

-- SINE, which provides a digital, closed-loop, multi-test capability;

-- SHOCK, which subjects a product to specified transient vibration peaks to simulate environmental shock; and

-- TARGET, which enables users to superimpose one vibration spectrum on another for random-on-random or sine-on-random testing.

Users can expand the function of the GR2518 beyond vibration testing with additional software.

-- ISAP (Interactive Signal Analysis Program), which offers real-time data acquisition and analysis of frequency response, coherence, auto spectra, and cross spectra;

-- TSL (Time Series Language), which is a high-level BASIC-type programming language that enables users to adapt the system to specialized applications requirements; and

-- MODAL and MODAL-PLUS software, which offers a full range of capabilities for measuring and analyzing structural modes of vibration.

GenRad's Structural Test Products (STP) Division in Milpitas is a leading

developer of multichannel systems for environmental, vibration, and structural testing and analysis in developmental laboratories. GenRad STP systems are also used by manufacturers of electronic and mechanical equipment for reliability testing and screening in production.

GenRad Inc. is a leading worldwide supplier of integrated software systems and automatic test equipment, to manufacturers and users of electronic and mechanical equipment, for design verification, product testing and process quality management. #90176b0841 06/25/1990 ~Business Wire

NEW YORK (JUNE 25) BUSINESS WIRE - S.E. Nichols Inc. (ASE:NCL), announced Monday that its net loss for the quarter ended May 5 was $3,488,000 (or 74 cents loss per share) compared with $7,497,000 (or $1.60 loss per share) for the same quarter of the preceding year.

Consolidated revenues for the quarter ended May 5 were $26,520,000 and reflect both sales of the company's discount department stores until each such store begins its previously announced inventory liquidation program and sales of three newly reopened deep discount drug and general merchandise stores operating under the name ''Pharmhouse,'' the first of which opened in mid-April 1990.

As a result of the liquidation sales program of the Nichols discount department stores and reopening of Pharmhouse deep discount drug and general merchandise stores, the results for the first quarter are not comparable to the results for the same quarter of the preceding year.

As of June 22 the company was operating 10 Pharmhouse retail stores and all of its previously operated discount department stores were in various stages of liquidation.

S.E. NICHOLS INC. AND SUBSIDIARIES
Condensed Consolidated Financial Information
(In thousands except per share and share amounts)

	Three Months Ended	
	May 5, 1990	April 29, 1989

RIVIERA BEACH, FL (JUNE 25) BUSINESS WIRE - James E. Davis, president and chief operating officer of Tele-Optics Inc. (NASDAQ:TOPT) Monday announced that Corvus Corp., its 44 percent stockholder, recently filed for protection under Chapter 11 of the U.S. Bankruptcy Code.

Tele-Optics has been informed by Corvus that it does not intend to purchase additional shares of Tele-Optics' common stock in the market at

this time. As previously announced, Corvus purchased shares of Tele-Optics from certain officers of Tele-Optics with payments to be made on an installment basis over a three-year period commencing June 30.

At that time, Corvus had announced its intention to acquire control of Tele-Optics by purchasing additional shares in the market. Tele-Optics does not anticipate any material impact on its business or operations as a result of the bankruptcy filing by Corvus.

Tele-Optics Inc. is engaged in the development, manufacture and marketing of optical, electronic and electro-optical products and systems for use in the medical and defense industries.

MILWAUKEE (JUNE 25) BUSINESS WIRE - Fiserv Inc. (NASDAQ:FISV) a leading computer services company providing data processing and information management systems to financial institutions worldwide, has acquired Accurate Data On Line Corp. (ADOL) of Titusville, Fla.

Accurate Data On Line currenly provides full-service, on line processing to over 25 percent of Florida credit unions, serving a combined total of 750,000 member accounts throughout the Southeast. With 107 credit union clients, Accurate Data On Line has a gained 50 percent share of the online processing market for credit unions headquartered in Florida.

As a Fiserv company, Accurate Data On Line plans to expand its data processing services to credit unions throughout Florida and the Southeast. New product and service enhancements will be announced within 30 days.

''Credit unions constiute a rapidly growing market in this country,'' comments George D. Dalton, chairman and chief executive officer of Fiserv. ''With over 14,000 credit unions serving more than 50 million members nationwide, it's an area with many opportunities. Accurate Data On Line increases the Fiserv presence in the credit union industry, bringing our total number of credit union clients to over 300 and the number of member accounts served to over 2 million.''

According to Paul E. Horgen, executive vice president and head of he Fiserv Credit Union Division, Fiserv is ranked among the top 10 providers of processing to credit unions. ''As a national organization, Fiserv offers a nework of resources and expertise that adds a new dimension to a local, regional servicer,'' Horgen comments. ''Our national network of over 2,400 professionals includes a depth in credit union-experienced people. People who are familiar with the unique needs of credit unions

and who are dedicated to serving those needs. This commitment provides our credit union clients with the reliability and the financial strength they're looking for in a data processing company.''

Steven J. Smith continues as president and general manager of Accurate Data On Line, a Fiserv company. ''As a client-oriented company, we see many benefits for our credit unions in this alliance,'' he says. ''From new products and services to the combined support of a national data processing company, our clients are gaining the resources that will help them continue to grow and prosper.''

In the past six years Fiserv, a Milwaukee-based company, has grown into a national network of specialized information management centers and subsidiary companies. The company's Data Centers are located throughout the United States, processing over 20 million customer accounts for more than 950 client financial institutions.

In 1989, the company's annual revenues were over $164 million, an increase of 31 percent over the prior year's record. A publicly-held company, Fiserv stock is traded in the NASDAQ over the counter market system under he symbol FISV.

NEW YORK, BEVERLY HILLS, CA (JUNE 25) BUSINESS WIRE - American International Group Inc. (NYSE: AIG) and International Lease Finance Corp. (OTC/ILFC) jointly announced Monday the execution of a definitive agreement whereby ILFC will merge into a wholly owned subsidiary of AIG.

In connection with the merger, ILFC common shareholders will receive $32.50 in cash per ILFC common share or, if a shareholder elects, 50 cents in cash plus 0.3 shares of AIG common stock per ILFC common share, subject to a maximum number of shares and certain other adjustments contained in the agreement.

If the market price of AIG common stock exceeds $104 per share during a specified period prior to the merger, the exchange rate will be adjusted so that the value of the AIG common stock portion of the merger consideration will equal $31.20 per ILFC common share.

Similarly, if the market price of AIG common stock is below $86 per share at the time of closing, the value of the AIG common stock portion of the merger consideration will equal $25.80 per ILFC common share, subject to restriction on the maximum number of shares which AIG will be required to issue. The value of the cash and stock to be issued in the merger is expected to total approximately $1.3 billion.

The principal executive officers of ILFC, who together own more than 50 percent of ILFC's outstanding common stock, have agreed to vote in favor of the transaction and to elect to receive AIG common stock in the merger.

ILFC will operate as a wholly owned subsidiary of AIG. ILFC's senior management team effective with the merger will consist of Leslie L. Gonda, chairman of the board, Steven F. Udvar-Hazy, president, chief executive officer and director and Louis L. Gonda, executive vice president and director. ILFC's management team will remain in place and the company will continue to be based in Beverly Hills, Calif.

The transaction has been approved by AIG's executive committee and ILFC's

board of directors and by a special committee of ILFC's independent directors.

AIG intends to finance the cash portion of the transaction from internal sources. In conjunction with the transaction, AIG will provide up to $125 million of financing to ILFC.

The transaction is subject to ILFC shareholder approval, delivery of opinions as to the tax consequences of the transaction and other conditions.

Certain of the transaction terms are subject to adjustment pursuant to AIG's previously announced 5-for-4 stock split, to be effected in the form of a 25 percent stock dividend, payable July 23.

AIG is the leading U.S.-based international insurance organization and the nation's largest underwriter of commercial and industrial coverages. Its member companies write property, casualty, marine, life and financial services insurance in over 130 countries and jurisdictions, and are increasingly engaged in a range of specialized financial services. American International Group, Inc.'s common stock is listed on the stock exchanges in New York, London and Tokyo.

As the world's premier independent owner and lessor of commercial jet transports, ILFC has built a portfolio of 98 advanced-technology jet aircraft averaging three years in age with an asset value exceeding $3 billion.

#90176c0027 06/25/1990 ~Comtex
WASHINGTON (JUNE 25) UPI - The plot sounds fishy, but it's all true.

Undesirable elements from Europe stow away in the hulls of ships crossing the Atlantic and sailing into inland waters of the United States and Canada. Upon arrival, the invaders quickly begin to wreak havoc, threatening to cripple utilities, hurt industry and inflict up to $5 billion in damage.

The villains aren't the type from a Tom Clancy novel of international intrigue. In fact, the villains aren't even human.

The culprit is a 1- to 2-inch long, striped mollusk called the zebra mussel, which multiplies at a pace that would make any rabbit jealous.

''You remember killer bees?'' asked Rep. Dennis Hertel, D-Mich., the chairman of the House subcommittee on oceanography and the Great Lakes. ''Well, this scenario could easily be read as 'Attack of the Killer Mussels.'''

Experts say the mussel can attach itself to almost anything that doesn't move, including intake and outlet pipes vital to power plants and water treatment facilities. And it gorges on the microscopic plant life essential for fish, thereby posing a danger to sport fishing and the commercial fishing industry.

''It has been pointed out by biologists and other experts that there is no way to stop the invasion of the mussel now that they have been introduced '' said Rep. Thomas Ridge, R-Pa. ''So we must now turn to the issue of controlling their growth and what seems like an imminent introduction into other waterways.''

Combatting zebra mussels has become serious business in Great Lakes and other threatened states and Congress is considering plans for a serious crackdown on the shellfish.

The zebra mussel, or Dreissena polymorpha, hails from European inland waters and the Caspian and Black Seas. It is believed the mussel was first transported to North America in 1986, and let loose on Lake St. Clair, just north of Lake Erie, when a foreign ocean-faring vessel released its

ballast water.

The mussel was first discovered in June 1988, and already has heavily infested Lake St. Clair and Lake Erie, and made its way into Lake Ontario, Lake Huron, and, most recently, into Lake Michigan, Lake Superior and the St. Lawrence River.

Its introduction appears imminent in other waterways, such as the Mississippi, Hudson and Ohio Rivers. Some fear the zebra mussel has the potential to reach the waters of most of the continental United States.

Several lawmakers from Great Lakes states are backing legislation to outmuscle the mussels.

''It would be difficult to overstate the potential threat of this creature to the Great Lakes environment and economy,'' said Rep. Henry Nowak, D-N.Y. ''An estimated $500,000 million in annual maintenance costs and lost economic opportunities could roll back the Great Lakes-based economic renaissance so important to our coastal communities.''

Later this month, the Coast Guard is to release a report examining methods for controlling the influx into U.S. waters of non-indigenous aquatic life such as the zebra mussel, sea lamprey, rusty crawfish, spiny waterflea, alewife, Asiatic clam, Chinese mitten crab, three-spined stickleback and the tube-nosed goby.

A House committee has already approved legislation authorizing $4.5 million for research into ''control and eradication'' of such non-indigenous species under the National Sea Grant College program and the Great Lakes Environmental Research Laboratory.

Sen. John Glenn, D-Ohio, and New York's Nowak are pushing legislation requiring the Coast Guard to issue regulations mandating that virtually all vessels entering U.S. waters exchange their ballast water on the high seas rather than within the United States. The Coast Guard supports the concept of mandated ballast water exchange. The bill also calls for spending $8 million per year over the next five years on research and prevention.

Although some in Congress might need some convincing that the zebra mussel poses a pressing problem, no-one in Monroe, Mich., doubts the seriousness of the threat.

That city has already spent $200,000 to repair damage caused by the mussels to its water treatment plant. Last December, businesses, schools and government operations were closed for several days because the mussels had so badly encrusted the intake pipes at the city's water facility as to cut off the public water supply.

''The enormity of this problem has yet to be realized by those who will eventually be affected,'' said Wilfred LePage, Monroe's water plant supervisor.

A mature female zebra mussel is capable of releasing up to 40,000 eggs during a reproductive season. Many fear the mussels will encrust and close down underwater pipes feeding such facilities as nuclear power plants, hydroelectric plants and water treatment facilities.

The possibility exists, in a worst-case scenario, for ''total interruption of electrical generation'' on a regional basis with unchecked infestation, according to Vincent Tobin, an official of the New York Power Authority.

Congressional estimates are that the mussels could inflict up to $5 billion in damage in the 1990s to factories, fisheries, ships, water supplies and power plants and related industries.

By BOB WEBSTER

WASHINGTON (JUNE 25) UPI - The nation's savings and loan crisis isn't going away any time soon, but some of those responsible for looting the industry could be going away for a long time if the government steps up its effort to detect and prosecute thrift fraud.

The government's attempt to crack down on thrift fraud has been criticized recently as being toothless and slow.

''The Bush admininstration's efforts to pursue and punish S&L fraud have been anemic at best, irresponsible at worst,'' said Sherry Ettleson, a staff attorney with the public interst group Public Citizen.

In recent weeks a number of bills have been introduced in Congress to bolster the government's ability to bring to justice thrift executives who used federally insured deposits for illegal purposes.

The estimated cost to taxpayers of the savings and loan industry collapse is between $130 billion and $500 billion, making it the nation's greatest financial debacle since the Depression.

''This country is being robbed blind and the thieves are getting away scott free,'' said Sen. Alan Dixon, D-Ill., chairman of the consumer and regulatory affairs subcommittee of the Senate Banking Committee.

Dixon, along with Sens. Robert Graham, D-Fla., and Timothy Wirth, D-Colo., recently introduced legislation to speed the prosecution of thrift fraud by establishing a strike force within the Department of Justice, which currently has a backlog of more than 1,300 major thrift fraud cases.

That number is bound to increase if even a fraction of the more than 17,000 referrals passed on by thrift regulators to the FBI within the past three years turns up evidence of criminal activity.

Earlier this month, Wirth offered a resolution calling for increased funding to investigate and prosecute thrift fraud. The Justice Department this year requested only $50 million of the $75 million Congress authorized for thrift fraud investigations.

In April, a measure to provide the Justice Department with an additional $19.1 million was opposed by the Bush administration and failed in the Senate.

''The administration's opposition to additional funding for savings and loan fraud prosecutions is difficult to reconcile with available evidence on the magnitude of the problem and the department's current resources,'' said Sen. Donald Riegle, D-Mich., and chairman of the Senate Banking Committee.

Another bill, introduced by Rep. Chalmers Wylie, R-Ohio, would create a national commission to design a strategy to improve criminal thrift fraud prosecutions.

''The average American taxpayer is outraged that so little has been done to prosecute the con men that looted the thrift industry,'' said Wylie, the ranking Republican on the House Banking Committee.

Although the causes of the industry's deterioration are many, a growing number of congressional and law enforcement fingers are pointing to insider fraud as a leading culprit.

Fraud was the major factor in the failure of the 530 thrifts under investigation by the FBI, the agency's director William Sessions told a congressional committee earlier this year.

But Treasury Secretary Nicholas Brady, who also serves as chairman of the oversight board of the Resolution Trust Corp., recently told the House Banking Committee that successfully prosecuting thrift fraud is difficult.

''When you talk about bringing one of these people to justice, it's going to take an enormous amount of time,'' Brady said. ''These are very complicated cases.''

The RTC, created in August by President Bush's thrift rescue bill, is responsible for overseeing the dismantling of failed thrifts. The agency hopes to have 300 investigators tracking thrift fraud and other criminal conduct in the savings industry by year's end.

To congressional critics, the government's efforts amount to too little too late.

''The American people are disgusted with the lack of progress of the savings and loan cleanup,'' said Rep. Frank Annunzio, D-Ill. ''The people want to know the answers to two questions: when is the cleanup going to get out of first gear and when are the savings and loan crooks going to jail?''

#90176c0050 06/25/1990 ~Comtex

WASHINGTON (JUNE 25) COMTEX - The registration statement filed at the NASD shows ES&L Bacorp Inc. proposed a stock offering in accordance with a plan of conversion to a capital stock form federal holding company (ES&L Bancorp). That would constitute a change from its existence as Elmira Savings & Loan F.A., in mutual form. The initial offering of between 350,625 and 474,375 shares is being presented for public sale as a Direct Community Offering.

The asking price per share is $8.00, which assumes a sale of 412,500 shares.

The proposed initial offering is being underwritten by Capital Resources Inc.

The ES&L's principal business involves receipt of deposits from the general public and origination of loans secured by residential real estate. Other business involves comercial real estate lending and investments in government and federal agency obligations.

Management expects the conversion to increase capital investments in the business, allowing more agressive lending and investment practices, providing access to future capital markets and allowing depositors and others to become shareholders in the banking entity.

The executive office of ES&L Bancorp Inc. is located at 300 West Water Street, Elmira, New York 14901, and its telephone number is (607) 733-5533.

#90176c0055 06/25/1990 ~Comtex

WASHINGTON (JUNE 25) COMTEX - The 8-K report filed at the SEC shows on June 18, 1990, MorningStar Foods Inc. announced that it had reached an amendment to its credit agreement, extending the date for a debt reduction payment from June 15, 1990 to June 25, 1990.

The debt repayment schedule, as restructured in December of 1989, had been made to correspond to the divestiture of certain of MorningStar's regional

dairy operations. MorningStar had entered an agreement for the sale of its Texas dairy operations on March 16, 1990. That sale, however, was delayed by request from the U.S. Department of Justice as related to filings made under the Hart-Scott-Rodin Act.

As Jim Bach, president of MorningStar, stated, "Although we have been in regular contact with the staff of the Justice Department, its is uncertain when the required waiting period will expire. In this interim period, we will continue to work with our banks to develop an appropriate amendment that will be based on the status of the divestiture program and other factors."

#90176c0058 06/25/1990 ~Comtex

WASHINGTON (JUNE 25) COMTEX - The 8-K report filed at the SEC shows as per a plan of reorganization under Chapter 11 of the U.S. Bankruptcy Code, as finalized on June 1, 1990, Tunex International Inc. was the subject of a 72% acquistion by Ventures Funding Corp. That acquisition, of 500,000 shares for a consideration of $50,000, gave voting control of the company to Ventures.

Ventures is a closely-held corporation controlled by Larry Hendricks, E. Dallin Bagley and Rudolf Zitzmann. Pursuant to the reorganization agreement, those three now constitute the board of directors of Tunex. Further, the agreement allows the appointment of two additional directors by holders of series A and B preffered stock, respectively.

The executive office of Tunex International Inc. is located at 556 East

2100 South, Salt Lake City, Utah 84106, and its telephone number is (801) 486-8133.

#90176c0061 06/25/1990 ~Comtex

WASHINGTON (JUNE 25) COMTEX - The 8-K report filed at the SEC shows on June 13, 1990, Westronic dismissed its independent auditors of the firm of Arthur Andersen & Co. and engaged the firm of Deloitte & Touche in their stead. Deloite & Touche has been the auditors of Westronics's 90% owned subsidiary, Rosenbalm Aviation Inc., as acquired in December of 1989.

Westronics decided that the change would be a practical move, since all businesses of Westronics other than that of Rosenbalm Aviation were discontinued. The decision was approved by Westronics's board.

Comments made on the financial statements of the company of the fiscal years ended Dec. 31, 1988 and 1989 by Arthur Andersen included the following:

1. A statement indicating that a consideration was not made on the company's accounts for differences in settlement amounts related to agreements with creditors over the discontinuance of circuit board manufacturing operations.

2. A statement indicating that the company had discontinued unprofitable operations and acquired a historically profitable entity.

3. A statement indicating doubts as to the company's ability to continue as a going concern, owing to a net capital deficiency and negative working capital as of Dec. 31, 1989.

WASHINGTON (JUNE 25) COMTEX - The 8-K report filed at the SEC shows on June 4, 1990, Home Federal Savings and Loan Association of Hamilton entered into a letter of intent with First Financial Bancorp. According to the letter, First Financial would acquire all outstanding common stock of Home Federal for a consideration of $6.8 million in First Financial common shares.

The letter provided that First Financial would issue no more that 191,275 shares and no less 127,517 shares to effect the merger.

The merger is subject to the immediate prior written approval of the Office of Thrift Supervision, as well as execution of a definitive agreement, formation of an interim bank entity, receipt of a fairness option, and various other approvals of the Federal Reserve Board and the OTS. The two parties agreed to commence seeking such approvals.

#90176c0063 06/25/1990 ~Comtex

WASHINGTON (JUNE 25) COMTEX - The 8-K report filed at the SEC shows on June 18, 1990, Cardinal Distribution acquired all issued and outstanding shares of capital stock of Ohio Valley - Clarksburg Inc. from the shareholders of Ohio Valley. Consideration in the form of $27.1 million in cash was arrived at via arms-length negotiations between the parties.

Financing for acquisition was made through short-term borrowings from Cardinal's existing lines of credit.

Ohio Valley, based in Wheeling, West Virginia, is engaged in the wholesale distribution of drugs, serving primarily West Virginia, Pennsylvania, Ohio, Maryland, Virginia and portions of adjoining states.

Prior to the acquisition, there had been no material relationships between any parties of Cardinal and those of Ohio Valley.

SEC - AMENDMENT NUMBER: 1

GROUP LED BY RIEDMAN CORP OWNS 261,750 SHARES (14.50%) OF NIAGARA EXCHANGE CORP (TICKER: NIEX) OF BUFFALO, NY.

ANNOUNCEMENT:

In connection with Niagara's March 29, 1990 announcement that it is currently considering alternatives to obtain additional capital, Riedman sent Charles Clauss a letter dated April 13, 1990 requesting the opportunity to participate in any proposal to raise capital.

Communications on this matter continued through April 27, 1990 in which Riedman continued to express its desire to compete on equal terms with third parties to provide capital to Niagara and Niagara continued to refuse to permit Riedman to do so unless Riedman would execute an agreement which would prohibit it from proceeding with its announced proxy solicitation of Niagara's shareholders.

On May 1, 1990 Niagara entered into a purchase and standstill agreement with WR Berkley Corp. pursuant to which Berkley acquired a 35 percent voting interest in Niagara.

On May 1, 1990 Berkley filed an application with the New York Insurance Dept. to acquire control of Niagara.

On May 4, 1990 Riedman commenced an action against Niagara in the Court of Chancery of the State of Delaware alleging that Niagara directors breached their fiduciary duties.

The action seeks, among other things, to require Niagara to allow Riedman a fair opportunity to compete to provide capital for Niagara.

On May 11, 1990 Riedman sent a letter to the NY Insurance Dept. requesting, among other things, that the dept. deny Berkley's application to acquire control of Niagara.

Riedman intends to expand its proxy solicitation at the 1990 annual meeting of Niagara's shareholders to include the rejection of the Berkley agreement.

Virgil E. Wenger, one of six nominees to Niagara's board, has been replaced by Richard W. Cutting.

By MICHAEL STRAUSS - Comtex Washington Correspondent

WASHINGTON (JUNE 25) COMTEX - U.S. Trade Representative Carla Hills said today agriculture is the key to obtaining a comprehensive agreement in the current Uruguay Round negotiations in the General Agreement on Tariffs and Trade.

"The fact of the matter is a majority of Uruguay nations only want reform in agriculture," Hills said today at a luncheon here before the Institute for International Economics. "We must have reform in agriculture or we won't get anything else."

Without a consensus on agriculture, Hills said it was unlikely a general agreement in other critical areas such as textiles, services, intellectual property rights and direct foreign investment can be reached.

Market access barriers, export subsidies and internal supports are three areas cited by Hills where the U.S. is seeking specific agricultural reform. She said Europeans have shown progress on the latter but no agreement is possible unless action is taken on all fronts.

"It is fundamental for Europe to begin to phase down export subsidies and open markets," Hills said. "We can't accept a package which does not get export subsidies and market access barriers on a slope of decline. I think this can be done. Without it, the whole round is jeopardized."

The U.S. is presently engaged in bilateral talks with Japan known as the Structural Impediments Initiative (SII) and Hills said the bilateral talks are a complementary aspect of the multilateral negotiations.

"There are no sweetheart deals just to benefit the U.S.," Hills said.

A final SII report is due at the end of July or shortly thereafter. Both sides must elaborate on their April commitments to structural reforms. The U.S. is urging Japan to enforce anti-monopolistic practices, increase safeguards on price fixing, reform its patent system and spend more on its infrastructure in an effort to open Japanese markets to foreign investors.

"We must have Japan open up faster," Hills said. "Japan is opening. It is not open but it is opening. There is nothing we are not asking the Japanese government to do that is not in their own best interests."

Hills also urged the issue of Japan's rice import barriers be addressed through the Uruguay Round.

"I don't need to tell you the price of rice is seven times higher in its market than it needs to be if the market were open," Hills said. "It is important for Japan to see it is in its own best interests if all of its agricultural markets were opened over time."

SEC - AMENDMENT NUMBER: 10

ANNOUNCEMENT:

In a June 21, 1990 press release, Pathe (TICKER: PCC) and MGM (TICKER: MGM)

announced a new agreement with respect to the offer.

The holders of common and preferred shares will receive a total of $21.50 per share, $4 of which will be paid on July 20, 1990 and the remaining $17.50 will be paid on or before Oct. 23, 1990.

The $4 per share payment is to be made from an escrow account into which Pathe has already deposited $200 million.

The amount necessary to pay the balance required to make the $4 per share payment will be deposited on July 16.

ANNOUNCEMENT:

On June 22, 1990, the Centaur Partners Group told National Intergroup Inc (TICKER: NII) that if three directors are to be elected at the 1990 annual meeting on July 25, 1990, Centaurs' nominees will be Melvyn J. Estrin, Robert J. Slater and William G. Tull and, if eight directors are to be elected, Centaur's nominees will be the aforementioned three plus Ray C. Davis and Leslie L. Kanuk, to serve for terms of three years, William I. Jacobs and D. George Harris to serve for a term of two years, and Peter J. Gianacakes to serve for a term of one year.

Centaur also advised National Intergroup that Centaur intends to propose for a vote by stockholders the amendment of Sections 6 and 19 of National Intergroup's by-laws.

The sections relate confidentiality of stockholders in tabulations of votes, proxies, consents and ballots and payments to executives and directors contingent upon a change in control.

Centaur also intends to propose that shareholders reject a proposal to lower the poison pill trigger to below 20 percent.

On June 5, National Intergroup filed a motion in US District Court for leave to file a second amended complaint in the Federal Court action.

PaineWebber Inc. and Peter J. Gianacakes were included as defendants in the motion.

#90176d0000 06/25/1990 ~French/German News Agency
GENOA (JUNE 25) - Jack Charlton said here Monday that taking Ireland into the quarter-finals as a manager was even better than winning the World Cup as a player for England in 1966.

"1966 was a wonderful day but this was an even more wonderful day," he said after Ireland beat Romania 5-4 on penalties.

They became the first side to reach the last eight of a World Cup after a sudden-death shoot-out, and without winning a game.

They drew all three of their first round games. Belgium beat the Soviet Union after extra-time in Mexico four years but they won 4-3 and did not need to resort to penalties.

Now the Irish look set to meet the hosts in the Olympic stadium on Saturday, but Charlton is not ready to think about that.

''I'm thinking more about getting back to the hotel and having a few beers. I might even have a swim," he said. "We'll start worryng about the Italians when we sober up tomorrow.''

This is the first time Ireland have qualified for a World Cup finals. The

former English defender also steered Ireland to the European Championships two years. That was their first-ever major tournament but Charlton has been criticised for his safety-first tactics.

But it does not disturb a man who prefers fishing to soccer these days. ''We might finish up winning it without winning a game. I don't care,'' he joked.

''The pubs will sell more booze tonight than they have in the last year! There'll be a party here in this town you've never seen the like of before - and there won't be a moment's trouble."

#90176d0130 06/25/1990 ~French/German News Agency

MANAMA (JUNE 25) - Lebanese President Elias Hrawi arrived here Monday on the third leg of a Gulf tour aimed at obtaining financial assistance for his Syrian-backed administration, official sources said.

Mr. Hrawi, who was expected to stay 24 hours, will meet with the emir of Bahrain, Sheikh Isa bin Salman al-Khalifa. He had earlier visited Qatar and Kuwait and is to travel on to Abu Dhabi in the United Arab Emirates Tuesday.

Mr. Hrawi has appealed to Arab nations to contribute to an international fund for Lebanon set up last week by Saudi Arabia, Morocco and Algeria.

The three countries drew up an Arab peace plan for Lebanon that paved the way for the president's election by parliament last November and outlined reforms giving greater political power to the country's Moslem community.

Mr. Hrawi has been unable to extend his authority to Christian areas in and around Beirut where army leader General Michel Aoun rejects the Taif accord for failing to guarantee a Syrian military withdrawal from Lebanon.

The Lebanese president, on his first tour of the Gulf, has expressed the hope of obtaining financial aid notably to help his army deploy in south Lebanon, where Israel has controlled up a "security zone" since 1982.

He made similar visits to Egypt, Libya and Tunisia earlier this month but returned without any concrete pledges of assistance.

ROME (JUNE 25) - Italy beat Uruguay 2-0 here Monday to earn a place in the quarter-finals of the World Cup and a meeting with Ireland in Rome on June 30.

Italy's goals were scored by Salvatore Schillaci in the 66th minute and substitute Aldo Serena with a header in the 84th minute.

Schillaci's left-foot shot, hit first-time from the edge of the area, brought him his third goal of the tournament, and eased Italian nerves after several near misses in an edgy performance.

#90176d0620 06/25/1990 ~French/German News Agency

LONDON (JUNE 25) - Four people were seriously injured Monday in a bomb blast that ripped through the ground floor of London's exclusive Carlton Club, whose members include leading Conservative Party members, police said.

A Scotland Yard official on the scene said the blast "has the appearance of being a terrorist incident."

There was speculation that the attack could be the work of the Irish Republican Army, which in the past has tried to kill leading members of the Conservative government.

Several blocks around the Carlton Club, located near Buckingham Palace and the Houses of Parliament, were sealed off, and police said searches were being carried out for other explosive devices.

British Deputy Prime Minister Sir Geoffrey Howe was reported to have been in the area when the explosion occurred and Prime Minister Margaret Thatcher who is a member of the club was informed of the blast in Dublin where she is attending an EEC summit.

There were unconfirmed reports that some people may have been trapped under rubble and firefighters said they had rescued 24 people from the building, which was also on fire after the blast.

A Scotland Yard spokesman said anti-terrorist squad investigators were on the scene.

The blast occurred at around 8:30 p.m. (1930 GMT) and customers wearing dinner jackets and cocktail dresses were standing outside the building as around 40 firefighters battled the blaze.

The building where the Carlton Club is located was built in 1832 and has been a key meeting place of London's Conservative establishment for 150 years.

#90176d0850 06/25/1990 ~French/German News Agency
WASHINGTON (JUNE 25) - Vietnam and Thailand are stepping up the battle for the international rice market with heavy subsidies, the U.S. Department of Agriculture (USDA) said Monday.

In its monthly report on the world cereals market, the department said Vietnam, in an effort to better Thailand, recently sold 500,000 tonnes of rice to the Philippines at prices below those previously set by Hanoi for export.

Thai rice prices have fallen by between 30 dollars and 40 dollars a tonne over the past two months, the USDA said.

Absent from the international rice market for a long time, Hanoi has reformed its agricultural policies with the emphasis on exports, the department said. It has increased exports from 125,000 tonnes in 1986 to 1.8 million tonnes last year and is expected to pass the million-tonnes mark during 1990, the department said.

Thailand, the world's largest exporter with sales of six million tonnes last year, has seen its exports tumble 47 percent this year, the USDA said and is planning to recoup some of its losses by selling off at subsidized prices some of its 670,000 tonnes of stocks. The USDA estimates this will cost Bangkok some 75 million dollars.

UPPER HEYFORD, ENGLAND (JUNE 25) - Dissident Chinese astrophysicist Fang Lizhi arrived here Monday aboard a U.S. Air Force transport plane, a U.S. official said.

The official said Mr. Fang's plane landed at this joint U.S.-British air base around 11:40 p.m. (2240 GMT).

-30- 457
#90176d1180 06/25/1990 ~French/German News Agency
LONDON (JUNE 26) - Seven people were hurt, one seriously, in a suspected IRA bomb attack Monday on an exclusive club in the heart of London that caters to the cream of Britain's Conservative establishment, police said.

The blast at the prestigious Carlton Club, whose habitues include British Prime Minister Margaret Thatcher occurred around 8:30 p.m. on the ground floor of the building, and caused extensive damage to the building, Scotland Yard officials added.

Three of the injured were U.S. nationals, while a fourth was 82-year-old Lord Kaberry, a former parliamentary secretary and vice chairman of the Conservative Party from 1955 to 1961.

Firefighters extinguished a blaze in the building and several square blocks around the club, located near Buckingham Palace and the Houses of Parliament, were sealed off while police searched for other explosive devices.

Mrs. Thatcher, who was attending a European Economic Community summit in Dublin, said the attack was "one more outrage in a catalogue of terrorist inhumanity."

"Whoever is responsible stands condemned of total and callous disregard for human life, both within the club and among passers-by. these people are prepared to bomb and maim others indiscriminately for their own perverted satisfaction," Mrs. Thatcher said in a statement.

Scotland yard anti-terrorist squad Commander George Churchill-Coleman said the explosion had been caused by a device containing 10 to 15 pounds (22 to 33 kilograms) of high explosive placed inside the building.

The blast collapsed about half of the ground floor into the basement, shattered windows and scattered debris in the street outside the club.

There were conflicting initial reports on casualties but a Scotland Yard spokesman said six persons had been treated in hospital for shock and smoke inhalation while a seventh was in serious condition after undergoing surgery.

#90176d1420 06/25/1990 ~French/German News Agency

NEW YORK (JUNE 25) - U.S. retail group Melville announced plans Monday to buy Peoples Drug Stores from Canadian concern Imasco for about 330 million dollars.

Pending U.S. Government approval, the deal with Imasco should be completed by August, Melville said in a statement.

With some 490 stores on the east coast of the United States, the Peoples chain had sales of 1.02 billion dollars last year.

Imasco, a conglomerate with interests in restaurants, tobacco and financial services, had bought Peoples in 1984.

Peoples will retain its name after the takeover and become a subsidiary of CVS, Melville's drug store chain.

CVS, which posted sales of 1.95 billion dollars last year, has more than 800 stores in the northeastern United States.

The Melville group also has chains of clothing, footwear and furniture stores. The conglomerate's turnover totaled 7.5 billion dollars in 1989.

KAMPALA (JUNE 25) - Uganda and Zaire signed an agreement over the weekend for joint oil exploration along their common border, it was announced here Monday.

Under the agreement, signed by Ugandan Water and Minerals Development Minister Henry Kajura and Zairean Energy and Mines Minister of State Mbosa Nkodia, the two countries would jointly acquire risk capital to exploit oil believed to exist around lakes Albert and Edward, along the common border.

The agreement followed three years of negotiations between the two countries following seismic studies that showed there were substantial oil reserves.

The agreement also established a joint Permanent Consultative Council to monitor the project.

Negotiations between the council and interested oil companies have already begun. Among interested companies is the Belgian firm, Petrosina.

-30- 1026

#90176d5430 06/25/1990 ~French/German News Agency

WELLINGTON (JUNE 25) - New Zealand authorities Monday announced an immediate ban on imports of semi-automatic weapons.

The ban comes amid police concern that New Zealand could become a dumping ground for the weapons, after Britain and some U.S. states imposed import restrictions.

Police Commissioner John Jamieson cited public concern about the military look-alike weapons.

"We have decided a complete ban on importation is necessary to promote the safe use and control of firearms in New Zealand," he said in a statement.

The ban excludes weapons already in the country, and current stocks held by dealers may be sold.

Dealers said they faced heavy losses in future as semi-automatics constitute about 50 percent of sales.

Wellington gun dealer Tony Scoon called the decision "ridiculous," saying there were hundreds of the weapons in the country already.

#90176d5520 06/25/1990 ~French/German News Agency

NICOSIA (JUNE 25) - Egypt will maintain its oil production level of 872,000 barrels per day (bd) during the next few years and meet any rise in domestic energy from its gas reserves, Minister of Petroleum and Mineral Resources Abdel Hadi Kandil said in a report published here Monday.

He told the Nicosia-based Middle East Economic Survey that the current rate ensured the requisite supplies for the domestic market and kept export levels stable.

Mr. Kandil said increased domestic oil consumption had been curtailed to two per cent annually in the past two years, against annual growth rates of 14 per cent in the early 1980s.

He attributed this belt-tightening to conservation measures and higher domestic fuel prices as well as a rise in gas consumption.

"We have replenished all the oil produced recently," he said. "We have produced 1.6 billion barrels of crude oil during the past six years and have replaced them with around two billion barrels of discovered reserves."

Mr. Kandil said that large volumes of gas production had also been replenished.

He said Egypt currently produces 752 million cubic feet (229 million cubic meters) of natural gas a day, 22,000 bd of condensates and 18,600 bd of

liquified petroleum gas.

WASHINGTON (JUNE 25) - Although many people find cockroaches most repulsive when they are scurrying about, a study by the U.S. Department of Agriculture has shown that the insects are most dangerous when dead.

According to the report, the dried-out bodies of dead cockroaches give off proteins which remain active over long periods and can cause serious allergies. These body reactions are usually manifested in the form of colds, skin irritations and respiratory difficulty, but can sometimes cause states of shock, or, in rare cases, death.

The study estimates that in the United States alone, 10 to 15 million people are affected by this problem, including the majority of asthma sufferers. The researchers warn that the allergies provoked by dead roaches can in turn cause allergic reactions to many shell-fish, which fall into the arthropod family along with cockroaches.

In order to avoid these problems, the study recommends that cockroaches be removed from dwellings by assuring air circulation in attics and around walls, by minimizing humid spaces, and by using chemical products which keep them away.

PARIS (JUNE 25) - Shares in Michelin, the world's biggest tire manufacturer, fell sharply on the stock exchange here after statements from chairman Francois Michelin that a financial loss was likely in 1990.

Shares fell to 99 francs from Friday's close of 108.22 francs with an estimated 425,000 shares changing hands.

Last week shares had already shed about 12 per cent of their value after the company said it would be eliminating up to 2,500 jobs.

At the annual meeting on Friday, Mr. Michelin predicted difficult years ahead for the French company.

Financial analysts had been expecting profits of around 1.5 billion francs (204 million dollars) for the company in 1990.

Seoul (JUNE 25) - South Korea's trade deficit with Japan in May increased sharply to 574 million dollars, marking the largest monthly red-ink figure since July 1987, the commerce and industry ministry announced Monday.

The deficit with Japan in the five months of this year amounts to some 2.37 billion dollars. If the present deficit pace continues, South Korea's annual trade deficit with Japan is expected to top 5 billion dollars, analysts say.

NEW DELHI (JUNE 25) - India's tiger population now stands at 4,200, a census report released Monday said.

This represented an increase of 200 tigers since the last census study in 1984.

There are 18 special tiger reserves in the country. They were set up in 1973 when the animals' population dropped to 2,000.

NICOSIA (JUNE 25) - The National Iranian Oil Company (NIOC) is reducing the price of its crude oil to Japanese customers in July rather than for the entire third quarter as is customary, in line with Saudi price reductions for the month, the Middle East Economic Survey (MEES) reported Monday.

NIOC will shave off 25 cents from a barrel of Iranian Light crude, which is comparable to the spot Oman oil price for July delivery set at 13.75 dollars per barrel, MEES said.

Iranian Heavy will be reduced by 1.15 dollars from a comparable spot Dubai price of 13.27 dollars a barrel for July delivery, the Nicosia-based newsletter said.

Spot prices for July will be calculated at the end of next month.

SEOUL (JUNE 25) - South Korea's trade deficit reached three billion dollars in the five months to May, 50 percent higher than the government's target for the whole year, government statistics showed Monday.

The government had previously estimated the deficit for 1990 at around two

billion dollars.

In 1989, South Korea recorded a 4.6 billion dollar trade surplus.

The statistics from the Tax Administration Office showed South Korean exports totalled 5.22 billion dollars in May, against 5.91 billion dollars of imports, leaving a 692 million dollar trade deficit.

This was the largest monthly deficit this year. May exports represented a 5.3 percent increase from a year ago, while May imports were up 17.9 percent.

South Korea recorded a 546 million dollar trade surplus in the five-month period with its largest trade partner, the United States, down 74 percent from the 2.08 billion dollar surplus in the same period last year.

Trade with Japan was in deficit by 2.37 billion dollars during the period, up 680 million dollars from a year ago.

Ships, tyres, footwear, machinery and synthetic fibre exports performed well, while textile exports were sluggish.

MANILA, June 25 (AFP) - Philippines food and beverage giant San Miguel Corp. was the country's most profitable corporation last year, the official Securities and Exchange Commission (SEC) said here Monday.

San Miguel's reported profit after tax was up 18.5 percent at 2.43 billion pesos (105 million dollars) on a gross revenue of 26.331 billion pesos (1.14 billion dollars), the SEC said.

The majority of shares in San Miguel, which has diversified from its brewing origins into agriculture, poultry and dairy, packaging and real estate, are held by the government.

The 100-year-old firm has regularly topped the SEC's list of 1,000 top blue-chip companies in recent years.

Many of the other top earners are also government-owned or -controlled, including Philippine National Bank, National Power Corp., Philippine Airlines and the Philippine National Oil Co.

The SEC, the government's corporate monitoring body, said the national bank was the second most profitable company, with 2.08 billion pesos (90 million dollars), although its total turnover of 6.777 billion pesos (293 million dollars) put it 13th in the list.

Privately-owned Philippine Long Distance Telephone Co. was third in profits with 2.06 billion pesos (89 million dollars), a 7.6 percent drop from the previous year, when it was the country's most profitable firm.

Its revenue totalled 9.95 billion pesos (43 million dollars) in 1989.

The National Power Corp. was fourth in the profit list with 1.7 billion pesos (73.5 million dollars), but second in gross revenues at 21.95 billion pesos (992 million dollars), the SEC said.

BRISBANE, Australia (JUNE 25) - Japan's giant Daikyo Corp. received state government approval Monday to take over the lease of two Queensland tropical island resorts in partnership with an Australian building society.

Queensland Treasurer Keith De Lacy said the government had approved Daikyo's proposal to enter a 50-50 partnership with OST Friendly Society to lease Green and Fitzroy Islands near Cairns, 1,100 kilometres (700 miles) north of here.

Earlier this year, the state government blocked Daikyo from proceeding with a 60 million Australian dollar (47 million U.S.), total buyout of the Green and Fitzroy Islands leases.

It gace the company 90 days to find a suitable joint-venture partner.

Mr. De Lacy said the government had notified the Foreign Investment Review Board (FIRB) of its satisfaction with the new joint-venture arrangement.

Last week, the Queensland Government moved to block Daikyo from the 74 million dollar (58 million U.S.) purchase of a major hotel development in Cairns.

Mr. De Lacy said the government would ask the FIRB to stop Daikyo from buying the new Four Seasons Hotel because of concern that it already held substantial tourist-related developments in the Cairns district.

LONDON (JUNE 25) - Queen Elizabeth II and Prince Philip left London Monday for a one-day offical visit to Reykjavik before visiting Canada.

The official visit to Canada beginning Wednesday comes as Canada is embroiled in a constitutiional crisis caused by the failure of the federal

government to win unanimous provincial approval of the Meech Lake accord granting Quebec status as a "distinct society."

The queen had been scheduled to attend a signing ceremony Sunday for the Meech Lake accord, now cancelled with the refusal of Manitoba and Newfoundland to ratify it.

LONDON, June 25 (AFP) - The Japanese Nissan auto plant in Sunderland, England, is to increase its orders for European parts by one third by 1992 a company spokesman said on Monday.

The factory, in the northeast of England, is to increase its orders for parts from 450 million pounds (765 million dollars) per year to 600 million pounds (1,020 million dollars). The plant, which was opened in 1986, is due to produce 77,000 cars this year. A third of them will be exported.

Nissan said that the decision demonstrated its confidence in British and European suppliers. The number of European companies producing parts for Nissan increased from 67 in 1986 to 177, of which 120 are British, this year.

Most of the parts used by the Sunderland plant were of European origin, and this should facilitate exportation towards other European countries, the spokesman said.

France has objected to the exportation of cars from Sunderland, maintaining that they contained insufficient European parts.

Nissan plans to produce 100,000 cars in Britain in 1991, and to achieve a growing volume of 200,000 cars in 1993. Half of these vehicles would be exported, the spokesman said.

KARLSRUHE, WEST GERMANY (JUNE 25) - West German authorities have brought charges against five West Germans since May 30 for spying for the East German secret service, officials said here Monday.

West German experts estimate the number of East German moles hiding in West Germany at 5,000.

The Office of the Federal Attorney said a couple, employed by the regional interior ministry of Lower Saxony in Hanover, had been accused of handing confidential documents over to the East German Stasi secret police since

1976.

The Stasi was dismantled earlier this year.

Two West German army officers in the northern cities of Bremen and Bielefeld were suspected of passing over information concerning their army units since the early 1970's.

A fifth suspect, a man from the southwestern town of Kaiserslautern, was charged with taking pictures of U.S. army facilities in the Hunsrueck mountains where NATO cruise missiles have been deployed, sources said.

Meanwhile in East Berlin, a former East German spy in the West German counter-intelligence services said he was considering life "behind the Urals", should Bonn fail to vote an amnesty for East-West spies ahead of German unification.

"The Soviets would no doubt welcome me, but if things there go the way they did here, it will not happen the (peaceful East) German way I'll find myself hanging from the nearest tree", Hansjoachim Tiedge said in an interview with the East German ADN press agency on Monday.

Mr. Tiedge's defection to East Germany in August 1985 was the most serious spying affair in West Germany after Guenter Guillaume, a close aide to then chancellor Willy Brandt, was unmasked as an East German spy in 1974.

TOKYO (JUNE 25) - T. Boone Pickens said here Monday he would buy more shares in Japan's Koito Manufacturing Ltd., but the automobile light-maker hit back with a letter branding him as a speculator with borrowed money.

The Texas oilman said his investment firm, Boone Co., planned to raise its stake from its current 26.4 percent in the "next few weeks" in a drawn-out bid to win seats on Koito's board.

"We intend to participate in a constructive manner as full and equal partners in management of Koito," said Pickens, here to attend Koito's annual general meeting on Thursday.

But Koito, closely linked to Japan's top automaker, Toyota Motor Corp., sent him a letter Monday charging that his investment firm was interested in only "greenmail." Greenmail is the practice of cornering shares in a company in the hope that it or another party will feel threatened and buy them back at a higher price.

Since he aquired a 20.2 percent stake in Koito in March last year, Pickens has been trying to get seats on the board. He has charged that Koito's refusal to agree has typified the overly protectionist nature of Japan's "cross-shareholdings" in a company by its clients, suppliers, banks, and other associates.

In the letter to Pickens, Koito president Takao Matsuura said that Boone Co.'s annual report to the State of Delaware put its total gross assets at the end of 1989 at 1.9 million dollars. But he said Boone Co. holds 39.4 million shares of Koito stock, valued at 950 million dollars.

"This appears to reinforce our conclusions that Boone Co. is not the genuine owner of the Koito shares and that it is acting as the agent or nominee of Watanabe, pursuant to an arrangement you have persistently refused to disclose," the letter said.

The Koito board has recently reaffirmed its policy of "refusing to aid or abet greenmail schemes," said the letter, a copy of which was provided by Koito's attorney.

"Inasmuch as Boone Co. received its shares in such a private transaction from affiliates of Watanabe, who twice tried to greenmail Koito with these shares before transferring record title to Boone Co., we hereby again

demand that you disclose the full nature of your alliance with Watanabe," the letter said.

Boone Co. vice-president Sidney Tassin told a press conference later Monday that the company made a revised report on its assets to the tax authority four weeks ago.

Tassin said that he and tax accountants simply forgot to declare assets abroad and in other states and that the revised figure totalled about 916 million dollars.

#90176d7410 06/25/1990 ~French/German News Agency

TOKYO (JUNE 25) - The cemeteries of Tokyo, having fallen victim to sky-rocketing real estate prices, are posting no-vacancy signs and forcing the ashes of loved ones to be placed in multi-story mausoleums or in distant suburbs.

The problem is so serious the Japanese minister of health recently commissioned a study to look for solutions.

Among the measures recommended by the study, which was released last month, was a drastic reduction in the size of plots offered in public cemeteries - from four square meters (yards) to 1.5 square meters.

Still, Tokyo risks running completely out of space, the report said. In order to meet demand, authorities must acquire between 2.8 million and four million square meters by 2000.

Such a venture is completely impossible given the astronomical cost of land, experts say.

Today, the rare available places in public cemeteries are in the far suburbs, causing Tokyo residents long journeys to visit the graves.

The prices at private cemeteries, which are often associated with temples of churches, are simply prohibitive.

According to a spokesperson for the department store Keio - whose retail line includes grave sites - a plot measuring four square meters in a private cemetery in Hachioji, about 45 kilometers (30 miles) from Tokyo, costs the equivalent of about 7,800 U.S. dollars.

That does not include the cost of the tomb and annual maintenence costs, which total another 23,700 dollars, the spokesperson said.

For less fortunate Tokyo residents, they have little choice but to keep the urns at home - as several thousands do - or accept a place in a multi-level, above-ground mausoleum that holds the ashes of many others separated by small drawers.

Such burial buildings have multiplied around Tokyo in recent years. The first was opened in 1938 in Shosodo to serve as a temporary storehouse and has lasted through the present as sort of Potter's Field. A space costs just 32 dollars a year.

Artificial flowers placed in front of the graves are regularly thrown away as they pose a fire hazard, while natural flowers begin to "smell bad quickly," according to one official.

These days, such grave sites are forced to enlarge to cater to a larger clientele.

#90176d8260 06/25/1990 ~French/German News Agency
MANAMA (JUNE 25) - Egypt will sustain its current oil production level of 870,000 Barrel per day during the coming years and will meet any additional domestic energy requirements from its increasing gas reserves, it was reported Monday.

The weekly Middle East Economic Survey (Mees) quoted Egyptian Minister for Petroleum and Mineral Resources Abdel Hady Kandil as saying Egypt has proven recoverable reserves of about 4.5 billion barrels of oil and 11 trillion cubic feet of natural gas.

Kandil told the Cyprus-based Mees that two interesting discoveries were made last week by Italy's Eni subsidiary, International Egyptian Oil Company (Ieoc). The first was a gas find about 35 kilometers southwest of

the Abu Madi gas field in the Nile Delta with estimated reserves of five billion cubic meters. The second was a small oil field in the Kanayis concession in the desert, 300 kilometers west of Cairo.

Asked whether Egypt had suffered a loss from the recent fall of oil prices, Kandil said: "There is no doubt that we have been hurt by price developments. We have tried to maintain certain price levels, but we were surprised that others were underselling us." "This negative trend will end. I still maintain that the picture will change soon, hopefully by the end of August," he said.

#90176d8340 06/25/1990 ~French/German News Agency

LAGOS (JUNE 25) - Britain will this year provide Nigeria with 362 million pounds (about 627 million dollars) to help it buy British imports in areas where it lacks foreign exchange, a diplomatic source said here Monday.

The amount would also be utilised to support education and training projects in the West African country, the source said.

In addition, about 460,000 pounds' (796,000 dollars') worth of textbooks are to be supplied to Nigerian schools by the British government this year to help end a serious current shortage, the source added.

The Nigerian government recently embarked on the selection and local production of some textbooks to be used uniformly in primary and secondary schools throughout the nation, an official source recalled.

Before now, each of the nation's 21 states and Abuja, the future capital, selected and produced books for its own students, said the source.

-30- 1105

#90176d8400 06/25/1990 ~French/German News Agency

PARIS (JUNE 25) - A labor conflict that had paralyzed French television production company SFP since June 14 ended on Monday, as the CGT labor federation withdrew its strike order to concentrate on what it called "other kinds of actions".

The strike, the longest at SFP since a six-week stoppage in 1979, was called to protest against a company plan to do away with 500 jobs (300 layoffs and 200 early retirements) out of a current total of 1,940.

Management estimated the cost of the conflict at about 20 million francs (3.5 million dollars), excluding any compensation the company might have to pay producers of programmes for which preparations were interrupted during the conflict.

The strike did not have much effect on television networks, and one management source commented that "The SFP employees know that the company has competitors and is no longer irreplaceable".

SFP lost 400 million francs last year, on sales of barely a billion.

-30- 1123

#90176d8460 06/25/1990 ~French/German News Agency

AMMAN (JUNE 25) - One hundred million dollars in assistance from Saudi Arabia arrived Monday in debt-ridden Jordan as a contribution to help the Jordanian economy, Finance Minister Basel Jardaneh announced.

The minister expressed Amman's appreciation for the Saudi support, which followed King Hussein's urgent call for help at an Arab League summit conference last month in Baghdad.

In that appeal, the Jordanian monarch said his country needed aid ''now - not tomorrow, not in the near future''. He voiced fears for the stability of Jordan, which he said had ''exhausted its material resources in defence of the longest Arab frontline with Israel.''

Jordan, which expects to receive 500 to 600 million dollars in foreign assistance this year, has already received 210 million in grants from Saudi Arabia, Kuwait, the United Arab Emirates, Qatar, Oman and Iraq.

The grants will go mainly towards servicing Jordan's 8-billion-dollar debt, post-rescheduling costs for which currently stand at 700 million dollars annually.

#90176d8510 06/25/1990 ~French/German News Agency

PARIS (JUNE 25) - The Paris Bourse made a modest gain on Monday, despite the continued spectacular fall of Michelin tire company stock, prices confirming the market's recovery that got under way last week.

The CAC-40 stock price index ended the Monday session with a gain of 0.41 percent.

Michelin was definitely going against the trend, following up its 12 percent plunge last week by shedding another 8.3 percent on Monday to finish the day at 99.20 francs (17.6 dollars).

More than 1.5 million Michelin shares changed hands, after more than 620,000 on Friday. The world's leading tire-maker's stock is now down 42 percent from the start of the year.

All this is due to pessimism about the tire-maker's prospects for the next few years. Michelin chairman Francois Michelin has not ruled out the possibility of seeing the group dip into red ink this year or next, and on Monday the firm announced that 2,260 jobs would be abolished.

However, Michelin's plunge did not discourage investors, despite Wall Street's sharp fall on Friday and Tokyo's poor Monday performance. They hope for lower interest rates, following a slight decline in West Germany just a few days before economic and monetary unification of the two Germanies.

Analysts note that if U.S. second-quarter business reports raise the possibility of a recession, the Federal Reserve might well loosen credit policy, a move that tends to boost stock markets.

Another big loser Monday was Moulinex, off nine percent. Eurotunnel continued its recent recovery, rising by 4.8 percent on the day. Sade was up six percent, and both Pernod Ricard and Hachette three.

-30- 1849

#90176d8620 06/25/1990 ~French/German News Agency

LONDON (JUNE 25) - Troubled British advertising group Saatchi and Saatchi announced Monday the sale of one of its remaining five U.S.-based management consulting concerns, Peterson and Co., in a deal which leaves Saatchi with less than 15 million dollars in proceeds.

Peterson was bought by Saatchi in 1987 for 42 million dollars. Subsequent investment has increased the cost of the acquisition to 116 million.

A Saatchi spokesman said that the object of the Peterson sale was stop-loss. The company contributed a 6.5 million dollar loss to Saatchi's interim figures this year.

The sale follows the disposal of its biggest consulting concern, Hay Group, for a net 55-60 million dollars earlier this month, announced along with a seven million pound (12 million dollar) pre-tax loss for Saatchi in the six months to end March this year, and no dividend for the period.

Chicago-based Peterson, like Hay Group, is being sold to its management. A Saatchi spokesman said that the company now hopes to gross 80 to 100 million pounds (136 and 170 million dollars) from the sale of all the consulting businesses, which cost it an estimated 250 million (425 million) to build up.

Total net receipts will be lower still because of a number of outstanding debts among them which have to be met by Saatchi, the spokesman said.

When Saatchi first put its consulting arm up for sale a year ago, analysts estimated that they would be worth up to 300 million pounds (500 million dollars), going some way to put the rest of the struggling business back on the rails.

But early attempts to sell it as a single entity failed to find any takers, and the unit contributed a 700,000 pound operating loss to the company's interim figures announced three weeks ago.

Saatchi's failed consulting venture, other acquired debts through overexpansion, and a .5 pence at 83 pence.

#90176d8880 06/25/1990 ~French/German News Agency
DUBLIN (JUNE 25) - The European Economic Community has agreed two-thirds of the laws needed to remove its internal barriers to trade by 1993, European Commission President Jacques Delors told the EEC summit here Monday.

Of the 282 measures proposed in the Community's White Paper to scrap legal, technical and fiscal obstacles, EEC ministers have adopted 185, a Commission spokesman quoted Mr. Delors as saying.

Member states were also speeding up their efforts to transcribe these laws in their national legislation, Mr. Delors said.

Of the 185 measures agreed in Brussels, 71 percent have been enshrined in national statute books, a rise of four percent since the start of the year, thanks to efforts by Italy and Belgium, the two worst laggards, to improve their implementation record, he said.

Mr. Delors praised the six-monund for Bombay crashed into a freight train at a railway station outside southern Andhra Pradesh state's Hyderabad town, killing 35 and injuring 85.

#90176d8920 06/25/1990 ~French/German News Agency
FREETOWN (JUNE 25) - Peace negotiations between the Liberian government and National Patriotic Front (NPFL) rebels were unlikely to get under way as scheduled here Monday, informed sources said, after church mediators and rebel representatives ran into transportation problems.

One of the five Liberian church mediators arrived here Monday for the second round of peace talks, but four others and the NPFL representatives were still seeking transport.

The Reverend Canon Burgess Carr was the only mediator to arrive, aboard an over-booked Ghana Airways flight from Abidjan.

He said the others were trying to charter a plane to bring them to the Sierra Leone capital. The government delegation arrived here Sunday aboard a chartered flight from Monrovia.

The Rev. Carr said the religious leaders and the NPFL delegates met at the weekend, but did not elaborate. The mediators were expected to meet rebel leader Charles Taylor, a fugitive former government official who was granted amnesty by President Samuel Doe last week for alleged embezzlement charges.

The first round of talks held at the U.S. Embassy here was adjourned June 16 without a cease-fire agreement in the bloody six-month civil war.

U.S. officials said it was not known if the talks would be held at the U.S. Embassy or at a conference center built for the 1980 Organization of African Unity (OAU) summit.

U.S. Embassy officials said they were willing to make their facilities available while workers at the conference center Monday had set up tables and microphones in the event that the talks would be held there.

Meanwhile, OAU assistant secretary-general Ahmed Haggag, who arrived here Sunday, said he would leave for Accra later Monday after holding "very encouraging" discussions with Sierra Leone Foreign Ministry officials and acting head of state Salia Jusu-Sheriff.

#90176d8970 06/25/1990 ~French/German News Agency
NAIROBI (JUNE 25) - Talks toward a ceasefire in troubled Liberia broke down Monday when rebels refused to return to the negotiations table.

The delegation head for the National Patriotic Front (Npfl) said in an

interview on the Bbc monday evening he considered it a pure waste of time and money to go to Freetown for talks as long as President Samuel Doe is unwilling to meet the Npfl's main demand and step down from office.

Delegation head Thomas Woweiyu indicated the Npfl would resume the battle for control of the capital Monrovia.

Government representatives under Information Minister Emmanuel Bowier had arrived Sunday in Freetown, where talks broke off June 16 without agreement on a ceasefire.

''We are not obliged to waste money and time,'' said Woweiyu in a telephone interview from Ivory Coast. ''Doe is not willing to negotiate his resignation. Therefore, we are not going to go to Freetown just to talk.''

Npfl head Charles Taylor met Sunday evening with Liberian religious leaders, who have served as mediators. They could not obtain Doe's commitment to resignation, ''so we are going ahead with our plan of action end this for once and for all,'' said Woweiyu.

He announced that the Npfl has already named a transitional government consisting of representatives from every county in Liberia.

In six months of fighting to topple Doe, the Npfl has seized control of about two-thirds of Liberia. Thousands of residents have fled Monrovia in expectation of a fierce battle for control of the capital.

PARIS (JUNE 25) - France took fresh anti-smoking measures on Monday, announcing bans and restrictions on smoking in trains.

In the Paris region, there will be a complete ban on smoking on suburban trains from 1991, affecting some 2.2 million commuters.

For inter-city services, smokers will be banned from lighting up in corridors and whole carriages will be designated non-smoking.

By 1993, 70 percent of train seats will be for non-smokers.

The measures are the result of an agreement between the French railways SNCF and the Health Ministry. They come as parliament is in the process of drafting new anti-smoking laws, backed by 300 medical experts who say the fight against tobacco-smoking is a "priority".

Among measures under consideration is the ban on tobacco sales to under children aged under 16. Health Minister Claude Evin is also proposing to

ban all tobacco advertising from January 1, 1993, and wants price increases in the next budget.

Every year, 50,000 people die in France from lung cancer, respiratory or heart disease caused by smoking, insurance statistics say, and the health bill for smoking-related illnesses comes to 40 billion French francs (seven billion dollars).

ISLAMABAD (JUNE 25) - Pakistan narrowed the imbalance in its international trade to 2.1 billion dollars in the fiscal year ending June 30, Commerce Minister Faisal Saleh Hayat said Monday.

Last year the trade gap was 2.373 billion dollars.

Hayat fixed a 5.5 billion dollars export target in the trade policy he announced for the new year. Despite new measures to liberalise imports, he said the import bill was expected to rise by just 100 million dollars over last year''s 6.8 billion dollars.

In a new effort to push exports, Hayat announced duty-free import of machinery and raw material for factories which guarantee export of 70 percent of their production.

Tax exemptions would be extended to exporters of jewelry, medicines, sports goods and towels and toilet linen and, for the first time, export of dairy products would also be allowed.

Business houses wishing to enter the unified European Community market can expend five percent of their year's export on opening offices in Ec area, the minister announced.

ANKARA (JUNE 25) - West German Defence Minister Gerhard Stoltenberg conferred with his Turkish counterpart Safa Giray and General Staff Chief Necip Torumtay here Monday at the start of a week-long official visit.

Echoing Stoltenberg's arrival speech, Giray said the visit was taking place against a background of profound political changes in Europe and voiced Turkey's support to the German unification.

Bonn minister said his discussions with Turkish officials would cover the conventional force reduction talks in Vienna as well as bilateral defence cooperation.

He said he remained hopeful for an agreement this year in Vienna, adding, however, ''but we shall still be needing Nato and modern armed forces''.

That's why, he said, Bonn valued the cooperation between the Turkish and West German armed defence cooperation, befitting the close ties between the two nations.

He noted earlier that cooperation for building of warships would be reviewed among other projects. Turkey, having bought two Meko-200 class frigates from West Germany, is to build two others at home, having already acquired technology for building submarines.

Beside 130-million-mark cash assistance in 18-month installments, Bonn has also supplied Turkey with transport aircraft, trainers, tank modernisation kits and 77 Leopard I tanks to be supplemented by 150 more.

After official talks Tuesday, Stoltenberg will visit President Turgut Ozal and Premier Yildirim Akbulut.

He will also tour defence units and installations at Izmir and Istanbul before leaving Turkey.

#90176d9300 06/25/1990 ~French/German News Agency

LONDON (JUNE 25) - The new artistic director of British royal couturier Hartnell, former Dior designer Marc Bohan, hopes to dress the Queen and Princess Diana, he told reporters as his appointment was officially announced here on Monday.

Mr. Bohan, 63, said the Queen dressed " in the style of those she represented", and said if she "honoured him with a visit", he would study the British "atmosphere" before presenting his collections.

At the press conference Hartnell President Manny Silvermann confirmed the past week's rumours of Mr. Bohan's appointment.

Mr. Silvermann said the new designer would be showing a haute couture collection in the spring, to be followed by ready-to-wear lines which should put Hartnell back among the ranks of the top fashion houses.

Hartnell was created by Norman Hartnell in 1923, and reached the peak of its success in 1952, designing Queen Elizabeth II's coronation robe.

Norman Hartnell died in 1979, and financial problems led to the sale of Hartnell in 1987, when a consortium headed by Manny Silvermann took over.

Paris-born Bohan started his career with Jean Patou in 1945. In 1960 he became artistic director of Dior, until he was unceremoniously dumped last year and replaced by the Italian Gianfranco Ferre.

The "prestige" of Hartnell and a desire to "do something different" had led him to accept his new job, he said.

#90176d9350 06/25/1990 ~French/German News Agency

BONN (JUNE 25) - The mayors of East and West Berlin made a joint plea here Monday for their city to replace Bonn as the capital of a united Germany.

Speaking at a press conference Tino Schwierzina and Walter Momper, both Social Democrats, said a blueprint for a political union treaty, to be signed later this year, must clearly state that the city which was divided for over 40 year will be the capital and seat of the future German government.

Berlin became the capital of the newly founded German Reich in 1871 but the United States, Britain and France which defeated Nazi Germany in 1945 made Bonn the capital of West Germany when it was created in 1949.

While East Berlin became the capital of East Germany in violation of allied agreements that said that all of Berlin was administered by the three Western allies and the Soviet Union, West Berlin had no direct links to the West as a West German exclave inside communist East Germany.

Mr. Schwierzina and Mr. Momper said if Berlin "loses its status as capital, its already difficult situation in the upcoming economic union will be untenable".

The city has enough space to house government offices, according to the mayors. Offices could be moved back to Berlin over a period of seven to eight years to ease the strain on some 100,000 government officials and their families, they added.

Mr. Momper said that "a country of 80 million people must have a real capital. Bonn's provincialism is no longer acceptable", Mr. Momper added.

East German Social Democratic Party (SPD) leader Wolfgang Thierse warned over the weekend that East Germans will feel as if they have been annexed by West Germany if Berlin no longer is their capital.

ISLAMABAD (JUNE 25) - Afghanistan lodged a strong protest with Pakistan on Monday over violation of its air space by Pakistani jets for the second day running, Radio Kabul monitored here reported.

It said the Kabul government had summoned the Pakistani charge d'affaires to deliver a strongly worded note on repeated intrusions by its war planes.

"Islamabad will be held responsible for the serious consequences of unabetted incursions by the Pakistani jets," it warned.

The radio said the Pakistani charge d'affaires was also summoned Sunday when his country's aircraft intruded into eastern Ningarhar province.

On Monday, two more planes entered Barikot from the Arandu side in the eastern Kunar province, the radio said, adding that the Pakistani jets penetrated 50 kilometers (30 miles) into Afghan territory.

Relations between the two countries are poor due to Islamabad's support of the anti-communist mujahedeen guerrillas battling to overthrow the pro-Soviet government in Kabul.

More than three million Afghans have taken refuge in Pakistan since the 1979 armed intervention in Afghanistan.

#90176d9460 06/25/1990 ~French/German News Agency

KARACHI (JUNE 25) - Prime Minister Benazir Bhutto's supporters in the assembly of troubled Sindh province Monday recommended that politicians demanding imposition of martial law be barred from political activities.

A resolution passed by the ruling Pakistan People''s Party (Ppp) in the assembly stressed that anti-democratic elements should be checked ''before it was too late''.

Opposition leaders have said Bhutto was inviting military intervention by her alleged partisan attitude in handling the ethnic strife between

Mohajir and Sindhi communities in the province.

Troops were called in by Bhutto last month to the aid of civil administration after an estimated 300 people were killed in the latest round of ethnic fighting in the province.

But reluctance by Bhutto to give in to the army's alleged demand for judicial powers to punish the trouble-makers in her home province is said to be holding up a clean-up operation by the troops.

Bhutto told a delegation of the business community in Islamabad Monday that her government needed their support and help in overcoming terrorism which has badly hit economic activities in the province.

Raja Abdur Rehman, the president of the Federation of Pakistan Chambers of Commerce and Industry who led the delegation, charged Indian diplomats were ''spreading all sorts of rumours'' in Karachi, the country's commercial centre,
which has suffered heavily in the ethnic tension.

#90176d9610 06/25/1990 ~French/German News Agency

ANKARA (JUNE 25) - Twelve people, two of them children, were killed early Monday in three armed clashes between Turks and Kurdish rebels, in eastern and southeastern Turkey, the Turkish news agency Anatolie reported.

Quoting government officials in the Diyarbakir region, Anatolie said a rebel commando attacked a village near the town of Genc. During gunfire exchange between the rebels and members of the local pro-government militia, three "village protectors" from the militia, two children from their families, and one "terrorist" were killed.

Anatolia also reported that one policeman and six rebels were killed Sunday

during a Turkish army raid in the eastern area of Van and Sirnak in the southeast.

Rebels operating in the area, which is under a state of emergency, usually belong to the Workers Party of Kurdistan. The Marxist party is the main armed Kurdish organisation fighting the central government in Ankara.

Since renewed fighting between Turks and Kurds in 1984, at least 1,947 people -- 765 civilians, 428 security forces, and 754 rebels -- have been killed.

MANJIL, IRAN (JUNE 25) - Tremors rumbled every half an hour through this hillside town on Monday, slowly destroying the few houses left since last week's massive earthquake buried tens of thousands of Iranians in their homes.

Nobody bothered to sweep up the new debris. Resigned survivors of Thursday's disaster huddled with an unnatural calm under tents as a strong wind whipped up the dust of the bricks and cement. "It's the force of nature," one said.

While dozens of aftershocks struck the region on Monday, foreign relief officials and Iranian provincial authorities met to discuss the next stage of the relief effort -- the creation of huge refugee camps for the

homeless.

"The conditions in the area are favourable," said Daravshi, vice-governor of the northwestern Gilan province. "The climate is good, the region has a lot of rainfall, there are no water or food problems. This is the rice-bowl of Iran."

He said people were "used to spending time outdoors after so many years of shelling" during the eight-year war with Iraq, but added that there was an urgent need for pre-fabricated homes and mobile medical units.

The central relief coordination office in Teheran on Monday put the number of homeless at more than a million with hundreds of town destroyed over an area of 11,000 square kilometers (4,000 square miles) in Gilan and Zanjan provinces.

It said 80,000 people died or were hurt in the quake. Relief coordinators had earlier put the toll at 36,907 dead and 35,693 injured. An unnamed official quoted by the Teheran Times said some 50,000 were killed and 200,000 hurt.

All the injured in the area around the once-bustling towns of Manjil and Rudbar -- worst-hit in the earthquake -- have been evacuated and relief officials agreed that the first stage of the rescue operation was over.

But as foreign physicians returned to Teheran to treat the injured, rescue workers continued to battle clogged roads and bad weather to reach remote villages in the Elbourz mountains totally cut off since the quake.

DUBLIN (JUNE 25) - Ireland's historic win in the World Cup brought life to a standstill throughout the Emerald Isle -- and the European Economic Community (EEC) summit as well.

Policemen, eurocrats, journalists and ancillary staff were glued to television screens at Dublin Castle, while the heads of state and government speeded up their talks in time to catch the penalty shootout that took Ireland, for the first time, into the Cup's quarter finals.

Less than a minute after the final whistle, Prime Minister Charles Haughey appeared in front of television cameras in the Castle courtyard, where he lavished praise on the national team.

"We now need the support of every man, woman and child in the country," he said, in a Churchill-like appeal to the country to give its all for the players in Italy.

Factories, offices and stores throughout the country had closed for the day, or shut their doors early to let fans to watch the match against Romania. Pubs in Dublin braced themselves for a long and noisy night of Guinness-drinking.

Goodwill even flowed from British Prime Minister Margaret Thatcher, who has had her share of abrupt exchanges with Mr. Haughey in the past.

She hurried down from the conference table to watch the match's climax, a British official said.

"She is delighted for the Irish," a British official said, who also observed that, after all, some of the credit should also go to the Irish team's manager, Jack Charlton -- an Englishman.

BANGKOK (JUNE 25) - A Thai-Burmese joint venture store was opened Monday in Burma's capital, state-run Rangoon Radio said in a dispatch monitored here.

The Myanmar-Pornsri store was set up by the Burmese Trade Ministry and private Bangkok-based company, Saha Pornsri Ltd., the radio reported.

It is to sell construction equipment and electronic spare parts for the local market, the radio said.

Myanmar is the official name given to Burma by the military government, which introduced foreign investment legislation to attract badly needed foreign exchange after seizing power in 1988.

The bloody coup was preceded by 26 years of military-backed, isolationist socialist rule blamed for gutting the economy of the resource-rich

Southeast Asian country.

#90176d9960 06/25/1990 ~French/German News Agency
LONDON (JUNE 25) - American Express announced Monday it would establish its European head office in 1992 in London's giant Canary Wharf complex, built by Canadian developers Olympia and York.

For Olympia and York, the American Express announcement is another step towards turning the complex on the east-end London docks into Britain's future financial centre.

The American Express deal represents more than half the 360,000 square metres (3.78 million square feet) of the first phase of the Canary Wharf project, which when completed will be the biggest office complex in Europe with 900,000 square metres of office space, said Olympia and York.

Canary Wharf, a 28-hectare (70 acres) complex four kilometres (2.5 miles) from the City of London, will be the site of several major international companies starting in 1991. Among them are investment banks Merrill Lynch, Morgan Stanley, Credit Suisse First Boston, as well as the Texaco oil giant and Manufacturers Hanover bank.

According to unofficial sources, the British government would like the head offices of the new European Reconstruction and Development Bank to be located at Canary Wharf.

American Express will rent 27,000 square metres for most of its London operations, which are currently scattered in six different locations in the city. About 1,500 American Express employees will work in the new European head office.

Olympia and York is the developer of New York's World Financial Center, which has 720,000 square metres of office space. American Express's world headquarters are located in the New York tower.

#90176e0022 06/25/1990 ~Latin America New Agency
BARCELONA (JUNE 25) EFE - Twenty ex-prostitutes are to start full-time work next month with Barcelona's Parks and Gardens Department under a project for people who want to enter a new profession.

The women, all of whom have been doing part-time work for the department for the past year, have been hired on six-month contracts, will be paid a monthly salary of 80,000 pesetas (dlrs 762) and could have their contracts renewed for a further six months.

Aged between 18 and 52, the women are among a group of 100 people included in the project, jointly organized by the National Employment Institute and the city council.

Since November 1988, more than 200 male and female prostitutes from Barcelona's Old Quarter have participated in projects for people who want to stop working in the sex industry.

Such projects include preliminary courses in technical skills or reading and writing during which participants are given a monthly allowance of 35,000 (dlrs 320) pesetas.

Participants are offered the option of classes in dressmaking, plumbing and electrical skills but the course organizers say gardening has been by far the most popular.

More than 5,000 people in Barcelona's central Old Quarter make a living, directly or indirectly, from prostitution.

LIMA (JUNE 25) EFE - Sixty-five Peruvians, including 50 Maoist "Shininnlence" sparked by the recent capture of leading rebel commanders, authorities said Monday.

The 50 terrorists were killed Sunday in two separate clashes with the Army in the Palo de Acero and Monzon zones of the central Andean region, some 450 km northeast of Lima.

No Army casualties were given for the clashes in the two zones where the Shining Path is believed to be heavily involved with farmers and drug traffickers in the distribution of the coca leaf crop cultivated in the area to finance its insurgency.

Six policemen and four civilians were killed Saturday when the lorry in which they were travelling was blown up by a powerful land mine, reportedly planted by the Shining Path, in the Andean province of Huancavelica, some 580 km east of the capital.

In addition, a group of about 100 Shining Path guerrillas ambushed an Army patrol in the same province Saturday, killing five soldiers.

The authorities said the current upsurge in rebel violence was linked to raids in the capital earlier this month on four Shining Path safe houses, one of them believed to the group's Lima headquarters, that led to the arrest of several rebel commanders.

Some 20,000 people have been killed in terrorist violence since the Shining Path took up arms in 1980.

#90176e0047 06/25/1990 ~Latin America New Agency

BOGOTA (JUNE 25) EFE - Sixty-three people were murdered over the weekend in the Colombian drug capital of Medellin, whose mayor, Omar Florez Velez, called the killings a "death festival."

The city's daily newspaper El Colombiano said the weekend was "perhaps the most tragic and black that Medellin and its neighboring municipalities have had in their history."

Among the dead were five police officers and 58 civilians, most of whom were killed by suspected death squads.

Nineteen people were killed Sunday when hooded gunmen entered a disco and ordered all the men outside, where they were shot by the gunmen, witnesses said.

Police said similar mass murders were carried out by death squads in other parts of Medellin, Colombia's second largest city, with a population of two million.

Since April, more than 100 people have died in random shootings in the

city, home to the notorious Medellin Cartel of cocaine traffickers, as the drug barons wage war against the authorities.

"Whoever is behind these acts are sowing violence for themselves, their children and their families," Florez said.

A Colombian court last week began investigating allegations that some police officers were involved in the mass killing of civilians.

Meanwhile, authorities have increased police patrols on the streets in an attempt to crack down on the violence, while calling in Army troops and tanks to assist.

National Police Chief Gen. Miguel Gomez Padilla said his men have been successful in fighting the drug trade and drug-related terrorism.

"We are decreasing (the drug traffickers') social and physical space," he said.

#90176e0049 06/25/1990 ~Latin America New Agency

PORT-AU-PRINCE (JUNE 25) EFE - Cinemas, theaters and bars were closed in Haiti Monday at the beginning of two days of mourning and the flag hung at halfmast for the State Council member who died after being shot in an attack blamed on supporters of the former Duvalier dictatorship.

Provisional President Ertha Pascal Trouillot declared the two days of mourning after State Council member Serge Villard died Sunday, four days after he was shot as he left a meeting with trade union organizers.

Trade unionist Jean Marie Montes was also killed in the attack and Emmanuel Maxi, another union activist, was seriously wounded.

Observers suspect the Tontons Macoute, deposed dictator Jean Claude Duvalier's private army, of opening fire on those taking part in last Thursday's meeting between trade unions and the State Council, which works in tandem with Pascal Trouillot to prepare for September elections.

Shortly after Villard's death, the government announced the resignation of Economy Minister Violene Le Gagneur, whose appointment was bitterly opposed by the Security Council because of her past support for Duvalier.

Villard had proposed the provision in the 1987 constitution which bars Duvalier associates from holding elected office for ten years.

Le Gagneur was a founding member of the Duvalier organization, the National Progress Party.

The Tontons Macoute terrorized the population for 29 years under the Duvalier dynasty of Francois Duvalier and his son Jean Claude who fled the country during a popular uprising in 1986.

Pascal Trouillot was chosen to head the provisional government by 11 opposition parties after military strongman Gen. Prosper Avril resigned during protests in March.

Shortly before the attack, members of Le Gagneur's personal guard interviewed on Radio Metropole threatened to kill Security Council members who persisted in opposing the economy minister.

#90176e0051 06/25/1990 ~Latin America New Agency

MADRID (JUNE 25) EFE - Former Spanish Lt. General Jaime Milans del Bosch, sentenced to 26 years prison for his part in a 1981 failed coup attempt, was Monday given a conditional pardon, Defense Ministry sources said.

But Milans del Bosch, who ordered tanks into the streets of the eastern Mediterranean city of Velencia in support of the rebellion, would remain in prison until the necessary legal prerequisites are approved, which is expected to take five days.

To be released, Milans del Bosch must complete a third of his sentence and have behaved well in jail which he has spent nine years.

Another condition is that Milans del Bosch be more than 70 years old at the time of the pardon. He turned 75 last June.

Milans del Bosch was originally sentenced to 30 years for his part in the Feburary 23, 1981 coup attempt in which paramilitary civil guards held legislators hostage for 17 hours.

Spain's highest military court in 1987 reduced the sentence to 26 years.

The coup was thwarted when King Juan Carlos refused to support the right-wing rebels, led by Civil Guard Lt. Colonel Antonio Tejero, who then surrendered.

Following Milans del Bosch's release, Tejero will be the last to remain in prison of the eight high-ranking officers given jail time for their roles in the coup attempt.

BEIJING (JUNE 25) XINHUA - CHINESE POLICE ARE SPARING NO EFFORTS TO ENSURE SECURITY DURING THE ASIAN GAMES SET TO OPEN IN THE CHINESE CAPITAL IN SEPTEMBER.

GU LINFANG, VICE MINISTER OF PUBLIC SECURITY, DESCRIBED THIS AS "AN IMPORTANT POLITICAL TASK" OF POLICE IN THE COUNTRY, ESPECIALLY IN BEIJING, THIS YEAR.

GU, REPORTING ON BEHALF OF MINISTER OF PUBLIC SECURITY WANG FANG AT THE 14TH MEETING OF THE 7TH NATIONAL PEOPLE'S CONGRESS STANDING COMMITTEE HERE TODAY, SAID PUBLIC SECURITY POLICE AND THE PEOPLE'S ARMED POLICE ARE RECEIVING TRAINING IN GROUPS AND BY STAGES FOR THE GAMES.

POLICE FORCES IN BEIJING AND NEIGHBORING HEBEI PROVINCE HAVE MADE DETAILED ARRANGEMENTS FOR SECURITY, CHECKPOINTS, TRAFFIC AND CERTIFICATION, AND MADE PREPARATIONS FOR POSSIBLE INCIDENTS DURING THE GAMES.

GU SAID POLICE FORCES IN OTHER LOCALITIES HAVE ALSO BEEN INVOLVED IN THE WORK TO ENSURE EXCELLENT SECURITY DURING THE ASIAN GAMES.

THE MINISTRY OF PUBLIC SECURITY HAS CONVENED A SERIES MEETINGS TO DISCUSS PUBLIC SECURITY WORK AND COORDINATE THE EFFORTS OF ALL DEPARTMENTS OF SECURITY AND PUBLIC ORDER DURING THE ASIAN GAMES, GU ADDED.

COLOMBO (JUNE 25) XINHUA - SRI LANKAN SECURITY FORCES TODAY WILL ADVANCE TO THE BATTICALOA TOWN IN EASTERN SRI LANKA, THE FLASHPOINT OF THE PRESENT FIGHTING WITH A MILITANT TAMIL GROUP, STATE MINISTER FOR DEFENSE RANJAN WIJERATNE SAID HERE TODAY.

BRIEFING NEWSMEN ON THE OVERALL SITUATION OF THE CONFLICT BETWEEN GOVERNMENT TROOPS AND THE LIBERATION TIGERS OF TAMIL EELAM (LTTE) IN THE NORTH AND EAST, WIJERATNE SAID THAT THE SECURITY FORCES "ARE NOW CONSOLIDATING THEIR POSITIONS IN THE EAST TO ENSURE THAT THERE WILL BE NO MORE SKIRMISHES FROM THE LTTE."

THE LTTE LAUNCHED A FULL-SCALE ATTACK ON GOVERNMENT TROOPS AND POLICE STATIONS IN THE EAST OF THE COUNTRY ON JUNE 11, TRIGGERING FIERCE FIGHTING BETWEEN THE TWO SIDES.

UP TO NOW, 132 SOLDIERS HAVE BEEN KILLED AND 200 OTHERS INJURED IN THE FIGHTING, ACCORDING TO OFFICIAL FIGURES. SOME 250 LTTE REBELS HAVE DIED IN THE CLASHES.

THE MINISTER ADMITTED THAT THE PROGRESS OF THE SECURITY TROOPS IN THE EAST HAS BEEN SLOWED. HE SAID THAT THIS IS NOT BECAUSE OF THE LTTE CADRES IN THE WAY BUT BECAUSE OF THE MINES BEING LAID IN THE WAY.

WIJERATNE SAID THAT THERE WERE SOME RESISTANCE FROM THE LTTE IN SOME AREAS IN THE EAST, BUT THE GOVERNMENT TROOPS HAVE FORCED THE REBELS TO RETREAT TO THE JUNGLES.

THERE WERE LARGE NUMBERS OF LTTE BUNKERS IN THE NORTH AND EAST, HE NOTED. THIS SHOWS THAT THE LTTE HAS BEEN PREPARING FOR THE PRESENT WAR FOR SOME TIME.

WIJERATNE SAID THAT THE GOVERNMENT HAS REESTABLISHED SOME POLICE STATIONS IN THE EAST WHICH WERE OVERRUN BY THE LTTE, AND THAT THE NORTHERN JAFFNA

FORT WAS STILL UNDER SIEGE BY THE LTTE BUT THE SECURITY FORCES WERE DETERMINED TO HOLD THE CAMP.

THE LTTE CADRES HAVE BEEN ATTACKING THE JAFFNA FORT, PALALY AIR BASE AND THE KARAINAGAR CAMP IN THE NORTH WITH MORTARS AND ROCKETS DURING THE PAST SEVERAL DAYS.

WHEN ASKED ABOUT HOW MANY PEOPLE HAVE BEEN RENDERED HOMELESS IN THE NORTH AND EAST, THE MINISTER DID NOT DISCLOSE THE FIGURE, BUT SAID THAT THERE WERE SUBSTANTIAL NUMBER OF REFUGEES.

IT WAS REPORTED THAT MORE THAN 200,000 REFUGEES FROM THE PRESENT CONFLICT HAVE BEEN ACCOMMODATED IN 67 CAMPS IN VARIOUS PARTS OF THE COUNTRY.

MANILA (JUNE 25) XINHUA - THE SOVIET UNION IS SEEKING CLEARANCE FROM THE PHILIPPINES TO ALLOW A SOVIET AIRCRAFT AND FOUR NAVAL VESSELS TO CONDUCT RESEARCH ON TYPHOONS IN PHILIPPINE TERRITORY, IT WAS LEARNED HERE TODAY.

IN A LETTER TO PHILIPPINE AMBASSADOR TO MOSCOW JUAN SAEZ DATED APRIL 17, THE U.S.S.R. STATE COMMITTEE FOR HYDROMETEOROLOGY PROMISED THAT IN EXCHANGE FOR ACCESS TO THE 200-MILE ECONOMIC ZONE OF THE PHILIPPINES, FILIPINO SCIENTISTS CAN TAKE PART IN THE RESEARCH WORK ON BOARD THE VESSELS AND AIRCRAFT. THE RESULT OF THE RESEARCH WILL ALSO BE AVAILABLE TO THE PHILIPPINE GOVERNMENT.

THE IL-18 "DC", A SOVIET-MADE METEO-LABORATORY AIRCRAFT, WILL BE BASING IN DA NANG, VIETNAM, DURING THE EXPERIMENT. IT WILL CONDUCT RESEARCH ON TYPHOONS APPEARING TO THE EAST OF THE PHILIPPINES FOR 3 TO 4 DAYS AND THEN GO BACK TO VIETNAM.

THE AIRCRAFT WILL BE WITHIN PHILIPPINE TERRITORY FOR 20 TO 25 DAYS IN CONNECTION WITH "TYPHOON 90" EXPERIMENT, WHICH IS PART OF THE INTERNATIONAL EXPERIMENT ORGANIZED BY THE ECONOMIC AND SOCIAL COMMITTEE/WORLD METEOROLOGICAL ORGANIZATION.

THE FOUR SOVIET VESSELS WHICH ARE ALSO PART OF THE EXPERIMENT WILL CALL ON THE PORT OF MANILA OR CEBU ON DIFFERENT DATES.

THE LETTER SAID THE EXPERIMENT WILL "IMPROVE TYPHOON FORECASTING PARTICULARLY IN CASES OF ANOMALOUS TRACKS OF THEIR MOVEMENTS.

#90176h0094 06/25/1990 ~Chinese News Agency

CHANGSHA (JUNE 25) XINHUA - SCENIC WULINGYUAN IN WESTERN HUNAN PROVINCE HAS BECOME A MAJOR TOURISM RESORT AFTER 10 YEARS' CONSTRUCTION, ACCORDING TO A LOCAL OFFICIAL.

DAYONG CITY TOURISM BUREAU REPORTS THAT MORE THAN 3,000 PEOPLE VISIT THE SCENIC SPOT EVERY DAY AND MORE THAN 10 MILLION PEOPLE HAVE TOURED THE AREA SINCE IT OPENED TO THE PUBLIC IN 1980.

THE AREA INCLUDES ZHANGJIAJIE NATIONAL PARK, TIANZI MOUNTAIN AND SUOXI VALLEY, WHERE PRIMEVAL FORESTS AND RARE PLANTS AND ANIMALS ARE PROTECTED.

THE STATE HAS INVESTED MORE THAN 200 MILLION YUAN TO DEVELOP TRANSPORTATION, POWER SUPPLIES, AND TELECOMMUNICATIONS AND SERVICE FACILITIES IN THE PAST DECADE. THE RESORT'S HOTELS AND INNS HAVE NEARLY 20,000 BEDS.

THE DAYONG CITY TOURISM BUREAU PLANS TO OPEN NEW SCENIC SPOTS AND TOURS TO INTRODUCE THE CUSTOMS AND FOLKWAYS OF ETHNIC MINORITIES SUCH AS THE MIAO AND TU PEOPLE.

#90176h0107 06/25/1990 ~Chinese News Agency
PYONGYANG (JUNE 25) XINHUA - OVER 200,000 CITIZENS FROM VARIOUS STRATA HELD A RALLY AND DEMONSTRATION AT THE KIM IL SUNG SQUARE HERE TODAY TO MARK THE 40TH ANNIVERSARY OF THE STARTING OF THE LAST KOREAN WAR.

THEY CONDEMNED THE UNITED STATES FOR ITS CRIMES AGAINST THE KOREAN PEOPLE IN THAT WAR AND URGED IT TO IMMEDIATELY STOP INTERFERENCE IN THE INTERNAL AFFAIRS OF KOREA AND WITHDRAW ITS FORCES AND NUCLEAR ARMS FROM SOUTH KOREA.

CHOE MUN SON, CHIEF SECRETARY OF THE PYONGYANG MUNICIPAL COMMITTEE OF THE KOREAN WORKERS' PARTY AND CHAIRMAN OF THE PYONGYANG MUNICIPAL PEOPLE'S COMMITTEE, ADDRESSED THE RALLY. HE SEVERELY ACCUSED THE UNITED STATES OF ITS CRIMES OF AGGRESSION AND MASSACRE AGAINST THE KOREAN PEOPLE DURING THE WAR, ITS CONTINUOUS OBSTRUCTION TO THE INDEPENDENT AND PEACEFUL REUNIFICATION OF KOREA AFTER THE WAR, ITS REJECTION OF PEACE PROGRAMS FROM THE NORTH SIDE AND ITS REPEATED MILITARY EXERCISES WITH THE NORTH AS THE

TARGETS.

HE POINTED OUT THAT IT IS URGENT TO EASE TENSION IN THE KOREAN PENINSULA AND MAINTAIN PEACE IN ASIA. HE DEMANDED THE UNITED STATES WITHDRAW ALL ITS TROOPS AND NUCLEAR WEAPONS FROM SOUTH KOREA.

PRESENT AT THE RALLY WERE PAK SUNG CHUL, VICE-PRESIDENT OF THE DEMOCRATIC PEOPLE'S REPUBLIC OF KOREA, KANG HUI WON, VICE-PREMIER OF THE ADMINISTRATION COUNCIL, KIM JONG RIN, MEMBER OF THE SECRETARIAT OF THE CENTRAL COMMITTEE OF THE WORKERS' PARTY, AND OTHER KOREAN PARTY AND STATE LEADING MEMBERS. ALSO ON THE OCCASION WERE FOREIGN DIPLOMATIC ENVOYS IN PYONGYANG.

TOKYO (JUNE 25) XINHUA - THE SOVIET PAYMENT DELAYS TO JAPAN INCREASED RAPIDLY IN THE LAST FEW MONTHS, LEAVING BILATERAL TRADE TO A STANDSTILL AT PRESENT, AN INDUSTRY ASSOCIATION SAID TODAY.

ACCORDING TO THE JAPAN ASSOCIATION FOR TRADE WITH THE SOVIET UNION, SOVIET COMPANIES FAILED TO PAY A TOTAL OF 444 MILLION U.S. DOLLARS FOR JAPANESE GOODS AND SERVICES BY THE END OF MAY, ALMOST DOUBLE THE 255 MILLION DOLLARS IN PAYMENT DELAYS AT THE END OF APRIL.

THE MAIN ITEMS NOT PAID FOR ARE INDUSTRIAL MATERIALS SUCH AS STEEL, FOLLOWED BY CHEMICAL PRODUCTS AND PETROLUEM, THE ASSOCIATION SAID.

HOWEVER, AN OFFICIAL AT A MAJOR TRADING HOUSE WAS QUOTED BY A KYODO NEWS SERVICE REPORT AS SAYING THAT ALLOWING FOR CONTRACTS SIGNED SINCE MARCH, THE ACTUAL PAYMENT DELAY IS ESTIMATED AT AROUND ONE BILLION DOLLARS.

"BILATERAL TRADE IS AT A VIRTUAL STALEMATE AT PRESENT," THE OFFICIAL SAID.

HE WAS ALSO CRITICAL OF THE SOVIETS' RELUCTANCE TO ISSUE LETTERS OF CREDIT INTENDED TO GUARANTEE PAYMENTS FOR IMPORTS, KYODO SAID.

MONTEVIDEO (JUNE 25) XINHUA - URUGUAY HAS BEEN USING ARMY SOLDIERS TO IMPLEMENT AN ANTI-DRUG TRAFFICKING PLAN.

THE MEASURE IS PART OF A GREATER PLAN THAT WAS FORMULATED BY COUNTRIES IN THE REGION WHEN EVIDENCE SURFACED INDICATING THAT URUGUAY HAD BEEN CHOSEN AS A TRAFFIC SITE BY THE POWERFUL COCAINE CARTELS OF COLOMBIA, PERU AND BOLIVIA.

ACCORDING TO OFFICIAL SOURCES, NEARLY ONE THOUSAND ARMY, NAVY AND INTERIOR MINISTRY RECRUITS ARE BEING USED TO TRY TO DETECT THE SMUGGLING OF DRUGS, MAINLY COCAINE AND MARIJUANA.

THE MEDELLIN COCAINE CARTEL IS KNOWN TO HAVE USED URUGUAY AS A JUMP OFF POINT FOR COCAINE SHIPPED TO EUROPE, OFFICIAL SOURCES ADDED.

SEVERAL OF THE CARTELS' "MULES" HAVE ALREADY BEEN CAPTURED AND THEIR COCAINE SEIZED BY POLICE OFFICIALS.

PANAMA CITY (JUNE 25) XINHUA - THE NATIONAL BANK OF PANAMA HAS MANAGED TO BOOST ITS LIQUID ASSETS, THUS REGAINING SOME NATIONAL AND INTERNATIONAL PRESTIGE.

ACCORDING TO OFFICIAL SOURCES, IN THE PAST SIX MONTHS, THE NATIONAL BANK'S NEW MANAGEMENT HAS BEEN ABLE TO PARLAY THE 17 MILLION DOLLARS LEFT BY THE PREVIOUS ADMINISTRATION INTO LIQUID ASSETS OF MORE THAN 500 MILLION DOLLARS.

THE SUBSTANTIAL SUM INDICATES PANAMA'S NATIONAL BANK NOW HAS ENOUGH CASH IN DEPOSITS TO MEET WITHDRAWALS AND TO PROVIDE THE PRODUCTIVE SECTOR WITH NEW SOURCES OF FINANCING.

LAST APRIL 25, PANAMA'S BANKING SYSTEM LIFTED A FREEZE ON ALL SAVINGS ACCOUNTS THAT HAD BEEN IMPOSED IN MARCH 1987 AS SECURITY AGAINST U.S. ECONOMIC SANCTIONS AGAINST PANAMA.

PANAMA'S BANKING SYSTEM IS EXPECTED TO RETURN TO STATE OF COMPLETE NORMALCY BY JULY 9, WHEN A FREEZE ON FIXED ACCOUNTS IS LIFTED.

#90176h0127 06/25/1990 ~Chinese News Agency

GABORONE (JUNE 25) XINHUA - THE AFRICAN NATIONAL CONGRESS (ANC) SAID TODAY THAT IT BACKS A CALL FOR A NATIONAL PEACE CONFERENCE ON AUGUST 4 IN THE STRIFE-TORN NATAL PROVINCE OF SOUTH AFRICA.

THE AFRICA NEWS ORGANIZATION (ANO) SAID THAT THE CONFERENCE WAS PROPOSED BY THE CONGRESS OF SOUTH AFRICAN TRADE UNIONS (COSATU) AND THE UNITED DEMOCRATIC FRONT (UDF).

THE TWO ORGANIZATIONS ALSO SUGGESTED THAT THE STATE OF EMERGENCY IN NATAL BE LIFTED, THE KWAZULU BANTUSTAN POLICE FORCE BE DISBANDED, A JUDICIAL COMMISSION OF INQUIRY BE APPOINTED, THE WARLORDS OPERATING IN NATAL AND KWAZULU BE ARRESTED AND CHARGED, AND THAT THE 32ND BATTALLION OF THE SOUTH AFRICAN DEFENCE FORCE (SADF), WHICH HAS BEEN DEPLOYED IN THE PROVINCE, BE WITHDRAWN.

THE ANC'S BACKING FOR THE CALL WAS CONTAINED IN A STATEMENT RELEASE TODAY AT THE END THE FIRST MEETING INSIDE SOUTH AFRICA IN 30 YEARS OF THE NATIONAL EXECUTIVE COMMITTEE (NEC) AND THE INTERIM LEADERSHIP OF THE ANC.

THE FOUR-DAY MEETING WAS CHAIRED BY ANC INTERNAL LEADER MR. WALTER SISULU, WHO WAS RELEASED BY PRETORIA IN OCTOBER LAST YEAR.

THE NEC CONDEMNED "IN THE STRONGEST TERMS" "SCANDALOUS" RELEASE OF 11 ULTRA-RIGHT ACTIVISTS, ALLEGED TO BE INVOLVED IN A PLOT TO ASSASSINATE ANC DEPUTY PRESIDENT NELSON MANDELA AND SOUTH AFRICAN PRESIDENT F.W. DE KLERK.

IT ALSO WARNED THAT THE AUTHORITIES' ATTITUDE COULD "SERIOUSLY JEOPARDISE" THE PROCESS OF REMOVING OBSTACLES TO CONSTITUTIONAL NEGOTIATIONS.

#90176h0131 06/25/1990 ~Chinese News Agency

ADDIS ABABA (JUNE 25) XINHUA - THE ETHIOPIAN NATIONAL ASSEMBLY HAS CALLED ON ETHIOPIANS TO CONTINUE SUPPORTING THE WAR AGAINST REBELS IN THE NORTH OF THE COUNTRY.

IN A RESOLUTION ADOPTED AT THE END OF ITS FOUR-DAY SESSION LAST NIGHT, THE NATIONAL ASSEMBLY RECOMMENDED THAT RECRUITMENT AND MILITARY TRAINING BE CONTINUED ON A BROADER SCALE AND THAT A DEPENDABLE RESERVE FORCE BE PUT IN PLACE.

THE RESOLUTION URGED ALL RETIRED SERVICEMEN AND OTHER PEOPLE WITH COMBAT EXPERIENCE TO BE IN READINESS TO ANSWER THE NATIONAL CALL FOR FIGHT.

IT ALSO CALLED FOR LAUNCHING NATIONAL PROGRAM UNDER WHICH EVERY ETHIOPIANS IS OBLIGED TO MAKE FINANCIAL AND MATERIAL CONTRIBUTIONS TO SUSTAIN THE WAR.

THE SESSION, THE FOURTH SINCE THE ASSEMBLY WAS CREATED IN 1987, APPARENTLY FOCUSED ON THE DETERIORATING SECURITY SITUATION IN THE COUNTRY AS THE REBELS HAVE INTENSIFIED THEIR OFFENSIVES AGAINST GOVERNMENT TROOPS.

REPORTS FROM NORTHERN ETHIOPIA SUGGESTED THAT THE REBEL FORCES ARE GAINING THE UPPER HAND IN THE FIGHTING WITH THE 300,000 STRONG ETHIOPIAN ARMED FORCES, THE LARGEST IN AFRICA. AT THE SAME TIME, THE REBELS HAVE REJECTED THE GOVERNMENT'S APPEAL FOR RESUMING THE PEACE TALKS, WHICH HAVE BEEN STALLED SINCE EARLY THIS YEAR.

THE RESOLUTION HOWEVER SAID THAT THE GOVERNMENT SHOULD CONTINUE TO TRY TO REVIVE THE PEACE DIALOGUE WITH THE ERITREAN PEOPLE'S LIBERATION FRONT (EPLF) AND THE TIGRAI PEOPLE'S LIBERATION FRONT (TPLF). THE FORMER HAS BEEN FIGHTING FOR ERITREA'S INDEPENDENCE WHILE THE LATTER HAS BEEN STRUGGLING FOR THE DOWNFALL OF THE GOVERNMENT OF PRESIDENT MENGISTU HAILEMARIAM.

THE PEACE EFFORT IS NECESSARY BOTH TO BRING ABOUT AN AMICABLE SETTLEMENT OF THE CONFLICT AND A SPEEDY END TO THE SUFFERINGS OF THE PEOPLE, IT NOTED.

THE RESOLUTION ALSO PROPOSED AUSTERITY MEASURES TO SUSTAIN THE BATTERED ECONOMY AND GREATER EFFICIENY IN THE ACTIVITIES OF BOTH GOVERNMENTAL AND NON-GOVERNMENTAL ORGANIZATIONS.

#90176h0135 06/25/1990 ~Chinese News Agency

UNITED NATIONS (JUNE 25) XINHUA - IRAN TODAY APPEALED TO THE INTERNATIONAL COMMUNITY TO PROVIDE MORE FINANCIAL AND MATERIAL AID TO HELP THE COUNTRY'S TENS OF THOUSANDS OF INJURED AND HOMELESS PEOPLE SUFFERING FROM A STRONG EARTHQUAKE LAST WEEK.

"WE APPEAL TO ALL THE COUNTRIES TO EXTEND THEIR SUPPORT AND AID FOR THE AFFECTED IRANIAN PEOPLE, ESPECILLY FOR THE RECONSTRUCTION OF THE AFFECTED AREAS," IRANIAN AMBASSADOR KAMAL KHARRAZI SAID AT A PRESS CONFERENCE HERE THIS AFTERNOON.

THE STRONG EARTHQUAKE HIT IRAN LAST THURSDAY, KILLING AN ESTIMATED NUMBER OF 50,000 PEOPLE, INJURING 110,000 MORE AND LEAVING 500,000 HOMELESS.

THE EARTHQUAKE, FOLLOWED BY SEVERAL AFTERSHOCKS, REGISTERED 7.8 ON THE RICHTER SCALE AND WAS THE STRONGEST EVER IN IRAN FOR 30 YEARS.

ACCORDING TO THE IRANIAN AMBASSADOR, THE MOST URGENT NEED REQUIRED IS THE MEDICAL AND SURGICAL SUPPLIES TO TREAT THE INJURED, MOST OF WHOM ARE IN VERY CRITICAL CONDITIONS AND MAY NOT SURVIVE IF NOT TREATED IMMEDIATELY AND PROPERLY.

FOOD, SHELTER MATERIALS, CLOTHES, WATER, ELECTRICITY AND SANITATION SUPPLIES AS WELL AS FINANCIAL AID ARE ALSO URGENTLY NEEDED FOR THE RESETTLEMENT OF THE HOMELESS, HE SAID.

THE AMBASSADOR SAID THAT SO FAR, 86 COUNTRIES HAVE ANNOUNCED THEIR EARTHQUAKE RELEIF SUPPORT FOR IRAN AND ABOUT 1,000 HELICOPTERS ARE SHIPPING MEDICAL AND OTHER RELIEF SUPPLIES DAILY TO THE AFFECTED AREAS.

#90176h0136 06/25/1990 ~Chinese News Agency

CAIRO (JUNE 25) XINHUA - A NINE-YEAR-OLD GIRL, ZAHYIA AL-MASIMI, DIED TODAY OF A BULLET WOUND SHE HAD SUSTAINED SATURDAY WHEN ISRAELI SOLDIERS CLASHED WITH STONE-THROWING PROTESTERS IN A REFUGEE CAMP IN THE OCCUPIED WEST BANK.

ACCORDING TO A REPORT FROM JERUSALEM, THE GIRL WAS HIT IN THE HEAD BY A PLASTIC BULLET WHEN SHE STEPPED OUT OF HER HOUSE AMIDST THE CLASH AT THE TULKAREM REFUGEE CAMP. SHE DIED AT JERUSALEM'S MUKASSED HOSPITAL.

THE ISRAELI ARMY SPOKESMAN'S OFFICE ADMITTED THAT THE BULLET WAS FIRED BY AN OFFICER IN THE DIRECTION OF AN ALLEGED LEADER OF THE PROTEST.

BY WESTERN COUNT, 720 PALESTINIANS HAVE BEEN KILLED SINCE AN UPRISING BROKE OUT IN DECEMBER 1987 IN THE WEST BANK AND GAZA STRIP AGAINST ISRAELI OCCUPATION. THE PLO PUT THE PALESTINIAN DEATH TOLL AT WELL OVER 1,000.

ESCALATION OF VIOLENCE IS FEARED NOW THAT ISRAEL IS UNDER A RIGHT-WING GOVERNMENT HEADED BY HARDLINE LIKUD CHIEF YITZHAK SHAMIR, WHICH VOWED TO "UPROOT" THE UPRISING.

#90176h0137 06/25/1990 ~Chinese News Agency

LUANDA (JUNE 25) XINHUA - DIRECT PORTUGUESE INVESTMENT IN ANGOLA AMOUNTED TO ABOUT THREE MILLION U.S. DOLLARS LAST YEAR FROM ABOUT 1.57 MILLION DOLLARS IN THE PREVIOUS YEAR, AN INCREASE OF 91 PERCENT.

LAST YEAR'S INVESTMENT WAS CHANNELED INTO THE FIELDS OF CONSTRUCTION AND COMMONDITY PROCESSING.

TO PROMOTE THE PORTUGUESE INVESTMENT IN ANGOLA AND TRADE BETWEEN THE TWO COUNTRIES THE PORTUGUESE DEVELOPMENT AND OVERSEAS BANK OPENED AN OFFICE IN LUANDA LAST WEEK.

THE OFFICE WAS INAUGURATED BY PORTUGUESE TRADE AND TOURISM MINISTER FARIA DE OLIVEIRA, WHO SAID THAT THE PORTUGUESE INVESTMENT IN ANGOLA CAN HELP OFFSET THE TRADE DEFICIT OF THE SOUTHERN AFRICAN COUNTRY.

THE BILATERAL TRADE HAS BEEN IN FAVOR OF PORTUGAL AND ANGOLA RECORDED A DEFICIT OF ABOUT 300 MILLION U.S. DOLLARS LAST YEAR.

ANGOLA MAINLY EXPORTS OIL AND COFFEE TO PORTUGAL AND IMPORTS FROM ITS FORMER COLONIAL MASTER FOOD, VEGETABLE OIL, MEAT, CANNED FISH AND ELECTRONIC PRODUCTS.

#90176h0138 06/25/1990 ~Chinese News Agency

LAGOS (JUNE 25) XINHUA - NIGERIA IS CONTINUING SEARCH FOR OIL IN THE CHAD BASIN AS PART OF ITS EFFORTS TO EXPAND THE OIL AND GAS RESERVE BASE, A LOCAL NEWSPAPER SAID TODAY.

THE REPORT QUOTED NIGERIAN MINISTER OF PETROLEUM RESOURCES JIBRIL AMINU AS SAYING THAT HE IS OPTIMISTIC ABOUT THE POSSIBILITY OF EXISTENCE OF OIL IN THE AREA DESPITE THE POOR RESULTS OF DRILLING SO FAR.

THE OIL-RICH COUNTRY ANNOUNCED THE DISCOVERY OF NATURAL GAS IN THE CHAD BASIN REGION LAST NOVEMBER AND IT IS WIDELY BELIEVED THAT A OIL DEPOSIT MUST ALSO BE THERE.

HOWEVER, ONLY 39,705 CUBIC METRES OF NATURAL GAS HAS BEEN STRICKEN IN TWO OF THE 12 WELLS DRILLED SO FAR.

SPEAKING SHORTLY AFTER A VISIT TO THE DRILLING SITE LAST WEEK, THE PETROLEUM MINISTER INSISTED THAT THE NEARER THE DRILLING MOVED TOWARD THE LAKE CHAD, THE MORE LIKELY IT COULD STRIKE OIL.

OTHER THREE COUNTRIES BORDERING THE BASIN -- CHAD, NIGER AND CAMEROON -- HAVE BEEN PUMPING OIL FROM THE BASIN, HE SAID.

THE MINISTER DISCLOSED THAT THE NIGERIAN NATIONAL PETROLEUM CORPORATION (NNPC) PLANS TO DRILL A FEW WELLS CLOSE TO THE NIGER AND CHADIAN SECTORS OF THE BASIN WHERE OIL HAS BEEN DISCOVERED.

#90176h0145 06/25/1990 ~Chinese News Agency

BEIRUT (JUNE 25) XINHUA - GUNMEN OF TWO RIVAL SHIITE MOSLEM FACTIONS, THE SYRIAN-BACK AMAL MOVEMENT AND IRANIAN-BACKED HEZBOLLAH (PARTY OF GOD), TRADED MACHINEGUN AND ROCKET FIRE IN SOUTH LEBANON TODAY.

ACCORDING TO LOCAL RADIO REPORTS, THE TOWNS OF SERVA AND HOMIN IN ATTOFAH PROVINCE EAET OF SIDON WERE ALSO BOMBARDED BY 120MM HOWITZER FIRE. TENSION CONTINUED AFTER THE BOMBARDMENT GAVE WAY TO SNIPER FIRE.

EARLIER THIS MONTH, SYRIA AND IRAN TRIED TO END THE INTER-SHIITE CONFLICT WHICH HAS BEEN GOING ON AND OFF FOR MORE THAN TWO YEARS, BUT THE EFFORT FAILED BECAUSE OF THE DEEP HOSTILITY BETWEEN THE TWO RIVAL FACTIONS.

NEVERTHELESS, SYRIAN TROOPS MANAGED TO HALT FIGHTINGS BETWEEN AMAL AND HEZBOLLAH IN WEST BEIRUT BY RAIDING THEIR POSITIONS, CONFISCATING THEIR WEAPONS AND ARRESTING ARMED PERSONNEL.

TODAY'S FIGHTING FOLLOWED THE KILLING OF AN AMAL COMMANDER IN A CAR EXPLOSION SUNDAY IN GHAZIYEH, FIVE KILOMETERS SOUTH OF SIDON.

NO ONE CLAIMED RESPONSIBILITY FOR THE EXPLOSION WHICH ALSO WOUNDED FIVE AIDES OF HUSSEIN HIJAZI, AMAL'S REGIONAL SECURITY COMMANDER.

#90176k0010 06/25/1990 ~Japanese News Agency

BANAI, MALAYSIA (JUNE 25) KYODO - ALL BUT 21 OF THE 1,003 HITACHI CONSUMER PRODUCTS (MALAYSIA) CO. WORKERS FIRED LAST WEEK FOR STAGING AN ILLEGAL STRIKE WERE REEMPLOYED MONDAY AFTER APOLOGIZING TO MANAGEMENT, A COMPANY OFFICIAL SAID.

HITACHI TOOK BACK 982 STRIKERS AFTER THEY SIGNED AN APOLOGY LETTER TO MANAGEMENT AND PROMISED TO AVOID FUTURE STRIKE ACTIVITY.

THE REMAINING 21 WORKERS WERE REFUSED REEMPLOYMENT BECAUSE THE COMPANY BELIEVES THEM TO BE WALKOUT ORGANIZERS. THE 21 SAID MONDAY THEY WOULD APPEAL TO THE HUMAN RESOURCES MINISTRY TO GET THEIR OLD JOBS BACK.

THE WORKERS WALKED OFF THE JOB JUNE 18 WHEN THE GOVERNMENT REJECTED THEIR REQUEST TO JOIN A NATIONAL TRADE UNION. THEY WERE FIRED BY THE COMPANY FOUR DAYS LATER.

ONLY UNIONIZED WORKERS ARE ALLOWED TO GO ON STRIKE, AND THEN ONLY AFTER GIVING ADVANCE NOTICE TO MANAGERS AND GOVERNMENT OFFICIALS.

ALL MALAYSIAN WORKERS, EXCEPT THOSE IN THE ELECTRONICS SECTOR, CAN FORM OR JOIN NATIONAL TRADE UNIONS. ELECTRONICS WORKERS CAN FORM IN-HOUSE UNIONS.

COMPANY MANAGING DIRECTOR YOSHIKAZU WATANABE TOLD REPORTERS MONDAY HE HAS REPEATED HIS OFFER TO HELP WORKERS FORM AN IN-HOUSE UNION.

WORKERS REJECTED THE OFFER LAST MONTH, SAYING THE ONLY EXAMPLE OF AN IN-HOUSE UNION IN AN ELECTRONICS COMPANY, ONE IN THE UNITED STATES, HAS PROVED UNWORKABLE.

MALAYSIA IS THE WORLD'S LARGEST EXPORTER OF SEMICONDUCTORS. LAST YEAR, THE NATION EXPORTED 3.8 BILLION DOLLARS IN ELECTRIC COMPONENTS. WORKERS IN THE ELECTRONICS INDUSTRY ARE AMONG THE LOWEST PAID IN MANUFACTURING.

#90176k0071 06/25/1990 ~Japanese News Agency

TOKYO (JUNE 25) KYODO - JAPAN'S MITSUI OIL EXPLORATION CO. AND ARABIAN OIL CO. SAID MONDAY NORWAY'S GYDA UNDERSEA OIL FIELD, IN WHICH THEY HOLD A COMBINED 10 PERCENT CONCESSION, STARTED PRODUCTION LAST THURSDAY.

IT CURRENTLY PRODUCES ABOUT 20,000 BARRELS PER DAY, 2,000 BARRELS OF WHICH WILL BE IMPORTED INTO JAPAN BY THE TWO COMPANIES, OFFICIALS OF THE COMPANIES SAID.

PRODUCTION IS PLANNED TO CONTINUE FOR ABOUT 20 YEARS, INCREASING TO 60,000-70,000 BARRELS PER DAY WITHIN THE NEXT MONTHS, THEY ADDED.

GYDA OIL FIELD, SOME 300 KILOMETERS SOUTHWEST OF STAVANGER, WAS FOUND IN 1980 AND HAS BEEN UNDER DEVELOPMENT SINCE 1988.

FOUR COMPANIES, INCLUDING A NORWEGIAN STATE-RUN PETROLEUM DEVELOPMENT COMPANY, HOLD 90 PERCENT OF THE CONCESSION. MITSUI OIL AND ARABIAN OIL HOLD THE REMAINING 10 PERCENT WITH A COMBINED INVESTMENT OF ABOUT 200 MILLION DOLLARS.

#90176k0077 06/25/1990 ~Japanese News Agency

TOKYO (JUNE 25) KYODO - A RESEARCH GROUP FOR THE POST AND TELECOMMUNICATIONS MINISTRY SUBMITTED A REPORT MONDAY OUTLINING SAFETY STANDARDS FOR THE USE OF ELECTRONIC GOODS AND TELECOMMUNICATIONS EQUIPMENT.

THE TWO-YEAR STUDY, HANDED OVER TO POSTS AND TELECOMMUNICATIONS MINISTER TAKASHI FUKAYA, IS THE FIRST ATTEMPT IN JAPAN TO LIST STANDARDS OF SAFETY FOR THE NATION'S BURGEONING USE OF ELECTRONIC GOODS ALTHOUGH IT HAS LONG BEEN RECOGNIZED THAT ENERGY EMITTED BY THESE APPLIANCES CAN HAVE NEGATIVE

EFFECTS ON THE HUMAN BODY.

THE REPORT, BY THE ELECTRONIC COMMUNICATIONS TECHNOLOGY COUNCIL, CLAIMS THERE IS A COMPLACENCY SURROUNDING THE USE ELECTRONIC APPLIANCES, WITH USERS LARGELY UNAWARE OF THE NEGATIVE EFFECTS ELECTROMAGNETIC WAVES MAY HAVE ON THE BODY, SUCH AS RAISING THE LEVEL OF ITS INTERNAL TEMPERATURES.

THE MINISTRY INDICATED THAT IT WOULD MAKE THE STANDARDS OF THE REPORT AVAILABLE IN A BULLETIN COMPLETE WITH UTILIZATION LEVELS FOR PEOPLE USING ELECTRONIC GOODS AND TELECOMMUNICATIONS EQUIPMENT.

THE STUDY EXAMINED THE EFFECTS OF RADIO WAVES FROM 10 KILOHERTZ TO 300 GIGAHERTZ, WHICH WOULD COVER THE WAVES EMITTED BY A NUMBER OF HOME APPLIANCES INCLUDING RADIOS, TELEVISIONS AND MICROWAVE RANGES. IT EXCLUDED HOWEVER, APPLIANCES WHICH USED LESS THAN SEVEN WATTS OF ELECTRICITY.

THE STUDY ALSO SEPARATED SUBJECTS INTO A GROUP WORKING WITH TELECOMMUNICATIONS EQUIPMENT AND AWARE OF THE DANGERS OF ELECTROMAGNETIC WAVES AND A ''GENERAL'' GROUP THAT IS UNAWARE OF THE RADIO WAVES THEY ENCOUNTER EVERY DAY.

THE FORMULA FOR SAFETY LEVELS OFFERED BY THE STUDY TAKES INTO CONSIDERATION THE STRENGTH OF THE ELECTRONIC SOURCE AND MAGNETISM ALONG WITH THE FREQUENCY OF THE WAVES.

IN AN EXAMPLE OF A TELEVISION BROADCAST ANTENNA WHICH GIVES OFF STRONG ELECTROMAGNETIC WAVES, THE STUDY SUGGESTS THAT A PERSON OF THE FIRST GROUP WOULD BE SAFE OUTSIDE OF A NINE-METER DISTANCE FROM THE ANTENNA WHILE A MEMBER OF THE ''GENERAL'' GROUP IS SAFE AT 21 METERS. LESS THAN SIX MINUTES WITHIN THOSE LIMITS ALSO WOULD NOT POSE ANY DANGER.

THE SAFETY STANDARDS OUTLINED BY THE COUNCIL IN THE REPORT ARE LARGELY SIMILAR TO THOSE ALREADY SPELLED OUT IN OTHER NATIONS SUCH AS THE U.S.

THE STUDY CAUTIONED ALSO THAT PEOPLE WITH METAL REINFORCEMENTS FOR BONES IN THEIR BODIES NEED TO EXERCISE SPECIAL CARE AROUND APPLIANCES THAT EMIT ELECTROMAGNETIC WAVES.

TOKYO (JUNE 25) KYODO - MITSUI PETROCHEMICAL INDUSTRIES LTD. SAID MONDAY IT HAD BOUGHT THE EASTMAN KODAK NEW YORK-BASED SEMICONDUCTOR PARTS PRODUCTION AND SALES DIVISION, PATHTEC.

THE PURCHASE PRICE WAS 4 MILLION DOLLARS (ABOUT 620 MILLION YEN). THE DIVISION WILL BE RENAMED MITSUI PATHTEC CORP.

THE PURCHASE WAS DECIDED IN ANTICIPATION OF A FUTURE BOOM IN PRODUCTS MADE BY PATHTEC, COMPANY OFFICIALS SAID.

-30- 593

#90176k0081 06/25/1990 ~Japanese News Agency

TOKYO (JUNE 25) KYODO - C. ITOH AND CO. SAID MONDAY IT WILL SET UP A JOINT VENTURE IN TOKYO WITH PPG INDUSTRIES INC., A MAJOR U.S. GLASS MAKER, TO IMPORT AND SELL GLASS IN JAPAN.

OF THE PLANNED CAPITAL OF 100 MILLION YEN, PPG WILL HOLD 51 PERCENT AND C.ITOH 49 PERCENT.

THE NEW FIRM, TO BE NAMED PPG C.I. WILL START OPERATION AT THE END OF JULY C. ITOH OFFICIALS SAID.

IT WILL IMPORT GLASS FOR GENERAL CONSTRUCTION USE FROM PPG'S JOINT PLANT IN CHINA, AND FOR HIGH-RISE BUILDING CONSTRUCTION FROM PPG'S PLANT IN THE U.S.

JAPAN'S GLASS INDUSTRY HAS GROWN AN ANNUAL 10 PERCENT RECENTLY AND THE NEW FIRM WILL AIM AT ANNUAL SALES OF SOME 10 BILLION YEN IN THE NEXT THREE TO FIVE YEARS, THE OFFICIALS SAID.

#90176k0086 06/25/1990 ~Japanese News Agency

BANGKOK (JUNE 25) KYODO - MORE THAN 1,100 THAI MUSLIM PILGRIMS BOUND FOR THE ANNUAL HAJ IN MECCA WERE LEFT STRANDED IN BANGKOK ON MONDAY BECAUSE OF A LACK OF FLIGHTS TO TAKE THEM TO SAUDI ARABIA.

THE PILGRIMS WERE WAITING AT BANGKOK'S DON MAUNG AIRPORT FOR SEVERAL DAYS FOR THE GOVERNMENT TO ARRANGE TRANSPORTATION FOR THEM.

THE GOVERNMENT AND THAI INTERNATIONAL, THAILAND'S NATIONAL FLAG CARRIER, COULD PROVIDE ONLY 492 SEATS ON TWO CHARTER PLANES FROM MALAYSIA AIRLINE SYSTEM (MAS) LEAVING BANGKOK MONDAY NIGHT AND TUESDAY MORNING. THE GOVERNMENT ALSO AGREED TO SUBSIDIZE THE AIRFARES FOR THE TWO FLIGHTS.

A PILGRIMAGE COORDINATOR WARNED THE GOVERNMENT OVER THE WEEKEND THERE COULD BE A ''SERIOUS PROBLEM'' IF IT FAILED TO PROVIDE TRANSPORT FOR THE PILGRIMS BEFORE THE AIRPORT NEAR MECCA CLOSES AT MIDNIGHT ON TUESDAY.

HOWEVER, THE SECRETARY TO THE THAI MUSLIM RELIGIOUS LEADER PRASIT MAHAMAD SAID MONDAY THAT THE DISAPPOINTED PILGRIMS WOULD RETURN TO THEIR HOMES PEACEFULLY SINCE THE GOVERNMENT HAD DONE ITS BEST TO HELP THEM.

THE PROBLEM WAS INITIALLY CAUSED BY A DRAMATIC INCREASE IN THE NUMBER OF

THAI-MUSLIMS WANTING TO GO TO THE HAJ THIS YEAR.

A DECREASE IN CHARTER FLIGHTS BY SAUDI ARABIAN AIRLINES, WHICH USED TO PROVIDE ENOUGH CHARTER FLIGHTS TO TAKE ALL THAI MUSLIMS, AGGRAVATED THE SITUATION.

THE SAUDI AIRLINE PROVIDED ONLY THREE CHARTER FLIGHTS FROM THAILAND THIS YEAR, HALF THE NUMBER IT PROVIDED LAST YEAR.

THE SAUDI GOVERNMENT HAS EXPRESSED ITS DISSATISFACTION WITH THAILAND OVER A CASE INVOLVING THE KILLING OF THREE OF ITS DIPLOMATS IN BROAD DAYLIGHT IN BANGKOK EARLY THIS YEAR. THAI AUTHORITIES SO FAR HAVE FAILED TO SOLVE THE CASE.

THERE ARE MORE THAN 2 MILLION MUSLIMS IN THAILAND WHERE THE MAJORITY OF ITS 56 MILLION POPULATION ARE BUDDHISTS.

TOKYO (JUNE 25) KYODO - YUKONG LTD., THE BIGGEST INTEGRATED ENERGY ENTERPRISE IN SOUTH KOREA, ANNOUNCED ON MONDAY IT HAD ESTABLISHED A BRANCH OFFICE IN TOKYO ON APRIL 1.

THE JAPANESE OFFICE, WHICH FOLLOWS ONES IN NEW YORK AND SINGAPORE, WILL HANDLE EXPORTS AND IMPORTS BETWEEN JAPAN AND SOUTH KOREA, THE COMPANY SAID.

YUKONG, AN AFFILIATE OF THE SUNKYOUNG BUSINESS GROUP, IS ENGAGED IN WIDE-RANGING ENERGY BUSINESSES FROM OIL DEVELOPMENT TO CHEMICALS, OCCUPYING A 44 PERCENT SHARE OF THE COUNTRY'S OIL PRODUCTS MARKET.

-30- 688

#90176k0090 06/25/1990 ~Japanese News Agency

TOKYO (JUNE 25) KYODO - SOVIET COMPANIES FAILED TO PAY A TOTAL OF 444 MILLION DOLLARS FOR JAPANESE GOODS AND SERVICES BY THE END OF MAY, ALMOST DOUBLE THE 255 MILLION DOLLARS IN PAYMENT DELAYS AT THE END OF APRIL, AN INDUSTRY ASSOCIATION SAID MONDAY.

THE JAPAN ASSOCIATION FOR TRADE WITH THE SOVIET UNION AND SOCIALIST COUNTRIES OF EUROPE SAID THE NUMBER OF DEFAULTING STATE-RUN CORPORATIONS ALSO DOUBLED TO MORE THAN 10.

THE MAIN ITEMS NOT PAID FOR ARE INDUSTRIAL MATERIALS SUCH AS STEEL, FOLLOWED BY CHEMICAL PRODUCTS AND PETROLEUM, IT SAID.

THE ASSOCIATION'S DATA, BASED ON A SURVEY ON 15 JAPANESE COMPANIES, INCLUDING MAJOR TRADERS, IS BELIEVED TO COVER ONLY 80 PERCENT OF SOVIET

PAYMENT DELAYS TO JAPAN, INDUSTRY SOURCES SAID.

THE ASSOCIATION DEFINED PAYMENT DELAY AS CONTRACTS THAT HAVE NOT BEEN SETTLED FOR 60 DAYS OR MORE AFTER SHIPMENT.

AN OFFICIAL AT A MAJOR TRADING HOUSE SAID THAT ALLOWING FOR CONTRACTS SIGNED SINCE MARCH, THE ACTUAL PAYMENT DELAY IS ESTIMATED AT AROUND 1 BILLION DOLLARS.

''BILATERAL TRADE IS AT A VIRTUAL STALEMATE AT PRESENT,'' HE SAID. THE OFFICIAL IS CRITICAL OF THE SOVIETS' RELUCTANCE TO ISSUE LETTERS OF CREDIT (L/CS), DOCUMENTS INTENDED TO GURANTEE PAYMENTS FOR IMPORTS.

#90176k0093 06/25/1990 ~Japanese News Agency

SEOUL (JUNE 25) KYODO - SOUTH KOREAN GOVERNMENT, OPPOSITION PARTIES AND NEWSPAPERS MARKED THE 40TH ANNIVERSARY OF THE 1950 KOREAN WAR ON MONDAY BY URGING NORTH KOREA TO CHANGE ITS CLOSED-DOOR ATTITUDE ON REUNIFICATION OF THE TWO KOREAS.

PRIME MINISTER KANG YOUNG HOON SAID IN A STATEMENT THAT SEOUL ''WILL WAIT PATIENTLY FOR NORTH KOREA, WHICH STILL DREAMS OF COMMUNIZING THE SOUTH BY FORCE, TO WALK TOWARD OPENNESS AND AWAY FROM INTERNATIONAL ISOLATION, JOINING THE SOUTH IN PROSPERITY.''

''WE WILL NOT HESITATE TO DO ANYTHING TO RELIEVE THE SUFFERINGS OF OUR NORTH KOREAN COMPATRIOTS,'' KANG SAID. ''IT IS THE TASK OF OUR TIMES FOR US, WHO EXPERIENCED THE TRAGIC WAR, TO TEACH THE POSTWAR GENERATIONS TO BE FULLY AWARE OF WHAT THE VALUES OF FREEDOM AND DEMOCRACY ARE AND WHAT ORDEALS AND HARDSHIPS OUR NATIONALS WENT THROUGH,'' SOUTH KOREA'S YONHAP NEWS AGENCY QUOTED KANG AS SAYING.

THE TWO KOREAS FOUGHT A THREE YEAR WAR, STARTING JUNE 25, 1950, WITH CHINA AND THE UNITED STATES BACKING DIFFERENT SIDES.

THE RULING DEMOCRATIC LIBERAL PARTY ANNOUNCED THE SAME DAY THAT THE NORTH MUST OPEN ITS HEART TO ITS FELLOW KOREAN NATIONALS BY ABAIMPORTANT NOT TO LET THEM REPEAT THE SAME CRIME AND WE MUST PROMOTE OPENNESS IN THE NORTH '' THE PAPER SAID.

ON MONDAY, SOUTH KOREA ALSO PROPOSED THE HOLDING OF A SEVENTH ROUND OF PRELIMINARY TALKS BETWEEN SEOUL AND PYONGYANG OFFICIALS ON A PROPOSED INTER-KOREAN PRIME MINISTERS' MEETING AT PUNMUMJOM TRUCE VILLAGE ON JULY 3 YONHAP SAID.

MEANWHILE, THE OUTGOING COMMANDER OF THE U.S. FORCES IN SOUTH KOREA SAID THE MILITARY THREAT FROM NORTH KOREA HAS DECREASED IN DEGREE COMPARED TO

THREE YEARS AGO WHEN HE TOOK COMMAND.

EXPRESSING THE HOPE THAT THE MOVEMENT TOWARD EAST-WEST DETENTE WILL INFLUENCE PYONGYANG'S ATTITUDE, GEN. LOUIS MENETREY TOLD A FAREWELL PRESS MEETING THAT THE REDUCTION CAME AFTER ENFORCED PREPARATIONS BY THE U.S. AND SOUTH KOREAN COMBINED FORCES.

MENETREY ALSO DESCRIBED AS ''EMBRYONIC'' NORTH KOREA'S NUCLEAR ARMS DEVELOPMENT.

IN WHAT IS REGARDED AS THE FIRST OFFICIAL PUBLIC COMMENT BY A SENIOR U.S. MILITARY OFFICER, HE SAID IT WOULD TAKE SOME TIME BEFORE NORTH KOREA COULD ACTUALLY PRODUCE AND DEPLOY SUCH WEAPONS IN THE FIELD.

SOUTH KOREAN DEFENSE MINISTER LEE SANG HOON HAS REVEALED AN ESTIMATION THAT NORTH KOREA IS LIKELY TO BE ABLE TO MAKE NUCLEAR ARMS BY THE MID 1990S.

MENTREY ALSO SAID SOUTH KOREAN AND U.S. TROOPS HAVE CREATED AN EMERGENCY PLAN BASED ON THE HYPOTHESIS THAT THE NORTH MAY DEPLOY BIOCHEMICAL WEAPONS.

MENETREY IS TO BE REPLACED BY GEN. ROBERT RICASSI ON TUESDAY AS COMMANDER OF U.S. FORCES IN SOUTH KOREA.

-30- 2853

#90176k0095 06/25/1990 ~Japanese News Agency

TOKYO, JUNE 25 KYODO - DU PONT JAPAN LTD. AND DU PONT-MITSUI FLUOROCHEMICALS CO. SAID MONDAY THAT THEIR U.S. PARENT COMPANY WILL START PRODUCTION OF SUBSTITUTE GASES FOR POLLUTION-CAUSING CHLOROFLUOROCARBON GASES (CFCS) IN JAPAN PROBABLY IN 1992.

U.S. DU PONT PLANS TO PRODUCE THREE TYPES OF HYDROFLUOROCARBON (HFC) -- 134A, 152A AND 125 -- WITH PLANNED TOTAL PRODUCTION OF 63,000 TONS PER YEAR IN ITS SUBSIDIARIES' PLANTS IN JAPAN AND THE NETHERLANDS AS WELL AS IN THE UNITED STATES FROM 1992 OR 1995 AT THE LATEST.

IN JAPAN, DU PONT-MITSUI WILL PRODUCE ABOUT 7,000 TONS PER YEAR OF HFC-134A IN ITS PLANT IN CHIBA PREFECTURE, OFFICIALS OF THE SUBSIDIARIES SAID.

U.S. DU PONT HAS SAID THAT IT WILL STOP PRODUCTION OF CFCS COMPLETELY BY THE END OF THIS CENTURY.

#90176m0001 06/25/1990 ~Market Consensus Surveys

FALLS CHURCH, VA (JUNE 25) MCS - A SAMPLING OF TODAY'S COMMENTARY

COMPILED BY MARKET CONSENSUS SURVEYS, INC. IN TWO SECTIONS (1) STOCKS (2)MONEY & ECONOMY.

IN THE NEWS:

U.S. stocks are trading mostly higher in London this morning. ... The COMMERCE DEPARTMENT reported Friday that personal consumption expenditures were unchanged in May after gaining 0.5% in April and 0.3% in May. ... Machine tool orders fell 28.7 in May after rising for two consecutive months, says the ASSOCIATION FOR MANUFACTURING TECHNOLOGY. ... PHILIP MORRIS has agreed to pay $3.8 billion to buy JACOBS SUCHARD, Switzerland's No. 2 candy and food firm. ... GRUMMAN is offering early retirement to 6,000 employees. ... "The New York Times" says a group of bankers is arranging a $20 million bridge loan for DONALD TRUMP as the groups presses for approval of a larger loan package to rescue the developer.

WHAT'S AHEAD:

The NATIONAL ASSOCIATION OF REALTORS releases existing home sales for May later today and the COMMERCE DEPARTMENT reports on new home sales on Friday. ... Leading economic indicators are due out Wednesday from Commerce.

FROM THE BEARS:

"The back of the bull has been broken," says JOE FESHBACH, technical research chief at SHEARSON LEHMAN HUTTON. "We're in for a lousy market." He sees the Dow skidding to 2750 in the next two weeks, followed by several failing rallies. By the end of the year, he sees the Dow down to 2400. ("USA Today", 6/25)

BERNADETTE MURPHY says the Dow could reach 3100 on the short-term, but she remains bearish over the longer haul because "we have a divergency in the stock market which has persisted since last August and that's the number of issues that are participating during the advancing periods. ... Until there is a correction in that divergence, I think there is a serious negative in the stock market and that is what has kept me in the bearish camp." ("Wall Street Week", 6/22)

STOCK MARKET:

"The selloff [Friday] looks awfully negative," says RICKY HARRINGTON, director of investment policy at MARION BASS SECURITIES of Charlotte, N.C. "My feeling is there will not be a major carryover of selling Monday and I don't think this is the start of something big on the downside. There is very good support for the Dow at 2950." ("Investor's Daily", 6/25)

"My indicators are OK, but my stomach isn't," says MARTIN ZWEIG. "I don't

like what I see in the economy. It's really bothering me. ... Even though bonds have been OK over the couple of months and [interest] rates haven't gone up, the Fed hasn't been pumping, either. And I don't like that." ("Wall Street Week", 6/22)

"The important thing about the week is that the surprises were on the bad side," says BILL WOLMAN, chief economist for "BusinessWeek" and "CNBC." "The week was bracketed by two dismal days." He blames "a growing recognition that there is a credit crunch," and a weakening

economy. "It's a different world than it was," says Wolman. (CNBC "Market Wrap-Up", 6/22)

"The Dow is in a sideways consolidation and the action Friday didn't indicate any meaningful violation of that pattern," says EUGENE PERONI JR. of JANNEY MONTGOMERY SCOTT. "Also, the fact no news accounted for the decline makes the case for an extended decline less likely." Peroni expects the Dow to remain in a trading range between 2940 and 2830 at least until mid-July and then resume a climb to 3100 late in the third-quarter. ("Investor's Daily", 6/25)

"I don't see a broad based or significant strong move," says PHILLIP RETTEW, technical analyst at MERRILL LYNCH. While he believes the Dow will reach 3000 soon, he cautions, "I suspect ... the breadth of the market will be rather narrow." (CNBC "Market Wrap-Up", 6/22)

"I think the market is vulnerable to more selloffs because of this incredibly poor program trading that is being allowed and I think anybody who wants to get into the market should try to balance the risk against the reward," says JULIUS WESTHEIMER. "I think the risk today is greater than the reward short-term. What could the reward be? Maybe up 10 percent, 300 points. Big deal. It's not that much. But the risk, I think is pretty great. ... Long-term, I'm very positive on stocks, but short-term I think there could be real trouble ahead." ("Wall Street Week", 6/22)

ARNOLD MOSKOWITZ, director of investment strategy at COUNTY NATWEST SECURITIES USA, says, "the spread between the futures and the cash market" is what brought on the wave of program trading last Friday. "I think the market had already embedded a Fed easing," says Moskowitz. "With reality coming back, they're sort of giving back part of that last rally." The Fed will not ease according to Moskowitz. (CNBC "Market Wrap-Up", 6/22)

"The performance of the [overall] market is extraordinarily troubling," says HUGH JOHNSON, analyst at FIRST ALBANY CORP. He is concerned that with little economic news to sway stocks until the June employment report comes out July 6, investors will react too much to daily trading action. ("USA Today", 6/25)

While round-the-clock trading seems likely to be an eventuality, the traders who will benefit most from it, those in Asia and Europe, seem rather blase about how these trades will change the market. "Investors like to buy and sell while watching the market," says MITSUYUKI KAWAI, deputy manager of foreign equities at NIKKO SECURITIES INC. He says any all-night trading system will not be "the real market." ("BusinessWeek", 7/2)

STOCK TIPS:

Which stocks could get hit hardest in a market selloff? CNN's DAN DORFMAN asked the short sale specialist JOE FESHBACH. His list: BANNER INDUSTRIES XOMA, ORGANOGENESIS, MGM/UA, CALIFORNIA ENERGY, CITICORP, PIONEER FINANCIAL, EGGHEAD SOFTWARE, RIGGS BANK, INTERNATIONAL GAMING TECHNOLOGIES BANK OF BOSTON, and NORTHRUP. (CNN "Business Morning", 6/25)

EASTMAN KODAK is the cover story this week in "Barron's," which concludes that the company has emerged "from some dark years with surprisingly good prospects." With earnings estimates on an uptick, the article notes the stock has recovered from a 52-week low of 36 1/8 and now trades at around 41. "Beyond that, it now has more going for it than just a coming earnings recovery," the article says. "One possibility ... could involve some kind of raid." ("Barron's", 6/25)

PAINEWEBBER GROUP INC. recently launched a 1,200-employee Capital Markets division run by the man-and-woman team of CHARLES MILLIGAN and MARGO ALEXANDER. The division will embark on a strategy of focusing squarely on stocks rather than bonds. "The '80s were certainly the decade of leverage and debt," says Ms. Alexander. "In the '90s, we will have the re-equitization of industry." LAWRENCE ECKENFELDER, a brokerage industry analyst at PRUDENTIAL-BACHE SECURITIES INC. has a hold recommendation on PaineWebber and says: "The banking strategy at PaineWebber is probably the right one, focusing more on the middle market, developing niches where they have expertise. I think they're making money in institutional equity but where the real money will come is on the underwriting side; they're well positioned on mid-sized companies, and they do have a strong research effort." (WSJ, 6/25)

"I think there will be quite a bit more underperformance in bank stocks," says GEORGE SALEM, senior banking analyst for PRUDENTIAL- BACHE. However, he still likes MORGAN GUARANTY, NATIONAL BANK of DETROIT and FIRST WACHOVIA of North Carolina. However, only the latter two are rated "buys." Morgan Guaranty is a "hold." The money center banks he would sell are CITICORP, CHASE MANHATTAN, CHEMICAL, FIRST CHICAGO and BANK of NEW YORK. ("Wall Street Week", 6/22)

Money manager JOSEPH McNAY of the $1 billion ESSEX INVESTMENT MANAGEMENT

CO. in Boston, lists his favorite stocks for "Barron's" this week. They are: AMGEN, CHIRON, CONSILUM, GERAGHTY & MILLER, HARDING ASSOCIATES, INTEL, KNOWLEDGEWARE, MOTOROLA, SAGE SOFTWARE, SCHLUMBERGER, STRUCTURAL DYNAMICS, SYNOPTICS, WASTE MANAGEMENT and WEATHERFORD INTERNATIONAL. He also lists his least favorites. They are: MARTIN LAWRENCE LIMITED EDITIONS, McDONNELL DOUGLAS, SOTHEBY'S and VIVIGEN. ("Barron's", 6/25)

"Investor's Daily" tracked seven stocks in what it calls the "99er" group - stocks whose earnings per share make them superior to 99% of all publicly traded concerns. It found that six of the seven moved higher during the stock market's eight-week rally. It ascribes "spectacular" performer status to three: RASTER DEVICES INC., TIMBERLINE SOFTWARE CORP. and SOLECTRON CORP. ("Investor's Daily", 6/25)

"Barron's" asked "FactSet DATA SYSTEMS" to have its computers identify "potentially undervalued companies whose multiples lagged their growth." The top five in the list of 24 in this morning's edition are: "L.A. GEAR, STEVENS GRAPHICS-SER A COM, LUKENS, FLUKE [JOHN] MANAGEMENT and INTELLIGENT ELECTRONICS. ("Barron's", 6/25)

In its first seven years of operation, BUSINESSLAND's revenues reached $1.2 billion, but more recently, the company has fallen upon hard times. "The business model they have been pushing has failed," says ROBERTSON, STEPHENS & CO. analyst PETER ROGERS. Rogers says Businessland's "management is out of control." He points to the departure of four top executives since October, and the June 15 firing of two top marketing executives as proof. ("BusinessWeek", 7/2)

"This is like the ideal deal," says PAINEWEBBER analyst EMANUEL GOLDMAN of the PHILIP MORRIS purchase of SUCHARD. "It's a beautiful combination." Philip Morris stock finished up 3/8 to 44 3/4 Friday after news of the deal. ("USA Today", 6/25)

-30- 10024

#90176m0002 06/25/1990 ~Market Consensus Surveys

FALLS CHURCH, VA (JUNE 25) MCS - A SAMPLING OF TODAY'S COMMENTARY COMPILED BY MARKET CONSENSUS SURVEYS, INC. IN TWO SECTIONS (1) STOCKS (2) MONEY & ECONOMY.

MONEY & CREDIT:

"There will be no change in policy yet, but they [the Fed] will be thinking hard about the question of whether a relaxation is in order," in light of the latest economic statistics, says ALLEN SINAI, chief economist at BOSTON CO ECONOMIC ADVISORS. "We have an uptick in manufacturing and a weak consumer, which means mixed signals for the Fed. This will not push the group to ease. ... There are too many crosscurrents." ("Investor's

Daily", 6/25)

"I am still bullish longer term and think that interest rates will move below 8 percent by the end of the year," says WILLIAM GROSS, a managing director of the PACIFIC INVESTMENT MANAGEMENT COMPANY in Newport Beach, Calif. "But things will probably be pretty sleepy until the end of the summer. Over the next few months there seems to be no substantial risk of higher interest rates." (NYT, 6/25)

"Although the market faces some near-term congestion, we believe that this stalemate ultimately will be resolved in favor of a renewed dip in bond yields toward 8%," says ROBERT DiCLEMENTE of SALOMON BROTHERS. "No imminent easing of monetary policy, a flurry of large government borrowings and the lack of recessions signs in economic data all present potential obstacles to a quick drop in interest rates." ("Investor's Daily", 6/25)

"Our market is performing surprisingly well considering the Treasury's huge third-quarter net borrowing requirements, which could be about twice as much as the $33.5 billion it raised in the comparable 1989," says one government securities dealer. "But yields probably will be forced somewhat higher as these new supplies reach the market." ("Investor's Daily", 6/25)

"The D-mark is going to be the basis for German political and economic power in Central and Eastern Europe, and therefore throughout Europe," predicts PETER RONA, president and chief executive officer of IBJ SCHRODER BANK & TRUST CO. in New York. Some analysts think German unification will lift the currency to new highs and into a more dominant role in world markets. But this process will not be a quick one as KURT MORGEN, a Frankfurt-based member of the managing board of DRESDNER BANK AG, explains "There is no precedent for this; it's never been done before." (WSJ, 6/25)

MARK ANDREWS, an economist at MERRILL LYNCH, predicts that the mark will eventually rise toward 1.50 marks to the dollar surpassing its 1 record of 1.56. (WSJ, 6/25)

THE ECONOMY:

"There are some second thoughts about the durability of the recovery," says the chief economist for "BusinessWeek" and "CNBC," BILL WOLMAN. "I'm looking at the numbers for the economy, and I don't like them very much." Wolman says that consumer spending on goods, home building, business construction and defense, which make up 45% of GNP, are below the numbers for the third quarter last year. (CNBC "Market Wrap-Up", 6/22)

"I think there is a slow [credit] tightening in the economy," says MARTIN

ZWEIG. "I definitely think it creates a big risk for the economy and possibly we could have a recession. ("Wall Street Week", 6/22)

"The durable goods report reinforces the suspicion that the manufacturing sector is no longer declining, but we are by no means seeing an upturn," says LAURENCE MEYER, senior economist for LAURENCE H. MEYER & ASSOCIATES in St. Louis. "I wouldn't anticipate a rebound." Mr. Meyer was disappointed by the weak consumer income figure. "Usually the consumer sector is a stabilizing sector," he says. "This sector usually tends to grow even as the economy weakens, but now that it is slowing down so much ... we are losing that protection that we normally have. That makes the economy more vulnerable to recession." (WSJ, 6/25)

"It looks like consumption will be flat in the second quarter," says ALLEN SINAI, chief economist at BOSTON CO. ECONOMIC ADVISORS. "If that happens, then it could be hard for the economy to get through the year without moving into recession." ("Investor's Daily", 6/25)

"The industrial sector is beginning to rise modestly, but consumption is definitely on the weak side," says DONALD FINE, chief market analyst for CHASE MANHATTAN BANK. "I think growth in the second quarter will be between 1.5 percent and 1 percent, but right now I am leaning closer to the lower number." (NYT, 6/25)

JAMES SOLLOWAY, chief economist for ARGUS RESEARCH CORP., says Friday's durable goods report of a 3.9% surge in May "suggests that while there isn't any major contraction, neither is there a boom" in the economy. ("Investor's Daily", 6/25)

RICHARD TRAINER, senior economist at the BANK of TOKYO NEW YORK GROUP, says the "implication" of last Friday's report of flat personal spending is "that we will be lucky to see 1.5% growth" in the economy in the second-quarter. "If this continues, then spending on durables and non-durables will be very anemic and spending on services will be slow." ("Investor's Daily", 6/25)

"Housing is certainly a drag on the economy," says CYNTHIA LATTA, senior financial economist at DRI/McGRAW-HILL. She says several factors are depressing the housing sector. In addition to the obvious chill of high mortgage rates, Ms. Latta notes the "rediscovery of risk on the part of banks," and an aging population that demands less housing. Most baby boomers are already housed and the current state of the economy doesn't bode well for trading up anytime soon. "Really, we're looking to exports to hold things together for the economy and keep our heads above water." (WSJ, 6/25)

IN WASHINGTON:

Opponents of a federal law that allows competing newspapers to merge their business operations are mounting a campaign to have the law 2 abolished or significantly amended. Despite growing opposition, newspaper analyst JOHN MORTON of LYNCH, JONES & RYAN in Washington says joint operating arrangements can benefit all publications in a market by allowing advertising rates to rise. (NYT, 6/25)

Unless administration and Congressional budget negotiators make progress this week, STEVE BELL of SALOMON BROTHERS doesn't see them getting back to serious work until after Labor Day, close to the elections. "Tough choices now become very tough that late in an election year." He looks for a disappointing deficit reduction package of $45-$50 billion, and an increase in the Gramm-Rudman targets. "Defense won't be cut nearly as much, especially over the next four or five years, as people think." (CNN "Business Morning", 6/25)

The federal cleanup of the savings and loan disaster will result in a significant transfer of wealth from the Northeast and Middle West to Texas and other states in the Southwest, many economists and politicians have concluded. (NYT, 6/22)

#90176p9207 06/25/1990 ~PR Newswire

DENVER (JUNE 25) PR NEWSWIRE - With a goal of recruiting strong third party developers for its new Geo/SQL(TM) software, Generation 5 Technology (NASDAQ: GFIV) has announced the release of its new $500 "Geo/SQL Developer's Toolkit."

The Geo/SQL software has gained industry attention by being the first sophisticated GIS system to integrate the AutoCAD(R) graphics environment with industry-standard SQL databases such as ORACLE(R). The software allows low-cost desktop 386 PCs, PS/2s, and UNIX workstations to be linked with large corporate databases running on networks, minicomputers and mainframes. Geo/SQL is being used for everything from municipal mapping, to hazardous waste management, to major utilities, facilities and construction projects.

To kick off the release of the new kit, G5 also announced an agreement with Oracle Corp. (NASDAQ: ORCL) to offer, for a limited time, both the clipped-version Geo/SQL Developer's toolkit and the Professional ORACLE Trial Version for an introductory price of $500. Full use licenses of Geo/SQL start at $9500.

"The promotion gives professional software developers a "no excuses" way to get a jumpstart in developing innovative Geo/SQL applications," said Mark Wilding, president of Generation 5 Technology Inc. The new toolkit comes on the heels of major announcements from Generation 5 Technology regarding

joint development and marketing agreements with Oracle and Autodesk.

Generation 5 Technology, is a pacesetter in the emerging fields of Automated Mapping (AM/FM), Geographic Information Systems (GIS), and Facilities Management (FM) software systems. The company offers its products in the U.S. and Canada (through Generation 5 Technology Ltd. (Canada), and in approximately 30 countries throughout the world.

Generation 5 Technology is currently shipping Release 3.0 of its Geo/SQL(TM) software (formerly MunMAP(TM), the first sophisticated GIS system to seamlessly integrate a topological data structure, the AutoCAD(R) graphics environment, and industry-standard SQL databases such as ORACLE. The software allows low-cost 386 PCs, PS/2s, and desktop UNIX workstations to be linked with large enterprise-wide databases running on minicomputers and mainframes. Sitting at a Geo/SQL AutoCAD workstation, a user can draw an on-demand map using data from computers in another building, or a hundred miles away.

Geo/SQL, MumMAP GIS, The Geo/SQL Developer's Toolkit, and G5 are trademarks of Generation 5 Technology Inc. and Generation 5 Technology Ltd. ORACLE(TM) is a registered trademark of Oracle Corp.; Geo/SQL(TM) is a trademark of Generation 5 Technology Inc.; and AutoCAD(R) is registered with the U.S. Patent & Trademark office by Autodesk Inc.

#90176p9208 06/25/1990 ~PR Newswire

MIAMI (JUNE 25) PR NEWSWIRE - New three- and four-day Amazon cruises from Manaus, the booming Brazilian port 1,200 miles from the river's mouth, have been introduced by 4th Dimension Tours, a Miami-based specialist in travel to Latin America.

The cruises are aboard the 24-passenger Desafio, one of the newest vessels operating on the river. The ship, 100 feet long and 24 feet wide, has a panoramic restaurant and broad sundeck. Passengers are accommodated in five twin-bedded cabins and seven with double beds; all have private baths.

The three-day cruise follows the Rio Negro, the black tributary on which Manaus is situated, for 12 miles to its meeting with the brown Amazon, the two colors flowing side by side until eventually they merge. The ship continues to January Lake, its overnight anchorage, dotted with Victoria Regia lilies. With pads up to six feet in diameter, they are the world's largest aquatic plants.

The second day is devoted to exploring the surrounding rain forest, boarding canoes to penetrate the jungle and disembarking to see its plants

birds and animals. The return to Manaus is at noon on the third day. Cruise fare is $499. Stays in Manaus at the luxurious Tropical Hotel can be arranged for $53.50 a night.

The four-day cruise, at a fare of $699, includes the meeting of the waters and January Lake and adds a full day in the Islas Anavilhanas, the Amazon area's most important ecological reserve, which passengers explore by canoe. Both the three- and four-day Desafio cruises operate weekly.

4th Dimension Tours offers other cruises of the Amazon and its tributaries. Iquitos, Peru, is the starting point for four- and six-day nature cruises aboard the 14-passenger Margarita at fares of $240 and $400, respectively. The Delfin, a 20-passenger, three-deck riverboat, operates three- and four-day cruises and a seven-day combination on the Cayaru and Yavari rivers, as well as the Amazon, from Leticia, Peru; fares range from $220 to $550.

The 56-passenger Rio Amazonas, with mostly air-conditioned cabins, a dining room, library and two bars, makes four-day cruises in both directions between Tabatinga/Leticia and Iquitos. Fares are $250 to $495; a six-night combination costs $475 to $895.

The 37-passenger Arca, designed specifically for the Amazon, also cruises between the two Peruvian ports but offers fewer shore excursions and more onboard activity than the Rio Amazonas; the fare is $240. Ecuador's Rio Napo, an Amazon tributary, is cruising waters for the Flotel Orellana, which holds 54 passengers in cabins with private baths; fares, including round-trip air from Quito, are $325 to $375 for four- day cruises and $340 to $465 for five days.

OREM, UT (JUNE 25) PR NEWSWIRE - Wicat Systems Inc. (NASDAQ: WCAT), announced today that its Customer Service Division is now certified by Novell to provide a full range of support services for Novell's NetWare(TM) (network operating system) and related communications products.

Wicat's staff of Certified NetWare Engineers will now provide front-line technical support to customers utilizing Novell products in their computer-based training and education centers.

"We are pleased to be able to offer our customers this important extended service option which further illustrates our commitment to being a 'single-vendor' solution," said Robert W. Mendenhall, president and CEO.

"This new Novell certification, and our IBM Service Partner status announced in May, uniquely qualifies our own technicians to provide all required service for customers using industry-standard MS-DOS hardware in their Wicat learning centers. These enhanced service capabilities now enable us to offer our customers immediate added value when they select our total service solution."

Wicat Systems Inc., is a world leader in technology-based training and education solutions, providing products and services to help clients achieve 30 to 50 percent learning improvement in schools, industry and government. Wicat's stock is traded on the NASDAQ market under the symbol WCAT.

CONTACT: Sally Jenkins of Wicat Systems Inc., 801-224-6400, ext. 304.

ORLANDO, FLA. (JUNE 25) PR NEWSWIRE - 1990 Design Automation Conference, June 24, 1990 -- Cadence Design Systems, Inc. (NASDAQ: CDNC) and Cadre Technologies Inc. today announced they signed an agreement to jointly market hardware-software co-design solutions for builders of electronics systems.

Cadence provides fully integrated Electronic Design Automation (EDA) solutions for the design of electronic systems, printed circuit boards and integrated circuits. Cadre develops Computer-Aided Software/Systems Engineering (CASE) tools that provide full life cycle solutions for the technical and embedded software development market. Cadre's Architecture Assessment and Design Systems (ADAS) offers system level simulation for combined software/hardware co-design.

Under the agreement, Cadence and Cadre will provide integration between their respective technologies to enable hardware and software engineering to work together from the system level, throughout the entire product development process. The companies will market these products to customers in all segments of the electronics industry including the defense, aerospace, telecommunications and automotive industries.

"By joining the proven technologies of these two companies, we will be able to quickly deliver a substantive technical solution for the integration of hardware and software engineering to designers of today's complex electronic systems," said Joseph B. Costello, Cadence's president and chief executive officer.

Cadre's Technologies Inc. full line of CASE products deliver a powerful, integrated development environment for managing and automating the analysis, design, code generation, integration and testing of high-

performance software and systems. With more than 15,000 installations internationally, Cadre has a customer base that includes Boeing, General Electric, Philips and Federal Express. Cadre is headquartered in Beaverton, Ore.

Cadence Design Systems, Inc. is a leader in the design, development and marketing of software solutions for the design of integrated circuits and electronic systems. Cadence operates throughout the United States, Europe and Asia. The company, headquartered in San Jose, Calif., is traded on NASDAQ under the symbol "CDNC."

ORLANDO, FL (JUNE 25) PR NEWSWIRE - 1990 Design Automation conference, June 24, 1990 -- Cadence Design Systems Inc. (NADSAQ: CDNC), a worldwide leader in electronic design automation (EDA) software, today announced an OEM agreement with Data I/O Corp. that brings programmable logic device (PLD) design synthesis capability to the Amadeus(TM) Systems Design Series. Under terms of the agreement, Amadeus users will gain access to Data I/O's ABEL(TM) PLD design software, thus extending Amadeus design support to all popular PLD devices, including complex, high-end devices from manufacturers such as Altera, AMD, Cypress, and Texas Instruments.

Integration of ABEL into Amadeus provides a design environment with a consistent user interface, extending Amadeus' top-down design methods to include advanced PLD design and analysis. With this added capability users will be able to automatically generate Verilog models from industry standard JEDEC files. Through ABEL, systems designers can implement PLD designs and examine various tradeoffs of using PLD device and design technologies. Additional Data I/O options included in the OEM relationship are automatic device selection that allows device selection based on user defined criteria and "fitters" for specific device families.

The ABEL design language lets users choose the type of description that is best suited to the logic being described. Amadeus users can thus describe their logic using high-level equations incorporating boolean operators, truth tables, state diagrams, or any combination of these. The ABEL language processor features powerful logic reduction, extensive syntax and logic error checking.

Data I/O Corp., based in Redmond, Wash., is the leading manufacturer of universal solutions for users of programmable integrated circuits. Its

products include software for use in the design, testing and logic synthesis of programmable logic devices and field programmable gate arrays; FutureNet(R) DASH(TM) Schematic Designer for design entry; and logic and memory programmers for the design and production environments. Data I/O has sales and service offices worldwide.

Cadence Design Systems Inc. is a leader in the design, development and marketing of software solutions for the design of integrated circuits and electronic systems. Cadence operates throughout the United States, Europe and Asia. The company is headquartered in San Jose, Calif., and is traded on NASDAQ under the symbol "CDNC."

IRVINE, CALIF. (JUNE 25) PR NEWSWIRE - Helionetics, Inc. (NASDAQ: HLXC), said today that it had signed a joint venture agreement with the North Computer Application and Development Corporation of Shenyang City in the People's Republic of China.

The new jointly-owned company, to be called the "Shenyang Shenlong Computing Systems Limited," will produce and sell a new-generation personal computer to the domestic Chinese and international markets for scientific, engineering and financial applications.

Helionetics said that the new personal computer, based on Sun Microsystems SPARC technology, will be more advanced and faster than competitive models. Most important, the new computer will be capable of running both native MS-DOS and SUN OS Unix application programs in one box.

Bernard B. Katz, chairman of the board of Helionetics, estimated that the potential market for the new computer workstation to be produced by the joint venture could range as high as $200 million worldwide over the next five years.

"The idea behind this joint venture is to merge our hardware technology with Chinese software and manufacturing expertise. This combination of SPARC with PC technology will produce a very powerful computer workstation for the Chinese and world markets.

"Our plans are to market Shenlong computers in Europe, the United States, China and the remainder of the Third World. This new venture should transform Helionetics from a board-level company to a computer manufacturing company and puts us into the workstation business for the first time. If both parties to this venture move quickly, the first Shenlong computer could be produced by the beginning of 1991," added Katz.

Helionetics said that the new joint venture company is subject to appropriate clearances from the U.S. Department of Commerce.

Helionetics, Inc., is a multi-national, high-technology firm headquartered in Irvine, Calif., with offices in Washington D.C., Honolulu and Munich.

Helionetics, Inc./Definicon International is a multi-national, high-technology firm located in Irvine, Calif., with offices in Washington, D.C., Honolulu, and Munich, West Germany.

RENO, NEV. (JUNE 25) PR NEWSWIRE - The Mills-Jennings Company (NASDAQ: JKPTE) today said revenue for the year ended Nov. 30, 1989, was $7.9 million, virtually unchanged from a year ago.

Net loss for the 1989 year was $679,000, or 10 cents a share, all due to one-time charges for discontinued operations and carrying costs of its California real estate, which it plans to sell or co-develop as a residential community. Excluding those expenses, ongoing manufacturing operations produced a profit of $100,00.

For the 1988 fiscal year, the company posted a loss of $1.3 million, or 31 cents a share, again due to mainly one-time charges for discontinued operations and real estate costs.

At Nov. 30, 1989, shareholder equity stood at $4.4 million shares vs. $5 million a year ago.

LEXINGTON, MA (JUNE 25) PR NEWSWIRE - Raytheon Company (NYSE: RTN) today announced that The Badger Company's Netherlands subsidiary, Badger B.V., and Camp Dresser & McKee Inc. (CDM), headquartered in Cambridge, Mass., have initiated a joint venture to expand the environmental services provided by both companies throughout Europe.

The venture combines Badger's worldwide strengths in chemical engineering and state-of-the-art process technologies with CDM's global expertise in environmental engineering. Together they offer the latest waste management and environmental remediation technologies and services for solving the critical environmental issues facing Europe today.

The venture will operate out of Badger B.V.'s facility in The Hague for the next 12 months as it develops opportunities to provide environmental management services. After one year, the venture expects to evolve into a new environmental services company. Potential European locations for the new company will be identified during the next 12 months, and the country and facility will be selected during 1991.

Located in The Hague, Badger B.V. provides chemical process engineering and construction services to Europe, Africa and the Middle East. In the area of environmental restoration, Badger B.V. is providing services for air pollution control and for wastewater treatment in the Netherlands, Italy, France and the United Kingdom.

The Badger Company, a Raytheon subsidiary headquartered in Cambridge, Mass., is an international engineering and construction company serving the process industries. It provides technology and services to the chemical and petrochemical industries and has diversified its markets to include polymers, plastics, specialty chemicals, automotive fuels, lubricants and environmental services.

Camp Dresser & McKee ranks among the largest U.S. environmental consulting

firms and has delivered environmental engineering and scientific services to industry and government in some 60 countries throughout the world. One of the first contractors for environmental remediation under Superfund, CDM has extensive experience in remedial planning and design, risk assessment, environmental audits and site assessments, wastewater treatment technologies, and facility operation.

Raytheon Company, headquartered in Lexington, Mass., is a diversified, international, technology-based company active in electronics, aviation, appliances, industry services and other lines.

STERLING, VA. (JUNE 25) PR NEWSWIRE - Star Technologies, Inc. (NASDAQ: STRRC) today announced that it has selected the 40 MHz SPARC(tm) RISC chip set manufactured by the ROSS Technology subsidiary of Cypress Semiconductor. The Cypress/ROSS chip set, the fastest CMOS SPARC microprocessors available, will be used by Star for the development of a new product based on the SOARC Scalable Processor ARChitecture microprocessor, the standard RISC architecture developed by Sun Microsystems, Inc.

Star said it has selected the CY7C600 family of 32-bit custom CMOS SPARC RISC chips, including the CY7C601 Integer Unit, the 40 MHz processing engine of the SPARC architecture, capable of supporting up to 40 RISC MIPS or 29 equivalent VAX MIPS peak performance; the CY7C602 Floating Point Unit for high-performance single- and double-precision floating point calculations at up to 8 MFLOPS and 6.15 equivalent DAXPY MFLOPS (double precision); the CY7C604 Cache Controller and Memory Management Unit which supports the SPARC standard MMU for virtual to physical translation, and the CY7C157 Cache Data Ram.

Glen J. Culler, Star's vice president of Technology Integration, said Star chose the Cypress/ROSS SPARC chip set because it is the fastest SPARC implementation available today and the only one that offers Reference MMU support.

Star Technologies, Inc., is a leading manufacturer of high- performance computing products, including compute servers, array processors and real-time image generators. Star products offer clear price/performance advantages over supercomputers and standalone graphics workstations for many high-performance applications in signal and image processing, simulation and training, computational chemistry and advanced scientific research, and design automation. Star is headquartered at 515 Shaw Road, Sterling, Va. 22170.

SAN DIEGO (JUNE 25) PR NEWSWIRE - The Price Company (NASDAQ: PCLB) announced today results for the third quarter of fiscal 1990 ending June 10, 1990.

In the 12 week third quarter ending June 10, 1990, sales were $1.177 billion, compared with $1.086 billion last year, an increase of 8.3 percent. Net income was $23.3 million, compared with $21.2 million last year, an increase of 9.8 percent. Fully diluted earnings per share was $0.47 compared with $0.42 last year, an increase of 11.9 percent.

In the 40 weeks of fiscal 1990, sales were $4.086 billion, compared with $3.689 billion last year, an increase of 10.8 percent. Net income was $93.5 million compared with $85.6 million last year, an increase of 9.2 percent. Fully diluted earnings per share for the 40 weeks was $1.84 compared with $1.68 last year, an increase of 9.5 percent.

The weighted average number of shares actually outstanding in the third

quarter were 49,099,000 shares, versus 49,540,000 shares last year (49,530,000 versus 49,423,000 respectively for the year to date).

Comparable warehouse sales in those Price Clubs which were operating during the same period last year increased .94 percent in the quarter and 2.96 percent for the 40 week period.

The company currently operates 49 Price Clubs in the United States, and six in Canada (a 50/50 joint venture with Steinberg, Inc.).

WASHINGTON (JUNE 25) PR NEWSWIRE - Household International, Inc. (NYSE: HI) and MCI Communications Corporation (NASDAQ-NMS: MCIC) today announced a three-year, multi-million dollar agreement for MCI to provide comprehensive voice and data communications services to the Chicago-based financial services company.

"Communications and information technologies play a fundamental role in the success that Household enjoys," said David Barany, chief information officer for Household International. "MCI will provide the telecommunications infrastructure necessary for the continued enhancement of our services."

Under the terms of the agreement, MCI will provide MCI 800 Service, an MCI Vnet Service, a virtual private network linking over 700 Household International locations.

"MCI's ability to flexibly design options to meet Household's operational and financial objectives clearly differentiated it from other telecommunications providers," said Howard Tyska, vice president of information services for Household International.

"Household's positive experience with MCI over the past three years has yielded a confidence in the company that supports a contract award of this magnitude," he added.

The nationwide virtual private network will allow for the consolidation of administrative functions, previously spread across the country, into three processing center located in Illinois, California, and Virginia. The new communications network will provide for enhanced customer servZNYPsuppK4 3/8)Usehold customers.

"As the communications provider of choice in the information- intensive financial services industry, MCI is pleased that Household International

has selected us for this significant contract," said Bert C. Roberts, Jr., president and chief operating officer for MCI.

Household International Inc. is a major provider of consumer and commercial financial services and consumer insurance products.

MCI Communications Corporation provides a full range of global telecommunications services to businesses, residences and governmental agencies. The company owns and operates the world's second-largest communications network, employing advanced fiber optics, digital microwave satellite and digital switching technologies.

CONTACT: Douglas Dome of MCI Midwest, 312-938-4995; MCI Corporate News Bureau, 1-800-289-0073; or Robert Hartney of Household International, 708-564-6265

#90176p9270 06/25/1990 ~PR Newswire

PARSIPPANY, N.J. (JUNE 25) PR NEWSWIRE - Armco Inc. (NYSE: AS) announced that it would record net unusual charges in the second quarter of 1990 totaling approximately $70 million. The charges include $20 million as a result of the verdict in a breach-of-contract suit and $15 million for a federal tax assessment, both previously disclosed. The charges also include an estimated $30 million for Armco Financial Services Group (AFSG) runoff companies.

The $20 million charge is related to a suit brought against Armco in Houston in 1986. On May 11, 1990, following trial in the Houston Federal District Court, a jury awarded the plaintiffs a total of $46.8 million plus interest. On June 1, the Court set aside $26 million of the award.

The $15 million charge related to federal taxes and interest is primarily for settlement of audit issues for the tax years 1978-1982.

The $30 million charge is for the AFSG finance and insurance runoff companies. The runoff companies are subsidiaries of AFSG that have stopped writing new business and are being liquidated. As a result of these additional reserves, Armco said it is confident that the major problems of its runoff finance and insurance companies are behind it.

Armco stated that as a result of these unusual charges, the company will report a net loss for its second quarter and six months ending June 30, 1990. Because of these unusual charges and the resulting losses, provisions of certain Armco debt agreements would prevent continued payment of common stock dividends.

Armco's management is studying all of the options available to provide

Armco's board of directors the flexibility to continue to pay common stock dividends, subject to future conditions and the discretion of the board. Armco added that it will not be prevented from paying dividends on the cumulative preferred stock of the company.

Armco produces stainless, electrical and carbon steels. Through joint ventures, the company also produces coated, high strength and low carbon flat-rolled steels and oilfield machinery and equipment. Insurance services are provided through businesses Armco intends to sell or liquidate.

#90176p9272 06/25/1990 ~PR Newswire

WASHINGTON (JUNE 25) PR NEWSWIRE - Horizon Air goes to trial Tuesday, June 26, on charges by its flight attendants, represented by the Association of Flight Attendants (AFA), that the airline's management has engaged in bad faith bargaining and interference with the union.

The trial will be held in Federal District Court in Portland, Ore., with Malcolm F. Marsh presiding over the case.

The lawsuit brought by AFA charges that Horizon repeatedly violated the Railway Labor Act (RLA) during nearly three years of negotiations with the flight attendants. The union claims that the carrier employed a wide range of tactics designed to frustrate the negotiating process and to prevent agreement on a contract. AFA also claims that the company interfered with the union when it bypassed the AFA negotiating team to deal directly with the flight attendants.

Horizon Air flight attendants first voted for representation by AFA in August 1987 by an overwhelming margin. The parties have been in negotiations ever since but have not reached agreement on a contract. Since early 1989, the talks have been conducted under the supervision of mediator Richard Cosgrave, under the authority of the National Mediation Board.

Horizon's 115 flight attendants are among the lowest paid in the airline industry, with a gross starting salary of $850 for a 35-day month. Some of the flight attendants have not had a pay increase in almost four years. Horizon, which is owned by Alaska Air Group, Inc., (NASDAQ: ALK) has flight attendant bases in Portland and Boise, Idaho.

"The Horizon flight attendants want decent pay and a strong union contract that protects them and guarantees their working conditions," said Donna Fitz, AFA MEC president at Horizon. "The flight attendants have remained

united behind AFA for three years, and this lawsuit is our chance to force management to deal fairly with us and give us the respect and dignity we deserve."

The Association of Flight Attendants, AFL-CIO, represents 30,000 flight attendants on 18 airlines including flight attendants at both Horizon Air and Alaska Airlines. AFA is the largest flight attendant union in the world.

WINDSOR, ENGLAND (JUNE 25) PR NEWSWIRE - Siebe PLC and The Foxboro Company (NYSE: FOX) jointly announced today that the two firms have reached a definitive agreement under which Siebe, Inc., The Siebe Group's U.S. master company, will acquire all of the common stock of Foxboro for $52 per share in cash. Foxboro has outstanding 12,624,023 common shares.

The two companies said the acquisition will be effected through a cash tender offer which will be followed by a merger between Foxboro and a United States subsidiary of Siebe, Inc. The tender offer is expected to commence on Friday, June 29, 1990, Siebe's financial advisor, Lazard Freres & Co., will act as dealer manager for the offer. Salomon Brothers Inc. is acting as Foxboro's financial advisor.

As previously announced Foxboro has been seeking to establish a strategic alliance. Commenting on the merger Gary Willis, chairman, president and chief executive officer of Foxboro said, "Siebe is an ideal merger partner. Their position in industrial instruments, commercial HVAC and building management systems when combined with Foxboro's premier strengths in the process control and automation markets will create a strong global total automation capability."

The acquisition, as is customary in transactions of this type, will require, among other things, the approval of Siebe PLC's shareholder. Siebe expects to call a meeting for this purpose to be held on or before July 27, 1990. Siebe has received commitment letters from various U.S. and British banks to fund the transaction. Bankers Trust Company of New York has arranged the U.S. financing for the transaction. Siebe PLC, is one of the world's leading manufacturers of industrial and environmental controls, compressed air products, specialized engineering products and life support products. Siebe recently announced record sales and profits for the year ended March 31, 1990. Sales increased by 11 percent to $2.35 billion and profits before taxes by 19 percent to $310 million.

The Foxboro Company, founded in 1908, is a world-wide leading supplier of process automation and control equipment serving its customers from over 100 sales and service centers throughout the world. The company reported 1989 net sales of $598 million and pre-tax income of $1.5 million.

MINNEAPOLIS (JUNE 25) PR NEWSWIRE - Honeywell (NYSE: HON) today said that the U.S. District Court for New Jersey has appointed a Special Master to facilitate Honeywell's patent infringement case against Minolta Camera Co., Ltd., of Japan. Honeywell announced Friday that it had received an expedited trial date for its case, which has been in the courts for more than three years.

Honeywell sued Minolta in April 1987 for patent infringement of Honeywell autofocus technology used in cameras. Honeywell amended its case in January 1990 to include breach of contract.

"The appointment of a Special Master, combined with the decision to speed up the trial by more than one year, further assures that Minolta's infringement of Honeywell patents will finally be addressed," said Christopher J. Steffen, Honeywell vice president and chief financial officer.

"We are gratified that Minolta's continued attempts to delay a fair and timely resolution of this matter have come to an end, and we are confident of a favorable outcome for Honeywell in the case," Steffen said.

The company said that the Special Master is Judge John L. Ard, a former New Jersey state judge. The role of a Special Master is to hear and rule on motions and see that they are carried out; to oversee discovery and direct the parties to comply with requests for information; to observe depositions, and generally to assure that the case remains on schedule for a September 1991 trial date.

Honeywell is a global controls company that provides products, systems and services for homes and buildings, industry, and aviation and space. The company had 1989 sales of $6.1 billion.

BOCA RATON, FL (JUNE 25) PR NEWSWIRE - Dento-Med Industries, Inc. (NASDAQ-NMS: DTMD) announced today that Dento-Med will now attempt to market its own products in addition to continuing its product development efforts. Management has determined to commence marketing of three of its patented products through its wholly owned subsidiary, Dento-Med Healthcare Inc., to both consumers and the health care industry. Dento-Med Healthcare is commencing a select regional promotion in the United States of Dento-Med's hand and body lotion and denture freshener product, which both use its patented Hydron (R) Polymer system, as well as its patented denture adhesive.

Harvey Tauman, the president of Dento-Med stated: "We have decided to market our patented products directly to drug stores, supermarkets and by direct mail, and have retained an independent advertising agency to create promotional concepts as well as packaging for our products. The choice of a brand name is still under consideration, and we will announce the brand name at a later date as well as the actual launch date, which may be during the fourth quarter of this year." Tauman continued, "Dento-Med Healthcare intends to market our patented hand and body lotion to both consumers, and to health care professionals who now use rubber or plastic gloves to prevent the spread of secondary infections."

Tauman concluded, "Dento-Med intends to continue its research and development efforts to create new products which use Hydron (R) Polymers and to obtain major third party marketing organizations to promote certain of Dento-Med's other products."

BOISE, ID (JUNE 25) PR NEWSWIRE - William M. Agee, chairman and chief executive officer of Morrison Knudsen Corporation (NYSE: MRN), today summarized the outlook relative to the company's operations during the second quarter of 1990, which ends on June 30.

As a result of contract awards during the quarter, the corporation's backlog should exceed $3 billion at June 30, 1990. That is an increase of over $400 million from the $2.6 billion reported at the end of last quarter. Backlog should further increase by Sept. 30, when final terms are reached on contracts currently under negotiation.

MK's engineering and construction segment, led by the Mining Group's strong performance, will show increased second quarter operating income over 1989.

Certain start-up problems on the large R46 transit car contract with New

York City Transit Authority will adversely impact the second quarter results for MK's Rail Systems Group. The effect of these problems will be partially offset by the gain on the previously announced sale of the group's Power Systems Division. Nevertheless, the company's second quarter and the first half income should exceed 1989's results.

Agee said, "The R46 problem is not permanent, it is a delay. We continue to believe that results for the entire company should be better for 1990 than for 1989."

MIAMI (JUNE 25) PR NEWSWIRE - Solar Financial Services, Inc. (OTC) today announced that it has successfully concluded its negotiations with Don L Motors, a Miami-based automobile financing, used car, wholesale, and repair company. Terms of the acquisition were not disclosed.

The acquisition of Don L Motors will bring Solar Financial Services receivables in excess of $20 million, thereby doubling the size of the company.

"The acquisition of Don L Motors will make Solar Financial Services one of Florida's largest independent automobile financing firms, and will also provide our company with a major entree into the wholsale and used car and

repair business," said David Pavsner, president.

Solar Financial Services expects to execute a formal agreement with Don L Motors in the next few days, and to complete the transaction by July 1, 1990.

DETROIT (JUNE 25) PR NEWSWIRE - The Michigan Employment Security Commission (MESC) will open a new prototype Job Service office in downtown Detroit this summer in space donated by First Federal of Michigan.

MESC Director Jack C. Barthwell said the new office will specialize in filling job openings for a broad range of clerical and other office occupations. Approximately eight MESC staff members will be assigned to the location.

The office will occupy space on the first floor of the First Federal Building, 1001 Woodward Ave., and is scheduled to open in early August. First Federal is Michigan's largest savings and loan institution.

"The donation of this office space is a major step toward implementing a plan to revitalize our Job Service operation in Detroit, making it more responsive to the needs of employers and unemployed workers," Barthwell said.

The Greater Detroit Alliance of Business (GDAB) and MESC have been jointly developing a plan to revamp Job Service in Detroit.

"Together, we hope to create a labor exchange in the city that can serve as a model for Job Service offices throughout the state," Anthony P. St. John, outgoing GDAB chairman, said. "The donation of this office space by First Federal is symbolic of the support that business is giving to our joint venture with MESC."

Eric H. Truhol, executive vice president and director of personnel for First Federal, said the company was pleased to donate office space to the joint venture between GDAB and MESC.

"We are happy to play a role in restructuring MESC's Job Service," Truhol said. "This program can be a major aid in helping employers and jobseekers meet their employment needs. And downtown Detroit, with its demand for office workers, is certainly an excellent site to launch this particular

prototype Job Service office."

Announcement of First Federal's office space donation was made at GDAB's annual meeting last week by MES Commission Chairman Ken Morris.

"This will be the first prototype Job Service office we expect to open in the City of Detroit during the coming months," Morris said.

MESC's Job Service is the state's largest public employment agency with 52 locations throughout Michigan. It offers a variety of employment services to help jobseekers prepare for and find suitable employment and employers find qualified workers.

MORRISTOWN, NJ (JUNE 25) PR NEWSWIRE - AT&T's (NYSE: T) UNIX Software Operation today was renamed UNIX System Laboratories, Inc.

The change in name follows the recent reincorporation of AT&T International's European and Asian UNIX(R) System business subsidiaries as wholly owned subsidiaries of UNIX System Laboratories, Inc. Relevant AT&T and UNIX Software Operation assets were assigned to the new company in November 1989.

"Today's announcement reflects the changes that have taken place in the way AT&T develops, markets and manages UNIX System V," said Larry Dooling, president of UNIX System Laboratories (USL). "USL is a separate business, committed to powering the Open Systems revolution by creating and providing our customers with the best system software, tools and services. We are committed, in concert with UNIX International and in accord with UI's UNIX System V Roadmap, to keep UNIX System V and other USL products at the heart of the worldwide Open Systems movement."

UNIX System Laboratories also announced an internal restructuring of the company into two business units: UNIX System V Software and Open Solutions Software.

The UNIX System V Software business unit, headed by Michael J. DeFazio, is responsible for the evolution of the UNIX System V base operating system. The Open Solutions Software business unit, headed by Joel A. Appelbaum, is responsible for system software that complements the base operating system. Such products include the C and C++ programming languages and network system software, such as the TUXEDO(TM) Transaction Processing System and the OSI Communications Platform.

UNIX System Laboratories Europe, Ltd., managed by Robert W. Mitze, is headquartered in London. UNIX System Laboratories Pacific, Ltd., managed by James L. Clark, is headquartered in Tokyo. Both operations were formerly subsidiaries of AT&T International.

The UNIX Software Operation was created as a separate business unit of AT&T in January 1989, in order to separate AT&T's UNIX System source code business from its computer systems business. UNIX System Laboratories, Inc., was incorporated as a separate subsidiary of AT&T in Delaware in November 1989.

UNIX International (UI) is a consortium of industry vendors and end users committed to UNIX System V as the base of the worldwide Open Systems movement. UI provides technical guidance to USL on the evolution of UNIX System V through the UNIX International UNIX System V Roadmap process.

NATICK, MA (JUNE 25) PR NEWSWIRE - Rational Systems, Inc. today announced a technology agreement whereby Computer Associates International, Inc. (NYSE: CA) will use Rational's DOS/16M DOS extender in several of its DOS-based products, including PC database and application development software.

DOS/16M can transparently take advantage of the extra memory that is available in "protected mode" on 80286-, 80386- and 80486-based personal computers and thereby overcome the DOS 640K barrier. DOS/16M is also compatible with Microsoft's recently announced Windows 3.0.

DOS extender technology has allowed CA to join Digital Equipment Corp., Lotus Development Corp., TOPS Division of Sun Microsystems, Ashton-Tate, DataEase International, Informix, Autodesk, and other software developers in creating sophisticated applications that need access to extended memory.

"Naturally we are pleased that the world's leading software company has adopted DOS/16M for use in several of its products," said Terry Colligan, president, Rational Systems. "This will greatly expand the community of DOS/16M users, who already number in the millions."

"As we add greater functionality to our PC database and application development software programs, memory is at a premium," said Sanjay Kumar, senior vice president of planning. "Rational's DOS extender has let us increase the performance of our PC software without forcing our clients to migrate to a new operating platform, thereby protecting their investment in their existing hardware."

Computer Associates International, Inc., headquartered in Garden City, N.Y., is the leading independent software company in the world. The company develops, markets and supports systems management, information management and business applications software for a broad range of mainframe, midrange and desktop computers. The company operates in more than 100 offices located in 24 countries.

Rational Systems, Inc., based in Natick, Mass., develops and markets professional programming tools for the personal computer. The company is a leader in providing development environments that maximize efficiency and creativity and enable programmers to deliver PC applications that are not limited by the DOS 640K barrier.

CONTACT: Byron Bollas of Rational Systems, 508-653-6006; or Chris Maynard of Computer Associates, 516-227-3300, ext 7129; or Catherine Marenghi or John O'Hara both of McGlinchey & Paul for Rational Systems, Inc., 617-862-4514.

#90176p9301 06/25/1990 ~PR Newswire

PEORIA, IL (JUNE 25) PR NEWSWIRE - Caterpillar Inc. (NYSE: CAT) announced today it has revised its outlook for 1990.

Profit for 1990, which had been earlier described as being under considerable pressure, is now expected to be substantially lower than in 1989. Profit for 1989 was $497 million or $4.90 per share.

Profit for the second quarter of 1990 is expected to be less than half the amount earned in the first quarter of 1990. Profit for the first quarter was $99 million or 97 cents per share.

More than half of the decrease in forecasted 1990 profit is due to a dramatic decline in results for Caterpillar Brasil. In addition, profits will be adversely affected by lower sales volume, the weakening yen, generally higher costs due to further delays in realization of benefits from the company's factory modernization program, and from costs related to the corporate restructuring.

In 1989, Caterpillar Brasil reported substantial profits -- the result of rapidly escalating prices and strong product sales. This level of profitability continued through the first quarter of 1990. However, it now appears the subsidiary will incur a loss for the year. The forecasted loss is due to the significant slowdown in the Brazilian economy because of the economic plan announced by the Brazilian government in late March. The slowdown is causing a substantial decline in sales when translated to U.S. dollars due to the continued weakening of the Brazilian cruzeiro coupled

with the inability to raise prices in Brazil's depressed economy. Although the situation is still uncertain, losses in Brazil are expected to be most severe in the second quarter, with somewhat smaller losses in the third and fourth quarters. Despite adverse effects on results for 1990, Caterpillar supports the Collor government's plans to restore Brazilian financial viability, cut inflation, and open the economy to competition.

Consolidated sales will be about flat compared with last year, with higher prices offset by lower physical volume.

About one-third of the higher prices will result from the effects of a weaker dollar compared with European currencies. This, however, will not benefit profit since the weaker dollar causes both sales and costs in Europe to translate into more dollars -- with the net effect about offsetting. Also, although overall prices are somewhat higher, some planned price increases in 1990 have been restrained by the weaker yen. In addition, price realization on growing exports to Japan has been negatively impacted by the weaker yen.

WESTBORO, MA (JUNE 25) PR NEWSWIRE - Banyan Systems, the leader in corporate-wide PC networking, today announced the appointment of James D. D'Arezzo to the position of vice president, marketing. In this role, D'Arezzo will lead Banyan's marketing effort with direct responsibility for channel marketing, product marketing, applications marketing, distribution strategy, strategic marketing, telemarketing, market research advertising, public relations, marketing communications, and tradeshows.

Before joining Banyan, D'Arezzo had been a corporate officer with Compaq Computer Corporation during that firm's period of explosive growth from 1983 to 1990. Most recently, from 1988 to the present, he was vice president marketing Europe and International, responsible for marketing activities of 14 Compaq subsidiaries outside the U.S. and Canada. These encompass 53 countries, more than 1500 authorized dealers, and account for 56 percent of the company's total business. In 1989, divisional sales were $1.3 billion. Earlier, he served as vice president, corporate marketing at Compaq's Houston, Texas headquarters.

According to D'Arezzo, "I find the opportunity to become an integral part of Banyan's management team very exciting, especially given the company's leadership position in corporate-wide PC networking. As corporations evolve their computing environments to encompass networks for new business advantages. Banyan's unrivaled experience in fulfilling these

requirements makes the company the key player in a booming market. My prior experience influencing the development of the explosive PC market with two other leaders, IBM and Compaq, meshes perfectly with Banyan's optimal position for the future."

Said Banyan Vice President James Allchin about D'Arezzo's appointment, "As David Mahoney, Banyan president and CEO, has expressed in the past, 'We are continuing to add depth and market experience to our management and staff at a level commensurate to our extremely rapid growth over the past six years.' Jim's appointment is further evidence of this strategy. Banyan has been recognized as providing technically superior solutions. Jim's focus will be upon establishing that same leadership position in the areas of corporate and product marketing."

Prior to joining Compaq, D'Arezzo spent seven years with International Business Machines Corporation (IBM) in various management positions, and was an early member of the start-up team that introduced the original IBM personal computer. He holds an M.B.A. in marketing from Fordham University, and a B.A. in English from John Hopkins University.

LONDON (JUNE 25) PR NEWSWIRE - AGB Research, the world's leader in television research and audience measurement, announced today it has just signed contracts with two major clients for People Meter research and audience measurement in Spain.

TV3 based in Barcelona and TVV in Valencia are two to the leading regional networks in Spain. Under the new three-year contracts they will receive overnight rating information from a People Meter panel of 2,000 householders operated by AGB's Spanish subsidiary, Media Control.

Commenting on this development, Mike Kirkham, managing director of AGB Television, said, "This development is very important to us; it marks the first stage in our entry into the Spanish market for television research and audience measurement.

"TV3 and TVV have recognized the clear superiority of AGB's service and the unique information source we can provide by linking television viewing information to advertising expenditure and consumer panel data." The service for TV3 and TVV in Catalonia and Valencia will start in December 1990 and will extend to provide full national coverage in April 1991.

AGB Research carries out television research and audience measurement in 15

countries including the United Kingdom, Italy, Austria, The Netherlands, Belgium, Spain, and Hong Kong. AGB Research provides minute-by-minute information on audiences to all television channels and is widely used in the advertising and television industries.

TV3 and TVV are "autonomic" television stations funded by a mixture of local government finance and advertising revenue.

Under the government liberalization of broadcasting in Spain, three new national networks are currently starting up. These are Antenna 3, Tele 5 and Canal Plus.

KANSAS CITY, MO (JUNE 25) PR NEWSWIRE - Today, when referring to SAZTEC International, Inc. (NASDAQ: SAZZ), "International" becomes the key word. Recent contracts and joint ventures have strengthened SAZTEC's role as an international leader in information technology.

"SAZTEC continues to play an ever-increasing role internationally in the area of information conversion," said Thomas L. Reed, chairman and chief executive officer. "We have reorganized internally and are fully prepared to take advantage of our new markets and opportunities in the U.S. and abroad." Reed cited the following six international activities:

-- SAZTEC and BBC Strike a "Chord": SAZTEC announces the signing of an agreement with the British Broadcasting Corporation to electronically capture the BBC's Gramophone library catalogue, the largest record catalogue on earth. The contract will provide revenues of approximately $2.4 million over a 12-month period.

-- British Library Sells General Catalogue: SAZTEC International, which has all rights to distribution for pre-1975 British Library general catalogue, has successfully sold subscriptions of the CD-ROM to 90 national and international libraries.

-- SAZTEC Hires New U.K./European Sales Manager: SAZTEC, in order to spearhead planned revenue growth internationally, has hired Peter Gouldstone to lead the sales efforts in the United Kingdom and mainland Europe. Gouldstone brings to SAZTEC all-round experience in the computing marketplace.

-- SAZTEC and Jouve: A UK/French Connection: SAZTEC signs an agreement with Jouve Systems d'Information of Paris that establishes a flexible bilateral relationship between the two companies. SAZTEC will represent

Jouve in the United Kingdom and Jouve will represent SAZTEC in France. In addition, both companies have agreed on a number of joint ventures.

-- SAZTEC Enters Spanish Market: SAZTEC International and Jaime Brull announce the signing of an agreement for the marketing and sale of SAZTEC services in Spain. Brull, an independent consultant, is the founder and publisher of DELIBROS, the professional journal of the book trade in Spain.

-- SAZTEC Enters Switzerland: SAZTEC announces the signing of an agreement for Tom Tanzer, recently retired library director of the Swiss Federal Institute of Technology, to represent SAZTEC in Switzerland. Tanzer will help market SAZTEC in the industrial, insurance, transport and library sectors of Switzerland.

SAZTEC, an international leader in the use of computer technology, provides comprehensive services to convert information for use on new or existing computer systems.

For more information, please contact Thomas Reed, SAZTEC International, 6700 Corporate Dr., Kansas City, MO 64120. The telephone number is 816-483-6900.

CORPUS CHRISTI, TEXAS (JUNE 25) PR NEWSWIRE - Marine Holding Company (NASDAQ-NMS: MDCO) announced today that it has filed a registration statement with the Securities and Exchange Commission covering a proposed underwritten public offering of three million shares of the company's common stock. The underwriters will be granted an option to purchase up to 450,000 additional shares of common stock to cover over-allotments. Marine plans to use the net proceeds from the sale to repay indebtedness, for capital expenditures and for general working capital purposes.

The common stock will be offered through Salomon Brothers Inc; Smith Barney, Harris Upham & Co. Incorporated; and Howard, Weil, Labouisse, Friedrichs Incorporated. Copies of a prospectus relating to the offering may be obtained from the underwriters.

The filed registration statement also covers additional shares of common stock expected to be issued in exchange for indebtedness of approximately $4 million owed to certain principal shareholders of the company. The number of shares to be issued in exchange for the indebtedness will be based on the offering price of the proposed underwritten offering net of the underwriting discount.

A registration statement relating to these securities has been filed with the SEC. These securities may not be sold nor may offers to buy be accepted prior to the time the registration statement becomes effective. This press release shall not constitute an offer to sell or the solicitation of an offer to buy, nor shall there be any sale of these securities in any state in which such offer, solicitation or sale would be unlawful prior to registration or qualification under the securities laws of any such state.

The company engages in the contract drilling of oil and gas wells in the U.S. Gulf of Mexico for independent and major oil and gas companies.

#90176p9317 06/25/1990 ~PR Newswire

THOMASVILLE, GA (JUNE 25) PR NEWSWIRE - Davis Water & Waste Industries, Inc. (NYSE: DWW), today announced results for the fiscal year and fourth quarter ended April 30, 1990.

Fiscal 1990 net income was $1,035,710 or 32 cents per share on sales of $192,693,815, versus net income of $3,433,253, or $1.05 per share, on sales of $196,638,416 for fiscal 1989.

Fourth quarter net income amounted to $988,735, or 31 cents per share, on sales of $52,237,350, compared to net income of $1,100,159, or 34 cents per share, on sales of $48,160,592 for the same period of the prior year.

"Results for the year were frustrating, although anticipated. Although we achieved a sales gain of 8.5 percent in the fourth quarter, competitive pressures in our market contributed to reduced margins and a 10 percent decline in earnings for the period. We believe the slowdown in land development and construction activity and related economic factors are improving slowly. As a result, we expect the first quarter of fiscal 1991 will be profitable compared to a loss of 16 cents per share in the first quarter of fiscal 1990," R. Doyle White, president said.

"Our continued confidence in the future resulted in the recent increase in quarterly cash dividends from seven cents per share to 7-1/4 cents per share, to be paid July 2, 1990, to shareholders of record on June 16, 1990. The company has paid dividends for 10 years, initially on a semi-annual basis and quarterly since October 1988," Jasper C. Davis, chairman, noted.

Davis Water & Waste manufactures and markets products relating to the distribution of water and the treatment of water and waste water. The company also designs, engineers, manufactures, sells and installs water and waste water treatment systems and pumping equipment, and distributes certain process materials used to treat water and sewage to comply with applicable health and water standards.

STAMFORD, CONN. (JUNE 25) PR NEWSWIRE - Asea Brown Boveri Inc. (ABB) announced today that its subsidiary SAE Sadelmi USA, Inc. is a member of a joint venture, Dillingham-Sadelmi, that has signed a $52 million contract to expand a wastewater treatment plant in Whittier, Calif., for the county of Los Angeles. Dillingham Construction Company of Pleasanton, Calif., and SAE Sadelmi will build a new 30-million gallon per day facility as Stage III of the San Jose Creek Water Reclamation Plant.

The scope of the project, which will increase the plant's capacity by about 50 percent, includes extensive excavation, construction of tanks for sedimentation and aeration, filters, pump stations and associated systems. In addition, the contract calls for excavation of two outfall tunnels and installation of processing systems. The job is expected to be completed in 1993.

SAE Sadelmi USA, headquartered in New York City, is a construction manager and general contractor for infrastructure projects.

Asea Brown Boveri Inc. provides products and services for the power, process, automation, environmental control, transit and other markets. The company and its subsidiaries have sales of approximately $7 billion and some 35,000 employees in the United States. They are part of the ABB Group, Zurich, the world's leading electrical engineering company with total annual sales of about $25 billion and 215,000 employees in 140 countries.

#90176p9322 06/25/1990 ~PR Newswire

WASHINGTON (JUNE 25) PR NEWSWIRE - Henry D. Edelman, president of the Federal Agricultural Mortgage Corporation (Farmer Mac), announced today that he has received a letter from the Office of the Comptroller of the Currency (OCC) that should facilitate the participation of commercial banks in the Farmer Mac secondary market program.

"The OCC letter represents significant progress in clarifying the regulatory situation for participating banks under the Farmer Mac program " Edelman stated.

A banking circular, which will contain the full details of the decision, is now being prepared by OCC for distribution to banks in the near future. "After months of discussions, we are pleased to receive this written summary of the decision on these important regulatory issues," noted Edelman, "however, we cannot fully evaluate the impact of the decision on the Farmer Mac program until we see the complete text of the banking circular."

Edelman continued, "Our initial reaction is that this decision is a positive step that may facilitate the implementation of the Farmer Mac program and provide an improved opportunity for participation in the program by many banks interested in originating Farmer Mac loans."

The letter to Edelman from the OCC's chief national bank examiner, dated June 19, 1990, applies to banks that sell loans into a Farmer Mac pool and retain a diversified subordinated interest in the pool equal to ten percent or less of the amount of the loans sold. The letter states that, under these circumstances:

1. For purposes of calculating lending limits, only the amount of the subordinated interest retained will by counted.

2. A bank may purchase diversified subordinated securities representing an

interest in a Farmer Mac pool only in connection with selling a loan into that pool.

3. The total amount of diversified subordinated securities that a bank may own cannot exceed 25 percent of the bank's capital.

4. For purposes of calculating capital, the loan will be considered as sold with recourse and the full amount of the loan principal will be counted under the risk based capital guidelines due to go into effect at the beginning of 1991.

Farmer Mac was created by the Agricultural Credit Act of 1987 to provide greater liquidity and lending capacity to agricultural lenders and to assure a stable supply of credit at competitive interest rates to farmers, ranchers, and rural home buyers.

DALLAS (JUNE 25) PR NEWSWIRE - Elcor Corporation (NYSE: ELK) said today that unusually heavy rains, which have plagued the Southwestern United States this spring, have temporarily reduced normal roofing installation in this important market area, thereby resulting in a lower level of premium laminated fiberglass asphalt shingle shipments than had been expected during the company's fiscal 1990 fourth quarter which ends June 30, 1990.

According to Roy E. Campbell, president, "Bad weather means instead of a typically stronger fourth-quarter performance that had been expected, Elcor is likely to report a relatively small loss in the order of $.10 per

share or less.

"Even though roofing products shipments in the fourth quarter will be lower than last year, operating profits for this segment will be substantially higher than the year-ago level as a result of improved prices. However, the improved profitability for this segment will not be enough to offset lower than expected operating results from our industrial products business," Campbell commented.

"Indications are that the temporarily-deferred roofing installation will contribute to strong demand for our Elk Prestique(R) premium laminated fiberglass asphalt shingles in our first quarter beginning July 1, 1990. In addition, we look forward to good demand for our Mosley Machinery solid waste balers and recycling equipment," he said. Campbell added, "Through the first nine months ending March 31, 1990, Elcor reported net income of $3.6 million or $0.51 per share including a tax loss carryforward extraordinary item of $1.2 million or $0.17 per share, so we will be profitable for fiscal 1990 compared with a $5.6 million net loss equal to $0.80 per share for fiscal 1989.

"The loss in fiscal 1989 was due in large part to new facility start-up losses, unusually high warranty costs and reserve provisions and lower roofing products margins. As a result, the 1989 fourth quarter alone had a loss of nearly $6 million equal to $0.85 per share," he said.

In addition, Campbell stated, "Elcor's Gory concrete roof tile business in Florida expects to see benefits from its increased sales and cost-reduction efforts. After two years of development, the company's Chromium Corporation business in Lufkin, Texas, also expects major production contracts for its conductive coatings product line to generate several million in additional revenues in fiscal 1991. Conductive coatings protect plastic computer consoles and other plastic electronic enclosures from electromagnetic and radio frequency interference.

"Elcor is optimistic about fiscal 1991," Campbell concluded. Elcor manufactures roofing products and industrial products. Each of Elcor's principal operating subsidiaries is the leader or one of the leaders within its particular market.

Elcor's roofing products facilities are located in Dallas and Ennis, Texas; Tuscaloosa, Ala.; Boca Raton, Miami, and Pompano Beach, Fla. Its industrial products facilities are located in Chicago; Cleveland; and Dallas, Lufkin, Midland, and Waco, Texas.

MELBOURNE, FL (JUNE 25) PR NEWSWIRE - Vincent S. Lamb, Jr., president of CTG/Scientific Systems Services (SSS) (NYSE: TSK), has been named to the board of directors of ADAPSO's Information System Integration Division (ISI).

ADAPSO, the computer software and services industry association, established the ISI division last year in a move to more fully represent the entire information technology industry.

ISI membership has quickly reached more than 165 companies. SSS, the systems integration division of Computer Task Group (CTG), is a nationally known manufacturing systems integrator specializing in software-intensive systems for discrete and processing manufacturers, logistics and materials handling.

"The ISI division," Lamb explained, "is made up of companies that hold the point-of-contact responsibility for the procurement and integration of software, hardware, communication and information technologies. The integrator is also responsible for training, specific design, operational and management objectives.

"A major purpose of this new ADAPSO division is to increase visibility and customer awareness of the capabilities and benefits of systems integration in both the commercial and government sectors," Lamb said, "and to learn more about increasing overseas business opportunities." CTG's president and chief operating officer, John P. Courtney, past chairman of ADAPSO, currently serves as a director on ADAPSO's board of directors and as a member of the Information Technology Services Division's board of directors. He is also chairman of the division's Federal Taxation Committee. CTG was recently named one of the nation's top 50 systems integrators by Computer Systems News.

Officers of the ISI board of directors are: president, Stuart Reeves, Sr., vice president, Electronic Data Systems Corp.; vice president, Robert B. Laurence, president, Oracle Complex Systems, Inc.; and treasurer, Stephen A. Mucchetti, partner-in-charge, Information Systems, Coopers & Lybrand.

CTG is an international consulting, systems integration and professional services company. Founded in 1966, today Computer Task Group is a $233 million company listed on the NYSE. Staffed by more than 3,500 employees, CTG provides information, automation and communication systems through an international network of branch offices and development centers throughout the United States, Canada, West Germany and Great Britain.

#90176p9335 06/25/1990 ~PR Newswire

PHILADELPHIA (JUNE 25) PR NEWSWIRE - Consolidated Rail Corp. (NYSE: CRR) has signed a long-term contract with H&M International Transportation Co. Inc., to operate its major double-stack intermodal terminal serving the New York-New Jersey metropolitan area. H&M also will operate the facility's new Container Freight Station (CFS) and bonded U.S. Customs Service Central Examination Station.

Conrail's program creating a full-service international container handling facility at the North Jersey Intermodal Terminal (NJIT) in Jersey City also includes $13 million in physical improvements.

At the container yard, H&M will provide all the services international container shippers need for efficient transportation movements. These include delivery of containers to consignees, Customs releases, computer interface capability, neutral chassis pool if desired, maintenance and repair of chassis and containers, and all customer service functions.

H&M also will provide full stripping and stuffing services (sorting of multiple shipments in a single container), as well as Customs examinations at the CFS as soon as building improvements are completed, expected by mid-summer. The CFS will be housed in an existing ten-year-old truck terminal on adjacent property acquired last year by Conrail.

"These improvements will transform the terminal into a full-service international container handling facility," said Gordon H. Kuhn, Conrail's senior vice president-Marketing & Sales.

"The new NJIT offers our customers all the services they need at a single location. It will be even more convenient and easier for our customers to use, speeding the flow of consumer goods into the nation's largest consumer market, the New York-New Jersey metropolitan area.

"This new state-of-the-art facility combines the quality services of Conrail, the nation's largest intermodal carrier, and H&M International, the largest container freight station operator in the metropolitan New York area."

The construction program at the terminal, formerly known as Croxton, is scheduled for completion in late 1990. The work also includes a new entrance gate complex and a new office building.

The new gate complex will provide faster and easier access for truckers picking up and delivering containers. The gate complex will include an improved inspection area with four booths, six traffic lanes, and paving.

The new office building, to be constructed as part of the gate complex, will house representatives of the steamship lines whose containers are processed through the terminal, as well as the terminal's administrative staff.

CONTACT: Robert L. Libkind or Patricia Linskey, (215) 977-4594, both of Conrail.

WASHINGTON (JUNE 25) PR NEWSWIRE - Banc One Corporation (NYSE: ONE), one of the nation's most profitable and fastest growing financial institutions and MCI Communications Corporation (NASDAQ-NMS: MCIC) today announced a four-year, $42 million minimum agreement for MCI to replace five current long distance companies as Banc One's primary provider of a comprehensive array of voice and data communications services.

Under the terms of the agreement, MCI will provide Banc One Services Corporation with MCI Vnet Service, a virtual private network, MCI 800 Service and a variety of customized data services linking the company's 700 subsidiaries and affiliate banks located throughout the United States.

"Our decision to consolidate all of our carrier services into a single vendor environment resulted in an extensive and competitive evaluation process involving all major national and regional carriers," said Ron Cybyske, senior vice president of Banc One Services Corporation.

"MCI's aggressive and flexible partnership approach to our communications requirements enabled the company to differentiate itself from the competition while meeting the unique needs of our business."

MCI will also provide Banc One with network management information utilizing INMS and MCI View and a customized billing solution that will assist each Banc One affiliate in managing its specific telecommunications costs.

"The cost-effectiveness of MCI's services, coupled with the network management capabilities now available to us, will serve to maintain Banc One as a technological leader in the financial-services industry," added Cybyske. "We intend to draw upon this competitive advantage throughout the next decade."

"Banc One is now among an increasing number of major financial services institutions across the country that have made MCI the communications provider of choice in this information-intensive industry," said Bert C. Roberts Jr., president and chief operating officer for MCI. "A contract of this magnitude, from such a highly-regarded concern as Banc One, is a

significant competitive victory for MCI."

Banc One Corporation has assets of $27.2 billion, not including Bank One, Texas, and common equity of $2.34 billion as of March 31, 1990. Banc One Corporation now operates banking organizations in Indiana, Kentucky, Michigan, Ohio, Wisconsin and Texas with 670 offices.

MCI Communications Corporation provides a full range of global telecommunications services to businesses, residences and governmental agencies. The company owns and operates the world's second-largest communications network, employing advanced fiber optics, digital microwave satellite and digital switching technologies.

Headquartered in Chicago, MCI Midwest is an operating division of MCI Telecommunications Corporation serving Illinois, Indiana, Michigan, Ohio and Wisconsin.

NEW MILFORD, NJ (JUNE 25) PR NEWSWIRE - Polifly Financial Corporation (NASDAQ: PFLY), the holding company for Polifly Savings and Loan Association, today announced the appointment of Joseph S. Paparatto as the corporation's new president, chief executive officer and director. Paparatto joins Polifly from his most recent position as president and CEO of Raritan Valley Savings/Hansen Savings Bank, SLA, East Brunswick, N.J., a position he has held since 1973.

Frederick T. Muller, chairman of the board of Polifly, stated that he "was delighted that Mr. Paparatto will be joining us as CEO and on the board of directors. He has a wealth of experience in the savings and loan business particularly in New Jersey. We know that Joe will be a great asset to our organization. I am looking forward to working with him."

Prior to becoming president of Raritan Valley, Paparatto was an executive vice president and operations officer of that institution. Paparatto received his Bachelor of Science degree in Finance and Masters in Business Administration from Seton Hall University. Paparatto received a Graduate Assistantship for MBA studies and taught Money and Banking and basic finance to undergraduates as part of a Graduate Assistance Program.

#90176p9342 06/25/1990 ~PR Newswire

CHICAGO (JUNE 25) PR NEWSWIRE - Midway Airlines (NYSE: MWD) on Sept. 4 will begin service to New Orleans International Airport from the carrier's hub at Philadelphia International Airport with one daily round-trip flight according to John P. Tague, vice president of marketing and planning.

Using McDonnell Douglas DC9-30 aircraft, service from Philadelphia to New Orleans will depart at 9 a.m. and arrive in New Orleans at 10:59 a.m. From New Orleans, the Midway flight will depart at 11:25 a.m. and arrive in Philadelphia at 3:15 p.m.

Midway will offer convenient connections through Philadelphia to passengers who originate or who are destined to any of the eight northeastern cities Midway serves. In general, passengers on southbound flights departing at approximately 7 a.m. from Boston; Albany, Buffalo and Rochester, N.Y.; Providence, R.I.; Hartford/Springfield, Conn.; and Montreal and Toronto in Canada can conveniently connect in Philadelphia with the flight to New Orleans. Passengers can depart New Orleans on Midway's 11:25 a.m. flight and connect at approximately 5 p.m. to northbound flights in Philadelphia.

Introductory fares between Philadelphia and New Orleans range from $99 to $149 one-way.

Introductory fares (effective for travel from Sept. 4 to Oct. 15): -- $99 one-way coach (non-refundable). -- $139 one-way coach (unrestricted). -- $149 one-way first class (unrestricted). Post-introductory round-trip fares between Philadelphia and New Orleans will be as much as $80 lower than those fares which presently exist in the market.

Fares from Midway's northeastern destinations to New Orleans range from $99 to $114 one way.

Midway Airlines offers coast-to-coast service from its hubs at Chicago's close-in Midway Airport and Philadelphia International Airport. Midway Airlines and its wholly owned subsidiary, the Midway Commuter, serve 59 destinations in the United States, Canada, U.S. Virgin Islands and the Bahamas.

CONTACT: Sandra Allen of Midway Airlines, 312-838-4813.

PLEASANTVILLE, NY (JUNE 25) PR NEWSWIRE - The Reader's Digest Association Inc. (NYSE: RDA) today announced that its United Kingdom subsidiary has agreed to make an offer to acquire David & Charles plc, a book publisher based in Newton Abbot, England, for over $17 million (over 10 million pounds sterling).

The David & Charles board will recommend that shareholders accept the Reader's Digest offer. Holders of approximately 64 percent of the ordinary shares have agreed to the Reader's Digest offer.

David & Charles publishes a variety of general interest and reference books and also runs one of the leading book club operations in the United Kingdom.

Neil McRae, managing director of London-based The Reader's Digest Association Ltd., said, "David & Charles will fit nicely into our strategic growth plans. Their unique blend of publishing and book club operations, combined with our direct marketing expertise, will enable us to extend our book publishing business in Britain."

McRae added that it is the Reader's Digest intention that David & Charles and its Readers' Union books clubs will remain in Newton Abbot.

Reader's Digest is a global publisher and direct mail marketer of magazines, books and home entertainment products. Its United Kingdom subsidiary also is one of the largest publishers and direct mail marketers in Britain. The acquisition of David & Charles is part of the company's worldwide plan to expand its presence in global publishing markets.

#90176p9359 06/25/1990 ~PR Newswire

NEW YORK (JUNE 25) PR NEWSWIRE - Apparel America, Inc. today reported net sales of $27,166,000 compared to $31,738,000 for the three months ended April 30, 1989, a decline of approximately 14 percent. Operating income totalled $3,500,000 compared to $4,512,000 in the prior year. Net income was $2,013,000 or $.25 per common share compared to net income of $3,311,000 or $.50 per common share in the first quarter of 1989. Net income per common share has been computed after the recognition of preferred stock dividend requirements. At April 30, 1990, there were an additional 1,519,000 average common shares outstanding.

The current reporting period includes additional interest and financing costs of approximately $761,000 primarily attributable to the inclusion of borrowings incurred to finance the Mayfair acquisition and a tax benefit of $713,000 arising from the utilization of net operating loss carryforwards.

Robert Postal, president, said "Apparel America's performance was adversely affected by the continued turmoil and contraction within the retail community. Further, the sluggish retail business climate, a highly promotional environment combined with certain credit restraints resulted in reduced deliveries." Postal said that both its Robby Len and Mayfair divisions were unable to fully offset margin deterioration caused by selected production curtailments in response to the above. Additionally,

Apparel America's results include in increase in its provision for bad debts of approximately $225,000, attributable to the Ames Bankruptcy proceedings.

Postal indicated that management is cautiously optimistic about the remainder of fiscal year 1991.

Apparel America, Inc. is a manufacturer of women's swimwear, specialty apparel and casual sportswear.

ST. LOUIS (JUNE 25) PR NEWSWIRE - Australia's largest peacetime defense purchase in history was completed on schedule and within budget when the

75th and final Australian F/A-18 Hornet was delivered to the Royal Australian Air Force (RAAF) last month, according to McDonnell Douglas (NYSE: MD).

Australian Minister for Defense Robert Ray accepted the historic Hornet during a ceremony at Australia's Fairbairn air base on May 16.

In remarks made at the ceremony, Ray called the Hornet program an important accomplishment for Australia's military and industry.

"It is indeed impressive to witness a program -- launched nine years ago as the largest ever peacetime defense acquisition -- being finished on time and to budget," said Ray. "The positive benefits of this program will be felt in Australia for many years to come."

The Royal Australian Air Force selected the F/A-18 in 1981. As a condition of purchase, the Australian government required an industrial participation program including co-production of parts and final assembly of the aircraft in Australia. This was the first program of its kind for the F/A-18.

The first two Australian Hornets were built in St. Louis and delivered to Australia in May 1985. The remaining 73 aircraft were co-produced by U.S. and Australian companies and then assembled and flight tested by Aerospace Technologies of Australia (ASTA) in Avalon, Australia.

The F/A-18 Hornet is built by the McDonnell Aircraft division of McDonnell Douglas in St. Louis. Deliveries to date total 930, including the U.S. Navy and Marine Corps (647), Canada (138), Australia (75), and Spain (70). Kuwait will receive its first Hornets in 1992. Switzerland and the Republic of Korea also have chosen the Hornet as their new fighter aircraft. Northrop is the principal airframe subcontractor; Hughes Aircraft makes the radar; and General Electric provides the Hornet's engines.

NEWPORT NEWS, VA (JUNE 25) PR NEWSWIRE - The board of directors of The Flight International Group, Inc. today elected James E. Cooling to the board. Cooling previously held the position of advisory director to the board.

"The board values Jim Cooling's legal expertise and background in aviation " said J. Nelson Happy, chairman and chief executive officer. "His election underscores the Board's commitment to ensuring that Flight

International receives sound, independent counsel during its financial restructuring."

Cooling joins General Charles Gabriel, USAF, Ret., former Air Force chief of staff and member of the Joint Chiefs of Staff, as Flight's second independent director. Other Directors of the company are: J. Nelson Happy, chairman; M. Joseph Garrihy, president; and Frederick S. Shaw, chief financial officer.

Cooling is an attorney with Kansas City, Mo.-based Cooling & Herbers, P.C. He is a member of the American Bar Association and Lawyer Pilots Bar Association. Cooling is the Technical Editor of Flight Training magazine.

The Flight International Group, Inc. is a leader in aviation services with interests in government and military contracts as well as commercial flight operations.

MONTGOMERY, AL (JUNE 25) PR NEWSWIRE - Blount Inc. (AMEX: BLT.A) today reported financial results for the first quarter ended May 31. The international manufacturing and construction company also held its annual meeting of stockholders today in Montgomery.

For the quarter, sales and revenues were $170.8 million compared to $179.8 million for last year. Operating income was $6.7 million compared to $5.3 million last year.

Net income was $1.2 million or $.10 per share compared to $1.1 million or $.10 per share in last year's first quarter. Net income from continuing operations was $1.2 million or $.10 per share compared to last year's first quarter net income from continuing operations of $1.9 million or $.16 per share.

Sales from Outdoor Products improved to $41.8 million from $37.5 million for last year's first quarter. Operating income was $3.4 million compared to $2.8 million last year. For the first time, the group's results reflect contributions from Dixon Industries Inc. which was acquired during the quarter. Dixon manufactures specialty riding lawn mowers and accessories.

Sales from Industrial and Power Equipment were $23.9 million compared to $22.5 million last year. Operating income was $1.1 million compared to $1.2 million a year earlier. Current year results include increased expenditures for new product development and occupancy costs for recently

expanded manufacturing facilities at the company's Hydro-Ax operations in Owatonna, Minn.

Sales from Sporting Equipment and other operations were $18.0 million compared to $17.8 million for last year's first quarter. Operating income was $2.1 million, down slightly from $2.3 million for last year's first quarter.

Construction revenues were $87.0 million, down from $102.1 million the prior year. Operating income was $.1 million compared to a loss of $1.0 million last year. Current year results reflect the contributions from a number of profitable new jobs which were added to the backlog late last year.

Interest expense was $1.4 million for the quarter compared to interest income of $.5 million last year. This reflects cash used to pay prior-year taxes, fund operating needs, and acquire Dixon.

Winton M. Blount, chairman and chief executive officer of Blount Inc., said: "The company's performance is essentially on target through the first quarter. We are especially pleased that the long-term operating strategies that were initiated last year are producing quarter-to-quarter positive results as anticipated."

TORONTO (JUNE 25) PR NEWSWIRE - Alias Research Inc., creators of 3D software used in connection with both the Hubble Space Telescope and Academy Award-winning special effects today, released Alias Studio(TM), the world's most advanced 3D computer software for industrial design.

Stephen Bingham, president of Alias, said, "People expect the market leader to make breakthroughs and we've moved the 3D yardstick way out. This is the ultimate in 'less is more' computer-aided industrial design (CAID) technology. We combined ease of use with state-of-the-art modeling tools and precision data transfer. This technology truly gives users a strategic advantage. Alias Studio will help get more, better designed products to market -- much faster."

Alias Studio, starting from US$25,000, is easy to use, high- precision 3D software for enhanced productivity in the creation of high- quality manufacturable designs. It is the world's first complete, easy- to-use, interactive modeling system based on non-uniform rational b- splines (NURBS). This geometry forms the basis of very high-quality curves and surfaces and provides transparent integration to computerized engineering

and manufacturing systems.

Automotive companies saw key portions of Alias Studio in November 1989 and have collaborated with the company's advancements rather than pursue the development of similar proprietary styling systems. Alias has a leading reputation in design studios worldwide including BMW, Honda, General Motors, Volvo, Sony, Motorola, British Telecom, Armitage Shanks, Timex and Reebok.

Alias Studio operates on 3D workstation computers from IBM and Silicon Graphics Inc. Alias Research Inc. is based in Toronto.

OKLAHOMA CITY (JUNE 25) PR NEWSWIRE - The board of directors of Bogert Oil Company (NASDAQ: BOGO) (the company) announced today the date of the special meeting of stockholders to vote on the approval of its cash merger with LDEC Acquisition Corporation ("LDEC"), a wholly owned subsidiary of Louis Dreyfus Energy Corp.

The meeting date has been set for Thursday, July 19, 1990, at 10:00 a.m. CDT, at The Petroleum Club, 100 North Broadway in Oklahoma City. Stockholders of record as of June 22, 1990, will be entitled to vote on the proposed merger.

The terms of the merger agreement provide that LDEC will merge with and into the company, which will be the surviving corporation. Thereafter, the company will be a wholly owned subsidiary of Louis Dreyfus Energy Corp. If the merger is approved, stockholders of the company will receive $13.20 in cash for each share of stock. Rausher Pierce Refsnes, Inc. rendered a fairness opinion regarding the merger.

SAN FRANCISCO (JUNE 25) PR NEWSWIRE - Chevron U.S.A. Inc., the domestic oil and natural gas subsidiary of Chevron Corporation, has named seven vice president/general managers to head new business units for exploration, land and production.

The assignments are part of a Chevron U.S.A. restructuring, announced Feb. 20, that is expected to cut about 10 percent of the 8,100 positions in exploration, land and production and significantly reduce layers of

management.

The company will replace three regions, based in Houston, New Orleans and San Ramon, Calif., with eight business units, each responsible for its own performance. Five are production units, two are exploration and one is land, which is responsible for oil and gas leases and related concerns. (The head of the New Orleans-based production unit will be named later.)

Chevron U.S.A. plans to complete the restructuring by October. A voluntary severance program was offered to employees in June, and results are now being tabulated. Management plans to begin making new job assignments soon, and expects to complete the process in August.

Effective Aug.1, the new vice president/general managers are: Bakersfield: John Cameron, Western Production Business Unit -- Cameron, 56, was formerly vice president of the Western Region, headquartered in San Ramon.

Denver: Gene Thomas, Rocky Mountain Production Business Unit -- Thomas, 52, has been manager of the Denver Division of Western Region production.

Houston: Jim Hooks, Western Exploration Business Unit -- Hooks, 53, has been general manager, exploration, for the Eastern Region, headquartered in New Orleans.

Will Lewis, Central Production Business Unit -- Lewis, 60, has been general manager of production in the Central Region headquartered in Houston.

Burt Branstetter, Land Business Unit -- Branstetter, 45, has been regional counsel in Chevron U.S.A.s law department in Houston.

MEADOW LANDS, PA (JUNE 25) PR NEWSWIRE - Off-track betting (O.T.B.) makes its official debut in Pennsylvania this week at the Westgate Plaza, just outside of New Castle, Pa., Ladbroke Racing Corp. said today.

It all gets under way on Wednesday afternoon when Ladbroke Racing Corp. opens its 22,500-square-foot facility. The New Castle O.T.B. site is expected to attract crowds from a wide area of eastern Ohio and northwestern Pennsylvania. Admission to the grandstand will be free. A full-service dining room and cafe also are available.

Gates will open at 11 a.m. on Wednesday for racing which begins at 1 p.m. Racing from Ladbroke at the Meadows and Philadelphia Park will be available on Wednesday afternoon, while racing from Pocono Downs and Penn National will be available at night.

Ladbroke Racing also owns The Meadows in Washington County. The purchase of The Meadows occurred in January of 1989 after legislation to enact off-track wagering in Pennsylvania cleared the Pennsylvania state legislature. Ladbroke will be permitted to open up to six sites in Pennsylvania. The location of those sites has not yet been disclosed by the company.

NEW YORK (JUNE 25) PR NEWSWIRE - Axa Midi, the seventh largest insurance company in Europe, today announced the formation of Axa Re Asia, a wholly owned reinsurance subsidiary based in Singapore.

As part of Axa's international group of insurance and reinsurance companies, the newly formed subsidiary will be responsible for developing Axa's reinsurance business in the Far East.

Claude Bebear, chairman and chief executive officer of Axa Midi Assurances

said, "With full underwriting authority, technical expertise and invaluable experience gained from its global network, Axa Re Asia is well positioned to serve the needs of the Asian insurance industry."

Bebear continued, "The paid-up capital of $27 million makes Axa Re Asia one of the more highly capitalized reinsurance companies in the Far East. The goal of Axa Re Asia will be to provide financial strength and professional expertise to this burgeoning region of the world. Our entrance into the Asia reinsurance market is part of our strategy to become one of the leading international insurance companies."

According to Bebear, Axa Re Asia will be managed by a carefully selected team of experienced local managers. "Our successful global strategy has been to put in place managers who best understand the needs and culture of each specific market. We believe this approach provides Axa with a competitive edge in providing the highest quality service," stated Bebear.

Singapore-based Axa Re Asia will join Axa's reinsurance subsidiaries in Paris, Montreal, London and New York as providers of reinsurance subsidiaries in Paris, Montreal, London and New York as providers of reinsurance throughout the world. Axa also has interests in a number of other international operations and transacts reinsurance business emanating from more than 100 countries.

Axa, with 1989 premium revenues of $8 billion, operates insurance and reinsurance companies in the United States, Europe, and Asia, including Great Britian, Germany, Belgium, Italy, Canada, and Singapore. In the U.S. Axa operates Axa Re U.S., a reinsurance company based in New York.

NEW YORK (JUNE 25) PR NEWSWIRE - James M. Steuterman, 33, senior vice president of New Plan Realty Trust (NYSE: NPR), has been named a member of the firm's board of trustees. His appointment, which increases the board from eight to nine trustees, was announced by William Newman, chairman and chief executive of the publicly owned real estate investment trust.

The largest publicly traded equity trust, New Plan owns 62 shopping centers in 14 states, apartment complexes and other properties.

Associated with New Plan since 1984 when he joined the trust as a property acquisition specialist, Steuterman advanced to a succession of posts, becoming director of acquisitions in 1986, vice president in 1988 and senior vice president and director of acquisitions last year.

Prior to joining New Plan, Steuterman served as corporate real estate manager for Schnuck Markets, Inc., St. Louis, a large regional grocery chain, from 1979 to 1984. Before that, he was with the Equitable Life Assurance Society and earlier had served with Baur Properties, a St. Louis developer of office parks. Trained in shopping center management, Steuterman was professionally certified after three years of specialized training and job experience.

Welcoming the newcomer to the board, Newman, said, "Jim Steuterman has proven himself especially adept at finding new properties and bringing them aboard as valuable additions to our portfolio of income- producing real estate."

Steuterman was raised in St. Louis where he attended the Clayton and Ladue

School Systems and Chaminade College Preparatory School. He received a B.S. degree in business administration from the University of Missouri-St. Louis.

A member of the International Council of Shopping Centers, a trade group, Steuterman and his family live in Plainsboro, N.J.

#90176p9390 06/25/1990 ~PR Newswire

RYE, NY (JUNE 25) PR NEWSWIRE - Melville Corporation (NYSE: MES) announced today it has reached an agreement in principle to acquire Peoples Drug Stores, Inc., a wholly owned subsidiary of Montreal-based Imasco Limited (Toronto Stock Exchange: IMS), for approximately $330 million in cash. The transaction is subject to the execution of an acquisition agreement and regulatory approvals.

Melville is one of the nation's largest specialty retailers, with sales of $7.5 billion in 1989. It has a major presence in the drug and health and beauty aid industry through its 811 CVS stores in 14 states, primarily in the northeast. In 1989 sales for CVS totaled $1.95 billion.

Peoples currently operates 490 stores in the mid-Atlantic region, including Virginia, Maryland, the District of Columbia, Pennsylvania, North Carolina, and West Virginia. Peoples had 1989 sales of $1.02 billion.

Together the two businesses will represent the fifth largest chain drug company in the United States.

The acquisition of Peoples will be financed from operating cash flow and existing lines of credit. It is anticipated that there will be no dilutive effect on Melville's earnings. The acquisition will be accounted for as a purchase transaction.

Rosenthal said that he expects the Peoples stores to keep their current name and that, while details have yet to be worked out, they will form a distinct unit within the CVS division.

The transaction is expected to close in August. Melville operates nationwide specialty retail stores in four business segments: apparel; prescription drugs, health and beauty aids; footwear; and toys and household furnishings. The company had earnings of $398 million in 1989. In addition to CVS, its stores include Marshalls, Wilsons, Chess King, Meldisco, Thom McAn, and Kay-Bee Toy. As of December 31, 1989, Melville operated 6,930 stores and employed over 100,000 people.

Imasco, which acquired Peoples in 1984, is a major Canadian consumer products and services company with operations in Canada and the United States.

#90176p9394 06/25/1990 ~PR Newswire

MISSISSAUGA, ONTARIO (JUNE 25) PR NEWSWIRE - A new segment in the Canadian automotive market was established today with the introduction of the British-built Range Rover luxury four-by-four, according to Roger J. Ball, 46, general manager, Land Rover Canada Inc.

Ball said the Range Rover is the only sport utility vehicle to combine permanent four-wheel-drive off-road capability with the performance, comfort, and convenience features of a European touring sedan.

Land Rover Canada is a subsidiary of Range Rover of North America, Inc. and a member of the Rover Group of companies, England. The U.S. company has spent the last four years building sales in the U.S. market and developing the Range Rover for its sales debut here.

"We're coming in at the top of a growing sport utility market in Canada," said Ball. "Over 82,000 units were sold in 1989, an increase of 60 percent over 1986. If the same rate of growth continues, some 100,000 sport utility vehicles will be sold in 1991," he added.

He said the vehicle will appeal to an upscale buyer with an income over $200,000 who might otherwise have purchased a European luxury sedan, a station wagon, or a fully equipped four-by-four.

"We're selling a complete vehicle with all the features anyone could want as standard equipment," Ball said. The four-door, aluminum-bodied Range Rover has more than 70 cubic feet of cargo capacity, seats five and is powered by 178 hp fuel-injected, aluminum V-8 engine with four-speed ZF automatic transmission and air conditioning as standard.

"The secret of the vehicle's capability is in the suspension," Ball said. "Range Rover is the only sport utility vehicle to feature a 14-gauge boxed steel chassis, live axles front and rear suspended on coil springs, a sophisticated ride-leveling device and four-wheel disc brakes with four channel ABS. Steel-belted Michelin radial tires, mounted on 16-inch alloy wheels were specially designed for Range Rover.

Some features of the even more luxurious "County" model are Connolly

leather upholstery in an exclusive design, chrome bumpers, and unique exterior paint selections. The only options are power slide and tilt sunroof (both models) and a premium audio system (County only) with compact disc system, 120 watts of power and improved seven-speaker system, including a subwoofer speaker.

"Range Rovers are frequently driven at over 165 kilometers per hour on the autobahns of Germany, which is why the suspension geometry, tire selection and braking capability are so highly specified," Ball added.

AUSTIN, TX (JUNE 25) PR NEWSWIRE - The CompuAdd Corporation today entered the laptop arena with the announcement of an 11.5-pound system based on a 16MHz Intel 386SX microprocessor and bundled with Microsoft Windows 3.0 loaded on the hard disk.

Called the CompuAdd 316SL, the new laptop is priced at $2,895 and comes standard with 2MB of memory expandable to 6MB, a fast 40MB hard drive, a high-density 3.5-inch diskette drive and a high-resolution VGA screen.

In addition to CompuAdd's licensed version of the popular Windows 3.0 operating environment, MS-DOS 4.01, DOS Help! utility and Lap-Link communications software are loaded on the hard disk for customer convenience.

The CompuAdd 316SL features two-way operation: use of the rechargeable battery pack and power-management software provided at no extra charge for up to three hours of on-the-go operation; or plugging into an AC power outlet for extended use.

The VGA screen -- a backlit, page-white LCD -- measures 8-by-6 inches and features 16 gray scales with 640-by-480 resolution. An external VGA video port allows users to connect the laptop with a range of full-sized monitors, including color.

Users also have the added flexibility of using the built-in 85-key keyboard or attaching a full-sized 101-key keyboard via a dedicated port.

Customer deliveries of the CompuAdd 316SL are scheduled to begin in July through the company's retail, mail order and direct sales channels.

MONTGOMERY, ALA. (JUNE 25) PR NEWSWIRE - Winton M. "Red" Blount, chairman and chief executive officer of Blount Inc. (AMEX: BLT.A), today announced that R. William Van Sant, president, has been elected chief executive officer by the board of directors effective Dec. 1.

Mr. Blount will remain as chairman of the board. Mr. Blount made the announcement at the Blount Inc. annual meeting of stockholders today in Montgomery. "Bill Van Sant's vision for this company is similar to mine " he said. "When you combine Bill's professional business expertise with his outstanding leadership skills, the result is a superb chief executive uniquely qualified to lead this company into the next century."

Van Sant said: "I am honored to be elected chief executive of Blount Inc. and am grateful for the confidence that Red and the board have placed in me. It is a special privilege to succeed Red, who has led this company through 45 years of sustained growth and diversification while giving of himself to its employees and to the citizens of the communities and states where we operate. We have worked together very closely during the past three years and I look forward to continuing to support the long-range strategies for growth that have been established for this company."

Van Sant joined Blount in 1987 as president and chief operating officer. Previously he was president and chief operating officer at Cessna Aircraft Co. after spending 25 years with Deere & Co. He earned B.S. and M.S. degrees in mechanical engineering from the University of Iowa.

Blount Inc. is an international manufacturing and construction company headquartered in Montgomery.

STAMFORD, CT (JUNE 25) PR NEWSWIRE - GE Capital Corporate Finance Group today announced it has formed a restructuring group that will specialize in providing debt and equity capital for corporate restructurings, reorganizations, capitalizations, turnarounds and debtor-in-possession financing.

Dennis Carey, general manager of GE Capital Corporate Finance Group, said the Restructuring Group has been formed to "respond to the desire of companies to de-leverage in this softening economy and put in capital structures that allow them to weather economic cycles."

GE Capital has named Jeffrey H. Coats, senior vice president and manager, to head this new group. He will manage a team of restructuring specialists based in Los Angeles and New York to focus the 20 years experience GE Capital Corporate Finance Group has had in the restructuring business on the challenges facing corporations in the 1990s.

"With access to GE Capital resources and GE Company industry expertise, this group has the ability to provide single source financing to fund deals of all sizes, ranging from short-term financing in crisis situations to long-term solutions for distressed firms," Coats said.

Recently, GE Capital Corporate Finance Group worked with turnaround specialist, Sandford C. Sigologg, to structure a $50 million debtor-in-possession facility for L.J. Hooker and a $37.5 million financing for the management buyout of its Merksamer Jewelers subsidiary.

GE Capital, headquartered in Stamford, is one of the nation's largest diversified financial companies with more than $59 billion in assets.

HOUSTON (JUNE 25) PR NEWSWIRE - American National Petroleum Company (NASDAQ: ANPC) announced today that, at its June 21, 1990 annual meeting of shareholders, Donald B. Bibeault and Lionel P. Boissiere Jr. were elected to the board of directors. They join Michael Y. McGovern and David G. Eller who are already on the board. Bibeault and Boissiere are succeeding Richard P. Rifenburgh and Kenneth L. Guernsey, whose terms have expired and who have declined to stand for re-election. Also, Philip J. Ablove has resigned as a director and chairman of the board earlier this month. Bibeault has been elected chairman of the board to replace Ablove.

Bibeault is the president and chief executive officer of Ironstone Group, Inc., the company's majority shareholder. He has been the architect of successful turnarounds at a number of medium size companies. In the early 1980s, he served as special advisor to the CEO of Varity Corp. (formerly Massey-Ferguson Ltd.), and more recently as president of Best Pipe & Steel and as a workout advisor to Bank of America.

Boissiere is a director of Ironstone Group, Inc. and is a principal with Hambrecht & Quist Venture Partners. He is also an officer and director of two companies in Hambrecht & Quist's LBO portfolio. As a member of Hambrecht & Quist's Mergers & Acquisitions Group, he led several successful leveraged buy-outs for Hambrecht & Quist and client accounts. In addition to his M & A background, Boissiere has experience in industry

and venture capital.

American National Petroleum Company, a Houston-based company, is engaged in oil and natural gas exploration and production and energy related businesses.

TULSA, OK (JUNE 25) PR NEWSWIRE - The sponsors of the Alaska Natural Gas Transportation System (ANGTS) project declared that Foothills Pipe Lines Ltd.'s entry into the group sponsoring the Alaskan segment is a significant step forward.

Foothills Pipe Lines Ltd., a major Canadian gas transmission company, today announced in Calgary, Alberta, that it had acquired ownership of United Gas Pipe Line Company's interest in Alaskan Northwest Natural Gas Transportation Company, the partnership which sponsors the planned Alaskan segment.

Vernon T. Jones, chairman of the board of partners and president of the Williams Companies, Inc. (NYSE: WMB), of Tulsa, said, "Foothills brings substantial new backing to the Alaskan segment project. It is a significant boost to our efforts to complete the ANGTS."

Foothills' chairman and chief executive officer, Robert L. Pierce, said, "This is tangible evidence of our belief in the project and our determination to see it completed."

Other members of the partnership are subsidiaries of the Williams Companies, Inc., Pacific Gas and Electric Company and TransCanada PipeLines Limited.

Foothills, through its partnership interest, will join in the "Cooperative Agreement for Design and Engineering of Alaska Gas Pipeline and Conditioning Plant," under which Exxon Company, USA and BP America participate with the partnership in technical and cost studies. Both Exxon and BP America are major North Slope oil and gas producers.

The ANGTS eventually will transport Prudhoe Bay gas reserves to the lower-48 states by a 4,800-mile pipeline through Alaska and Canada. Approximately 1,500 miles of the system, in Canada and the United States, were completed in 1982 and deliver 1.3 billion cubic feet per day of Canadian gas to the U.S. West Coast and Midwest.

Foothills Pipe Lines, Ltd. is also the sponsor of the Canadian portion of the ANGTS. It is owned 50 percent each by NOVA Corporation of Alberta, based in Calgary, and Westcoast Energy Inc., of Vancouver, British Columbia.

CHICAGO (JUNE 25) PR NEWSWIRE - Sears, Roebuck and Co. (NYSE: S) and its wholly owned subsidiary, Sears Receivables Financing Group, Inc., announced that the subsidiary filed today with the Securities and Exchange Commission a registration statement for the issuance and sale of $250 million of Sears Credit Account Trust 1990 C Pass-Through Certificates through an underwriting syndicate to be managed by Dean Witter Reynolds Inc., Lehman Brothers and Merrill Lynch Capital Markets.

Sears will sell receivables arising from a portion of its merchandise group credit accounts to the subsidiary, which in turn will transfer the receivables to a trust which will issue the certificates. Discover Card receivables will not be included in the trust. The certificates will represent undivided ownership interests in the trust.

A registration statement relating to these securities has been filed with the Securities and Exchange Commission but has not yet become effective. These securities may not be sold nor may offers to buy be accepted prior to the time the registration statement becomes effective.

This release shall not constitute an offer to sell or the solicitation of an offer to buy, nor shall there be any sale of the certificates in any state in which such offer, solicitation or sale would be unlawful prior to registration or qualification under the securities laws of any such state.

A copy of the prospectus, when available, may be obtained from Dean Witter Reynolds Inc., 2 World Trade Center, New York, N.Y. 10048, Lehman Brothers Syndicate Department, American Express Tower, 200 Vesey Street, New York, N.Y. 10285, or Merrill Lynch Capital Markets, syndicate department, World Financial Center, North Tower, seventh floor, New York, N.Y. 10281.

TORONTO (JUNE 25) PR NEWSWIRE - Varity Corporation (NYSE: VAT) said the most powerful diesel engine produced by its British-based Perkins unit has been successfully tested by the U.S. Army and may be built in the U.S. for military customers by Detroit Diesel Corporation.

Perkins' Condor CV12 diesel already powers the British Army's Challenger main battle tank. It was also selected for the missile launcher

development program associated with the proposed U.S. Midgetman missile system.

Varity said the CV12 has successfully completed extended tests at rated output of 1,500 horsepower by the U.S. Army Tank Automotive Command (TACOM).

As a result, Perkins and Detroit Diesel signed a memorandum of understanding that may involve U.S. production of the CV12 for a new generation of armored vehicles. Perkins and Detroit Diesel have been collaborating in a range of distribution and marketing programs in North America since 1988.

NEW YORK (JUNE 25) PR NEWSWIRE - Willcox & Gibbs, Inc. (NYSE: WG) announced today that it has reached an agreement to purchase, for cash, the shares of Filix Lastex S.A. of Troyes, France. The aggregate purchase price would be approximately $39,000,000. The agreement is subject to certain conditions, including approval of the French government and of the Willcox & Gibbs board of directors.

Filix Lastex S.A. is the largest covered yarn manufacturer in France and one of the industry leaders in all of Europe. In 1989 sales reached $51 million and net earnings rose to $3,200,000.

Covered yarn is a continuous filament yarn wrapped around spandex, and its main use to date has been in the women's hosiery market. In the United States this product has enjoyed significant growth in the last ten years, and a similar growth is anticipated in the markets served by Filix Lastex S.A.

John K. Zeigler, chairman and chief executive officer of Willcox & Gibbs stated that "the acquisition of Filix Lastex S.A. represents a logical and significant extension of our operations in the covered yarn industry. We believe that our company, through its subsidiaries, Regal Manufacturing Company of North Carolina and Rubyco Inc. of Canada, is already the world's leading and largest supplier of covered yarns. The purchase of Filix Lastex will enable us to participate in the anticipated growth markets of Europe and many other countries in which the French company is already marketing its products. In addition, there are many marketing and production synergisms between our present operations and those of the company in France which should bring about significant benefits to our covered yarn operations."

FAIRFAX, VA (JUNE 25) PR NEWSWIRE - ERC Environmental and Energy Service Co., Inc. (NASDAQ: ERCE) announced that it has been awarded an engineering services contact by the Federal Highway Administration (FHWA) to assist its Eastern Federal Lands Highway Division with respect to its construction program for bridges and highways in the eastern United States.

ERCE was recently awarded the contract and already has five engineers working full-time on the project. Working closely with FHWA personnel on the project, ERCE's staff are providing construction inspection for roadway and bridge construction and also testing services. Most of ERCE's work under the contract is expected to occur on the Natchez Trace Parkway near Nashville, Tenn., and is being managed out of the Nashville Operations' office.

In addition to the contract revenue of $715,760 to ERCE over the next two years, the contract contains options that could allow it to be extended four more years, with the potential for $1.5 million in additional revenues to ERCE.

ERCE is a professional and technical services firm providing a comprehensive range of environmental, infrastructure, and energy consulting, engineering, and analytical services to industrial and commercial companies and governmental agencies. The company has principal operating offices in Fairfax, Va., Nashville, Tenn., and San Diego.

IRVINE, CA (JUNE 25) PR NEWSWIRE - Mission Power Engineering Company last Friday filed a mechanic's lien on the third contract of the COSO geothermal project located in the China Lake area of California. The lien was filed against California Energy Company of San Francisco and its partners, the owners of the COSO project.

"The lien was filed by Mission Power to protect its rights on the last three of eight geothermal power plants it engineered and constructed for California Energy and its partners," said Jack Adrian, Mission Power's president and chief executive officer. Mission Power is a wholly owned subsidiary of SCEcorp and has been the contractor for the more than $300 million geothermal project.

"Mission Power filed the $47 million lien because California Energy and its partners have not paid us since January 1990, and are in breach of the contract. On June 13, 1990, Mission Power terminated this contract and began demobilization of its equipment and personnel from the site," Adrian said.

Earlier in the month, Mission Power filed a lawsuit in Inyo County Superior Court against California Energy and its partners on all eight power plants. In its complaint, Mission Power is seeking more than $79 million for breach of contract, plus interest and damages for alleged fraud and misrepresentation by California Energy Company.

WATERBURY, CT (JUNE 25) PR NEWSWIRE - The board of directors of Centerbank (NASDAQ: CTBX) today elected Robert T. Kenney president. Kenney will continue to report to chairman and chief executive officer Robert J. Narkis. As president, he will be responsible for the day-to-day operations of the bank.

"Bob Kenney is experienced in all aspects of the bank's operations and is a tremendous asset to our organization," stated Narkis. "Having served Centerbank for over 22 years, his sound financial background, in-depth knowledge of the industry, and demonstrated leadership ability will be most helpful in building value for shareholders, customers and employees."

Kenney began his banking career with Centerbank in 1969 as manager of the accounting department, and continued to move up through the organization assuming more responsibilities. He was made a member of senior management in 1982, served as treasurer and chief financial officer, and most recently, chief operating officer.

Actively involved in the Waterbury community, Kenney is a trustee of Waterbury Hospital, director and trustee of the Waterbury YMCA, and past chairman of the board of the United Way of Greater Waterbury. A member of the legislative committee of the Savings Banks' Association of Connecticut he is also a director of the Hartford Mutual Investment Fund, and senior associate of Robert Morris Associates. He is a certified public accountant and a member of the Connecticut Society of CPAs and the American Institute of CPAs.

Kenney lives in Waterbury with his wife Helen, and two sons. Established in 1850, Centerbank is an FDIC-insured, state-chartered savings bank with assets of $1.8 billion and 19 branch offices.

#90176p9434 06/25/1990 ~PR Newswire

ST. LOUIS (JUNE 25) PR NEWSWIRE - INTERCO Incorporated (NYSE: ISS) expects its four core companies to register improved operating profits in fiscal 1991 ending Feb. 23, 1991, Richard B. Loynd, chairman of the board

and chief executive officer, told shareholders at today's annual meeting. In fiscal 1990 the core companies reported operating profits of $137.7 million, up from $127.4 million the year before.

First quarter operating profits of the core companies are expected to be below the $28.3 million earned a year ago, Loynd said. "Our footwear performance is up again and on target," while earnings of the furniture businesses are below the year-ago pace, primarily due to soft industry conditions, he explained.

"In recent weeks, we have seen an improvement in our furniture order rates " Loynd continued. "Therefore, we expect in the second half to see a pickup in our furniture segment." INTERCO is projecting "continuing improvement throughout the year" in its footwear operations, he noted.

All the core companies -- Broyhill Furniture Industries, Inc.; The Lane Company, Incorporated; Converse Inc.; and The Florsheim Shoe Company -- "are leaders in their industries and have good momentum in the marketplace " Loynd said. "We are implementing strategies that should produce increased sales and operating profits."

The executive continued: "We have already seen a number of positive signs." For instance, he pointed out that Converse's "Magic" line is sold out through fall and is now projected to exceed its $30 million sales goal for the year. "Broyhill has made inroads into several new markets; Lane's new line of reclining sofas and love seats has been well received and sales will be above target. Florsheim is benefiting from new products, as well as production consolidations and discontinuance of unprofitable and low-profit businesses," Loynd added.

"However, our debt is much larger than these companies can support and a financial restructuring is absolutely essential to the long-term health of INTERCO and these fine companies," Loynd stressed. "We must take whatever steps are needed to see that this restructuring is completed. Management plans to do that as quickly as we possibly can."

He pointed out, "Over the past month we have been in negotiations with our bank group and have arrived at an agreement in principle with the steering committee to restructure our senior debt. We are presently in final negotiations which we expect will lead to a new agreement with all our banks."

Loynd emphasized: "Our objective is simple and straightforward: to maintain the strengths of the core companies so that they can capitalize on the significant growth potential each of them has."

As previously reported, last month INTERCO filed a registration statement with the Securities and Exchange Commission detailing a restructuring plan

that involves an exchange offer for the company's subordinated debt, as well as alternatives including a prepackaged Chapter 11 plan of reorganization, if the exchange offer doesn't succeed.

#90176p9437 06/25/1990 ~PR Newswire

CHICAGO (JUNE 25) PR NEWSWIRE - Duff & Phelps today has lowered the ratings for Southeast Banking Corp. (NYSE: STB) as follows: senior debt to 'BBB-' (triple-B minus) from 'BBB+' (triple-B-plus); subordinated debt to 'BB+' (double B-plus) from 'BBB' (triple-B); and preferred stock to 'BB' (double-B) from 'BBB-.' Approximately $420 million of securities are affected by the rating changes. The commercial paper rating has been lowered to Duff 3 from Duff 2. In addition, the short- term certificate of deposit rating for the corporation's principal subsidiary, Southeast Bank, N.A., has been lowered to Duff 2 from Duff 1-.

"The rating changes reflect the severe deterioration within the loan portfolio and associated pressures on profitability. Southeast Banking Corp. recently announced it expects non-performing assets to increase from $474 million, or 4.55 percent of loans and other real estate owned, at March 31, 1990, to approximately $600 million to $620 million, about 5.90 percent, at June 30, 1990. This increase follows a first-quarter rise in non-performing assets from $330 million or 2.99 percent of loans and OREO at year-end 1989. As a result, non-performing assets will have risen approximately $280 million or 85 percent over the first six months of 1990. The deterioration which occurred in the second quarter will, in all likelihood, require a large loan loss provision to increase the loan loss reserve and cover anticipated charge-offs. Southeast has stated that it expects a loss for the second quarter and for 1990 as a whole. Above-average loan loss provisions will likely pressure earnings in the near term. Expenses associated with the workout of problem assets and the cost to carry non-performers will continue to negatively affect earnings over a more extended time horizon. Problem real estate credits generally require a lengthy period of time to resolve. As such, we do not expect non-performers to decline in the near term or the negative earnings impact to diminish quickly," stated a D&P spokesman.

With assets of $17.1 billion at March 31, 1990, Miami-based Southeast Banking Corp. is Florida's second largest bank holding company. Its principal subsidiary is Southeast Bank, N.A., Florida's largest bank. Southeast provides financial services from more than 230 locations throughout Florida. Commercial banking has long predominated, although building a retail banking presence is a strategic initiative.

#90176p9442 06/25/1990 ~PR Newswire

CALGARY, ALBERTA (JUNE 25) PR NEWSWIRE - Foothills Pipe Lines Ltd. (''Foothills''), of Calgary, announced today that it has acquired an interest in the Alaskan section of the Alaska Natural Gas Transportation System (ANGTS). Specifically, Foothills has purchased all of the shares of United Alaska Fuels Corporation, a United Gas Pipe Line Company subsidiary that has been a partner in Alaskan Northwest Natural Gas Transportation Company, the sponsor of the Alaskan segment of ANGTS, since its formation in 1978. Foothills holds the certificates for the ANGTS in Canada and owns and operates the southern Canadian section of the ANGTS known as the ''Prebuild''.

The ANGTS is a 4,800-mile pipeline project through Alaska and Canada to transport Alaskan North Slope volumes from Prudhoe Bay to markets in the lower 48 states. Approximately one-third of the system in mileage terms has been ''prebuilt'' and is currently transporting Canadian gas for export to various U.S. markets. Upon completion, the ANGTS will be able to deliver sufficient North Slope gas supplies to displace 400,000 to 600,000 barrels of imported oil per day.

Robert L. Pierce, chairman and chief executive officer of Foothills, emphasized that the acquisition of a partnership interest in the Alaskan segment underscores the confidence in the ANGTS by Foothills and its two shareholders, NOVA Corporation of Alberta and Westcoast Energy Inc. Specifically, Pierce stated: ''When you consider the growing gap between rapidly increasing U.S. demand and lower 48 production, it is clear that the United States will soon need access to North Slope gas supplies, which currently represent approximately 15 percent of proven gas reserves in the U.S. It is also clear that the ANGTS is the most economic and environmentally sound means of providing that access. We are confident, therefore, that the remainder of the project will be required by the end of the decade.''

Foothills' acquisition will also facilitate the coordination of preconstruction activities which are required for the project. In this respect, C. Kent Jespersen, president of Foothills, stated: ''Given the magnitude of the ANGTS and the fact that it will traverse two countries, it is extremely important that the sponsors of the Alaskan and Canadian segments of the project coordinate their financing, design and construction activities. Foothills' participation in both segments will clearly help achieve that goal, and it should contribute to the expeditious completion of the project.''

Jespersen also emphasized that the ANGTS is a source of additional gas reserves that could be brought onstream quickly, given the fact that it is

subject to the 1977 treaty between Canada and the U.S. committing both countries to the expeditious construction of the pipeline on a timely basis. In this regard, substantial progress has already been made in the design of the project and in obtaining regulatory approvals in both countries.

Foothills Pipe Lines Ltd. (''Foothills'') is a privately held major Canadian gas transportation company owned equally by NOVA Corporation of Alberta and Westcoast Energy Inc.

CONTACT: R.L. Pierce, 403-290-7800, or C.K. Jespersen, 403-294-4430, both of Foothills Pipe Lines Ltd.

DENVER (JUNE 25) PR NEWSWIRE - MinVen Gold Corp. (AMEX: MVG) today announced that its Blackdome Mining subsidiary has entered into an agreement to acquire a group of four claims known as the Elizabeth

property located approximately 19 miles south of its Blackdome Mine in south-central British Columbia.

Blackdome will earn a 100 percent interest in the property by making payments totaling Cdn$130,000 before Mar. 31, 1993 and carrying out Cdn$1.5 million of exploration work by Dec. 31, 1993. A net smelter return royalty of 4 percent is payable to the vendors, which reduces to percent after Cdn$2 million has been paid.

"We are very excited about the potential of the Elizabeth claims," said James A. Anderson, MinVen president and chief executive officer. "We have made a 1990 work commitment of Cdn$100,000 and will begin trenching, surface mapping and sampling as soon as access road repairs have been completed on the new property."

Anderson noted that high grade gold mineralization occurs in a steeply dipping quartz vein that is about three feet wide. He said that an outcrop of the vein 3.6 feet wide by 16.6 feet long, sampled by Blackdome in April, averaged 2.75 ounces of gold per ton.

MinVen Gold is a publicly held, Denver-based mining company with interests in five operating mines in the U.S. and Canada. Its shares are traded on the American, Toronto and Vancouver Stock Exchanges under the symbol MVG.

#90176p9454 06/25/1990 ~PR Newswire

HUNTINGTON, NY (JUNE 25) PR NEWSWIRE - In a joint statement released today Aviation Education Systems, Inc. (AES) has agreed to purchase Barton ATC, Inc.

AES will purchase Barton for an undisclosed amount. AES, located in Huntington, Long Island, N.Y. is active in the recruitment, screening and subsequent training of young men and women for careers in aviation, with an emphasis in the air traffic control arena. Barton, headquartered in Murfreesboro, Tenn. is primarily in the business of owning and managing privatized air traffic control towers as well as U.S. weather stations. Further, it also participates with universities and colleges in the training of air traffic controllers. Industry analysts view the move as both sensible and aggressive, and project that it provides Aviation Education Systems, Inc., with a compatible diversified base.

Studies have shown that the privatized operation of selected local air traffic control towers, when freed of the plethora of federal government personnel regulations, is significantly less costly than those operated by the F.A.A. In some cases, less than half.

Since all operating standards are precisely the same, and all safety requirements meet or exceed the F.A.A. regulations, privatization makes fiscal sense. Greater use of privatized airport control towers is an immediate and logical way to affect major savings in the federal budget.

Various studies done in past years indicate approximately 400 local air traffic control towers could be turned over to private industry. With savings of over $100,000 per year for each tower. This would offer a potential savings to taxpayers of over $40,000,000 per year.

F.A.A. trial programs initiated in 1982 and 1983 have confirmed that the conversion to a privatized operation does not affect performance or safety and results in a very large unit cost savings. Most of those studies have suggested a phase program, whereby the F.A.A. would release 20 to 40 towers each year to private industry. This would also significantly help the F.A.A. with its problem of continuing shortages of air traffic controllers. Private companies can hire retired F.A.A. controllers and retired military controllers.

AES, through its Aviation Training Institute subsidiary, operates a controller training school on Long Island. It will be possible, therefore in the near future for AES to be capable of hiring, training and now employing some of its own graduates. The training program of AES is associated with the State University of New York, Stony Brook campus. The State University of New York is completely accredited and is part of the F.A.A. originated Aviation Science Degree Program now being offered through select universities and colleges.

Both spokesmen noted that Lynch will remain active in Barton ATC. The agreement in principle for the acquisition by AES, Inc, is subject to the final approval of the boards of both AES and Barton ATC.

MINNEAPOLIS (JUNE 25) PR NEWSWIRE - General Mills' (NYSE: GIS) board of directors today approved a new quarterly dividend rate of 64 cents per share, an increase of 9 cents, payable Aug. 1 to shareholders of record July 10. The new annualized dividend rate of $2.56 represents an increase of 16 percent over total dividends of $2.20 paid during the recently concluded 1990 fiscal year. The new rate represents the 26th consecutive year of increase in dividends per share.

Chairman Bruce Atwater said the increase approved today reflects the company's strong financial position, strong earnings progress in fiscal 1990, and excellent future prospects. Atwater said the company's long-term goal is to increase dividends in line with earnings per share growth by maintaining a dividend payout of up to 50 percent of earnings from continuing operations.

General Mills and its predecessor companies have paid uninterrupted dividends without reduction in each year since the turn of the century. The last increase was for the payment of Aug. 1, 1989.

PHILADELPHIA (JUNE 25) PR NEWSWIRE - The executive committee of the board of directors of National Media Corp. (NASDAQ: NMCO), a national marketing organization, today approved "open market purchases of National Media common shares in accordance with applicable S.E.C. Regulations and as price and market conditions permit," John J. Turchi Jr., chairman and chief executive officer, reported today.

In addition, Turchi said, "Management of National Media has requested the SEC and NASDAQ formally open an investigation into the malicious circulation of material false statements concerning the company's current condition. The company believes these statements are circulated

particularly by two call-in telephone investment advisory services. These actions are designed to drive down the company's shares to fill short positions to the detriment of our shareholders."

Turchi added, "With 20 million in cash, very little debt, revenues for the March 31, 1990, year up 99.5 percent to a record $130,766,100 and earnings up 371 percent to $11,539,600 or $1.01 per share from $.23, National Media is in outstanding condition. On behalf of our shareholders, we intend to diligently pursue and prosecute those who create and disseminate untrue stories about our company, and robbing our shareholders of the potential growth that is rightfully theirs."

#90176p9481 06/25/1990 ~PR Newswire

HOUSTON (JUNE 25) PR NEWSWIRE - Regal International Inc. (NYSE: RGL) Chairman Ruben V. Aragon today announced that Zurich Corp., through an affiliated company, had purchased the Regal indebtedness to First City Bank of Midland, Texas. This debt, in the approximate amount of $2.14 million, was in default and was purchased by Zurich for approximately $1.85 million. As previously announced, Zurich has agreed to pass this discount on to Regal resulting in earnings to be recognized of approximately $300,000. In addition, Zurich will either restructure this indebtedness to a three year term or convert the debt to equity. Aragon added that this funding significantly reduces the company's short term debt and eliminates a potential serious bank default. Regal's working capital, which was a negative $939,000 at March 31, 1990, would now be a positive $1,205,000.

Pursuant to its agreement with Zurich, Regal has issued to Zurich 12 million options to purchase Regal common stock at 25 cents per share. These options will have a one year term and, if exercised, will more than double the company's equity from $2,279,000 at March 31, 1990 to $5,279,000 upon exercise of the options. Zurich has informed management that it intends to exercise these options.

Aragon stated that the demand for the company's rubber products is significantly improved over prior periods and that the Zurich financing, when completed, will provide the company with essential working capital and the funds necessary to complete the negotiated settlement with the Environmental Protection Agency in the environmental litigation now pending in Texas.

ATLANTA (JUNE 25) PR NEWSWIRE - BellSouth Mobility has reached an agreement with Ford Motor Company to offer cellular service to customers in many metropolitan areas throughout the Southeast.

Lincoln-Mercury dealers located in 26 communities served by BellSouth Mobility will offer a cellular telephone as a factory-installed option on the Lincoln Town Car, Lincoln Continental and Lincoln Mark VII automobiles.

"Ford is reacting in a positive way to the increased demand for cellular telephones by people on the move. Providing mobile telephone equipment in their cars from the factory demonstrates Ford's commitment to our industry," said Joanne O'Donnell, general manager - External Affairs for BellSouth Mobility.

"The agreement will make BellSouth Mobility part of the Ford Cellular System nationwide cellular network. The Ford Cellular System is an outgrowth of our commitment to provide a 'total package,' from installation of the phone through start-up of the service," said Don Duncan, audio planning, marketing and sales manager for Ford Electronics Division.

High quality cellular telephone equipment will be installed at the factory when the car is built. Lincoln-Mercury dealers will assist customers with the warranty and service for the factory-installed equipment. Billing for cellular telephone service will be handled by BellSouth Mobility.

BellSouth Mobility is the largest provider of cellular telephone service in the southeastern United States. BellSouth Mobility currently services more than 245,000 cellular telephone customers in Alabama, Florida, Georgia, Kentucky, Louisiana, South Carolina and Tennessee.

FORT LAUDERDALE, FL (JUNE 25) PR NEWSWIRE - Telematics International, Inc. (NASDAQ: TMAX), announced today that all six proposals recommended by the company's board of directors were approved by shareholders at their 1990 annual meeting held at the company's headquarters in Fort Lauderdale, Fla.

With 11,551,206 shares voting (or 68.6 percent of the total of 16,822,265 shares issued and outstanding), the company's shareholders:

1. Elected Papken Der Torossian as a Class II Director. 2. Approved amendments to the company's 1988 Stock Option Plan to increase the total number of share of common stock which may be issued pursuant to such plan by 200,000 shares and to eliminate the one-year eligibility requirement under such plan. 3. Approved an amendment to the company's Employee Stock Purchase Plan to increase the total number of shares of common stock which may by issued pursuant to such plan by 200,000 shares. 4. Ratified the adoption of the company's Executive Officer Stock Incentive Plan and authorized for issuance thereunder a total of 220,000 shares of common stock. 5. Ratified the adoption of the company's Board of Directors Stock Option Plan consisting of 70,000 shares of common stock for those members of the company's board of directors who are not officers or employees of the company. 6. Ratified the appointment of Ernst & Young, independent certified public accountants, as the company's auditors for the 1990 fiscal year. After disposition of these formal business matters, William A. Hightower, the company's president and chief executive officer, reported on the status of the company's operations. Afterwards, John P. Pitt, the company's chairman of the board, and Hightower responded to questions from shareholders with respect to a variety of matters.

Founded in 1982, Telematics designs, manufactures and markets computer

systems and software products designed specifically for voice and data communications applications and networks. The company's products include a full range of programmable packet switching systems, low-end protocol converters and switches, T1 multiplexers, and frame relay switches. Telematics has approximately 400 employees worldwide. Headquartered in Fort Lauderdale, Fla., Telematics also has facilities in Calabasas and San Mateo, Calif.; Herndon, Va.; Basingstoke, England; Paris; Frankfurt, Germany and Tokyo.

WALL, NJ (JUNE 25) PRNEWSWIRE - New Jersey Resources Corporation (NYSE: NJR) officials today shared their enthusiasm about the company's long-term financial prospects with members of the North Jersey Chapter of the American Society of Utility Investors. NJR hosted the chapter's quarterly meeting at the corporate headquarters of its utility subsidiary, New Jersey Natural Gas Company, here.

The American Society of Utility Investors is a non-profit national association of about 10,000 individual utility investors who hold utility stocks in New Jersey and elsewhere. The association was founded in the mid-1970s by Dr. James Spang, a former educator, who also attended the conference.

Nearly 50 members of the northern New Jersey chapter attended the conference. They were given an in-depth financial look at NJR, its utility and other subsidiaries, Commercial Realty & Resources Corp. (CR&R) and NJR Energy Corporation (NJR Energy). CR&R develops high- quality commercial office and flex space and NJR Energy engages in natural gas and oil exploration and development.

"We have experienced continued growth in each of our business segments and are well-positioned to meet the challenges of the future," said James T. Dolan Jr., chairman and chief executive officer of New Jersey Resources Corporation. "Our ultimate corporate objective is to enhance the value of our stockholders' investment, and we have continued to work successfully toward that goal in 1990, recently increasing our annual dividend rate for the 13th straight year.

"About 43 percent of the corporation's nearly 16,000 stockholders are also New Jersey Natural Gas customers," Dolan said. "The value of New Jersey Resources stock is recognized by local investors, who obviously consider the stock to be a wise investment."

FAIRFAX, VA. (JUNE 25) PR NEWSWIRE - Robert O. Swanson, vice president, Mobil Oil Corporation, and executive vice president, international, marketing and refining division, has been elected to the Mobile Oil Corporation board and to its executive committee. The moves become effective July 1, according to Allen E. Murray, chairman and chief executive officer of the parent Mobil Corporation (NYSE: MOB).

A graduate in chemical engineering from Rensselaer Polytechnic Institute, Swanson joined Mobil in 1958 as a process engineer in a Kansas refinery. He advanced through a variety of engineering and planning positions, including foreign assignments in the Philippines and France, and, in 1976, was named vice president, Mobil Chemical Company, and general manager of its Petrochemicals Division.

In 1980, he was appointed group vice president, planning, resources, and distribution, of Mobil's former affiliate, Container Corporation of America. He became executive vice president of Container in 1982 and a year later was elected president and chief executive officer.

Swanson assumed his current responsibilities in February 1985, and was elected a vice president of Mobil Oil in September 1985.

He is married to Cynthia J. Shevlin and has four sons.

VANCOUVER, BRITISH COLUMBIA (JUNE 25) PR NEWSWIRE - World ComNet Inc. has announced the appointment of Catherine T. Fitzgerald as vice president of Sales and Marketing.

Fitzgerald brings extensive travel industry experience to her new position. Having founded her own travel agency, she later joined Merritt Travel Management as director of Group Travel. She then was named regional marketing manager and later reservations manager for United Vacations, a division of United Airlines. Fitzgerald's most recent appointment was that of vice president of Client Services for System One.

Fitzgerald's strong background in both tour operation and automation make her ideally suited to oversee World ComNet's program of linking travel agents and tour operators via TOURINC.

Headquartered in Irvine, Calif., World ComNet Inc. is involved in the development of automation products and services for the travel industry. Its TOURINC tour distribution system allows travel agents to use their existing Computer Reservations terminals to locate and book thousands of tour options from 118 contracted tour operators. The company has distribution contracts with System One and COVIA. World ComNet Inc. is a subsidiary of WCN Investment Corp.

LOS ANGELES (JUNE 25) PR NEWSWIRE - Los Angeles based L.A. Gear, Inc. (AMEX: LA), which was rated the number-one company for shareholder rights of the 1000 major corporations listed in the United Shareholders Associations's (USA) annual "Shareholder 1000" ratings, was honored today in Los Angeles by USA Los Angeles Chapter Chair Bill Feathers.

Feathers made the announcement in an award ceremony held today in Los Angeles , where he presented L.A. Gear Executive Vice President Gil N. Schwartzberg and Chief Financial Officer Kevin Ventrudo with a plaque honoring L.A. Gear as 1990's number-one company for shareholder rights.

The award is based on the company's score in USA's "Shareholder 1000," an annual rating of 1000 major U.S. corporations ranked according to their responsiveness to shareholders.

Feathers praised L.A. Gear Corporation for its commitment to shareholder rights. "The rest of corporate America can learn a lesson from L.A. Gear's responsiveness to shareholders," he added.

Each individual company on the USA list was rated in three areas -- long and short-term economic performance for shareholders, adherence to shareholder rights, and executive compensation and incentives -- and then ranked according to their cumulative scores. Feathers said USA members have identified these areas as the most important criteria for stock purchase decisions.

Feathers noted that the Los Angeles-based footwear company earned the highest score of all 1000 companies for its commitment to shareholder rights, and its overall score was in the top 20 percent. He encouraged the company to "keep up the good work," and improve the company's overall score in next year's ratings.

With more than 64,000 members and 38 chapters nationwide, USA is a non-profit, grassroots organization founded in 1986 to protect and enhance

shareholder rights and management accountability as key elements of a competitive economy.

#90176p9525 06/25/1990 ~PR Newswire

LOS ANGELES (JUNE 25) PR NEWSIRE - Unocal (NYSE: UCL) said today that test data from the first 1,500 cars crushed in its South Coast Recycled Auto Program (SCRAP) show that the pre-1971 vehicles emit more than twice as much hydrocarbon -- a major contributor to smog -- as originally forecast.

Test data compiled on the first 1,500 vehicles scrapped by Unocal show that the vehicles have on average more than 60 times as much hydrocarbon emissions as 1990 models. Original projections had indicated that pre-1971 vehicles would emit 30 times more hydrocarbons than new cars equipped with catalytic converters.

"The test results suggest that we are removing some of the heaviest polluting cars from Los Angeles' roads," said Richard J. Stegemeier, Unocal chairman, president and chief executive officer.

BAR-90 machines are used to test each car's tailpipe emissions before it is scrapped. These are the same machines approved by the California Bureau of Automotive Repair for smog checks.

Unocal tested a 1990 Ford Taurus on the BAR-90 machine and found, for example, that it emitted 14 parts per million of hydrocarbons. Unocal's SCRAP cars (all pre-1971 models) show average hydrocarbon emissions of 950 parts per million, but in reality average emissions could be substantially higher. Twenty percent of the cars tested emitted at least 2,000 parts per million, the maximum measurement provided by the BAR-90 machine. Unocal is currently testing a different machine that can measure hydrocarbon emissions up to 10,000 parts per million.

Preliminary data gathered over the first few weeks of the Unocal SCRAP project also indicate that these old cars have been driven more than originally predicted -- an average of 7,000 customer-reported miles per year, compared with about 6,000 miles used in air quality computer models.

DALLAS (JUNE 25) PR NEWSWIRE - DSC Communications Corp. (NASDAQ: DIGI) today announced that it has reached a preliminary settlement agreement, subject to court approval, with plaintiffs in a class action lawsuit. Under the settlement, the claims against the company and the individual defendants will be dismissed without any admission or presumption of liability by the defendants. The suit originally filed in 1985 arose out of the company's voluntary restatement, announced Oct. 2, 1985, of its financial statements for certain periods of 1984 and 1985.

The settlement agreement, which allows the company to avoid protracted litigation, provides for a total settlement of approximately $30 million, of which DSC will contribute approximately $9 million. The balance will be contributed by the company's insurance carrier and other defendants, including the company's former independent public accounting firm and investment banking firm. The settlement will not materially affect the company's financial position.

DSC Communications Corp. is a leading designer, developer, manufacturer and marketer of digital switching, transmission and private network system products for the worldwide telecommunications industry.

CAMP HILL, PA (JUNE 25) PR NEWSWIRE - Pennsylvania Blue Shield will open an Operations Center in Williamsport by mid-1991 employing 250 people initially, the company announced today.

Blue Shield, the state's largest health insurer, confirmed plans announced earlier this year to process Medicare Part B claims at a downtown site to be developed this summer.

The three-story facility will be located on the current city-owned site at Pine and Church streets, presently occupied by the Williamsport Parking Authority. Blue Shield will occupy 50,000 square feet of the building.

Steadily increasing business growth influenced Blue Shield's plans to expand its non-subsidiary business outside the Harrisburg area for the first time, according to company officials. The Camp Hill-based insurer employs more than 6,000 people, and last year processed more than 70 million Private Business and Medicare claims.

"A strong, productive labor pool and close proximity to our headquarters near Harrisburg makes Williamsport an ideal choice for this Operations Center," said Thomas C.Sommers, senior vice president, Human Resources

Administration of Blue Shield. "We look forward to a long, successful relationship with the community and to expand our presence there as our business continues to grow." Sommers projected a potential expansion of the Williamsport Operations Center to approximately 1,000 employees over the next five years.

Blue Shield does not plan to begin accepting applications for employment at the Williamsport facility until October. Groundbreaking for the structure is expected to be scheduled early this summer, with a planned occupancy of June 1991.

Pennsylvania Blue Shield, the nation's largest Blue Shield Plan, paid out more than $5.3 billion in health care benefits in 1989. The company serves 6 million subscribers in its Private Business programs, and 3.2 million Medicare Part B beneficiaries in Pennsylvania, New Jersey, Delaware and the District of Columbia metropolitan area.

CLEVELAND (JUNE 25) PR NEWSWIRE - The Sherwin-Williams Company (NYSE: SHW) has completed the purchase of the Krylon(R) aerosol paints and coatings business of Borden, Inc. (NYSE: BN). The acquisition includes selected assets of the aerosol paints and coatings business of Illinois Bronze Paint Company, the manufacturer of ColorWorks(R) and other aerosol paints.

Krylon's broad aerosol paint and coating line has extensive distribution at hardware/home centers, mass merchandisers, industrial distributors and craft and artist's supply stores. In addition, the acquisition also includes all of the Krylon business in the automotive aftermarket, except for Krylon car colors and van and truck exact-match aerosol touch-up products. The acquisition does not include the hobby/craft segment of Illinois Bronze.

"Due to our dedicated approach to the aerosol coatings market, the Krylon brand will receive a renewed marketing commitment along with improved sales and service support throughout its broad distribution network," states John G. Breen, chief executive officer of The Sherwin- Williams Company.

The announcement that a definitive agreement had been reached to purchase the Krylon business was made on Dec. 22, 1989.

PHILADELPHIA (JUNE 25) PR NEWSWIRE - The board of directors of International Mobile Machines Corp. (NASDAQ: IMMC) today announced the following appointments: Sherwin I. Seligsohn, founder and chairman of IMM, was appointed to the position of chairman emeritus; William J. Hilsman, president and chief executive officer, was appointed chairman of the board in addition to his duties of president and chief executive officer; Richard W. Pryor, chief operating officer, was appointed executive vice president and chief operating officer.

In taking this action, the board of directors is positioning IMM as a world leader in the emerging wireless digital access marketplace. "It is our intent to focus IMM's leadership and management into the areas that will give our shareholders the greatest return on their investment," said the board.

Seligsohn's role as chairman emeritus was established to enable him to focus his efforts on IMM's growing dominant position in intellectual property (patents) in the field of wireless digital access systems. Since IMM's inception, Seligsohn has been leading the effort to establish IMM's intellectual property as the core technology of the wireless digital access marketplace. With the decision in May of 1990, by the U.S. cellular industry to use IMM's core technology in the next generation of the U.S. cellular telephone marketplace, IMM's key position in the industry has been established. "Now we have turned it into a business and will meet the expectations of our shareholders," said Seligsohn. Seligsohn will continue to be a director of the company, and direct its worldwide strategy in implementing its intellectual property position. "I can finally devote my full time and energy to our intellectual property business. I fully support the action the board has taken," said Seligsohn.

As chairman, Hilsman will set the strategic direction of the company. He will focus his efforts: in the marketplace with IMM's current and future customer base, in the industrial arena with IMM's current and future partners, and in the shareholder and investment community. "I have been given the complete backing of the board to do whatever is necessary for IMM's total success," said Hilsman. "We have a dominant patent position in the industry, and are the only company in the world with spectrum efficient wireless digital access systems operating in the marketplace. It is time to exploit that position," he said.

Pryor's position as chief operating officer has been expanded to give him complete control in bringing IMM to profitability as quickly as possible. Pryor will direct all administrative, operational and financial functions of the company. Since his arrival on the scene one year ago, Pryor and his team have delivered four successive record quarters of revenue. "I am here for one reason, and one reason only -- to get to profitability. We are well on the way," said Pryor.

IMM is a world leader in wireless digital access technologies.

FORT WORTH, TX (JUNE 25) PR NEWSWIRE - Tandy Corp. (NYSE: TAN) today announced that its board of directors has approved the adoption of amendments to update Tandy's shareholder rights plan, which was adopted in 1986 and amended in 1988. The amendments are not being adopted in response to any specific effort to acquire control of the company and the board is not aware of any such effort.

The major amendments to the plan specify that (i) the percentage of ownership which a person must acquire before the rights will permit the holders (other than the acquiring person) to purchase additional shares of common stock at a reduced price will be 15 percent (compared with the prior level of 25 percent, which could be lowered to 10 percent under certain circumstances); (ii) certain approved transactions can be excepted by the board of directors from the plan's operation; (iii) the rights can be redeemed under additional circumstances, and redemption of the rights and amendment of the plan is deferred for 180 days under certain circumstances; and (iv) the rights will expire on June 22, 2000.

A company spokesman said, "The amendments to the plan are intended to maintain the ability of all Tandy shareholders to realize the long-term value of their investment in the company. The program is not aimed at preventing a takeover, but to encourage a buyer to negotiate appropriately with the board prior to attempting a takeover. In addition, the amendments should maintain the flexibility of our board of directors in responding to the negative effects of abusive share-accumulation tactics and tender offers that do not offer an adequate price to most shareholders."

The plan amendments are described in more detail in an enclosure to a letter that is being mailed to all Tandy shareholders.

Tandy, with fiscal 1989 sales and operating revenues of over $4.1 billion, is a premier manufacturer and marketer of personal computers and audio, video, telephonic and other electronic products.

SHIREMANSTOWN, PA (JUNE 25) PR NEWSWIRE - Rite Aid Corp. (NYSE, PSE: RAD) announced today it is offering a $5,000 reward for information leading to the arrest and conviction of the individual responsible for the death of Rite Aid Security Officer Henry Sanderson Folk, of Palm Springs, Fla.

Folk died of a gunshot wound to the head received while responding to an attempted drug robbery at about 3:30 p.m. on Sunday, June 24, in the Rite Aid Pharmacy in the North Dixie Plaza, 499 NE Spanish River Blvd., Boca Raton, Fla.

According to police reports, the suspect is a white male between 30 and 35 years of age, 5'9"-5'11" in height, of medium build with short brown hair, neatly trimmed with a two-inch ponytail. He was clean shaven and was last seen wearing a black jacket and blue jeans.

The suspect was last seen approaching Yamato Road, driving in a westbound direction near Federal Highway W. in a white station wagon. The station wagon is thought to be a 1985-89 model, has woodgrain side panels, Florida license plates and tinted windows.

Folk had been a member of the Rite Aid security officer corp since 1988. He was a retired 17-year New Jersey police officer.

People with information concerning this incident are urged to call the Boca Raton Police Department Tip Line at 407-338-1333.

NEW YORK (JUNE 25) PR NEWSWIRE - PolyGram Records will release a double album of the live recording of the Knebworth 1990 concert. Artists so far scheduled to appear at what is being described as "the greatest ever line-up of all British artists" are: Eric Clapton, Genesis, featuring Phil Collins, Tony Banks and Mike Rutherford, Pink Floyd, Elton John, Paul McCartney, Mark Knopfler, Cliff Richard and The Shadows, Status Quo and Tears for Fears.

Polydor (U.K.) Ltd. recently announced the conclusion of a worldwide deal with Silver Clef Enterprises Limited on behalf of Nordoff Robbins Music Therapy for the 'live' recording of the Knebworth 1990 concert, which the company will release August 7 -- only 5 weeks after the event. The album entitled Knebworth will be digitally recorded and mixed by Rolling Stone's producer Chris Kimsey.

Polydor U.K.'s managing director David Munns commented, "We are all very excited about this album. It's not often that you get a dozen of the

world's biggest selling artists all featured on one album."

MTV has acquired the exclusive rights for America to the TV special of Knebworth 1990, which will air on July 14. The concert, which has completely sold out, takes place on June 30.

The American branch of the charity, Nordoff Robbins Music Therapy Foundation, Inc., has been fundraising in the states for several years and is proud to announce the opening in September of their first clinic which is allied to New York University. The charity's President Ian Ralfini and Chairman Ahmet Ertegun will be hosting the third annual Silver Clef dinner in New York on Oct. 31.

#90176p9555 06/25/1990 ~PR Newswire

WASHINGTON (JUNE 25) PR NEWSWIRE - MCI Communications Corporation (NASDAQ-NMS: MCIC) today announced it is upgrading its Common Channel Signalling System 7 (CCSS-7) to more than triple the message handling capability and to support more applications such as Integrated Services Digital Network (ISDN) over the MCI network.

Fully installed in MCI's nationwide network since April, 1989, CCSS-7 has reduced call set-up times and improved network efficiencies, according to MCI. The network protocol is the foundation for ISDN and other advanced technologies.

"Now MCI is upgrading the hardware on all signalling transfer point pairs " said Richard T. Liebhaber, executive vice president and group executive. "Our capability to handle calls will increase from 9,000 to 21,000 messages per second. This will enable MCI to handle a larger volume of calls efficiently and economically as demand for our products and services escalate."

The extensive hardware enhancements to CCSS-7 began earlier this year and are scheduled to be completed by the first quarter of 1991.

"We'll also be increasing message handling capacity through the installation of new software in our system in the near future," Liebhaber said. "We expect that the two software releases -- one in early 1991 and the other later in the year -- will increase our capacity to more than 30,000 messages per second."

The new MCI upgrades to CCSS-7 will provide the platform for enhanced interconnections with the Bell Operating Companies and private networks as

new layers of intelligence will be shared through the CCSS-7 interface. For MCI, it will yield further improvements in end-to-end call set-up time reduce local telephone company interconnect costs, and upgrade the quality of service provided customers. It will also provide the basis for future ISDN services in 1991 and beyond.

The new developments will further allow MCI to convert its international gateways to CCSS-7 and shift its network control system to CCSS-7 from the current X.25 protocol.

"The technology advances introduced in the next 18 months will broaden the array of capabilities provided by MCI's international, 800, 900, and Vnet products," Liebhaber said.

He added that testing of the system with the Bell Operating Companies is underway. Completion of CCSS-7 trials with Pacific Bell is expected within the next few weeks and a trial with Nynex is scheduled to begin in the fall.

Headquartered in Washington, MCI is the world's second largest long distance provider, with 1989 revenue of $6.5 billion. The company offers a full range of domestic and international voice, data, telex and electronic messaging services to business, residential and government customers. MCI's long distance services enable customers to call throughout the United States and dial direct to more than 170 foreign countries.

CHICAGO (JUNE 25) PR NEWSWIRE - Ford Motor Company (NYSE: F) will kick off its second annual "Partners In Success" program during the 50th Annual Convention of the National Newspaper Publishers Association (NNPA), June 27-30 at the Chicago Hilton and Towers.

Developed in 1989 in conjunction with Don Coleman & Associates, a Detroit-based advertising firm, the "Partners" program is designed to strengthen and promote Ford's commitment to the black consumer, and to black economic development. By conducting on-site seminars, displays and new vehicle test drives during major black consumer market national conventions, Ford reaches a professional audience that has a specific interest in its minority programs, products and services.

On Thursday, June 28, at 10:30 a.m., the "Partners Advisory Panel" (representatives from selected Ford departments with a minority focus plus two black Ford dealers) will present a "Strategic Look at the Impact of the Automotive Industry on the Black Community." The panel also will provide an overview of Ford's minority programs, including Corporate Urban Programs, Minority Supplier Development, and Minority Dealer Training.

Dr. Ronald E. Goldsberry, executive director - Sales and Services Strategies for Ford's North American Sales Operations, will serve as the seminar's keynote speaker. Dr. Goldsberry, a seven-year Ford senior executive, was named one of the nation's top 25 black executives by Black Enterprise Magazine in 1988, and was honored in 1985 with the Industry Week Magazine Excellence In Management Award. He is a member of the board of trustees of the Rockefeller Foundation.

Participating Ford components are: Ford Division, Lincoln-Mercury Division, Ford Credit, Ford Parts and Service Division, Ford Electronics Division, and North American Automotive Operations.

CONTACT: Terry Reed, 313-353-5855, or Valerie Taylor, 517-487-2697, both of Coleman & Associates; or Bill Carroll of Ford Motor Company, 313-322-1300

#90176p9568 06/25/1990 ~PR Newswire

WASHINGTON (JUNE 25) PR NEWSWIRE - John F. Kennedy was president when the federal government's current telephone system was installed. But when AT&T finishes replacing it with a new state-of-the-art system today, don't expect an outpouring of nostalgia.

Known as FTS2000 (FTS stands for federal telecommunications system), the new network has about 1.3 million users working for 92 government agencies in some 4,200 locations scattered among the 50 states plus Puerto Rico,

Guam, and the Virgin Islands. AT&T has a 60 percent share of FTS2000, or about 785,000 users with 57 agencies in more than 3,000 locations. US Sprint has the balance.

The overall FTS2000 contract was procured by the General Services Administration (GSA) on behalf of all government agencies. AT&T's portion is valued at $2.7 billion to $15 billion over 10 years, depending on the level of usage. GSA estimates that the combination of new technology and today's lower service prices will save taxpayers $200 million a year over the old system.

From a special facility built for the purpose in nearby Vienna, Va., Cann's employees install and monitor AT&T's part of FTS2000 -- a portion that, by itself, is about the same size as AT&T's entire domestic long distance network in 1963, when the old system was put into service.

The changeover to FTS2000 took place in 17 phases starting last October. GSA and officials at the user agencies have expressed great satisfaction with the transition, which is being completed more than 17 months before the contract-required date.

At each transition phase, the old network was kept intact until the new system was ready, so service interruptions weren't a concern during outovers. More than 95 percent of users' phone numbers remain the same. Even Hurricane Hugo and the earthquake near San Francisco last year failed to halt the transition or knock out service.

But while the changeover was made as seamless as possible to users, there's a big difference between the service they had before and what they've got now.

The new system is a huge leap forward is technology. AT&T's FTS2000 traffic is carried on a free-standing private network of digital switching machines tied together by more than 300,000 miles of company-made fiber optic cable.

All agencies on FTS2000 receive Switched Voice Service. Even this basic phone service may be augmented, if an agency desires, with features such as recorded information messages, toll-free 800 service, and code assignments that restrict long distance calling to authorized personnel.

MCLEAN, VA (JUNE 25) PR NEWSWIRE - NVR L.P. (AMEX: NVR) today announced

that it has agreed with its lending banks to extend its existing working capital credit and mortgage warehousing facilities, and that a separate mortgage warehousing facility has also recently been concluded.

The renewed facilities provide $249 million of working capital financing for the Partnership's homebuilding operations and $35 million of mortgage warehouse financing for its financial services business and expire on July 16, 1990. The additional mortgage warehousing facility provides $50 million for that purpose through Aug. 10, 1990. The partnership said it anticipates that its lending banks will renew these credit facilities at approximately the indicated levels upon their expiration.

#90176p9571 06/25/1990 ~PR Newswire

HOUSTON (JUNE 25) PR NEWSWIRE - Transwestern Pipeline Co. today announced that it has filed a rate case settlement with the Federal Energy Regulatory Commission (FERC) and has signed a related customer agreement that will significantly enhance the company's role in the California marketplace.

"The settlement completes Transwestern's conversion to a transportation pipeline, and negotiations with Southern California Gas Company (SoCalGas) have resulted in an extension of the service agreement through 2005," said Terence H. Thorn, president of Transwestern.

The rate case settlement incorporates a firm transportation capacity brokering program, along with zone rates and other tariff changes to facilitate Transwestern's mission as a transporter of natural gas. According to Thorn, these are the next logical steps in the company's transition from a traditional merchant to its new role as a transportation pipeline.

"Capacity brokering will allow more efficient allocation of existing firm transport capacity to those end user, local distribution company, marketer or supply customers who desire the security of service that firm transportation provides," he said.

"It's because Transwestern is comfortable in its role as a transporter and SoCalGas in its role as shipper that we have been able to extend our service agreement through at least 2005," Thorn added. "The extension solidifies the relationship between the two companies."

Transwestern Pipeline Co., a wholly owned subsidiary of Enron Corp., is a 4,500-mile natural gas transmission system extending from west Texas and

Southern Oklahoma to the California border.

Enron Corp., America's leading natural gas company with approximately $10 billion in revenues and $9 billion in assets, operates the nation's largest natural gas transmission system; markets natural gas, gas liquids, crude oil and refined products nationally and worldwide; owns 84 percent of Enron Oil & Gas Co., one of the country's largest independent (non-integrated) natural gas exploration and production companies; and also is one of the largest independent producers of electricity in the United States, with extensive experience in combined heat and power installations.

#90176p9574 06/25/1990 ~PR Newswire

DENVER (JUNE 25) PR NEWSWIRE - Scientific Software-Intercomp Inc. (SSI) (NASDAQ: SSFT) today announced the introduction of The Petroleum WorkBench a suite of Reservoir Management software for the working engineers and geologists in the oil and gas industry. The Petroleum WorkBench brings high technology which has previously been available only on mainframes and super-computers to the end users desktop. Even more significant, the new software from SSI has been designed to be so easy to use that engineers and geologists with nominal PC experience will be able to perform a detailed expert analysis with minimal learning.

The WorkBench covers the broadest range of technology available in a

single Reservoir Management product. Applications include single and multi-well log analysis, including open hole and cased hole analysis, well test interpretation, reservoir description including cross sections and mapping, reservoir simulation including a graphical input and ouput processor, and a suite of production engineering data base display tools including production curve plotting and analysis. The system uses the latest in user interface technology based on the OSF (Open Software Foundation) Motif window system and X windows. These tools allow the user to use a simple point and select mechanism to do even the most complex operations.

According to E.A. Breitenbach, chairman and chief executive officer of SSI "The Petroleum WorkBench will change the way in which the oil and gas industry uses technology. Where experts were once needed to use the latest in mathematical models and computer tools it will now be possible for the working engineer and geologist to get expert results without becoming a computer expert. We believe that engineers and geologists will be able to substantially increase their productivity by using the WorkBench product."

The potential users of the WorkBench number in the tens of thousands and the market size today is in the $300 million range according to Breitenbach. He added, "For the last several years SSI has directed its research efforts toward a repositioning of the company away from expert mainframe users and toward bringing high technology to the desktop in an easy to use integrated package. This is the first product in that redirection and the strategy will continue to be implemented with more products of this type in the future."

The WorkBench technology was derived from the software technology that SSI has developed and marketed for use on large computers for over 20 years. The technology is proven and accepted throughout the oil and gas industry, but has never been available in this form or in the price range that the WorkBench will be marketed.

According to R.C. McFarlane, president and chief operating officer of SSI, "The WorkBench has been priced so that it is economical for every technical person who can use it. The single copy price of the WorkBench is $30,000. In volume the WorkBench software sells for under $11,000 per user. Previously, to purchase all of the technology we put into the WorkBench for a mainframe would cost more than $200,000."

Customer testing of the new software is planned to begin next month with users in Denver. SSI plans to continue the testing phase for several months to incorporate user feedback and refine the product as needed. Deliveries to customers are expected to begin in the third quarter.

The Petroleum WorkBench either uses a Personal Computer with a 386 or 486

micro-processor or one of the new IBM RISC System 6000 workstations. An important element in making this technology possible was the increase in computing power available today in a desktop machine.

SSI has been a leading provider of high technology software and consulting services to the oil and gas industry for more than 20 years. SSI has offices in Denver, Houston, London, Calgary and Bakersfield.

MIAMI (JUNE 25) PR NEWSWIRE - Florida Power & Light Company (FPL) today announced the acceptance by Martin County and St. Lucie counties, Florida, of an offer for the sale on behalf of the utility of $86,135,000 of 30-year tax-exempt revenue bonds maturing on July 1, 2020 (Series 1990 Bonds).

The Series 1990 Bonds consist of $76,300,000 of Martin County Pollution Control Revenue Refunding Bonds, Series 1990, bearing interest at 7.30 percent per annum; and $9,835,000 of St. Lucie County Solid Waste Disposal Revenue Bonds, Series 1990, bearing interest at 7.50 percent per annum.

The Series 1990 Martin Bonds initially will be offered to the public at 99.397 percent of par, and the Series 1990 St. Lucie Bonds initially will be offered to the public at 99.60 percent of par.

The cost to FPL as the party backing the Series 1990 Bonds, after underwriting commissions, is 7.437 percent on the Series 1990 Martin Bonds and 7.622 percent on the Series 1990 St. Lucie Bonds. Payment of the principal of and interest on the Series 1990 Bonds of each issue will be insured by the Municipal Bond Investors Assurance Corporation.

The proceeds of the Series 1990 Martin Bonds, together with funds provided by FPL, will be used to redeem, on Oct. 1, 1990, $76,300,000 principal amount of the Martin County Pollution Control Revenue Bonds, Series 1980. The 1980 bonds were issued to finance a portion of the cost of the acquisition, construction and installation of certain pollution control facilities located at FPL's Martin power plant. The proceeds of the Series 1990 St. Lucie Bonds will be used to finance a portion of the cost of the acquisition, construction and installation of certain solid waste disposal facilities located at FPL's St. Lucie power plant.

FPL is the principal subsidiary of FPL Group, Inc. (NYSE: FPL). This communication shall not constitute an offer to sell or the solicitation of an offer to buy, nor shall there be any sale of these securities in any jurisdiction in which such offer, solicitation or sale would be unlawful

prior to registration or qualification under the securities laws of any such jurisdiction.

An official statement relating to these securities can be obtained from Goldman, Sachs & Co., and Morgan Stanley & Co. Incorporated.

RICHARDSON, TX (JUNE 25) PR NEWSWIRE - CONVEX Computer Corp. (NYSE: CNX) today announced that it has completed a public offering of two million shares of common stock at $18 per share, all of which were sold by the

company. In addition, the underwriters exercised an option to purchase 300,000 additional shares to cover over-allotments. The proceeds of the offering will be used to strengthen the company's financial position for the purpose of facilitating future growth and providing the company with additional flexibility to take advantage of business opportunities that may arise.

Of the shares sold, 1,200,000 were offered in the United States by an underwriting group managed by Goldman, Sachs & Co. and Robertson, Stephens & Co., and 800,000 shares were offered outside of the United States by an international syndicate managed by Goldman, Sachs International Ltd. and Credit Suisse First Boston Ltd. Copies of the final prospectus can be obtained from the office of Goldman, Sachs & Co. at 85 Broad Street, New York, NY 10004, or Robertson, Stephens & Company at One Embarcadero Center San Francisco, CA 94111.

CONVEX Computer Corp., a leading supplier of supercomputers worldwide, was founded in 1982 to design, manufacture, market and service high-performance systems. The company markets its products primarily to scientific, engineering and technical users throughout the world for a wide variety of applications in such areas as geophysical research, computational chemistry, computer-aided engineering, image processing, aerospace simulations and molecular biology. CONVEX has sold more than 650 systems in 33 countries to 400 customers worldwide. The systems are sold and serviced through direct sales and an extensive distribution network.

ATLANTA (JUNE 25) PR NEWSWIRE - Subsidiaries of The Southern Company (NYSE: SO) have reached an agreement in principle with Gulf States Utilities Co. (NYSE: GSU) to settle a four-year dispute over major power sales contracts between the utility systems.

The settlement -- which is subject to several contingencies, including approval by the Federal Energy Regulatory Commission (FERC) and the Securities and Exchange Commission -- will terminate the contracts and end litigation between the parties.

Terms of the proposed settlement call for Gulf States to provide the Southern subsidiaries with a financial package -- including cash, common stock, and deferred payments -- that has a net present value of approximately $300 million, before taxes. Given the contingencies involved, it's not possible at this time to determine the effect on The Southern Company's net income.

As collateral for all future payments, Gulf States will pledge the Lewis Creek Generating Plant -- a 520-megawatt gas-fired facility near the city of Willis in eastern Texas. Gulf States would also provide Southern with transmission access to the plant at a FERC-approved rate.

In 1982, Southern Company subsidiaries agreed to provide Gulf States with electricity from specific coal-fired generating units. Deliveries were scheduled to begin with 500,000 kilowatts of capacity in June 1984, rising to 600,000 kilowatts in 1987 and 700,000 kilowatts annually from 1988 through May 1992. In addition, the contracts called for Southern to provide various amounts of interruptible power over this period. Total value of the contracts was estimated at approximately $1 billion.

In 1985, Gulf States asked the Southern electric system to consider eliminating or suspending sales because the energy needs of its customers had fallen below forecasted levels. In late 1986, Gulf States discontinued most of the payments owed under the contracts. The Southern electric system -- with FERC approval -- suspended all transactions called for by the contracts in July 1988.

The dispute has been the subject of legal action before the FERC, the U.S. Court of Appeals for the District of Columbia Circuit, and the U.S. Supreme Court. A separate suit is still pending in the U.S. District Court for the Eastern District of Texas.

The Southern Company is the parent firm of five electric utilities: Alabama Power, Georgia Power, Gulf Power, Mississippi Power and Savannah Electric. (At the time the contracts with Gulf States were signed, Savannah Electric was not a member of the Southern electric system.) The

Southern Company's common stock is one of the 20 most widely held corporate stocks in America.

HOUSTON (JUNE 25) PR NEWSWIRE - Transco Exploration Partners Ltd. (NYSE: EXP) (TXP) today announced two successful offsets to the discovery well, the Exxon No. 1 Sweet Lake Land and Oil Co. The wells, Exxon No. 2 and No. 3 Sweet Lake Land and Oil Co., in the Miogyp. sands at Chalkley Field in Cameron Parish, La., were drilled by Exxon Co. USA as operator.

The Exxon No. 2 well, located 3,000 feet west of the discovery well, is currently at a depth of 15,870 feet. Initial interpretation of the logs and other data indicates approximately 300 feet of net gas sand below 14,450 feet.

The Exxon No. 3 well is located 2,400 feet east southeast of the discovery well and has been drilled to 16,100 feet. Initial interpretation of logs and sidewall cores indicate approximately 246 feet of net gas sand below 14,000 feet. The Exxon No. 3 is currently being completed and is expected to be on production in August.

The discovery well, the Exxon No. 1 Sweet Lake, announced June 21, 1989, encountered approximately 500 feet of gas-bearing sands in the Oligocene Miogyp. sand formation. The well is approximately 15 miles southeast of Lake Charles, La., in section 11, T12S-R7W.

TXP has a 30.625-percent working interest in both the Exxon No. 2 and No. 3 Sweet Lake Land and Oil Co. wells. The five percent overriding royalty interest TXP holds in the discovery well will convert to a 35 percent working interest upon well payout. Exxon owns the remaining interests in

the wells. Construction of central production facilities, which are designed to handle 225 million cubic feet per day, are expected to be completed by mid-July.

A planned Exxon No. 4 Sweet Lake Land and Oil Co. well is expected to begin drilling by September 1990. This well will be approximately 3,500 feet south of the discovery well and is expected to be drilled to approximately 18,000 feet. TXP will have an 8.75 percent working interest in this well.

George S. Slocum, president and chief executive officer of Transco Energy Co., said, "When TXP and its independent financial and technical advisors are able to establish the ultimate reserve potential from the Chalkley Field, it will proceed with its plans to sell its interest in the field."

Slocum added, however, that he was unable to predict at this time when such a determination could be made or when the liquidation of TXP would be completed. He said that when such information becomes available, TXP will advise its unitholders.

TXP is a publicly traded partnership listed on the New York Stock Exchange. Transco Energy Co. is the special general partner and owns a 74 percent interest in TXP.

HOUSTON (JUNE 25) PR NEWSWIRE - Garnet Resources Corporation (NASDAQ: GARN) today announced that the Toroyaco No. 2 test well, drilled in the Putumayo area of Colombia, has reached total depth of 9,141 feet, logging has been completed and production casing has been set to 9,141 feet. Although initial examination of the logs indicated probably favorable results, Garnet management stressed that no definitive conclusions could be drawn prior to the completion of testing.

Testing is expected to be carried out on the Toroyaco No. 2 well within the next ten days on both the Villeta "U" and "T" sands that are productive in the discovery well.

Garnet said the Toroyaco No. 2 test well was drilled as a confirmation well to its Toroyaco No. 1 oil discovery made last year and is located approximately 1.2 miles southwest of the original discovery.

Garnet also announced the drilling rig currently on the Toroyaco No. 2 would be moved to the Linda No. 2 location which will be a confirmation test to the Linda No. 1 discovery located about 2.5 miles from the Toroyaco discovery. Additionally, crews are now building a location for

the Mary No. 1, a rank wildcat located approximately 4.5 miles northeast of the Linda discovery. Drilling on both of these new test wells is expected to be commenced before Aug. 1, 1990.

Garnet's exploration and production activities in Columbia are being carried out by Argosy Energy International, Garnet's wholly owned subsidiary, in association with Ecopetrol, the Colombian National Oil Company.

MINNEAPOLIS (JUNE 25) PR NEWSWIRE - FSI International Inc. (NASDAQ: FSII) today reported results for the fiscal 1990 third quarter and nine months ended May 26, 1990.

For the third quarter, sales were $14.1 million, compared with $15.3 million in the year-earlier period. The company had previously announced an expected loss for the quarter. The actual loss was $643,000, or $.16 per share, compared with net income of $811,000, or $.20 per share, last year.

For the first nine months of 1990, sales totaled $40.9 million, compared with $43.1 million, last year. The company had a loss of $612,000, or $.15 per share, year-to-date in 1990, versus net income of $2.0 million, or $.57 per share, in 1989.

Richard Jackson, FSI president and chief executive officer, stated, "We are disappointed with our results for the 1990 third quarter. Lower orders coupled with some customer-requested delays in shipment dates, contributed to the lower sales in the third quarter. Margins declined due to a change in product mix and additional termination costs for the previously announced discontinuance of the Convac photoresist product line." Jackson said that during 1990, FSI has incurred approximately $550,000, or $.14 per share, in after-tax, nonrecurring charges related to relocation of its southern California division and termination of the Convac relationship.

"We are continuing our strong efforts in sales and marketing to increase incoming orders," continued Jackson. "While essential new product development funding continues, we are taking other steps to improve future performance, such as consolidating positions and reducing other operating expenses. We are encouraged by the industry outlook for 1991 and 1992, with sales volume for equipment companies projected to rebound approximately 20 percent per year."

FSI International Inc., is a leader in producing automated surface conditioning equipment for processing silicon wafers. The company develops, manufactures, markets and services centrifugal spray processing systems, and chemical management and delivery systems for use in the fabrication of advanced semiconductor integrated circuits. FSI's customers include semiconductor manufacturers located throughout North America, Europe, Japan and the Far East.

NEW YORK (JUNE 25) PR NEWSWIRE - ISS International Service System, Inc., the nation's largest commercial cleaning contractor, and the Service Employees International Union, AFL-CIO, today announced an agreement which will put an end to bitter labor strife at the Century City complex in Los Angeles.

Henrik Slipsager, president and CEO of ISS, state that the agreement to recognize SEIU Local 399 as the collective bargaining agent was in the best interest of ISS's customers, stockholders and employees.

John J. Sweeney, international president of the SEIU, said that the agreement with ISS enhances considerably the union's position in Los Angeles and should work to the benefit of all union contractors in the area.

Slipsager noted that ISS is a party to more than 150 collective bargaining agreements throughout the country and enjoys a good working relationship with the local unions involved. "I see no reason why our agreement in Los Angeles should not prove mutually advantageous," he said.

The settlement was reached after a meeting between Slipsager, Sweeney, Jim Zellers, the president of SEIU Local 399, and Gus Bevona, chairman of the SEIU building service division and president of SEIU Local 32B, 32J, which represents 74,000 janitors in New York City. A tentative agreement was finalized on Sunday, June 24, and will be presented to the workers for ratification on Tuesday, June 26.

WALTHAM, MA (JUNE 25) PR NEWSWIRE - Cambex Corporation disclosed today it is now shipping four-megabit memory devices in both models of its STOR/9000 memory storage systems used with IBM System/3090 mainframe computers.

The company said it has installed since March more than three billion bytes of STOR/9000 central memory using the advanced memory component, and is beginning shipment this month of STOR/9000 expanded memory units using the four-megabit chips. Systems/3090 computers, IBM's largest mainframes, have both high-speed central memory and very large expanded memory to handle the massive data volumes they must process, often while operating 24 hours a day.

Cambex said it believes it is the first System/3090 memory supplier, including IBM, to deliver central storage units using the new chip. IBM has stated publicly that it uses four-megabit parts on expanded storage units with capacities in excess of one billion bytes of storage, Cambex said.

"The four-megabit chip, which is currently more expensive on a cost-per-bit basis, has four times the shortage capacity and density of the popular one megabit chips used in most computer memories and is significantly more reliable as well," according to Arnold Epstein, director of engineering at Cambex Corporation.

"The greater density of the new chip reduces power consumption and total parts count and improves overall storage system reliability considerably," Epstein stated. "In addition, the four megabit chip has a faster access time which allows Cambex and others who use it to accommodate advanced higher speed computers as they become available in the future," he said.

Using the new chip, Cambex began shipping some STOR/9000 central storage units, mostly large configurations with up to 256 megabytes of storage, to customers in March. STOR/9000 expanded storage units will begin to incorporate the new chip in models with capacities of one gigabyte (one billion bytes) or more starting this month. A STOR/9000 central storage unit used with an IBM System/3090 computer has a capacity of up to 512 million bytes of memory; a STOR/9000 expanded storage unit can have up to four billion bytes of memory.

Cambex Corporation, headquartered in Waltham, Mass., develops and manufactures central and expanded memory storage systems for IBM System/3080, System/3090 and ES/3090 mainframe computers and controller and peripheral products for IBM Series/1, RT and RS/6000 computers.

#90176p9629 06/25/1990 ~PR Newswire

GUILDERLAND, NY (JUNE 25) PR NEWSWIRE - Intermagnetics General Corporation (IGC) (NASDAQ: INMA) announced today that the company has received a contract from the U.S. Department of Energy (DOE) under the Small Business Innovation Research (SBIR) program for approximately $500,000.

The Phase II program, which follows the completion of a Phase I award in February 1990, will result in the fabrication of a superconducting magnet suitable for an extremely high frequency (280 gigahertz) quasi-optical gyrotron. This advanced form of gyrotron, a source of very high power microwaves, is essential, among other applications, for the heating of plasma in fusion reactors. The availability of a magnet for such a gyrotron is vital to the continued development of the quasi-optical gyrotron system, and the resulting magnet technology will be critical to the commercial availability of magnets for possible future applications in such areas as communications and radar.

The federal SBIR program implements the Small Business Innovation Development Act of 1982. The program aims at strengthening the role of innovative firms with less than 500 employees in areas of federally funded research and development, and is designed as a phased process that may be continued for a three-year time period. Phase I awards are used to determine the scientific feasibility of an idea and may not exceed $50,000; Phase II awards are used to perform research and development on the most promising ideas resulting from Phase I, where funds up to $500,000 are awarded to each project selected for continuation. Under Phase III, the companies are expected to pursue commercial applications of the research, either by use of non-federal funds or by non-SBIR contracts provided by the government.

IGC is a leading manufacturer of superconducting wire and superconducting magnet systems, especially those used in MRI medical diagnostic imaging systems. The company also produces cryogenic equipment, permanent magnet systems and material separators.

SAN DIEGO (JUNE 25) PR NEWSWIRE - Magma Power Co. (NASDAQ: MGMA) announced today that the Imperial Irrigation District (IID) completed on June 23 temporary repairs to the 230 KV transmission line which carries

electrical power from independent power producers in California's Imperial Valley to Southern California Edison Co. (AMEX: SCE). The transmission line was damaged by a freak wind storm on June 9 forcing IID to transmit reduced quantities of electrical power to Edison.

All four of Magma's four geothermal power plants are once again delivering power to Edison in excess of their firm capacities, according to Andrew W. Hoch, the company chairman of the board and chief operations officer. "IID did a terrific job in making temporary repairs to the 230 KV line," Hoch said.

#90176p9642 06/25/1990 ~PR Newswire

HOUSTON (JUNE 25) PR NEWSWIRE - LL&E Royalty Trust (NYSE: LRT) announced today that its monthly distribution to unit holders will be made on July 15, 1990 to unit holders of record on July 5, 1990. This distribution represents amounts payable to the trust with respect to production for the month of April 1990.

The total amount of the July distribution will be $743,008 or approximately $.03912 per unit. Due to the nature and timing of other operating and capital projects along with monthly production fluctuations, this distribution is not necessarily indicative of future monthly distributions.

As previously announced, the working interest owner has begun to escrow amounts for the Fort Worth Basin property in connection with the issue of recapture of intangible drilling and development costs under Section 1254 of the Internal Revenue Code. The trust's interest in the amount escrowed from the current month's distribution and the cumulative balance of such are $7,042 and $508,908 respectively. As stated last month, pending the possible appeal by the IRS of the previously announced favorable ruling rendered by the United States Tax Court on the Section 1254 issue, the working interest owner has made no decision on whether and when these amounts will be released from escrow.

The working interest owner has determined under the terms of the trust documents that it is eligible to escrow funds from all trust properties for the 1254 recapture issue. However, it has advised the trustee that it does not intend to exercise its rights to escrow funds, other than for the Fort Worth Basin, for this issue for the July 1990 distribution. However, the working interest owner intends to continue to monitor its estimates of relevant factors in order to evaluate the necessity of escrowing funds for this issue on an ongoing basis. The working interest owner is under no obligation to give any advance notice to the trustee or

the unit holders in the event it determines that funds should be escrowed.
If the working interest owner does begin to escrow such funds with respect to the productive properties, other than Fort Worth Basin, the effect on royalties paid to the trust would be significant, and in certain circumstances could eliminate distributions for a period of time.

#90176p9647 06/25/1990 ~PR Newswire

WASHINGTON (JUNE 25) PR NEWSWIRE - British Aerospace today entered the newly-defined regional jet market with the introduction of a 70-seat aircraft to be called the RJ70.

Launched at the Regional Airline Association convention here, the RJ70 addresses a market segment which is demanding specialized jet equipment. The RJ70 has been created to accentuate profitability and passenger comfort for regional operators seeking growth into jet equipment with a maximum of 70 seats.

As delivered, the RJ70 comes complete with 70 seats, two toilets, forward galley, wardrobe space and stowage for additional beverage carts. However, the flexible interior of the RJ70 will allow a mixed class layout (with standard 4-abreast first class seats) and allows for an additional galley to be installed in the rear. While the aircraft will be jetway compatible, optional airstairs will also be available.

The RJ70 is developed for today's environment with the backing of several decades of regional airline experience by British Aerospace. Equipped with an EFIS flight deck and powered by an optimized version of Textron Lycoming's ALF 502 high bypass engine, the RJ70 will enter the market as a proven airline product with a background of over 1 million flights.

Compared to other regional jets the RJ70 offers the widest cabin and the most comfortable interior. With 19-inch wide seats and a 21-inch aisle, the standard 5-abreast interior provides an excellent level of comfort and with 1.82 cubic feet per passenger overhead bins, and large underfloor holds the aircraft offers the most checked baggage per passenger.

"We are confident that the RJ70 is the very best formula for the regional market," said Brian Thomas, president of British Aerospace, Inc. "On economics, we are offering lower seat mile costs and greater profit potential than the competition. With the RJ70, we are also offering levels of passenger comfort and profit making capability that a stretched corporate jet or a modified turboprop design cannot hope to achieve. We regard the RJ70 as being highly competitive in the hub bypass role, offering true airline standards. In the hub feed role, it will challenge

competitors' traditional turboprop services by expanding the catchment area, thus providing substantial traffic capture potential."

The RJ70's balance of payload and range will enhance the operators' regional network by providing greater flexibility of services from a wider variety of points. Where necessary, congested hubs can be avoided by utilizing the RJ70's capability of carrying passengers to their destination via the most attractive possible routing.

Typically requiring around 30 passengers to break even, due to low operating economics, the RJ70 offers 40 profit making seats. Performance and economics will allow the RJ70 to fit into any airline system.

Company officials also emphasize that the RJ70 will incorporate the environmental attributes that have distinguished its family of aircraft.

LONGMONT, CO (JUNE 25) PR NEWSWIRE - Spectrum Datatech Inc. announced today, June 25, 1990, that a reverse stock split of 1 for 7 was approved by the shareholders at the annual meeting on June 11, 1990. This brings the total outstanding shares down to 1,061,723 and the total float to 280,029. Book value per share as of March 31, 1990 was 82 cents adjusted for the split. Management expects this split to take place the week of June 25, 1990.

This split was accomplished with the intention of capitalizing the company in a way to make it possible to eventually trade on a stock exchange. The company also is currently seeking an acquisition in order to meet minimum shareholder equity requirements of the various exchanges.

Spectrum Datatech is in the business of selling products and services to the users of computers. They sell all forms of blank magnetic media for computer storage. The company is also a large distributor of electrostatic paper and pen plotter products.

DALLAS (JUNE 25) PR NEWSWIRE - Southern Natural Gas Company (SONAT) of Birmingham, Ala., agreed today to pay $300,500,000 to ARCO (NYSE: ARC) Oil and Gas Company for damages which ARCO sustained when its production platform in the Gulf of Mexico was destroyed by fire on March 19, 1989.

Seven workers were killed and 23 injured in the fire and explosion on ARCO's South Pass "B" Platform.

Today's settlement came during a recess of the trial of a lawsuit brought by ARCO against SONAT which began June 11 in Madisonville, Texas.

The incident occurred while SONAT was making preparations to purge its 18-inch underwater pipeline which was connected to ARCO's platform.

SAN FRANCISCO (JUNE 25) PR NEWSWIRE - The Board of Directors of San Francisco-based PLM International Inc. (AMEX: PLM) today announced the appointment of KPMG Peat Marwick as the principal accountants to audit the financial statements of PLM International, its subsidiaries and its affiliated partnerships and investment programs.

The selection of KPMG Peat Marwick follows an extensive review of a number of qualified candidates by PLM International's management, the Audit Committee of its Board of Directors and its Board of Directors. KPMG Peat Marwick replaces Ernst & Young who was dismissed as PLM International's principal accountants on May 11, 1990.

PLM International is an integrated equipment leasing company engaged in the leasing and management of transportation equipment and in operating leases domestically and internationally, and in the syndication of capital equipment leasing investments. The company operates and manages over $1.3 billion of transportation equipment and related assets for its account and various investment partnerships and third party accounts.

(JUNE 25) UPI - New York Mets pinch-hitter Tim Teufel stepped up to the plate only once Sunday afternoon, guessed wrong, and still ripped the game winner

With two outs in the ninth and his team trailing Philadelphia 5-4, Teufel slapped a two-run bases-loaded single off Phillies reliever Roger McDowell to lift the Mets to a 6-5 victory.

''It was one-on-one versus Roger,'' said Teufel. ''He has been struggling. Maybe in a different situation he throws a better pitch. Expecting the sinker, I kept my hands in and tried to go the other way and I was fortunate to make good contact. When you don't get that many at-bats in a week, that means you are fortunate to do what I did.''

The heat of summer has been good to the boys from Shea. Since June 5th the Mets have gathered 15 victories to only three defeats. They sit two games back from NL East-leading Pittsburgh and have started to enjoy themselves again.

''We are playing very well now, with great pitching from everyone, an offense generating five runs or more a game and I never saw so much fun in here,'' second baseman Gregg Jefferies said. ''You would have thought we won the World Series. We're like little kids playing for the fun of it again, not worrying about business or New York pressure or anything.''

McDowell, 2-3, entered the ninth after Don Carman gave up consecutive singles to Howard Johnson and Dave Magadan. Teufel, batting for winner Jeff Innis, 1-1, looped his single to right.

''I threw Teufel a slider on the first pitch for a strike, then a fastball which I got out over the plate,'' McDowell said. ''He went the opposite way with it, and won the ball game.''

In other NL action, Pittsburgh beat Montreal 5-3, Atlanta slipped by San Diego 11-10 in 12 innings, Chicago edged St. Louis 3-2 in 10 innings, Houston whipped San Francisco 8-2, and Cincinnati pummelled Los Angeles 10-6.

In the AL it was Boston 2, Baltimore 0; Toronto 8, New York 3; Kansas City 11, Minnesota 2; Cleveland 9, Milwaukee 5; Chicago 3, Oakland 2; California 10, Detroit 2; and Seattle 11, Texas 5.

-- AROUND THE NL --

Pirates 5, Expos 3

At Montreal, Don Slaught got hit by a pitch with the bases loaded in the seventh inning, forcing home Barry Bonds to lift the Pittsburgh Pirates back into first place in the NL East. Former Expo Neal Heaton, 10-2, went six innings for the win, becoming the second 10-game winner in the National League.Stan Belinda got the last three outs with the bases loaded to earn his first save. Dennis Martinez, 5-5, worked seven innings.

Braves 11, Padres 10, 12 innings

At Atlanta, Andres Thomas belted a lead-off homer in the 12th innning to

give returning manager Bobby Cox his first win. Rick Leucken, 1-2, was the winner, going two innings, giving up two hits and striking out one. Craig Lefferts, 5-2, lasted only two innings.

Cubs 3, Cardinals 2, 10 innings

At Chicago, pinch-hitter Hector Villanueva lined a two-out single that scored Ryne Sandberg in the 10th inning. Paul Assenmacher, 2-1, who worked the 10th, picked up the victory. Tom Niedenfuer fell to 0-3 after relieving to start the ninth.

Astros 8, Giants 2

At Houston, Bill Gullickson scattered eight hits over 8 2-3 innings and added a two-run single and Franklin Stubbs hit a two-run homer. Gullickson 5-5, walked four and struck out three. Don Robinson, 2-1, took the loss for the Giants, allowing five runs and eight hits in five innings.

Reds 10, Dodgers 6

At Cincinnati, Chris Sabo blasted a three-run homer to cap a six-run sixth inning that powered the Cincinnati Reds. Rick Mahler, 2-2, allowed four runs on five hits in six innings, fanning three and walking none to pick up the victory. Norm Charlton worked the last three innings for his second save. Fernando Valenzuela, 5-6, went 5 1-3 innings, giving up 10 runs, eight hits, striking out two and walking two.

#90176u0083 06/25/1990 ~United Press International

(JUNE 25) UPI - The Oakland Athletics have made two World Series appearances since last being swept in a series at home.

In a rivalry that has become baseball's focal point, the Chicago White Sox emerged from Sunday's 3-2 10-inning victory and three-game sweep of the defending World Champions as bona fide challengers for the Western Division title.

On the strength of Dan Pasqua's game-winning solo homer, the White Sox closed to within one game of the first-place Athletics by inflicting the damage on enemy turf. In the process, they demonstrated that they should be taken seriously.

''I don't know about this business of being a contender,'' Chicago Manager Jeff Torborg said. ''Don't forget this is only June but this club is not a fluke.''

Last weekend, Chicago was in a similar position to challenge for the

division lead, squaring off in a four-game weekend series at home.

But after winning the opener, the White Sox lost the final three games and some of their confidence in the process as the A's flexed their championship muscle to maintain control of the division.

Pasqua's opposite-field homer boosted the White Sox to within one game of the first-place Athletics, a position they have held for 72 consecutive days.

''They outplayed us three days and they won three,'' Oakland Manager Tony LaRussa said. ''It makes us understand now what we have to do.''

Pasqua, a left-hander, drilled an 0-1 pitch from Oakland starter Dave Stewart over the left field wall for his eighth homer of the year.

Pasqua hit the game-winner off a pitch he hadn't seen before.

''Stewart threw me a sinking fastball on the outer half of the plate - it was a pitch he hadn't showed me before,'' Pasqua said. ''I knew I hit it well but I wasn't sure it was out until I saw Rickey (Henderson) watching the ball go over the wall.''

Stewart gave full credit to the Pasqua's stroke.

''I made the pitch I wanted to make,'' he said. ''As long as I've been pitching I've been told to make (the batter) take you deep to the opposite field. If he pulls the ball, you haven't done your job. You have to take your cap off to Pasqua.''

Stewart, 9-6, allowed just six hits in 10 innings, but suffered his fifth loss in his last eight decisions. The right hander struck out a season-high nine and walked none.

It was the A's first extra-inning loss this year and the first White Sox sweep of the A's since April 1988.

Ironically, Stewart had already started icing his arm after the ninth inning because the A's were trailing 2-0. But Dave Henderson hit a two-run two-out homer that tied the game and sent it into extra innings.

''It's nobody's fault but mine, sending Stewart out to pitch that 10th inning after he had already gone to the clubhouse and started to ice down '' LaRussa said.

Bobby Thigpen, 3-2, picked up the victory despite yielding the two A's runs. Barrry Jones retired the A's in order for his first save.

Elsewhere in the American League, Toronto ripped New York 8-3, Boston bashed Baltimore 2-0, Kansas City crushed Minnesota 11-2, Cleveland clipped Milwaukee 9-5, California clubbed Detroit 10-2 and Seattle edged Texas 11-5.

In the NL, it was: New York 6, Philadelphia 5; Pittsburgh 5, Montreal 3; Atlanta 11, San Diego 10 in 12 innings; Chicago 3, St. Louis 2 in 10 innings; Houston 8, San Francisco 2 and Cincinnati 10, Los Angeles 6.

-- AROUND THE AL --

Red Sox 2, Orioles 0

At Boston, Dwight Evans smacked a leadoff home run in the seventh inning, his third in two games, lifting Boston to a three-game sweep. Baltimore has dropped 10 of its last 12 games. Greg Harris, 7-3, allowed five hits and fanned seven in eight innings and Jeff Gray notched his first save. Bob Milacki, 3-4, went 7 1-3 innings and took the loss.

Blue Jays 8, Yankees 3

At Toronto, George Bell went 3 for 4 with two home runs and four RBI to power the Blue Jays. Bell's first homer was a solo blast which keyed a four-run second inning. John Cerruti, 6-3, went five innings, allowing seven hits. Chuck Cary, 4-3, pitched two erratic innings and suffere the loss.

Royals 11, Twins 2

At Minneapolis, Danny Tartabull homered and drove in four runs and Jim Eisenreich collected five hits to lead Kansas City's 23-hit attack. Storm Davis, 2-5, returned from the disabled list and pitched six strong innings. Allan Anderson, 2-10, was rocked for 10 hits and seven runs in two innings.

Indians 9, Brewers 5

At Milwaukee, Chris James belted four hits and drove in four runs and Jerry Browne scored three runs to pace Cleveland. John Farrell, 4-4, gave up one run and three hits in five innings. Mark Knudson, 5-4, took the loss.

Angels 10, Tigers 2

At Anaheim, Calif., Chili Davis, Kent Anderson and Lance Parrish all blasted home runs and Kirk McCaskill scattered four hits over seven innings to power the Angels to their seventh win in their last eight games. McCaskill, 6-3, earned the victory and Frank Tanana fell to 5-5.

(JUNE 25) UPI - The Sixth International AIDS Conference wrapped up Sunday in San Francisco. The concluding session coincided with Gay Pride Day...

an event marked by homosexual groups across the country. Parades and information bazaars attracted hundreds of thousands of gays and heterosexuals.

Organizers of the San Francisco event say some 325-thousand people watched the procession, while another 300-thousand people lined Santa Monica Boulevard to watch Los Angeles' 20th annual Gay and Lesbian Pride Parade. Rallies and parades in New York and Chicago also attracted six-figure crowds.

Iran is experiencing difficulty digging out from Thursday's massive earthquake in the northwestern portion of the country. A major aftershock registering five-seven on the Richter scale rumbled through the same area Sunday. The region has been shaken by seismic activity since Thursday's temblor, which killed upwards of 40-thousand people.

Weather forecasters in the Philippines say the island nation is in the path of another tropical storm. Typhoon Percy is 460 miles southeast of the Philippines and is heading toward the island nation at 16 miles an hour. The storm system packs winds of 93 miles an hour and is expected to make landfall by Wednesday or Thursday.

(JUNE 25) UPI - Nelson Mandela is in the nation's capital. He is slated to meet with President Bush Monday, a session which he has said he plans to use to urge Bush to continue economic sanctions against the South African government. When he arrived in Washington Sunday, Mandela commended the United States for being at the ''forefront of the struggle against'' apartheid.

European Community leaders are scheduled to gather in Dublin Monday. Among the topics expected to be covered are an aid package for the Soviet Union, German re-unification and E-C political union. West Germany and France are the strongest advocates for Soviet aid... with Britain being the odd man out by pressing a go-slow approach.

Texas officials said Sunday they expect to contain a brushfire in the state's Panhandle by Monday morning. The fire, which is 75 percent contained, broke out Saturday about one hour after firefighters had snuffed another brushfire one mile away. The latest blaze has consumed at least 19-hundred acres.

The search for bodies from the June 14th flash flood in eastern Ohio has shifted some 30 miles downstream from the site of the brunt of the disaster. The surging waters claimed the lives of 23 people with several others still listed as missing. Investigators say the region being

searched downstream of Shadyside probably will yield the remaining flood victims.

#90176u0234 06/25/1990 ~United Press International

HOBART, Australia (JUNE 25) UPI - A conservationist said Monday mankind may be to blame for a penguin stampede at a breeding ground on Macquarie Island that killed at least 5,800 of the flightless waterfowl.

Bob Brown, a conservationist for the southern island state of Tasmania, said up to 5,000 chicks and at least 800 adult King penguins died in early June at their colony, one of the world's largest, at Lusitania Bay on Macquarie Island's south side.

The King penguin is a long-beaked silver, gray and white species nearly 39 inches tall and crowned with orange and black.

Macquarie Island, an Australian dependency, is a meteorological and geological research station 1,000 miles southeast of Tasmania.

''After the stampede, the bodies of the chicks on the beach were piled four and five high,'' Brown said.

The bodies of the majestic birds were found by a wintering party June 10. The party returned to Tasmania last week.

The cause of the stampede was not known, but Brown said it possibly was prompted by a loud noise or a flash of light from a human source.

''In this mechanized era of aircraft, boats and lights and so on, the possibility of that occuring is much higher than a natural phenomenon, although it can't be discounted,'' he said.

The penguins gather at Lusitania Bay in a colony that can peak at 250,000 in summer, but drops to about 60,000 in mid-winter when the still-fledging juveniles predominate, Brown said. Currently, it is winter in the Southern Hemisphere.

#90176u0242 06/25/1990 ~United Press International

(JUNE 25) UPI - Nelson Mandela kicked off the third leg of his U-S visit Sunday when he arrived in Washington, D-C. While the anti-apartheid leader has concentrated on the masses during the first two portions of his journey, it appears as if the Washington segment will focus on nitty-gritty politicking. Mandela has said he will use his visit to the nation's capital to press Congress and President Bush to continue

pressuring South Africa to dismantle the system of racial segregation and repression.

The sixth annual gathering of AIDS scientists and researchers closed shop Sunday in San Francisco. Unless U-S policy is changed in the near future it appears as if this year's conference will be the last held on American soil. The problem is that federal policy bans AIDS-infected foreigners from entering the United States unless they get a special waiver.

The immigration policy is one of several issues AIDS activists say proves the insensitivity of the Bush administration to people with AIDS. Activists voiced their disdain for Bush's policies by shouting down his representative at the AIDS conference... Health Secretary Louis Sullivan. The protesters used whistles and chants to drown out Sullivan, who said unity is important to defeat the disease.

A published report Sunday in London says the British military plans to step up security of British bases in West Germany. The reported tentative action follows an increase of attacks against British targets by the Irish Republican Army. According to the report, extra British patrols will be allowed in the two West German provinces where the bulk of British troops are stationed.

#90176u0243 06/25/1990 ~United Press International

(JUNE 25) UPI - Canada's Liberal Party ended a weekend convention Sunday by promising to find a way to avoid a possible Quebec secession. The promise was made contingent on the Liberal's return to power in the next election. The pledge follows Saturday's appointment of a Quebec native to head the party and the breakdown Friday of a bid to alter the constitution to provide Quebec with special status.

The New York police department has assigned 50 detectives to investigate the so-called Zodiac killer. The unidentified gunman has shot four people... one of whom died of his wounds Sunday. The assailant somehow knew the astrological sign of each victim... a fact which prompted the chief of police to caution New Yorkers NOT reveal their birthdate to strangers. The gunman's cryptic notes have listed the horoscope signs of each person he gunned down.

More trouble for Donald Trump. Sources close to negotiations aimed at rescuing Trump's sagging empire say two banks may NOT join a critical bailout plan, which could force the mogul into default. A French and a German bank reportedly are balking at last-ditch efforts to re-finance Trump. Sources say without their help, Trump's casino bonds will either fail or significantly falter.

-30- 1413
#90176u0322 06/25/1990 ~United Press International

NEW YORK (JUNE 25) UPI - Donald Trump has until midnight Tuesday to make a payment on a junk bond issue for his Trump Castle casino, but bankers reportedly may be willing to throw the cash-strapped developer a $20 million lifeline.

The New York Times Monday said a group of banks is preparing a bridge loan as it works to win approval for a larger bailout plan for the beleaguered real estate mogul.

Talks to develop the $65 million loan package continued through the weekend, but the going was anything but smooth.

Trump, who was unable on June 15 to meet nearly $43 million in payments on bond issues for the gaming hall in Atlantic City had a grace period that expires at 12:01 a.m. Wednesday to raise the funds or be found in default.

He's trying to raise $65 million in fresh capital, which would allow him to meet the bond payments, in a complex and broad-ranging bailout plan negotiated among his multiple lenders.

Sources said Saturday the Dresdner Bank, a leading West German bank, was balking at joining the bailout.

Dresdner is among four foreign lenders whose agreement is key to the bailout plan to help Trump restructure $2 billion in bank loans and $1.3 billion in publicly traded debt.

Later in the weekend, Societe Generale bank of Paris, one of five banks forming a syndicate that has loans on the Trump West Side railroad properties, also hesitated to join the bailout plan, sources said.

Societe Generale was ''having reservations at this 11th hour about whether (the bailout) makes sense for them,'' a source close to the negotiations said.

The source added: ''Where we stand at the moment is that (Monday) the plan is to speak to Dresdner and Societe Generale to see if they can be persuaded to go along with the agreement. If they don't agree, then the Trump casino bonds will be in default, or at least the bank agreement will in serious jeopardy.''

The source said the the French and German banks were the only ones out of about 60 banks who were hesitating to join the bailout plan.

Dresdner Bank and Japan's Mitsubishi Trust & Banking Corp., Sumitomo Bank

Ltd., and Dai-Ichi Kamgyo Bank Ltd., bought portions of loans extended by Chase Manhattan Bank Corp. to Trump.

The reported bridge loan may make continuing talks less frenzied. The Times reported that terms on any new loans would include stringent restrictions on Trump's personal and business finances: monthly charitable contributions and his personal and household expenses would be capped at $450,000 a month for the rest of this year, $375,000 a month in 1991 and $300,000 monthly in 1992, for example.

Meanwhile, the New York Post reported Monday that Trump's financial empire isn't the only thing threatening to go up in smoke. The domes that top his Taj Mahal casino could vanish as well if an Ohio contractor doesn't get paid, the newspaper said.

Lawyers for Molded Fiber Glass Co. of Ashtabula, Ohio, filed suit last week, and are considering literally removing the domes that glisten from the roof of the Taj, the Post said. Trump has allegedly reneged on paying the family-owned firm nearly $3 million overdue since February, the Post said.

On Friday, Trump broke his silence about his financial plight to voice confidence he will survive.

In a one-page statement released in his name by the Trump Organization, his holding company, Trump warned thousands of employees and suppliers of his real estate, hotel and casino holdings would also suffer if he went under.

''The banks we have been working with are very close to coming together in support of a restructuring plan,'' Trump said in the statement.

''A final agreement would benefit all of us, but perhaps most important are the 25,000 employees and thousands of family firms and other suppliers - spanning the hotel, construction, development and travel industries, that are dependent upon the Trump Organization,'' he said.

''There is a dramatic multiplier effect - take one person out of a hotel and six service people are affected,'' said Trump, who owns the Plaza Hotel in Manhattan and three Atlantic City hotel-casinos.

#90176u0353 06/25/1990 ~United Press International

TEHRAN, Iran (JUNE 25) UPI - Quake-battered northwestern Iran was shaken again by an aftershock that measured 5.7 on the Richter scale and reportedly unleashed at least one landslide.

Sunday's aftershock was the most severe of some 360 aftershocks that have shaken the Caspian Sea region of Iran since Thursday's initial earthquake, which was measured at 7.7 on the Richter scale by the U.S. Geological Survey and 7.3 by the Tehran University Geophysical Center.

Iranians now consider Thursday's quake - significantly more powerful than the 7.1 temblor that hit northern California last October - their most serious ever.

Upward of 40,000 were feared dead. Iran's Central Relief Headquarters put the count at 36,907 dead, the official Islamic Republic News Agency reported. In 1755, a quake in northern Iran killed an estimated 40,000.

Hojatolislam Asadollah Bayat, a deputy speaker in the Iranian Majlis, or Parliament, said 114 villages in Zanjan province had been completely devastated by the quake and its aftershocks.

''The extent of damage and loss of life in these villages is so vast that the government forces, though doing their best, can do little to rescue the injured and help the survivors,'' Bayat said. ''People must join in to help the victims.''

A rescue worker in the region told United Press International that the stench of decomposing bodies in the most severely hit areas was so bad that workers were beginning to consider it unsafe to handle the dead.

The epicenter of Sunday's temblor, which struck at 1:15 p.m., was near the same spot as Thursday's quake.

With Sunday's aftershock following several days of continued seismic activity, Iranians in towns and villages near the worst-hit areas were afraid to enter their homes, relief workers reported.

Bodies were still being dug out by the score from under the rubble at Roudbar, Manjil and other villages on the Alborz Mountain slopes between the Caspian Sea and Zanjan, about 175 miles northwest of Tehran.

Roudbar, Manjil and Loushan, towns bunched together in the Alborz, emerged as the worst-hit in the disaster.

Manjil and Roudbar, with a combined population of some 200,000, have tens of thousands of people still unaccounted for. A large dam nearby on the Safid Rud, or White River, appeared to have withstood the tremors.

Rocks and dirt were still sliding down the mountain slopes in the area, blocking roads and making access to the stricken area difficult.

A road between Rounbar and Rasht that had just been cleared was buried by

a landslide again after Sunday's aftershock, the official Iranian news service IRNA reported.

Trucks carrying food and blankets were nevertheless arriving steadily at Roudbar, Manjil and Loushan and at least 40 bulldozers have been dispatched to the area to clear the roads.

The Tehran newspaper Kayhan said deep cracks have appeared in the mountainsides and ''getting aid to the victims is almost impossible.'' At Roudbar, it reported, corpses ''are still lying on the ground.''

IRNA said teams of army mountaineers were dispatched to the rugged ranges where villagers have been trapped for days without help.

The hard-line newspaper Abrar Sunday put the casualties in Gilan and Zanjan provinces at 40,000 dead and 70,000 injured. Some 200 C-130 aircraft and dozens of helicopters continued relief flights into the area for the third straight day.

An Iranian state television crew that flew to the devastated villages in Zanjan province Sunday brought back footage of hundreds of corpses lining the roads in the inaccessible areas, with relatives sitting by, waiting for airlifts or burial.

More than 40 aircraft carrying medical volunteers and relief supplies from abroad landed at Tehran's Mehrabad airport by Sunday, and Tehran radio made repeated announcements that Iran welcomed international help.

Ashrafuddin Hosseini, a cleric in the town of Qazvin, read the Koran, the Islamic Holy book, as he traveled to Manjil, and said with tears in his eyes: ''We in Iran did not know we had so many friends.

''Perhaps after this terrible tragedy, we can resume our old broken relations with nations,'' he said.

But Jomhuri Islami, a hard-line Tehran newspaper, said: ''Suspicious hands are being stretched toward our nation to help. ... The criminal U.S. government is on the top of all. In a deceitful message, it asked Iran to list its requirements.''

Deputy Foreign Minister Mohammad Ali Besharati said the Iran would accept help from all countries except Israel and South Africa.

''The Islamic Republic has welcomed specialists as well as medical and relief teams from abroad from the day the disaster struck,'' Besharati said, denying reports that Iran had refused to accept foreign medical teams.

(JUNE 25) UPI - Around the world... around the clock... the latest news from U-P-I.

Protesters interrupted the AIDS conference in San Francisco yesterday when Health Secretary Louis Sullivan delivered a speech to the closing session of the international meeting. Noisy demonstrators angry with the Bush adminstration's policy toward the AIDS chanted- ''NO more words. We want action.''

Hundreds of thousands of people joined in gay unity parades and celebrations yesterday. San Francisco police estimate between 200 and 300-thousand people marched through town. The parade included floats, marching bands, dancing and speeches. The day also was recognized in other large cities, including Los Angeles, New York, and Chicago.

Nelson Mandela is in Washington for perhaps the most diplomatically delicate part of his American tour. The South African black nationalist will meet with President Bush today and will address a joint session of Congress tomorrow. Mandela says he'll ask for tougher sanctions against the white-ruled government of Pretoria.

A deputy speaker in the Iranian Parliament says the devastation from the earthquake and aftershock is so vast the government at its very best can do little to help the injured and survivors. The death toll stands at more than 36-thousand and search teams continue to pull bodies from the rubble.

The official Palestinian News Agency reports the P-L-O has called for a special meeting of Arab League foreign ministers. The agency quotes a Palestine Liberation Organization official as saying the summit is necessary to address Israel's war against the Palestinians.

(JUNE 25) UPI - The New York trial of the first three youths charged in the rape and beating of a Central Park jogger opens today. There are strong indications the victim of the highly publicized attack plans to testify against her accused attackers. Altogether, six youths have been charged in the April 1989 assault.

A spokeswoman at Pittsburgh's Children's Hospital says Stormie Jones, the world's first heart-liver transplant recipient, is back at the hospital for tests. She says doctors believe the problem the 13-year-old Texas girl is experiencing can be treated by changing medication. Stormie underwent a simultaneous heart-liver transplant in 1984.

Milwaukee police are searching for an 11-month-old boy who may have been abducted. Police say the child's father left the boy in a car yesterday when he went into a gas station for about a minute. When he returned, the child was gone. Police say they doN'T think the child could have gotten himself out of the baby seat.

Time is running out for Donald Trump. The real estate developer has until midnight to make a payment on a junk bond issue for his Trump Castle casino. Sources close to negotiations between Trump and his creditors say two banks are hesitant about joining a bailout plan worth 65-Million dollars.

A conservationist on a Tasmanian island reports a penguin stampede killed at least 58-hundred of the birds. Bob Brown says the penguins died in early June at their colony, one of the world's largest. Brown says a loud noise or flash of light from a human source could've sparked the stampede.

#90176u0365 06/25/1990 ~United Press International

SAN FRANCISCO (JUNE 25) UPI - The 6th International AIDS Conference, which produced hopeful reports of new treatments but no medical breakthroughs, ended with a plea for unity and a furious denunciation of the government's performance against the epidemic.

Dr. Louis Sullivan, U.S. Secretary of Health and Human Services, appeared at the closing session of the conference Sunday to urge researchers and activists to renounce theatrics and ''stand together.''

But his message was all but drowned in an ear-splitting din of whistles, boos, taunts and chants from hundreds of protesters enraged by Bush administration AIDS policy.

Some of the 10,000 delegates heeded the protesters' call to stand and turn their backs on Sullivan, the federal government's top health policymaker.

Sullivan's speech included no announcement of major policy changes and skirted the U.S. government's immigration and travel restrictions on people infected with the AIDS-causing human immunodefiency virus, or HIV. About 100 international groups boycotted the meeting to protest the policy that bars HIV-infected foreign visitors unless they obtain a special waiver.

The five-day meeting could be the last international aids conference held in the United States. The International AIDS Society, one of the sponsors, has withdrawn its support for holding the 1992 meeting in Boston unless the U.S. government lifts travel restrictions on foreigners infected with

the virus that causes AIDS.

The 1991 conference is set for Florence, Italy.

Jeffrey Fricke, an AIDS educator with the University of California-Los Angeles, was among those who joined the protesters in turning their backs on Sullivan.

''He has the authority and power to do something about this restrictive policy,'' Fricke said. ''There are many people here who are not activists who agree that civil disobedience is the way to get attention in certain circumstances, and this is one of them.''

Sullivan's speech was delayed 10 to 12 minutes by the high-decibel protest.

''No more words. We want action,'' chanted the demonstraters, who were kept away from the stage by police barricades. They handed out a leaflet in the hall that said, ''After 10 years of Bush/Reagan rhetoric on AIDS, we will no longer tolerate words without action.''

''Let us not turn our frustration into theatre,'' Sullivan said over a din that at times prevented even an interpreter for the deaf standing next to him from hearing him. Protesters also threw paper airplanes, crumpled leaflets and confetti.

''The AIDS epidemic can divide us or it can unite us,'' he said. ''Let us stand together, united in a common cause.''

No one was arrested during the demonstration. Afterwards, many protesters - members of the AIDS Coalition to Unleash Power - marched noisily out of the hall to join San Francisco's annual Gay Pride Parade.

The meeting, attended by about 10,000 delegates and 1,500 journalists from around the world, was intended to facilitate the exchange of the latest scientific information on AIDS.

There were no dramatic advances against the virus revealed, although preliminary studies on new antiviral drugs and a prototype vaccine offered hope for an eventual medical triumph.

Controversy threatened to overshadow science, however, and police made nearly 300 arrests in a series of protests on San Francisco streets by AIDS activists demanding wider access to experimental AIDS drugs and an easing of the U.S. restrictions on AIDS-infected travelers.

The protests underscored the uneasy relationship among government AIDS policymakers and researchers on the one hand and, on the other, AIDS activists, whose protest chants often include such highly charged terms as

''genocide.''

Prior to the closing ceremony, protesters handed out postcards bearing a picture of a coffin. The cards were addressed to President Bush, who turned down two invitations to address the meeting and instead attended a fund raiser for Sen. Jesse Helms, R-N.C., a staunch advocate of restrictions on HIV-infected people.

Sullivan, seeking common ground with the protesters, reiterated the administration's opposition to excluding HIV-infected food workers from the anti-discrimination protection of the Americans with Disabilities Act.

''I would add that any policy based on fears and misconceptions about HIV will only complicate and confuse disease control efforts,'' he said above the din.

A coalition of more than 30 groups also sent an open letter to Sullivan calling on him to provide better leadership against the disease that has stricken 130,000 Americans since 1981.

''We appeal to you to take command of our nation's war on AIDS and fulfill your responsibility to us all,'' the letter said.

Another call for unity was better received.

Preceding Sullivan, Dr. Anthony Fauci, director of the National Institute of Allergy and Infectious Diseases, drew a standing ovation for remarks that finely balanced the concerns of scientists with the fears of AIDS activists.

''They (activists) do have something important to say and they can contribute constructively to our mission. When it comes to clinical trials some of them are better informed than many scientists imagine,'' Fauci said.

He also said, ''Activists are mistaken when they assume or least publicly state that scientists do not care about them. Most scientists care deeply.''

''We must join together for together we are a formidable force with a common goal.''

#90176u0388 06/25/1990 ~United Press International

MANILA, Philippines (JUNE 25) UPI - President Corazon Aquino said Monday her lawyers believe the constitution does not bar her from seeking a second term, leaving open the possibility she will seek re-election in

1992.

It was the first time Aquino addressed the issue of the provision in the 1987 constitution that states, ''The president shall not be eligible for re-election.''

''Well, some lawyers tell me that because the constitution was ratified after I had already been in office that this would not apply to me,'' Aquino said at her regular news conference.

Aquino quickly added, ''But this is neither here nor there because as I have said - what I am interested in is just getting the projects and programs of this government especially those ... intended to alleviate poverty to be fast tracked and to see their completion before the end of my term.''

The 57-year-old president was referring to the political movement she formed this month, Kabisig, or ''arm in arm.''

Kabisig has elicited severe criticism among allies in the ruling coalition who fear it would serve as the vehicle for Aquino's re-election.

Aquino has said that Kabisig was an effort to revive the spirit of ''people power'' that emerged in February 1986 when Filipinos rallied to support a military revolt that toppled the late 20-year ruler Ferdinand Marcos and swept her to power.

Aquino, who has crushed six coup attempts since taking office, has repeatedly said she would not seek re-election at the completion of her six-year term in May 1992.

But a close aide who did not wish to be named said Aquino might stand for re-election if she felt the ideals she fought for would be compromised by a new administration.

The aide specifically referred to Eduardo Cojuangco, 55, Aquino's estranged cousin and a close Marcos ally who fled on the same plane with the dictator in 1986. Cojuangco returned quietly to the country last year and has hinted he wanted to be president.

''Cojuangco stands for everything that she fought against,'' said the Aquino aide.

Aquino's comments about her eligibility to run again came when she was asked by reporters about remarks by Cardinal Jaime Sin, the influential archbishop of Manila, during a visit to California this month.

Published news reports quoted Sin as saying that God had a hand in the

1986 revolution and may tell her that her mission was not over yet.

''If the Lord says, 'Go on, Mrs. Aquino' what can she do,'' Sin said, according to the news reports.

Sin played a key role in the 1986 uprising.

#90176u0442 06/25/1990 ~United Press International

(JUNE 25) UPI - Thunderstorms raged in the Plains states and the Mississippi Valley Monday but had no effect on the heat wave which has gripped the South for most of the last week, setting records in Texas and other states.

Lightning and thunder shook residents of Missouri and Iowa with heavy rains also reported in northern Texas, southern Oklahoma and western Arkansas early Monday.

Scattered showers and thunderstorms Sunday did little to ease the heat in the Lone Star state, as Lubbock set an all-time record high for the date of 110 degrees.

A strong upper level high pressure area centered over western New Mexico kept the mercury above the century mark for the entire state except the mountains and northwest plateau.

Some of the worst storms Monday were reported near Quincy, Mo., in the southwest part of the state. Showers also were reported from near Ottumwa, Iowa, south to the border with Missouri.

Light showers fell over parts of the mid-Atlantic region and scattered clouds spotted the skies from the West Virginia mountains to the Atlantic Coast.

Overnight temperatures ranged from the upper 40s in West Virginia to the low 60s in the Philadelphia area.

Forecasters at Bangor International Airport in Maine warned of dense fog, but clear conditions were reported for most of the rest of the region. A few clouds wafted over parts of Vermont and Rhode Island.

Brunswick, Maine, dipped to a cool 56 degrees at 2 a.m., but in Boston the temperature was 67 degrees.

In the West, typical summer weather was expected in northern and central California through midweek - night and morning low clouds along the coast and warm, sunny days inland. Coastals highs were in the 60s along the

coast and in the 90s in the Central Valley over the weekend.

In Oregon, weak high pressure was expected to linger off the Oregon coast with low pressure east of the Cascades through midweek, maintaining a low level onshore flow of marine air for night and morning clouds in much of western Oregon and mild summer temperatures.

To the north, a trough of low pressure offshore continued to steer moisture across western Washington.

Sunday was the 15th 100-degree-plus day in Lubbock this month, just two days short of the all-time record of 17 days recorded in July of 1940.

Other Texas cities with temperatures exceeding 100 degrees were Wink, 109; Amarillo, Presidio and Beeville, 108; Childress, Dalhart and Laredo, 107; and Cotulla, El Paso and Lajitas, 106 degrees.

The Southeast had partly cloudy skies Monday with scattered thunderstorms in southern Florida and temperatures at 3 a.m. ranging from a low of 62 degrees in Knoxville, Tenn., to a high of 76 degrees in Tampa, Fla.

-30- 2904

#90176u0457 06/25/1990 ~United Press International

(JUNE 25) UPI - U-S policy towards AIDS victims was the focal point of protest on the final day of the Sixth International AIDS Conference in San Francisco.

AIDS activists chanting... ''No more words! We want action!''... drowned out yesterday's closing speech by Health and Human Services Secretary Louis Sullivan. Some of the 10-thousand delegates stood and turned their backs.

Sullivan's speech included NO major policy announcements and skirted the government's immigration and travel restrictions on people with AIDS.

Nearly 300 people were arrested at street protests during the five-day meeting over AIDS-linked travel restrictions... the slow pace of the development of AIDS drugs... and limited health care for AIDS victims.

Protestors were especially incensed by U-S travel policy, which bans foreign visitors infected with the AIDS virus without a special waiver. The U-S ban threatens the future of international medical meetings in the United States.

Harvard University and the International AIDS Society pledged NOT to host the Eighth International AIDS Conference in Boston in 1992 unless the restrictions are lifted. The 1991 conference is set for Florence, Italy.

But yesterday wasn't entirely anguish for America's gay community. Hundreds of thousands of people nationwide marched to celebrate their homosexuality.

Festivities in New York, Chicago, Los Angeles, Atlanta and other cities focused on AIDS and gay rights issues. Some San Francisco revelers celebrated the end of the Cold War by calling themselves ''Gays for Gorby.''

-30- 1747

#90176u0466 06/25/1990 ~United Press International

(JUNE 25) UPI - A provincial holiday in Quebec yesterday turned into a celebration of its looming secession from Canada.

The threat of thunderstorms did NOT prevent thousands of people in Montreal from filling downtown streets to celebrate St. Jean Baptiste Day in honor of the patron saint of French Canadians.

But thousands of Quebecois used the occasion to proclaim Quebec's independence after two provinces failed to approve a constitutional amendment to keep the French-speaking province in Canada.

The amendment known as the Meech Lake accord was negotiated three years ago by the federal government and 10 provinces. It recognized Quebec as a distinct society and allowed it to promote and protect the French language and culture.

Quebec Premier Robert Bourassa says he will seek provincial control from the federal government over immigration and communications. The move would give Quebec more sovereignty but fall short of full independence.

Prime Minister Mulroney celebrated the holiday in his hometown in Quebec. He said in a prepared statement that the celebration would be ''tinged with sadness'' because of the failure of the amendment.

But the battle to keep Quebec in Canada is far from over. Canada's Liberal Party has pledged to find a way to unite French-speaking Quebec and the rest of the country if it returns to power. It has chosen a Quebec native as its new leader.

#90176u0467 06/25/1990 ~United Press International

(JUNE 25) UPI - Black leader Nelson Mandela says he will urge President Bush to impose tougher sanctions against the South African government when he meets Bush at the White House today.

Bush last week acknowledged the sanctions, which he initially opposed, may have produced some positive responses from the government of Pretoria. In his words- ''If you can credit sanctions with the evolution toward democracy in South Africa... it seems there are some good things to it.''

Mandela arrived in the nation's capitol yesterday, after a triumphant visit to Boston. The anti-apartheid activist's stay in Washington will be less public than his visits to Boston and New York. Mandela will concentrate on meetings with various government officials, including Secretary of State Baker and the Congressional Black Caucus.

The African National Congress leader also will address a joint session of Congress tomorrow and meet with the top leadership of the A-F-L C-I-O. Mandela's one major public appearance will be at a rally at the Washington Convention Center.

#90176u0468 06/25/1990 ~United Press International

(JUNE 25) UPI - A deputy speaker in the Iranian Parliament says the extent of the quake damage in northwestern Iran is so bad that even at its very best, the government canNOT do very much to help the survivors.

Bodies are still being pulled from the rubble of what used to be villages along the Alborz Mountains between the Caspian Sea and the province of Zanjan. The area is about 175 miles northwest of Tehran.

Emergency teams are having a very difficult time reaching stricken areas because landslides have blocked main roads. Yesterday's aftershock, which measured five-point-seven on the Richter scale, only made matters worse by closing roads that had just been cleared and reopened.

Iran says Thursday's initial quake was the nation's worst ever. It measured seven-point-seven on the Richter scale.

The death toll is approaching 40-thousand, while tens of thousands of people remain unaccounted for in several towns. 70-thousand are reported to be injured.

But there are stories of hope. In the mountain town of Manjil, French teams using dogs and cats to sniff through rubble found three little girls still alive 60 hours after the quake.

-30- 1325

#90176u0469 06/25/1990 ~United Press International

(JUNE 25) UPI - A conservationist says mankind may have caused a penquin

stampede that left at least 58-hundred birds dead on the Tasmanian island of Macquarie.

Bob Brown says a flash of light or loud noise may have sparked the stampede which occurred earlier this month.

Brown says it's NOT likely a natural phenomenon could have caused the penquins to react with such fright.

He says about five-thousand chicks and at least 800 adult King penguins died at their colony- one of the world's largest- at Lusitania Bay on the island's south side. Macquarie Island, an Australian dependency, is a meteorological and geological research station one-thousand miles southeast of Tasmania.

During the summer, as many as 250-thousand penquins are at Lusitania Bay. But now it's winter in the Southern Hemisphere and the number of penquins stands at about 60-thousand.

#90176u0545 06/25/1990 ~United Press International

(JUNE 25) UPI - The United States confirms the Chinese government has released a leading dissident, Fang Lizhi, and his wife. The couple has spent more than one year in the sanctuary of the U-S Embassy in Beijing. China's official news agency says the two dissidents were granted permission to leave after admitting political mistakes connected to last year's pro-reform uprising.

President Bush will welcome Nelson Mandela to the White House later this morning. The South African black nationalist has said he will press Bush to tighten sanctions against the government of Pretoria. Bush admitted last week sanctions may have resulted in some positive actions on the part of South African President F-W de Klerk. The president added he would like to reward De Klerk for initiating reform.

The sixth International Conference on AIDS ended in San Francisco yesterday with hope for new treatments but NO signs of a cure for the deadly virus. Health Secretary Louis Sullivan delivered the closing speech but was jeered by many protesters angry at the Bush adminstration's attitude toward the AIDS crisis. The demonstrators were so loud that Sullivan's speech was interrupted for more than 10 minutes.

The strong aftershock that rocked quake-damaged northwestern Iran yesterday only made matters worse for survivors of the inital temblor and those trying to get help to the region. Landslides have blocked roads and relief teams are having a difficult time reaching the many towns and villages that need help. About 37-thousand are said to have died in

Thursday's initial quake, but that number is expected to rise because thousands remain unaccounted for.

-30- 1832

#90176u0549 06/25/1990 ~United Press International

(JUNE 25) UPI - European Community leaders are meeting in Dublin, Ireland today for a summit expected to focus on aid to the Soviet Union and European security. France and West Germany favor getting aid to the Soviet Union as quickly as possible, but Britain wants to see Moscow implement more reforms. The leaders also will discuss sanctions against South Africa. British Prime Minister Thatcher wants the E-C to send a message of support to President de Klerk.

Ronald Gene Simmons faces the death by lethal injection tonight at the Cummins prison near Pine Bluff, Arkansas. 49-year-old Simmons killed 14 members of his family and two other people during a 1987 Christmas holiday shooting spree. Authorities say Simmons was angry because his daughter had ended an incenstuous relationship. Simmons has NOT appealed his sentence, saying- ''Let the torture and suffering in me end.''

New York police are on the hunt for a serial gunman who has shot four people, killing one. A task force of nearly 50 investigators is trying to find the man who calls himself Zodiac and knows the astrological sign of each of his victims. A 78-year-old homeless man died yesterday from wounds he suffered in an attack nearly four weeks ago. Police are warning New Yorkers NOT to reveal their astrological sign to a man fitting the gunman's description.

Prosecutors in the New York trial of Imelda Marcos and her co-defendant, Saudi financier, Adnan Khashoggi, are expected to deliver their closing arguments today. During the past three months, the prosecution has brought witnesses to the stand to testify against Marcos- charged with racketeering, conspiracy and fraud. And there have been NO defense witnesses to rebuff accusations Marcos and her late husband bilked the Philippine government out of Millions.

-30- 1981

#90176u0622 06/25/1990 ~United Press International

(JUNE 25) UPI - The Sixth International AIDS Conference closed yesterday in San Francisco on a confrontational note. Delegates shouted down Health and Human Services Secretary Louis Sullivan as he delivered the closing address.

The spirit was more festive in gay pride celebrations stretching from New York to Los Angeles. In midtown Manhattan, about 200-thousand people marched in a parade that went past the Empire State Building to Greenwich

Village.

Thunderstorms are raging this morning in the Plains to the Mississippi Valley. Forecasters say lightning and thunder shook residents of Missouri and Iowa with heavy rains. Texas yesterday suffered record heat.

An Israeli Cabinet member says Soviet Jewish immigrants will NOT be settled in the occupied West Bank and Gaza Strip. Moscow and Washington have objected to the settling of the newcomers in the occupied terrorities.

Opening arguments begin today in New York in the case of three teens accused of raping and beating a female jogger in Central Park. Prosecutors say the woman may take the witness stand against her alleged attackers.

Investigators say the American Medical Association gave one of its former executives a one-point-one-Million dollar retirement deal. The deal was cut without the knowledge or approval of the group's governing board.

Oil analyst Trilby Lundberg says gasoline pump prices nationwide dipped slightly in mid-June because of lower prices on the wholesale market. The average price per gallon was slightly more than a dollar 17 cents a gallon.

-30- 1718

#90176u0699 06/25/1990 ~United Press International

(JUNE 25) UPI - China has permitted a leading dissident and his wife to leave the country. Fang Lizhi and Li Shuxian have spent the past year in the refuge of the U-S Embassy complex in Beijing. China says the couple was allowed to leave after admitting they committed political errors during last year's pro-reform uprising.

White House spokesman Marlin Fitzwater says Lizhi and his wife are traveling to London. Dr. Fang has been offered and has accepted a teaching position at Cambridge University. Fitwater says the United States welcomes China's decision to let Fang and his wife leave and adds it will help U-S relations with China.

Black leader Nelson Mandela says he will urge President Bush to increase sanctions against the South African government when he meets with Bush at the White House this morning. During his stay in the nation's capitol, Mandela will meet with the Congressional Black Caucus and address a joint session of Congress.

The 12 leaders of the European Community are tackling the issue of a Western aid package for the Soviet Union during the first day of a two-day summit in Dublin, Ireland. France and West Germany are pressing the issue, saying time is running out. The leaders also are expected to debate relaxing sanctions against South Africa.

Israeli Housing Minister Ariel Sharon says Israel will NO longer settle Soviet Jewish immigrants in the occupied West Bank and Gaza Strip because of tensions in the area. The Soviet Union and the United States have voiced their opposition to Jewish immigrants being relocated in the Israeli-occupied territories.

-30- 1777

#90176u0703 06/25/1990 ~United Press International

(JUNE 25) UPI - The situation in northwestern Iran remains grim as relief workers try to get to mountain villages that have been devastated by the earthquake. A rescue worker told U-P-I emergency teams are concerned about unsafe health conditions because of the number of bodies that remain under the rubble.

The Moldavian Parliament is the latest Soviet republic to declare its independence from Moscow. Hundreds of thousands of Moldavians responded to yesterday's action by gathering at Moldavian-Romanian border to show support for rejoining the country of which they were a part until 1940.

New York City police are looking for a bizarre serial gunman who has shot four people, killing one of them. The gunman said he will kill eight more according to their astrological signs. Police are advising New Yorkers NOT to reveal their birth date to anyone who fits the gunman's description.

Closing arguments are expected to begin this morning in the case of John Vento, one of eight men charged in the racial slaying of Yusuf Hawkins in a Brooklyn neighborhood. Jurors will have to decide if 21-year-old Vento intended to kill when he joined the group of attackers last summer.

Donald Trump is having problems arranging a 65-Million-dollar bailout loan but it's possible bankers will agree to throw the real estate developer a 20-Million-dollar lifeline. Trump has until midnight to make a payment on a junk bond issue for his Trump Castel Casino.

#90176u0788 06/25/1990 ~United Press International

HOUSTON (JUNE 25) UPI - A total of 1,021 rotary rigs were working in the United States last week, continuing a trend of an increased count for every week thus far in June, industry monitors said.

The count compared with 999 rotary rigs the week before, and 810 the same week a year ago, Baker Hughes Inc. reported Sunday.

The Gulf of Mexico offshore rig count recovered slightly from a 13-rig drop recorded last week, Offshore Data Services Inc. reported. Three more

rigs were working in the Gulf last week, boosting the total number of working rigs to 141, and pushing the utilization rate to 66.8 percent.

Offshore drilling activity was unchanged in European waters and the Mediterranean Sea compared with the previous week. The area's utilization rate continued at 93.3 percent, with 126 of 135 rigs in European waters working.

Worldwide utlization increased last week as a result of the three-rig increase in the Gulf. The worldwide rate is at 80.8 percent, with 540 of the world's 688 offshore drilling units working.

In Texas, there were 333 rotary rigs working last week, compared with 323 the week before and 240 the same week a year ago.

Other relevant rig counts included: Louisiana, 166 last week, 150 the week before and 136 the same week a year ago; New Mexico, 51, 51 and 41; Oklahoma, 127, 132 and 100; and Canada, 94, 104 and 121.

-30- 1543

#90176u0790 06/25/1990 ~United Press International

JERUSALEM (JUNE 25) UPI - In letters to Soviet President Mikhail Gorbachev and European Community leaders, Prime Minister Yitzhak Shamir stressed immigrants to Israel will not be settled in Israeli-occupied territories or ''uproot'' Palestinians, a spokesman said Monday.

Shamir wrote Gorbachev last month after the Soviet leader said during summit talks with President Bush that immigration of Soviet Jews to Israel could end if the immigrants settled in the West Bank and Gaza Strip, a Foreign Ministry spokesman said.

In the letter, Shamir ''repeated Israel's declarations of no intention of settling newcomers in the territories,'' the spokesman said.

Sunday, Housing Minister Ariel Sharon for the first time since taking over his new position overseeing immigration said Israel would not settle new immigrants outside of its pre-1967 borders.

Sharon said immigrants were being directed to the center of the country, the southern Negev and Wadi Ara regions and the northern Galilee area.

The Foreign Ministry spokesman said the Sharon statement meant Israel would not forbid immigrants from settling in the West Bank and Gaza Strip but ''will not encourage them to live there.''

In a letter to European Community heads of state, Sharon pledged his narrow, Likud-led coalition government would not use immigrants to push

Palestinians out of the Israeli-occupied West Bank and Gaza Strip.

''Soviet Jews and other Jewish immigrants will not prejudice the position of any other inhabitants, will not take the place of others, will not uproot others. This is our policy,'' Shamir wrote.

The letter, sent last week, was intended to reach the heads of state before an EC summit in Dublin that opened Monday, the Foreign Ministry spokesman said.

The quasi-governmental Jewish Agency said since April 1989, 65,000 new immigrants have come to Israel, three-fourths of them from the Soviet Union, Israel radio reported Monday. Slightly more than 200 immigrants have settled in the West Bank and Gaza Strip, the radio report said.

The figures excluded Arab East Jerusalem, annexed by Israel in 1967 and considered by Palestinians and many nations, including the United States, to be occupied territory.

Shamir also told European leaders that his government aims to ''continue the peace process, bring calm to the region, and solve the Palestinian problem'' based on Shamir's May 1989 initiative that calls for Palestinian elections in the occupied territories, he wrote.

The foreign ministry spokesman reiterated Shamir's position that Arab residents of East Jerusalem and Palestinians affiliated with the Palestine Liberation Organization would be excluded from the proposed elections and peace process.

Shamir also urged European leaders to shun contacts with the PLO and to speak out against Arab criticism of Israel, the spokesman said. In order to ''diffuse tension generated artificially'' by Arab states, Europeans should ''voice their opinions strongly against Arab criticism of the new government,'' the spokesman said Shamir wrote.

LONDON (JUNE 25) UPI - Britain Monday welcomed the ''positive solution'' that led to the release Monday of Chinese dissident Fang Lizhi and his wife and said the astrophysicist had been invited to study with the prestigious Royal Society.

Chinese officials said they gave ''lenient treatment'' to Fang and his wife, Li Shuxian, both 54, after admitting political errors linked to last year's pro-democracy movement.

They said the couple, who had been harbored in the U.S. Embassy in Beijing

were allowed to leave China to seek medical treatment. British and U.S. officials said they were en route for Britain aboard a U.S. military plane that was expected to arrive late Monday or early Tuesday.

The Foreign Office and a spokesman for Prime Minister Margaret Thatcher said the Fang and his wife were welcome in Britain, where they said Fang had received an invitiation to study with the Royal Society, one of Europe's oldest scientific bodies. He may work at either Oxford or Cambridge, they said.

''We are confident that he will soon find an academic position appropriate to his talents where he can carry out his researches in an atmosphere conducive to study,'' a statement said.

''We are pleased that a positive solution has been found to this long-standing problem,'' it said. ''We are glad that we have been able to contribute to this outcome and warmly welcome the Chinese government's decision to allow him and his wife to leave.''

The Foreign Office said it had no details about the health of the couple, but added medical treatment would be available if required.

It would not comment on the negotiations that led to the deal being reached, but the British Broadcasting Corp. reported both Washington and Beijing may have wanted to use a third party so that neither side would lose face.

London was eager to participate because it wishes to have sound relations with Beijing in the runup to China's assumption of sovereignity of Hong Kong, it said.

#90176u0819 06/25/1990 ~United Press International

TOKYO (JUNE 25) UPI - Texas oilman T. Boone Pickens did not list $1 billion in assets on a 1989 tax form, and the president of a Japanese auto parts maker said Monday the omission indicates Pickens is attempting to force greenmail on his company.

Pickens arrived in Tokyo Sunday for the latest round of an 16-month battle to gain access to the management ranks of Koito Manufacturing Co., Japan's largest auto parts maker.

Pickens is the company's major shareholder but has not been given a seat on the board, a fact Pickens said exemplifies Japan's closed-door policy on foreign investment.

Pickens, who owns 26 percent of Koito stock, will press his demand for

four of Koito's 20 board seats at an annual shareholders meeting Thursday.

Koito says Pickens only wants greenmail from the company. Greenmail is a payment made by a targeted company to a potential acquirer in order to stop a takeover. Pickens denies he is interested in the tactic.

Koito President Takao Matsuura said Pickens failed to list $950 million in assets when Boone Co., Pickens' private investment firm, filed its 1989 franchise tax report in Delaware.

A copy of the tax report, supplied to the media by Koito, showed Boone Co. assets of $1.9 million. The Koito stock owned by Boone Co. was worth about $950 million last year, Matsuura said.

''This appears to reinforce our conclusion that Boone Co. is not the genuine owner of the Koito shares,'' Matsuura said in a letter to Pickens which was released to the media.

Boone Co. Vice President Sidney Tassin said the tax form was amended this month to correct the mistake which he said was made by an accountant who did not know foreign assets had to be included on the form.

''On June 12 a letter went by certified mail that contained our amended filing,'' Tassin said.

''This is just a diversionary tactic to avoid the real issue of denying the largest shareholder a seat on the board,'' said Mark Helmke, a Pickens adviser.

Matsuura said he suspects Pickens did not buy Koito stock with his own money but was given the stock by Kitaro Watanabe, the owner of a Japanese auto dealership.

(JUNE 25) UPI - Iran is digging out from a devastating aftershock to last week's earthquake. Some Iranians appear amazed at the outpouring of international aid. One cleric in the devastated region said... ''We in Iran did NOT know we had so many friends.'' But some remain suspicious. A hard-line Tehran newspaper said suspicious aid is coming from, quoting here... ''the criminal U-S government.''

Peace talks resume today between representatives of Liberian President Samuel Doe and National Patriotic Front rebels who want to oust him. Sources say there's little hope that the peace talks would succeed without Doe's resignation. The talks are scheduled to resume at the U-S Embassy in Freetown, the capital of neighboring Sierra Leone .

Investigators report that the American Medical Association gave a one-Millionthousand-dollar retirement deal to one of its former executives. The investigation says the payment to Joe Miller came without the knowledge or approval of the A-M-A's governing board. The A-M-A's policy-making House of Delegates also was told Miller received a consulting contract after he retired in 1982.

Officials in Tallahassee, Florida, say a nine-year-old boy is recovering today after receiving ''several hundred'' stitches following an alligator attack. Dominic Reeves was followed his dog into the water into a small lake... and witnesses say the gator attacked immediately. His mother pulled him free.

#90176u0853 06/25/1990 ~United Press International

(JUNE 25) UPI - The Tokyo Stock Exchange took a battering Monday, with the leading indicator losing nearly 2 percent of its value.

The Nikkei average of 225 selected issues plunged 570.38 points and ended the day at 31,124.19 - a 1.8 percent drop. The Nikkei had already lost 392.70 points Friday.

The broad-based Tokyo Stock Price Index fell 40.04 points to end at 2,301.02, more than doubling its loss of 19.07 points Friday.

Volume was extremely thin, with only about 300 million shares changing hands, down from 350.69 million shares Friday.

Elsewhere in Asia, stock prices rose sharply on the Hong Kong stock exchange on a late rally sparked by the Chinese government's freeing leading Chinese dissident Fang Lizhi.

The Hang Seng index surged 26.00 points to close at 3,276.44. The rise followed a gain of 4.23 points Friday.

Volume was a strong 2.34 billion shares, up from Friday's turnover of 2.15 billion shares.

Stocks opened slightly higher and kept momentum in slow morning trading.

On the Singapore Stock Exchange, prices slumped in light trading, pulled down by a lack of institutional interest and the drop in Tokyo.

The Straits Times Industrial Index fell 9.76 to 1522.62. The All Singapore Index fell 1.43 to 429.57. Turnover was a light 41.43 million shares.

Analysts said the market was continuing to drift in thin trading, with most investors adopting a wait-and-see attitude.

Share prices also softened on the Sydney Stock Exchange.

The All Ordinaries index gained 0.3 point to 1512.8. Turnover was 143.1 million shares.

Institutional investors said they were watching leading stocks in view of the fiscal year ending June 30.

#90176u0883 06/25/1990 ~United Press International

TOKYO (JUNE 25) UPI - U.S. and Japanese trade negotiators began a new round of trade talks Monday and the Americans said they are pleased with Japan's efforts to reform basic economic structures that contribute to the nearly $50 billion annual U.S. trade deficit with Japan.

A senior U.S. administration official said the Japanese have came up with proposals in the latest round of trade talks that could lead to a reduction in the trade imbalance in two to three years.

The proposals detailed in 10 hours of trade talks represented an end to Japan's foot-dragging on the trade issue, said the official, who asked not to be identified but said he spoke for the whole U.S. delegation.

The negotiators are scheduled to conclude the talks Tuesday but have said they will extend them as long as needed to agree on final recommendations to be delivered to President Bush and Prime Minister Toshiki Kaifu.

''I would describe the talks today as being cooperative,'' the U.S. official said. ''We have made progress. We have heard progress this evening in each of the areas.''

The United States presented Japan last year with a list of six areas, such as its complex distribution system and closed business practices, it wanted Tokyo to reform to help bring down the stubborn trade deficit.

Japan issued a comparable list of seven changes the United States should make, including reducing the U.S. budget deficit and increasing the savings rate.

The two countries reached an interim agreement in April and are to have a final agreement ready in July.

A week ago, the U.S. trade representative, Carla Hills, said in a speech in New York that Japan must end its ''foot-dragging'' in the talks, known

as the Structural Impediments Initiative.

Other U.S. officials spoke of Japan's backsliding on promises made in the interim report.

The tone of the senior U.S. official who briefed reporters after the first day of talks was more optimistic.

''I think with what we learned in the last day or two - one, we received their first draft of the final report, and, two, through our talks today - that Mrs. Hills would agree with what I have been saying,'' the official said.

He cautioned that the issues have not been completely resolved and that, even when they are, the changes would not produce immediate results.

''I think it would be a mistake to measure the success by the next few months of trade figures,'' the official said.

The official would not discuss details of the talks but he acknowledged a key sticking point has been the level of Japanese spending on public works projects, such as sewer systems and highways.

The U.S. side sees public spending as a means to stimulate all types of spending in Japan, which would theoretically lead to more imports of foreign goods.

News reports said Japan was ready to offer to spend about $2.7 trillion, or about 8 percent of its gross national product, on infrastructure improvements over the next 10 years. The United States has asked for an amount equal to 9 or 10 percent of Japan's gross national product.

A U.S. deputy trade representative, Linn Williams, who heads the U.S. negotiating team, said in interviews with the Japanese media that Japan must spend at least $3.2 trillion on public works projects over the next 10 years.

Many Japanese acknowledge the need for more infrastructure spending in a country where less than half of all homes are connected to sewer mains.

Japan's spending on public works projects amounted to about 6.7 percent of its GNP in 1989. Its budget for fiscal 1990, which began April 1, totals about $429 billion.

Japan is expected to press the United States to reduce its budget deficit.

In the 32-page interim report issued in April, Japan pledged to ease controls on the opening of large-scale retail stores to give foreign firms

greater access to the Japanese market and revise the Antimonopoly Law to include stricter penalties against corporations violating its provisions.

''Japan will carry out its promises (made in the report),'' Foreign Ministry spokesman Taizo Watanabe said. He added, however, that the United States must understand the limitations of Japan's commitments.

#90176u0982 06/25/1990 ~United Press International

JOHANNESBURG, SOUTH AFRICA (JUNE 25) UPI - Racial reform in South Africa has provoked an unprecedented onslaught of right-wing terrorism, forcing police for the first time to regard white extremism as a threat at least equal to that from black guerillas.

An unprecedented onslaught of bombings and anti-government plots over the past month, linked by police or media to right-wing groups, prompted Brig. Leon Mellet, chief spokesman for the Ministry of Law and Order, to say Monday: ''The seriousness with which these acts are being viewed ... is as great as any other.

''Special attention is being given to (them),'' he said. ''These acts generate further acts.''

The extreme right has promised violence as a response to President Frederik de Klerk's relaxation of 42 years of apartheid. Since the February launch of de Klerk's reforms and the legalization of the ANC, the movement's guerrilla incursion has subsided while white violence has been increasing.

Government officials insist that right-wing threats and action will not be tolerated.

''Escalating violence will not be allowed to jeopardize the process of change,'' de Klerk said in an interview this month.

Anti-apartheid activists concede the government's assurances are being borne out by decisive action against extremists.

''It would be churlish to say (the government) is not making an effort. It is,'' an ANC spokesman said Monday.

Police have detained a member of the white-supremacist Afrikaner Resistance Movement, known as the AWB, for the May 23 bombing of a museum house in Pretoria and another for the June 9 bombing of a black union office in the racially tense town of Welkom.

They have offered an $18,800 reward for an extremist who declared war on

the government in a videotaped statement June 19 and now is wanted in a weapons theft. Police also temporarily detained 11 right-wingers on the basis of a Saturday newspaper report of a plot to assassinate de Klerk and black leader Nelson Mandela.

Police Monday are still hunting those responsible for two Saturday night bombings of offices of the ruling National Party in the Johannesburg area. No one has claimed responsiblity, but Nationalist members of Parliament have blamed the far right.

The AWB, which claims 20,000 active supporters and is the foremost right-wing alliance, has been implicated in almost all the actions, but shadowy splinter organizations such as the Farmers' Army, White Wolves, and Farmers' State Party have anonymously linked themselves to illegal activities. Police estimate there may be more than 40 such extremist groups, but decline to say which are being investigated.

''We've made some good arrests,'' Mellet said, saying he believes police are not finding impartial investigation difficult.

The force has been accused of being riddled with far-rightwingers. In a move aimed mainly at conservatives, police leaders have forbidden officers from being active members of political parties.

Police also received substantial pay increases this month, a tactic senior officers privately concede has gone some way to curbing bitterness over the change in focus of their efforts. Police authorities are also attempting to recruit better educated and more enlightened recruits.

#90176u1027 06/25/1990 ~United Press International
(JUNE 25) UPI - Chinese dissident Fang Lizhi and his wife flew to exile in Britain after spending more than a year in refuge at the U-S misson in Beijing Bay-JIHNG'. The official Xinhua news agency says the couple received ''lenient treatment'' after committing political errors involving last year's pro-democracy movement. British officials confirm the couple took a U-S military jet to London. White House officials say U-S officials played a role in securing Fang's release.

European Community leaders opened a two-day summit today at Dublin Castle in Ireland. Topping the agenda is a proposal by France and West Germany to grant economic aid to the Soviet Union in hopes of bolstering President Gorbachev GOHRB'-ah-chawf. France and West Germany say the Soviet economy is in criticial condition and needs aid from the West. Britain opposes the proposal, with one official saying- ''there's NO evidence of Mr. Gorbachev going down.''

Israeli Prime Minister Yitzhak Shamir offered assurances to the Soviet Union and European leaders that immigrants to Israel will NOT be settled in the Gaza Strip and West Bank. A Foreign Ministry spokesman indicates Shamir wrote letters to Soviet and European Community leaders. Officials say Israel will NOT forbid immigrants from settling in the Gaza Strip and West Bank, but- quoting here- ''will NOT encourage them to live there.''

The former model who lured District of Columbia Mayor Marion Barry into an F-B-I sting operation is expected to testify today in his drug and perjury trial. A report says Hazel ''Rasheeda'' Moore is expected to take the stand this afternoon. It was previously thought that her testimony would be postponed to the final days of the trial, which begins its fourth week today.

#90176u1085 06/25/1990 ~United Press International

SEATTLE (JUNE 25) UPI - Boeing has spent more than $11 million this year on tests for the Navy's Sea Lance anti-submarine missile - despite the scuttling of the torpedo program by the Defense Department in January, it was reported Monday.

The Navy canceled the $3.3 billion Sea Lance on Jan. 3 after allocating $61.1 million for its development this fiscal year and said it will cease all funding for the project as of Sept. 15.

However, according to a report in Monday's Seattle Post-Intelligencer, Boeing Aerospace and Electronics last week announced it completed a "pyrotechnic shock test" and a "panel separation sled test," which were designed to ensure the missile's torpedo survives its launch and flight and sheds it protective covering. According to the newspaper, the Navy presented Boeing with a $3.6 million "award fee" last month for the tests.

However, a spokeswoman for Adm. W.C. Carlson, assistant deputy commander for Anti-Submarine Warefare and Undersea Warfare Systems in Washington, D.C., said as far as the Navy is concerned the Sea Lance testing is over. "As far as the admiral knows, Boeing has completed its testing," she told the Seattle newspaper. Still, Boeing has announced it plans to drop the missile from an airplane in another test later this summer.

In January, the Navy notified Boeing it was canceling the Sea Lance systems work, but authorized the military contractor to continuing testing "as necessary to perform the portion not terminated," the newspaper said.

The Sea Lance torpedo was designed to be fired from a submarine and descend by parachute near its target, shed the parachute and then hunt out an enemy submarine target.

#90176u1096 06/25/1990 ~United Press International

PINE BLUFF, Ark. (JUNE 25) UPI - A man who killed 14 members of his family and two other people in a 1987 Christmas holiday spree faced execution Monday night for the largest mass slaying of a family in the Untied States.

Ronald Gene Simmons, 49, of Dover, Ark., who authorities said went on the murder binge because his daughter had broken off an incestuous relationship with him, was scheduled to be executed by lethal injection at 9 p.m. CDT.

No litigation pends in the case because Simmons has declined to appeal, saying, ''I only ask for what I deserve. Let the torture and suffering in me end.''

Simmons could halt the execution by changing his mind and saying he does want to go through the appeal process.

Simmons was in a holding cell about 20 steps from the death chamber at Cummins prison, about 20 miles southeast of Pine Bluff. His death would be the second execution in a week in Arkansas, which carried out its first execution in 26 years June 18 when John Edward Swindler, convicted of killing a police officer, was electrocuted.

Simmons also would be the 131st person executed in the United States since the Supreme Court reinstated the death penalty in 1976 and the second in Arkansas.

A death row convict in Texas also asked that no appeals be made to stop his execution, which is scheduled for early Tuesday. Former voodoo priest James Edward Smith, 37, condemned for killing a man in a robbery, said he was looking forward to reincarnation and considers more prison time to be cruel and unusual punishment.

Despite Smith's wishes, his mother, Alexine Hamilton of Indianapolis, told lawyers to file an appeal Monday to halt the execution. Smith was taken Monday for a mental examination.

Manuel Ulibarri of Aurora, Colo., was in Arkansas in hopes to talk face-to-face with Simmons before the execution. Becky Simmons, 46, Ulibarri's sister and Simmons's wife, was among those killed.

''I think it would take a big pressure off of us knowing what was the motive behind it,'' Ulibarri said. ''I know at one time he really loved his children and he loved my sister but all that changed towards the later years.''

Ulibarri said Simmons had rejected a previous request to visit him but said he hoped the prison chaplain or someone could persuade him to allow him to visit.

Prosecuting Attorney John Bynum of Russellville said he thought Simmons's primary motive was to kill his daughter, Sheila McNulty, 24, of Camden, and her husband Dennis, 33.

''He had some grievances with some of these other people and some ill feelings,'' Bynum said, ''but in my opinion, the true motive ... was basically so that he could kill Dennis and Sheila, and he had to kill all these people in preparation for Dennis and Sheila.''

Simmons had been charged in 1981 in New Mexico with incest for an affair with Sheila and she apparently fathered a child by him, but he was never tried and fled to Arkansas. A long note introduced into evidence indicated he had a love-hate relationship with Sheila. In it, Simmons wrote that she had destroyed him and he said, ''I will see you in hell.''

Bynum said he believed Simmons killed the members of his family from Dec. 22-26, 1987, then stayed in the house two nights with some of the victims before driving into nearby Russellville on Dec. 28, where he killed two more people and wounded four others before surrendering, saying he had ''gotten everyone who had hurt'' him.

One of those killed in Russellville was Kathy Kendrick, 25, who had spurned his amorous advances. The other was a man, J.D. Chaffin, 33, who authorities said apparently was in the wrong place at the wrong time.

''The things that stood out the most were the whites of his eyes and the whites of his teeth,'' said Julie Money, one of those wounded in Russellville. ''He looked like a mad dog staring at me. The gun looked like a cannon.''

(JUNE 25) UPI - It could be harder for minors to get an abortion following a Supreme Court ruling today. The court upheld the constitutionality of laws requiring that parents be notified of minors seeking abortions. The rulings by Justices Anthony Kennedy and John Paul Stevens uphold parental notification laws from Ohio and Minnesota aimed at restricting younger women's access to abortion.

The justices also issued a 5-4 ruling today that will make it more difficult for families wishing to take injured loved ones off life support

systems. The court ruled that states can require extensive evidence of a person's wishes before withdrawing life sustaining medical treatment.

The first round of trade talks between U-S and Japanese negotiators in Tokyo has ended with the Americans reporting progress. U-S officials say they're pleased with Japan's efforts to end its foot-dragging on the trade issue... and say there could be a reduction in the trade imbalance in two to three years.

Israel is promising European leaders and the Soviet Union that immigrants will NOT be used to ''uproot'' Palestinians in Israel-occupied territories. A Foreign Ministry spokesman says Israeli Prime Minister Shamir wrote letters to the European Community and Soviet President Gorbachev saying immigrants will NOT be settled in the Gaza Strip and West Bank.

#90176u1184 06/25/1990 ~United Press International

WASHINGTON (JUNE 25) UPI - The Supreme Court ruled Monday that states can require extensive evidence of a person's wishes before withdrawing life sustaining medical treatment.

The 5-4 ruling by Chief Justice William Rehnquist will make it tougher for families to end such treatment for loved ones who are in a coma. The ruling comes in a closely watched case from Missouri involving attempts by the parents of Nancy Beth Cruzan, who has been in an irreversible coma since January 1983, to end medical treatment.

Justices Byron White, Sandra Day O'Connor, Antonin Scalia and Anthony Kennedy joined Rehnquist in the majority.

The high court affirmed the decision of the Supreme Court of Missouri, which held that trial testimony in the Cruzan case did not amount to ''clear and convincing'' proof of the patient's desire to have withheld food and nutrition.

The testimony involved statements Cruzan made to her housemate about a year before an accident that left her in a coma. At that time Cruzan had said she would not want to live if she had to face life as a ''vegetable.''

''The observations did not deal in terms with withdrawal of medical treatment or of hydration and nutrition,'' the court said. ''We conclude that a state may apply a clear and convincing evidence standard in proceedings where a guardian seeks to discontinue nutrition and hydration of a person diagnosed to be in a persistent vegetative state.''

The court called Cruzan's parents ''loving and caring'' and acknowleged their plight, saying, ''Close family members may have a strong feeling ... that they do not wish to witness the continuation of the life of a loved one, which they regard as hopeless, meaningless and even degrading.

''But there is no automatic assurance that the view of close family members will necessarily be the same as the patient's would have been had she been confronted with the prospect of her situation while competent.''

Justice William Brennan, in an emotional dissent joined by Justices Thurgood Marshall, John Paul Stevens and Harry Blackmun, said the court has ''discarded evidence of her will, ignored her values and deprived her of the right to a decision as closely approximating her own choice as humanly possible. They have done so disingenuously in her name and openly in Missouri's own.

''That Missouri and this court may truly be motivated only by concern for incompetent patients makes no matter,'' Brennan said. He then quoted the late Justice Louis Brandeis and said, ''The greatest dangers to liberty lurk in insidious encroachment by men of zeal, well-meaning but without understanding.''

The case began when Cruzan was thrown from her car in a crash Jan. 11,

1983. She suffered severe head injuries and has never regained consciousness. The only medical treatment provided is a ''gastrostomy tube'' through which she receives food and water.

Her parents sought to have the tube removed in 1987 and let their daughter die. The hospital and eventually the state supreme court refused.

Seeking Supreme Court review, her parents said, ''Unfortunately, Nancy Cruzan's case is not unique. Thousands of people lie in hospitals across the United States in the persistent vegetative state without hope of ever recovering. ... Review ... by this court is vital to determine whether individual medical treatment should be a decision for patients, families and their doctors, or for the states.''

#90176u1237 06/25/1990 ~United Press International

WASHINGTON (JUNE 25) UPI - Here is the text of President Bush's remarks in welcoming Nelson Mandela, deputy president of the African National Congress, to the White House Monday during a brief ceremony on the South Lawn:

Well, welcome to all of you, and it is a great pleasure, a sincere pleasure for Barbara and me to welcome to the White House Mr. and Mrs. Mandela. Mr. Mandela, a man who embodies the hopes of millions.

In our meetings this morning, he and I will talk about the future of South Africa. And it is my sincere hope that these talks will be productive discussions that will contribute to positive change toward true democracy, and the dismantling once and for all of apartheid. We meet at a time of - we meet at a time of transition for South Africa.

We applaud the recent steps President de Klerk and the government of South Africa have taken to expand the rights and freedoms of all South Africans.

These are positive developments, steps toward fully free and democratic future that we all wish to see for all of the people of South Africa. In order for progress to continue, we must see on all sides a clear commitment to change. All parties must seize the opportunity to move ahead in a spirit of compromise and tolerance, flexibility and patience and from all parties, we look for a clear and unequivocal commitment to negotiations leading to peaceful change.

I call on all elements in South African society to renounce the use of violence and armed struggle, break free from the cycle of repression and violent reaction that breeds nothing but more fear and suffering. In the words of the great Martin Luther King Jr., ''Let us not seek to satisfy our thirst for freedom by drinking from the cup of bitterness and hatred.''

Mr. Mandela, in the eyes of millions around the world, you stand against apartheid, against the system that bases the rights and freedoms of citizenship on the color of one's skin. That system is repugnant to the conscience of men and women everywhere, repugnant to the ideals that we, in America, hold so dear. No system that denies the rights that belong to each and every individual can endure forever. Apartheid must end.

The United States, committed to the concept of free market and a productive private sector, is ready to do its part to encourage rapid and peaceful change toward political and economic freedom. We will continue to urge American firms that are still doing business in South Africa to play a progressive role in training and empowering blacks and building a foundation for future prosperity.

But while the reform process has moved forward, and it has, apartheid remains a reality - and genuine democracy a dream. Our sanctions have been designed to support change, and when the conditions laid down in our law have been met, then, and only then, with the Congress, whether a change in course will promote further progress through peaceful negotiations.

Mr. Mandela, we, in this country, support the struggle against apartheid, and for two centuries we had our own battles. America fought its own battles to promote the standard of equal rights. It was here at the White House in a room now obscured by these coverings because we're repainting the White House - but it's right there - in the midst of the Civil War that Abraham Lincoln signed the Emancipation Proclamation, that great beacon of light and hope. And in the room where this historic document was signed, even now we feel the power of the undeniable truth that guided Lincoln's hand: That all men must be free.

In this past year, freedom has made great gains. A terrible chapter of oppression has ended for millions of men and women. In Eastern Europe, in Asia, and in this hemisphere, people have defeated, through peaceful means dictatorships that promised freedom and progress but delivered only poverty and repression. The triumph is far from universal. There are still those who rule through force and terror, but the events of this year have been clear: the future belongs not to the dwindling ranks of the world's dictators, but to democracy, the millions of friends of freedom the world over.

Mr. Mandela, you said many years go, before the first of your 10,000 days in prison, that there is no easy walk to freedom. Your years of suffering, your nation's suffering, have borne that out. But just as this past year so many millions of people in Eastern Europe and elsewhere tasted freedom, so too South Africa's time will come. As Martin Luther King said on the steps of the Lincoln Memorial, ''We cannot walk alone.'' Sir, we here in America walk in solidarity with all the South Africans who seek, through

non-violent means, democracy, human rights, and freedom.

Once again, it is a sincere privilege to welcome you to the White House. And may God bless you and all the people of South Africa. Welcome, sir.

LONDON (JUNE 25) UPI - Romanian President Ion Iliescu says the tough tactics used by his country's miners to break up recent anti-government protests were justified but he plans to ask Britain for help to train a riot control force, The Times reported Monday.

In an interview with the British newspaper, Iliescu was unrepentant about the behavior of about 5,000 miners who two weeks ago beat up

anti-government protesters and damaged buildings in Bucharest. He charged the Western media had ignored events of June 13, when he claimed unspecified right-wing groups attempted a coup.

''What is fundamental is who started the violence and who provoked the violence,'' Iliescu told the newspaper.

''What government would be interested in provoking violence knowing that any violence and instability would be directly linked to it?'' the newly inaugurated president said.

''I think that things are de-escalating by themselves and the world will reach a stage when it will have a more rational approach to what happened.''

Iliescu said police and some army troops had been ''psychologically incapable'' of suppressing demonstrators who had blocked central Bucharest for 53 days because of the bloodshed of the December revolution that toppled Nicolae Ceausescu.

''Even though we had a legally elected government and state institutions were being attacked, including police headquarters, the Ministry of the Interior and even the television building, the police did not dare shoot to scare them (the rioters), even in self-defense,'' said the president, who was formerly a Communist Party leader.

Iliescu in the interview moved to defuse widespread Western condemnation of the violence, which prompted the European Community to freeze a vital trade and cooperation pact.

He claimed the miners arrived in Bucharest spontaneously to help the government after seeing television broadcasts of anti-government attacks. He had thanked the miners for their help and support after the protests were quashed.

The president said he was considering making a formal request to Britain for help in creating a new riot control force. He cited the police forces' handling of London anti-poll tax riots in April, saying his forces lacked similiar experience.

''Perhaps an exchange of experience with Madame Thatcher would be worthwhile on this matter,'' he said.

The newspaper said many miners had volunteered for the proposed anti-riot squad, which Iliescu said would be a part of the police force. Some opposition politicians and student leaders are wary of the plan, saying the squad could become a modern version of the Nazi brownshirts, The Times said.

HUNTSVILLE, Texas (JUNE 25) UPI - A killer and former voodoo priest who wants to be executed as scheduled Tuesday is mentally competent to make that decision, a psychologist said Monday after an 11th-hour examination.

James Edward Smith, 37, has refused to allow appeals to be filed on his behalf because he believes continued incarceration is cruel and unusual punishment and that he will be reincarnated after execution.

The early Monday mental evaluation of Smith by psychologist Jerome Brown was set up after attorneys for Smith's mother brought up psychological evaluations conducted in 1978 in Miami. Smith at that time was found innocent by reason of insanity in a Dade County, Fla., robbery.

Brown previously had examined Smith and found him competent, but sought the new evaluation after reviewing the Florida case.

''Having now re-evaluated James Edward Smith ... I have concluded Mr. Smith does not exhibit any signs of mental illness or mental deficit, that he is capable of making a rational choice among his legal options, and that he is fully aware of his legal options,'' Brown wrote Monday.

''Additionally, Mr. Smith is fully aware that his execution is scheduled for some time past midnight tonight, on June 26, 1990, and the reasons for

his punishment of execution.''

Brown said Smith showed no signs of psychosis, thoughts of suicide or ''delusional religious beliefs.'' Attorneys for the state and Harris County on Monday submitted Brown's latest findings to the U.S. 5th Circuit Court of Appeals and the Supreme Court.

Smith is a former Hare Krishna follower who also has said he is a former voodoo priest. Before receiving a stay of an execution scheduled two years ago, Smith asked prison officials for dirt to enable him to perform a voodoo ritual marking of his body to assist what he believed would be his reincarnation.

Attorneys for Smith's mother, Alexine Hamilton of Indianapolis, planned to file papers Monday with the 5th Circuit in an effort to block Smith's death by lethal injection. Hamilton claims her son is not mentally capable of deciding to waive appeals.

U.S. District Judge Kenneth Hoyt of Houston refused Sunday to allow Hamilton to intervene, saying she had no authority in the case because her son had been found mentally competent.

''If the man's not competent, or if there is a sufficent question as to whether he is competent, you want to err on the side of being sure,'' Assistant Attorney General Bob Walt said of the last-minute mental exam of Smith.

''This guy is not making the choice I or you would make, but he's not playing on the same field as we are. He truly believes in reincarnation, so having the state take his life is no big deal to him.''

Smith complained bitterly after his mother won a stay of his May 11, 1988, execution date.

''Time is all I have,'' he said recently of the earlier stay. ''I could already be 2 years old in another body, a 2-year-old prodigy.''

Smith was sentenced to die for the 1983 shooting of Missouri City insurance agent Larry Rohus, 44, who was killed after turning over money during a robbery at the Union National Life Insurance Co.

After handing Smith a bag of money, Rohus pleaded with the gunman not to shoot him.

Shortly after his first execution date was stayed, Smith claimed to have been involved in ritualistic killings in Orangeburg, S.C., New York City and Miami. But authorities in those areas said they were unable to substantiate any of Smith's claims that human sacrifices were offered to

voodoo gods, and Smith said last week that he had lied.

MANILA, PHILIPPINES (JUNE 25) UPI - Typhoon Percy picked up strenghth Monday as it roared toward the Philippines, where 47 people were killed and thousands left homeless in a devastating storm last week.

The Manila weather bureau said Percy's peak winds had reached 115 mph and could gain more strength before it smacks the main Philippine island of Luzon Wednesday or Thursday.

Percy - expected to be the third major storm to hit the Philippines this year - was about 500 miles from Manila in the Pacific.

Percy was expected to follow the path of Typhoon Orphelia, which slammed the Philippines' rice-producing northern farmlands Thursday and Friday with peak winds of 75 mph before moving on to Taiwan.

Relief officials reported 11 more fatalities Monday from Orphelia, bringing the overall toll of lives to 47. The latest casualty report included a family of five, which perished in a landslide in northern Benguet province. Nineteen others were reported missing.

The officials said 140,000 Filipinos lost their homes or their livelihoods because of the storm.

News reports said Orphelia left five people dead and four missing in Taiwan.

Weather forecaster Amado Pineda said Percy, which has a 400-mile rain span was a stronger typhoon than Orphelia.

''It is very powerful and has a wide circulation that, even if it does not pass here, its fringe winds will hit metro Manila,'' said Pineda.

On Oct. 24, 1988, Typhoon Ruby, which matched Percy's peak winds, killed 181 people on land and another 264 at sea when it sank the ferry Dona Marilyn.

#90176u1327 06/25/1990 ~United Press International

PITTSBURGH (JUNE 25) UPI - The Pittsburgh Pirates moved to shore up their beleaguered pitching staff Monday by acquiring right-hander Jay Tibbs from the Baltimore Orioles.

Tibbs, 28, was acquired in exchange for a player to be named, spokesman Jim Lachima said. Tibbs was expected to be in uniform Monday night when Pittsburgh played Philadelphia at Three Rivers Stadium.

Tibbs has made 10 appearances for Baltimore, all starts, this season. He joins the Pirates with a 2-7 record and a 5.68 ERA.

It had not yet been determined what Tibbs role will be for the Pirates.

''I did talk with (General Manager) Larry Doughty and (Manager) Jim Leyland briefly this morning and they really didn't give any indication if Jay will start or be a reliever,'' Lachima said. ''But Tibbs has been a starter all year.''

Doughty gave no immediate indication when the player would be named or where he would come from.

The acquisition is seen as a move to beef up Pittsburgh's ailing pitching crew. John Smiley is recovering from a broken bone in his left hand, Ted Power is recovering from a strain in his right tricep and Bob Walk is nursing a strained right groin. All are on the disabled list.

The Pirates held a half-game lead over Montreal to lead the National League East before beginning Monday night's three-game homestand with Philadelphia. Pittsburgh begins a 10-game West Coast road trip in San Francisco on Friday before the All-Star break July 9-11.

#90176u1329 06/25/1990 ~United Press International

WASHINGTON (JUNE 25) UPI - The Federal Reserve Board said Monday it has granted permission to Banca Commerciale Italiana to provide securities brokerage and foreign exchange services to institutional clients in the United States.

The Milan, Italy, bank has assets of $129.9 billion and operates offices in New York, Chicago and Los Angeles. The services will be provided through the bank's subsidiary, BCI Capital Corp., of New York.

''The board has determined that the performance of the proposed activities (by Banca Commerciale) can reasonably be expected to produce public benefits which would outweigh adverse effects,'' the Fed said.

In addition to the brokerage services, the bank will provide advisory services on domestic and international mergers and acquisitions, joint ventures, divestitures, leveraged buyouts and other corporate transactions the Fed said.

The bank was also granted permission to:

-Perform studies ''principally in the context of determining the attractiveness and feasibility of particular corporate transactions.''

-Offer valuation services.

-Provide statistical forecasts and other data on transactions in foreign exchange markets.

Banca Commerciale ''will limit its services to institutional customers, who will be financially sophisticated and therefore likely to be aware of alternative sources of advisory and execution services and to have the resources to compare performance and prices,'' the Fed said.

The Italian institution's application was opposed by the Investment Company Institute, an association of mutual funds, which questioned whether the securities activities would violate federal banking laws.

But the Fed said it believes ''that the comments made by the ICI do not warrant denial of this application.''

#90176u1344 06/25/1990 ~United Press International
ISLAMABAD, PAKISTAN (JUNE 25) UPI - Despite the Soviet Union's military withdrawal 20 months ago, the American-supported Afghan resistance is becoming increasingly isolated and desperate, analysts said Monday.

The Pakistan-based rebels fear a cut-off in U.S. aid as well while they face a political offensive by the communist regime in Kabul, the analysts said.

Its unity is also under question, experts believe.

The resistance has been fighting for 12 years to oust the pro-Soviet government in Afghanistan, and is now under pressure to come up with a viable initiative that would project it as a more credible political force.

''The Mujahideen (guerrillas) cannot afford to let things go on as they are or they will increasingly be left out,'' said Ijaz Gailani of Islamabad's Institute for Strategic Studies. ''There's already a sense of confusion and desperation among them.''

In a bid to respond to initiatives by the superpowers and by the government of President Najibullah, the resistance government-in-exile recently received 30 former Afghan political leaders and intellectuals at its headquarters in the Pakistan border city of Peshawar.

Members of the group, coming mostly from the United States, Europe and Iran, include ex-Afghan prime minister Mohammad Youssef and other former officials who served in governments prior to the 1978 communist revolution in Kabul.

The delegation is preparing a document outlining a possible formula for ending the civil war, which has cost the lives of about 1 million people and caused more than 6 million others to become refugees.

''The Mujahideen want this third party on the scene to try and break the stalemate,'' said one Pakistani expert on Afghanistan. ''The delegates came here with a clean slate. But they are anxious to forge unity within the Mujahideen.''

Since the Soviet Union in February 1989 withdrew the last of its troops backing the government of Najibullhah, the guerrillas have been unable to capture any major urban centers.

Their failures have resulted from a lack of experience in conventional warfare and from internecine disputes that have flared into bloody conflicts since the withdrawal of the Soviet occupation force, the common enemy of the rival guerrilla groups.

Najibullah, meanwhile, has defied Western predictions of his swift overthrow following the pullout and is exuding increased confidence.

Last month, the 43-year-old former head of the secret police launched his version of perestroika in a bid to build a more moderate image for his regime. Diplomats have described the moves as cosmetic.

He appointed as prime minister a non-member of his ruling People's Democratic Party, Fazle Haq Khaliqyar, and called a grand assembly, known as a Loya Jirgah. It approved amendments to the constitution committing the country to political pluralism and liberalizing the economy,

Faced with the rebel incompetence and the robustness of Najibullah, the United States is reportedly seeking to disengage from the conflict, which has cost it billions of dollars in aid to the resistance.

#90176u1345 06/25/1990 ~United Press International

(JUNE 25) UPI - A Supreme Court ruling today makes it tougher for familes to withdraw life-sustaining medical treatment from loved ones in a coma. It means states can require extensive proof of a person's wishes before such treament is withdrawn. The high court ruled in a Missouri case involving attempts to end treatment for a woman who has been in a coma since 1983. The decision upheld a Missouri Supreme Court ruling that the trial evidence did NOT amount to ''clear and convincing proof'' of the patient's desire to have food and nutrition withheld.

In other action, a pair of rulings today by the Supreme Court upholds the constitutionality of laws restricting minors' access to abortion. A 6-3 ruling by Justice Anthony Kennedy upheld an Ohio parental notification law... and a second ruling by Justice John Paul Stevens upheld portions of a similar law from Minnesota. The decisions mean NOT only that notice must

given... it must also be given to both parents in many cases.

The White House says it ''welcomes'' China's move allowing dissident Fang Lizhi and his wife to be flown to exile in Britain after a year in the U-S Embassy in Beijing. White House spokesman Marlin Fitzwater says Fang... a renowned astrophysicist... plans to teach at Cambridge University. Fitzwater told reporters Washington's extension of China's most-favored-nation trade status likely played a role in China's decision allowing the couple to leave.

South African officials say the latest round of racial reforms has sparked right-wing terrorism that presents a threat police say equals that from black rebels. A Law and Order Ministry spokesman says an UNprecedented onslaught of bombings and anti-government plots in the past month has been linked by police to right-wing groups. Officials say white violence has increased since South Africa's president launched reforms beginning last February.

#90176u1353 06/25/1990 ~United Press International

WASHINGTON (JUNE 25) UPI - Here is the text of Nelson Mandela's comments in being welcomed to White House Monday by President Bush:

Mr. President, it is an honor and a pleasure for my wife, my delegation, and I to be welcomed by you. This is a continuation of the rousing welcome which we have received from the people of New York and Boston, black and white. That welcome has far exceeded our wildest expectations. We look forward to visiting Atlanta and other cities, because we are confident that the warm welcome we have received is not confined to New York, Boston and Washington. That mood expresses the commitment of all the people of the United States of America to the struggle fo apartheid.

One thing that is very clear, and it has been made even more clear in the remarks by the president is that on the question of the removal of apartheid and the introduction of a non-racial democracy in our country, we are absolutely unanimous.

That is something that we have always known, because the people of America and the president in particular have spoken in this regard in very clear and firm terms. And this has been a source of great encouragement to our people. To receive the support of any government is, in our situation, something of enormous importance. But to receive the support of the government of the United States of America, the leader of the West, is something beyond words.

If today we are confident that the dream which have inspired us all these years is about to be realized, it is in very large measure because of the

support we have got from the masses of the people of the United States of America, and in particular from the government and from the president.

There are very important political developments that have taken place in our country today, and it is my intention to brief the president as fully as possible on these developments.

We are doing so because it is necessary for him to understand not only in broad outline what is happening in our country; he must be furnished with the details which may not be so available to the public so that the enormous assistance that he has given us should be related to the actual developments in the country.

I will also ask the president to maintain sanctions because it is because of sanctions that such enormous progress has been made in the attempt to addess the problems of our country. I will also inform him about developments as far as the armed struggle is concerned. The remarks that he has made here are due to the fact that he has not as yet got a proper briefing from us.

I might just state in passing that the methods of political action which are used by the black people of South Africa were determined by the South Africa government. As long as the government is prepared to talk, to maintain channels of communication between itself and the governed, there can be no question of violence whatsoever.

But when a government decides to ban political organizations of the oppressed, intensifies oppression and does not allow any free political activity, no matter how peaceful and nonviolent, then the people have no alternative but to resort to violence. There is not a single political organization in our country, inside and outside parliament, which can ever compare with the African National Congress in its total commitment to peace. If we are forced to resort to violence, it is because we have no other alternative whatsoever.

But even in this regard, there have been significant developments which I hope to brief the president on. I am also going to brief the president on the key role which the ANC now occupies in the country as a result of its efforts to mobilize the entire country around the question of peace. We have and are addressing the question of black unity. We are also addressing ourselves to means and methods of helping Mr. de Klerk to maintain his position with confidence, and to go on with negotiations without looking over his shoulder.

We have already started important initiatives in trying to mobilize the white community, not only those who support him, but even the right wing, because we are the only organization in the world that can help Mr. de Klerk to maintain his position.

And I am going to urge on the president not to do anything without full consultation with the ANC in regard to any initiative which he might propose to take in order to help the peace process in the country. As people who are operating inside, and as the architects of the peace process, it is absolutely necessary for everybody who wants to be of assistance in the struggle of the black people inside the country, and who want to help promote the peace process to have full consultation with the ANC before any step is taken.

Finally, Mr. President, I would like to congratulate you and President Gorbachev for the magnificent efforts that you are making in order to reduce international tensions and to promote peace.

It is my hope that governments throughout the world will follow your example, and attempt to settle problems between governments, and between governments and dissidents inside its country by peaceful methods. You have - you and Comrade Gorbachev have - opened a chapter in world history which might well be regarded as a turning point in many respects. And here we congratulate you and wish you every success.

#90176u1365 06/25/1990 ~United Press International

NEW YORK (JUNE 25) UPI - Prosecutors Monday described John Vento as one of the ringleaders of the mob that killed a black teenager in the city's Bensonhurst neighborhood but the defense contended Vento was not a racist and had not ''acted in concert'' with two white youths already convicted in the slaying.

During closing arguments in state Supreme Court in Brooklyn, Assistant District Attorney Martin Hershey said Vento had admitted to authorities that he helped round up the gang that set upon Yusuf Hawkins, 16.

Vento, 21, is the third of eight young white men to be tried in the killing of Hawkins, who was shot dead last Aug. 23 in Bensonhurst, a predominantly white section of Brooklyn.

The slaying inflamed racial tensions citywide and sparked a series of demonstrations, some of them violent.

Vento faces two counts of second-degree murder, riot and civil rights violations and other lesser charges.

During his closing argument, defense attorney Gerald DiChiara told the jury that his client was not a racist, pointing out that four blacks had testified about Vento's character.

''This kid is probably the least prejudiced kid you will ever find,'' DiChiara said. ''He doesn't even think black or white. He thinks friends.''

DiChiara stressed that Vento had not acted with the same intent as Joseph Fama and Keith Mondello, two other whites who were convicted in the killing last month. He said Vento was at the scene of the attack only because he was a friend of Mondello's.

''John Vento did not act in concert,'' DiChiara said. ''He was not of the same mind, playing the same game, as Joey Fama.''

But Hershey disputed that point, calling Vento ''one of the ringleaders, one of the generals'' in ''an army prepared for war.''

The legal concept of ''acting in concert'' is likely to be a pivotal issue for the jury, which must decide whether Vento was a co-conspirator with Mondello and Fama or simply an innocent bystander.

Vento had originally agreed to testify for the prosecution in return for immunity, but then reneged on the agreement.

Before he backed out, Vento told a grand jury that he had a central role in rounding up the gang, some of whom carried baseball bats into the attack.

He also testified he knew someone on the scene had a gun and that he was one of the young men carrying a bat the night of the killing.

During the trial, the prosecution contended Vento's own testimony was the strongest evidence against him that he ''acted in concert'' with the others.

''It is from Vento's own mouth that we have evidence that he not only participated, but participated with the mental state required for the two different kinds of murder with which he is charged,'' Hershey said in his closing statement.

Last month, Fama, 19, the alleged triggerman in the attack, was convicted of murder. The accused ringleader, Mondello, also 19, was cleared of murder and manslaughter, but convicted of lesser charges.

Both men received maximum prison terms on the charges.

Prosecutors had asked that the jury be allowed to consider manslaughter charges against Vento, which are easier to prove than murder and can carry a maximum sentence of up to 25 years in prison, but Owens last week refused to add those charges.

#90176u1385 06/25/1990 ~United Press International

BUENOS AIRES, Argentina (JUNE 25) UPI - A group of investors led by Citicorp of New York and the Spanish company Telefonica de Espana offered the highest bids in the sale of 60 percent of the Argentine state-run telephone company, Public Works Minister Roberto Dromi said Monday.

If the sale goes through as expected in October, it would be the most significant debt-for-equity swap ever undertaken by Argentina and its most ambitious sale of a state-run company to private interests.

Once the sale is completed, bidders would have swapped over $4.5 billion in paper for Argentine foreign debt, which totals $62 billion, in exchange for the telephone company known as Entel.

The remaining 40 percent of the company will be sold to employees, individual stockholders, and small, independent phone companies, according to Entel representatives.

Competition in the bidding was based exclusively on which company offered to buy the most Argentine foreign debt on the secondary market, where Argentine debt paper now sells for about 13 cents on the dollar.

Bidders must also offer $114 million in cash for the southern sector of Entel and $100 million in cash for the northern sector, according to the bidding rules.

An additional cash payment of $204.43 million is required to be paid by purchasers over three years for the southern zone and $176.57 million over that same period for the northern zone, the rules stipulate.

Citicorp and Telefonica Espana can purchase only one sector of the company either the northern half or the southern half, according to Maria Julia Alsogaray, manager of Entel and chief overseer of the privatization process.

The Argentine government is trying to encourage sale of northern and southern sectors to different groups so there will be competition, theoretically, in the future as to which one offers the better service.

''The bidding went better than expected,'' she said in a news conference after the bids were announced.

Earlier this month she had said there was a possiblity no company would offer to buy the money-losing Argentine phone system, which has its own foreign debt of $1.4 billion. She has frequently described Entel as in a ''state of collapse,'' awash in red ink and unable to invest in new

equipment, maintenance, and more lines.

The Italian company Stet and French Cable and Radio, backed by the U.S. bank J.P. Morgan, may be given a new chance to bid for the southern half of the company, while another U.S. group - Bell Atlantic Corp. of Philadelphia in association with Manufacturers Hanover Trust - may get a new chance at bidding for the northern half of Entel, according to Dromi.

The three companies were the only ones who offered bids out of a total of seven consortiums that originally expressed an interest.

The winning companies must invest $4.7 billion in both the northern and southern zones combined over the next seven years, according to sale rules.

Dromi said President Carlos Menem will make the final announcement Thursday awarding the winners of the two bids for both sectors of the phone company.

The amount of the bids were announced by Dromi after he opened envelopes in a public ceremony in a room of the Public Works Ministry.

According to his figures, Citicorp and Telefonica de Espana offered $2.72 billion in debt swaps for the southern part of the phone company, while Stet and French Cable and Radio offered $2.333 billion.

He said the Citicorp-Telefonica group offered $2.308 billion in swaps for the northern sector while Bell Atlantic and Manufacturers Hanover bid $2.228 billion.

''Citicorp and Telefonica de Espana must decide first of all whether they prefer the northern or the southern group,'' Dromi said.

''Once they decide that, the runner-up will be given a chance to equal the bid of Citicorp and Telefonica,'' Dromi said. ''In this case, Stet is the runner-up in the south and Bell Atlantic is the runner-up in the north.''

#90176u1392 06/25/1990 ~United Press International

LONDON (JUNE 25) UPI - A charity started and chaired by Terry Waite, the Church of England envoy believed held by a pro-Iranian group in Lebanon, launched an appeal Friday on behalf of victims of last week's devastating earthquake in Iran.

''Obviously we bore in mind that Mr. Waite is still in captivity,'' said Gillian Roberts of Y-Care International. ''But we are making our appeal entirely on humanitarian grounds. There are no political motivations behind our action.''

Waite is still the chairman of the development agency of the Young Men's Christian Association, which he began in 1984, and which now has the archbishop of Canterbury, Robert Runcie, as its temporary chairman.

Waite, 51, an assistant to the archbishop, negotiated the release of some Western hostages held by Moslem extremists in Lebanon, before his Jan. 20, 1987, disappearance.

He is believed to be held by the pro-Iranian Hezbollah group in west Beirut. Recently released hostages have said he is alive and well.

Y-Care International, the charity Waite set up three years before his abduction, has made an initial donation of $17,200 to International Rescue an organization that has rescue workers in Iran trying to help victims of the earthquake that has left an estimated 80,000 people dead. It expects to collect more funds for further relief.

''This is exactly what Mr. Waite would have liked us to do,'' Roberts said. ''He was instrumental in setting up Y-Care and was active as its chairman. Compassion in suffering - regardless of the politics of the situation - is what he would have wanted us to keep in mind.''

The appeal was sent out by Y-Care after consultation with the archbishop, who Roberts said ''obviously sees the muddying of the waters, but thinks it is important right now to be of assistance to the thousands who are suffering.''

The charity sent $1.71 million last year to aid the victims of the Armenian earthquake. It also arranged for long-term assistance, including $513,000 for a school opened by Prime Minister Margaret Thatcher during her visit to the area earlier this month.

#90176u1411 06/25/1990 ~United Press International

(JUNE 25) UPI - Witnesses in the African nation of Zambia report the worst civil UNrest since 1986. They say riot police in the capital of Lusaka used tear gas as they fought running battles today with nearly one-thousand protesters. The angry mob, which hurled objects and looted stores, was demonstrating against rising food prices and government policy. Several people were treated for injuries, but there were NO reports of any deaths.

Closing arguments began today in the New York racketeering trial of Imelda Marcos and Saudi Arabian businessman Adnan Khashoggi. The lead prosecutor in the case told the jury that evidence presented during the lengthy, three-month trial fits together like a puzzle to show the defendants'

guilt. Defense attorneys begin their closing arguments tomorrow.

#90176u1415 06/25/1990 ~United Press International

MOSCOW (JUNE 25) UPI - Most Soviet citizens no longer perceive the Communist Party as the leading force in the country and the prestige of the nation's lawmakers also has fallen, a poll in the official party newspaper Pravda showed Monday.

The poll of 1,500 Soviets, conducted by the Social Research Center of the Academy of Social Sciences, also found that 20 percent of those surveyed said they had lost interest in politics.

Pravda attributed the disillusionment with the party, Parliament and politics in general to ''the crisis of power that is still under way.''

''Evidently people who fail to see actual results feel disillusioned,'' Pravda said.

Only 18 percent of those surveyed said they are firmly convinced that the Communist Party is the nation's leading force and another 14 percent agreed partially.

The number of people who do not consider the party the leading force in the country more than doubled since a previous poll last year, to 53 percent of those questioned, Pravda said. The figures for the poll last year were not given.

A quarter of those surveyed thought the Communist Party should not be given any special role in society and should have the same position as any other party. Twenty-seven percent said they had seen positive changes in the party.

Results of the poll were released a week before the Communist Party begins its crucial 28th Party Congress, at which there is expected to be a fight over the new role of the party as the country moves toward democratic ideas and a modified market economy.

On March 13 the Congress of People's Deputies voted to eliminate the Communist Party's constitutional right to maintain its leading role in Soviet society, although the influence of the party remains pervasive.

The poll found that the new Congress of People's Deputies and Supreme Soviet, chosen last year in the country's first multi-candidate elections, are losing prestige.

This was despite the fact that they have been transformed from the

rubber-stamp Parliaments of old into more assertive legislatures. Pravda did not say what percentage had lost faith in the legislature.

It said 1,500 people in 18 regions of the country were questioned in late May and early June for the poll, adding that it covered ''all social and professional groups.''

A margin of error and other details of the methodology were not given.

#90176u1428 06/25/1990 ~United Press International

WASHINGTON (JUNE 25) UPI - The Supreme Court, continuing the process of undoing the landmark Roe vs. Wade ruling, upheld Monday the constitutionality of two tough parental notification laws limiting a minor's access to abortion.

The court, in one 6-3 ruling by Justice Anthony Kennedy, upheld an Ohio parental notification law. In a second ruling by Justice John Paul Stevens the court upheld portions of a similar law from Minnesota.

The court's action continues a process begun last year in its ruling in Webster vs. Reproductive Health Services of chipping away at the right to abortion guaranteed in the landmark 1973 Roe vs. Wade ruling. While the court has previously uphelp both parental notice and parental consent laws Monday's opinions take the laws further.

The court's decision upheld not only mere notice, but requirements that impose a 48-hour waiting period, and a requirement that both parents be notified as long as there is a legal system in place for minors to bypass their parents.

The court's ruling will have a wide effect. About half the states require some parental involvement in the abortion decision of minors and statistics show that over 1 million teenagers between the ages of 15 and 19 become pregnant each year. About 40 percent of those pregnancies end in abortion.

Justice Sandra Day O'Connor called the two-parent requirement of the Minnesota law ''unreasonable when one considers that only half the minors in the state of Minnesota reside with both biological parents.''

Nonetheless, O'Connor, joined by Chief Justice William Rehnquist and Justices Byron White, Antonin Scalia and Anthony Kennedy, said a two-parent notice requirement with a judicial bypass provision satisfies the Constitution.

Scalia, the most vocal opponent to Roe on the court, took the court to

task for not overturning Roe, pointing to the fractured decision in the Minnesota case, which has various members of the court joining and dissenting from various portions of the ruling.

''The random and unpredictable results of our consequently unchanneled individual views make it increasingly evident, term after term, that the tools for this job are not to be found in the lawyer's - and hence not in the judge's - workbox,'' he said.

Despite the court's action, Justice Thurgood Marshall, joined by Justices William Brennan and Harry Blackmun, noted in the Minnesota case that ''Roe remains the law of the land,'' and went so far as to say the ruling ''reaffirms the vitality of Roe'' because five members of the court voted to strike down some portions of the law.

However, few off the court share that view.

Roger Evans, a lawyer representing Planned Parenthood, said that ''it appears that when you read the two rulings together, the court is continuing the course it set in Webster, which is, by fractured opinions, steadily eroding the constitutional protections accorded women who might choose abortion. Today's victims are minors.''

He added that it's always been clear that the ''state could require parental involvement, but what they've done here is that they've allowed the states to whittle away at the protections minors have in those circumstances. They've allowed the states to make the minors wait 48 hours made the bypass more risky for the minors,'' he said

Officials of the National Right to Life said the court's decisions will provide additional encouragement to its cause.

''Today, the court indicated it is sympathetic to parental interests. It is still not clear how far they'll go, but it is clear that they favor parental involvement. These parental decisions are life and death issues in the lives of children and families,'' said Susan Smith, a lobbyist for the National Right to Life.

The Minnesota case concerned a 1981 law that provided that no abortion may be performed on an unemancipated minor until at least 48 hours after written notice to both biological parents, regardless of their marital status.

The law, as upheld in lower courts, also provided for a bypass of the parental notification through the courts if the minor is mature enough to make the decision herself, or if the court decided it is not in the best interest of the minor to inform both parents.

The Ohio case concerned a 1986 challenge to an Ohio law that required parental notification by physicians who intend to perform abortions on unmarried, unemancipated women under the age of 18. The law also provided for a judicial bypass of the parental notification provision.

The Supreme Court has previously upheld both parental notification statutes and parental consent statutes in a series of rulings.

However, the court's rulings on consent statutes require a series of legal safeguards for the minors so they can bypass their parents if it would be in their best interest, such as in cases of abusive parents. The court had not previously addressed the need for a judicial bypass in a parental notification statute.

#90176u1440 06/25/1990 ~United Press International

RICHLAND HILLS, TX (JUNE 25) UPI - Police thought at first a woman was overreacting when she called to report a snake was breaking into her house.

Sgt. Mike Davis said he figured the woman had seen a grass snake. But when he arrived at her Richland Hills home in northern Texas, he found a 10-foot python on her porch.

Jana Klarich, who concedes she is afraid of snakes, said her 4-year-old daughter called her to the glass front door of the home. She discovered the snake, which had pushed its body vertically up the glass.

When police arrived, they realized they had a problem. The city's animal control officer was off duty, and neighboring police departments could not - or would not - come to their aid.

Officer Kathi Perkins determined the snake was not threatening, so officers carefully lifted it into a plastic garbage can provided by Klarich and took the serpent to the police station and then to the Humane Society of North Texas.

Police have been unable to find the snake's owner.

#90176u1448 06/25/1990 ~United Press International

BELGRADE, YUGOSLAVIA (JUNE 25) UPI - Serbia's Communist president Monday sought to assert his nationalist credentials in a speech that set Yugoslavia's largest republic on a possible collision course with its two main rivals over the country's political future.

President Slobodan Milosevic also reiterated in his 30-minute address to

the Serbian Assembly his resolve to amend Serbia's constitution before scheduling the republic's first multi-party elections since World War II.

He called for a referendum on his plan in an apparent tactic to discredit demands by the republic's anti-communist opposition that elections be held before a new constitution is adopted. Milosevic's speech to the single-party Serbian legislature was carried live on state-run television and radio.

The Communist Party of Serbia has outlined a draft constitution that would end its monopoly on power and allow multi-party elections. But its delay in pursuing enactment has stoked charges that it is playing for time in order to prepare for elections.

Most of Milosevic's address was aimed at reharnessing growing Serbian nationalist emotions that he unleashed on taking power three years ago but which have been shifting to the opposition.

Serbian nationalism has been fueled by the April victories of nationalists in the republics of Slovenia and Croatia in the first free elections held in Yugoslavia since the 1945 communist takeover.

The nationlist trends and fears among smaller ethnic groups of hegemony by the 8.5 million-strong Serbian majority has led to a disputes over the future political structure of what has been a loose federation of six republics.

Milosevic, 49, said his government wants Yugoslavia to become a federation with a multi-party political system, capitalist-style economy and a stronger central government.

That position is being advocated by federal Prime Minister Ante Markovic, but opposed by the nationalist administrations in Slovenia and Croatia, which are demanding a confederation in which they would control of their own economic, political, and security affairs.

Milosevic said that should Slovenia and Croatia refuse to relent, Serbia would only join a confederation after Croatia returned Serbian-dominated areas it gained after World War II. "If there is a confederation, the borders must be changed," he said.

He said his government's draft constitution provides for a united Serbia and guarantees the "protection of the interests of the Serbian people who live outside Serbia." The differences between the republics over Yugoslavia's future political shape have raised fears among many Yugoslavs of a civil war.

On another emotional issue, Milosevic said the draft constitution would

put an end to wishes of ethnic Albanian separatists in the province of Kosovo by eliminating many areas of self-rule.

Kosovo has been wracked by bloodshed between the ethnic Albanian majority and its 200,000 minority Serbs and is regarded by Serbs as the birthplace of their heritage. They claim the 1.7 million ethnic Albanians want to join neighboring Albania. Ethnic Albanians contend they want Kosovo, which once had a Serbian majority, to be given greater autonomy.

#90176u1486 06/25/1990 ~United Press International

NASHVILLE, Tenn. (JUNE 25) UPI - Corrections Corp. of America said Monday it will manage a 440-bed, maximum-security prison to be built at Leavenworth, Kan., for the federal government.

The U.S. Marshal's Service will pay Corrections Corp. of America $10 million in the first year of the contract, which can be renewed for four more years, spokesmen said.

''This is the first maximum-security facility to be awarded to the private sector and the largest private prison contract ever awarded by the federal government,'' Corrections Corp. of America president Doctor R. Crants said.

''It expands CCA's operations into a sixth state and will be a significant revenue generator for the company.''

Spokesmen said the project was a joint venture between Corrections Corp. of America and Corrections Development Corp., based in St. Louis, and both companies will develop the prison's design.

Corrections Development Corp. will build and finance the project and Corrections Corp. of America will begin its management contract when the prison opens in January 1992, spokesmen said.

#90176u1488 06/25/1990 ~United Press International

(JUNE 25) UPI - Nelson Mandela is at the White House for more than two hours of meetings with President Bush and other high-ranking U-S officials. In remarks preceding the talks, the black South African leader defended the use of violence against his nation's apartheid system. Mandela also told Bush the United States should NOT lift economic sanctions against South Africa without consulting the African National Congress.

A Supreme Court ruling today in the case of a Missouri couple trying to turn off life-support systems keeping their daughter alive will make it

tougher for the parents of Nancy Beth Cruzan to get their wish. The justices ruled 5-4 that states can require extensive evidence of the coma victim's wishes before withdrawing life sustaining treatment. Cruzan has been in an irreversible coma since January 1983.

The court also today upheld the constitutionality of restrictive abortion laws for minors. A ruling by Justice Anthony Kennedy upheld an Ohio parental notification law. A second ruling upheld parts of a similar Minnesota law. The rulings uphold NOT only parental notification, but requirements imposing a 48-hour waiting period... and a requirement that both parents be notified as long as there is a legal system in place for minors to bypass their parents.

The trial of Washington, D-C, Mayor Marion Barry resumed today with a woman testifying she saw Barry smoke marijuana on a ship off the Virgin Islands in 1986. Jonetta Vincent says she was on the ship with Barry and former city worker Charles Lewis when Barry allegedly used marijuana. Her statement apparently corroborates testimony by Lewis who said the meeting was the first time he and Barry used drugs together. Barry faces 14 cocaine and perjury counts but is NOT accused of using marijuana.

#90176u1491 06/25/1990 ~United Press International

JERUSALEM (JUNE 25) UPI - The presidents of the East and West German parliaments arrived in Israel Monday on the first joint foreign visit by high officials of the two Germanys.

Rita Sussmuth, president of the West German Bundestag, and Sabine Bergmann-Pohl, president of the Volkskammer, began the official visit with a wreath-laying ceremony at the Knesset, the Israeli parliament.

The German officials were scheduled to meet Tuesday with Prime Minister Yitzhak Shamir, Labor Party Chairman Shimon Peres and senior government officials. They also will visit the Yad Vashem Holocaust memorial, and on Wednesday tour Jerusalem with Mayor Teddy Kollek.

Knesset Speaker Dov Shilansky, a Holocaust survivor, took a day off Monday in order to avoid officially meeting the German delegations, and instead acting Knesset Speaker Dan Tichon took his place.

Shilansky, who opposes relations with Germany, has vowed never to meet any official guests from Germany. However, the right-wing Likud Party member agreed to meet the visitors privately.

A Foreign Ministry spokesman said the visit underscored the importance Israel placed on friendly relations with the two Germanys, which are rapidly approaching unification.

Israel and the Federal Republic of Germany established diplomatic relations in 1965. This year, representatives of the German Democratic Republic and Israel have met in Copenhagen to discuss the opening of diplomatic ties and the issue of reparations for the victims of the Holocaust.

In a reversal of its policy under hard-line Communist leadership, East German admitted its moral responsibility for crimes committed against Jews during the Nazi era.

-30- 1896

#90176u1495 06/25/1990 ~United Press International

DUBLIN, IRELAND (JUNE 25) UPI - European Community leaders opened a two-day summit Monday by debating a plan proposed by France and West Germany to grant urgent economic aid to the Soviet Union in hopes of bolstering President Mikhail Gorbachev.

Britain opposes the proposal. ''There's no evidence of Mr. Gorbachev going down,'' a top aide to British Prime Minister Margaret Thatcher said on the first day of a two-day summit of EC heads of state at medieval Dublin Castle.

France and West Germany said the Soviet economy is in critical condition, and needs emergency aid from the West.

''I do not think we have a lot of time,'' West German Chancellor Helmut Kohl said.

Britain and the United States insist Western economic aid to the Soviets will be wasted unless free-market reforms are implemented first.

''We must ask ourselves whether it makes sense to throw huge sums of money at the Soviet Union,'' the British aide said.

Some diplomats said a likely compromise called for the EC to urge a Western aid package at next month's Houston summit of the seven leading industrial democracies. The July 9-11 summit involves the so-called ''G-7'' nations: the United States, Japan, Canada and four EC countries - Britain, France, West Germany and Italy.

''We would like a European Community aid package to be approved in Dublin, at this summit, but we're not the only country represented here,'' a West German official said.

The showdown over Soviet aid dominated the 12-nation summit, overshadowing a proposal to relax sanctions against South Africa and the EC's plans to

forge closer ''political union,'' including a common foreign policy.

Britain, which is frequently isolated at EC summits, conceded defeat of its proposal to lift an investment ban and other EC sanctions imposed in 1986 on South Africa. Unanimity was required to reverse the sanctions, but Ireland and Denmark first seek proof of ''profound and irreversible change'' in apartheid.

Still, Thatcher sought a ''clear signal of support'' for liberalizing steps taken by South African President Frederik de Klerk, and such a gesture was likely in the summit's final communique on Tuesday.

EC leaders set a Dec. 14 starting date in Rome for a special intergovernmental conference in Rome leading to closer political ties in the 12-nation Economic Community.

Goals include ''a common foreign policy, including joint consideration of the issues of peace, security and arms control,'' said Enrique Baron, president of the European Parliament.

The conference is scheduled to run parallel to a similar forum Dec. 15 in Rome on economic and monetary union, which is expected to lead to a common European currency.

Mitterrand and Kohl seek closer European political ties and a common foreign policy. In fact, Mitterrand said he favors creating a federal ''United States of Europe.''

''It is important not to lose a day, a week or a month'' in preparing for the political conference, Mitterrand said.

Thatcher, a fierce defender of national sovereignty, wants the political conference to focus on fine-tuning of EC institutions rather than union.

At the last EC summit, on April 28 in Dublin, Thatcher said the community must define ''what 'political union' is not,'' before deciding what it should be.

Surely, she said, political union must not mean the abolition of constitutional monarchies in Britain and five other EC countries. Other leaders said that was not their intention, and Thatcher's opponents accused her of creating fear.

Britain and Portugal went along with a unanimous vote to convene the political meeting despite reservations about it.

East German Prime Minister Lothar de Maiziere joined the EC leaders at lunch Monday. His country will be absorbed into the community once German

unification is completed.

AMMAN, JORDAN (JUNE 25) UPI - A senior official in the Palestine Liberation Organization said the PLO may freeze its peace initiatives in the Middle East - but denied the group has already done so - in retaliation for President Bush's decision to break off diplomatic contact with the organization.

Salah Khalaf, second in command to PLO Chairman Yasser Arafat, told United Press International in a telephone interview that a Tunisian newspaper had incorrectly reported that the PLO had ended peace intiatives.

Kalaf said the PLO may do so, however, if Washington continued ''to ignore our peace initiative.''

Khalaf said, ''I was misquoted by (the) al Sabah Tunisian newspaper. ... What I actually said was that the U.S. decision to suspend talks with the PLO could lead to putting a freeze on the group's peace initiative, as it was strongly opposed to and being ignored throughout the entire U.S.-PLO dialogue.''

''The PLO adheres to its peace initiative and commits itself to pursue the political peaceful approach more than ever,'' he said. ''But if the U.S. continues to ignore our peace initiative, this could lead to freezing it.''

Bush suspended diplomatic contact with the PLO, under pressure from Congress, saying the PLO failed to condemn a May 30 seaborne attack on an Israeli beach resort by the radical Palestine Liberation Front. The front is led by PLO executive committee member Abul Abbas. Israeli forces foiled the attack.

Bush insisted suspension of the talks was a narrow action in response to terrorism. He expressed hope talks would be renewed and insisted the U.S. action was not taken out of any special concern for the complexities of the U.S.-Israeli relationship.

U.S.-PLO talks were initiated in late 1988, after Arafat bowed to U.S. insistence that he renounce terrorism and recognize Israel's right to exist.

Meanwhile, Egyptian Foreign Minister Esmat abdel Meguid flew to Washington and is scheduled to meet Tuesday with Bush and Secretary of State James Baker. The Egyptian government had expressed regret at Bush's break in talks with the PLO and said it hoped U.S.-PLO talks contact would be restored soon.

Egyptian President Hosni Mubarak reportedly instructed abdel Meguid to travel to Washington following a Saturday telephone call from Bush. It was the first direct contact between Mubarak and Bush since the United States cut contacts with the PLO.

Abdel Meguid is accompanied by Mubarak's senior political adviser, Osama el-Baz.

Egypt's Middle East News Agency, in a dispatch from Tunis, Tunisia, said Abul Abbas told Arafat in a detailed secret report on the beach attack that the operation ''aimed only at specific military targets.''

Abul Abbas's report also suggested Arafat use his report ''also in responding to the American administration, which has declared its biased position toward Israel,'' MENA reported.

''The real terrorism is the Israeli terrorism,'' he reportedly wrote.

AMMAN, JORDAN (JUNE 25) UPI - Saudi Arabia on Monday provided $100 million in aid to help improve Jordan's economy, Jordanian Finance Minister Basel Jardaneh said.

In remarks broadcast by Amman radio, Jardaneh said the Saudi aid was part of a pledge made by King Fahd during last month's emergency Arab summit in Baghdad, Iraq. An unspecified amount of additional Saudi aid will be received soon, Jardaneh said.

A Jordanian official, who insisted on anonymity, told United Press International that Saudi Arabia had promised Jordan $300 million. The official said the balance of the Saudi aid package should come ''very soon.''

Last week, Jordan received $145 million promised at the Baghdad summit by oil-rich Persian Gulf countries: $80 million from Kuwait, $20 million from Qatar, $5 million from Oman and $40 million from the United Arab Emirates.

Jardaneh said Jordan expected to receive a total of $360 million from gulf states. He said he was optimistic Jordan would actually receive more than $500 million from these countries by the end of this year.

Jordan has reached an agreement with the International Monetary Fund to reschedule its $8.4 billion foreign debt.

(JUNE 25) UPI - China's official news agency says dissident Fang Lihzi and his wife were allowed to seek exile in Britain today after they admitted political errors linked to last year's pro-democracy movement. Fang and his wife had spent more than a year holed up in the U-S Embassy in Beijing. The two flew aboard a U-S military transport plane today to Alaska, where they transferred to a second aircraft for the final leg of their journey.

Typhoon Percy is heading toward the Philippines, where 47 people were killed and thousands of people left homeless after a devastating storm last week. The Manila Weather Bureau clocked Percy's peak winds at 115 miles-an-hour. The storm is in the Pacific 340 miles east of an island that is 230 miles southeast of Manila. Forecasters say it likely will hit the main Philippine island of Luzon Wednesday or Thursday. It would be the second typhoon in as many weeks to hit the northern Philippines.

COLUMBUS, Ohio (JUNE 25) UPI - More than 900 members of United Steelworkers union Local 2342 went on strike Monday at the Buckeye Steel Castings plant after rejecting the company's ''final contract offer.''

David Caldwell, president of the local union, said the pension portion of the proposed contract was too low.

''It is strictly economic. The amount is simply too little,'' Caldwell said.

He said union members voted nearly unanimously Sunday to reject the proposal and go on strike at midnight when their old pact expired.

Caldwell said the company has refused to address the pension issue. That and other minor problems with contract language have been a major topic during contract talks, he said.

''They were aware from early on in the negotiations that this was a major problem for us, and that was reaffirmed before we left negotiations with the final proposal,'' Caldwell said.

No new negotiations were scheduled.

Joseph Stegmayer, vice president and chief financial officer of Worthington Industries, which owns Buckeye Steel, said company officers would meet Monday to discuss the situation.

He said company officers were ''surprised'' by the walkout.

''We thought we made very good progress in negotiations,'' he said. ''We think we offered a very good package, actually.''

Details of the offer were unavailable.

ATLANTA (JUNE 25) UPI - The second patient to undergo a controversial AIDS treatment that involved heating his body to 108 degrees was discharged from the hospital Monday in good condition, his doctor said.

Tony Mascio, 38, of Chicago underwent the experimental hyperthermia procedure, previously used only as a cancer treatment, June 14 at the Atlanta Hospital and Medical Center.

Mascio remained in the hospital for 11 days to allow doctors to treat the AIDS-related Kaposi's sarcoma cancers that had grown on his liver, tonsils and lungs, they said.

''Tony left the hospital in good condition,'' Dr. Kenneth Alonso said in a statement. ''Significant remission in Tony's Kaposi's sarcoma has been noted. However, it will be at least 30 days before initial assessment of his HIV status can be determined.''

Mascio walked out of the hospital at 11:30 a.m., accompanied by members of his family.

Doctors heated Mascio's blood to raise his body temperature to 108-degrees to kill the cancer cells and the AIDS virus. The procedure is conducted while the patient is under general anesthesia and involves passing the blood through a heating apparatus similar to a dialysis machine.

The operation was first performed Feb. 20 on Carl Crawford, an Atlanta waiter, whose condition appears to have markedly improved.

Crawford and his doctors said his Kaposi's cancer lesions have virtually disappeared and no evidence of the AIDS virus has been detectable in his blood since the operation.

Alonso, a cancer specialist, and Dr. William Logan, a thoracic surgeon, have restricted their assessments about the procedure they have pioneered as a possible AIDS cure to observations made on the two patients.

A third patient has not been scheduled to undergo the treatment, estimated to cost $30,000.

Alonso brought the initial results of the treatment to the 6th International AIDS Conference in San Francisco last week, but was relegated to a smaller gathering for clinicians and researchers working on experimental therapies.

Private and public AIDS researchers, while expressing some hope that the procedure may have some benefit, have been skeptical about its long-term success.

The government's leading AIDS researcher, Anthony Fauci, director of the National Insitute for Allergies and Infectious Diseases, has dismissed the possibility the treatment could become a cure as ''extraordinarily unlikely.''

Skepticism about the procedure were heightened as a result of an ongoing state probe of the hospital.

On June 13, Georgia health officials said they planned to revoke the hospital's license because of numerous violations, including several patient deaths unrelated to the AIDS treatment.

#90176u1590 06/25/1990 ~United Press International

ALBURQUERQUE, NM (JUNE 25) UPI - The nation's oldest Hispanic civil rights organzation, the League of Latin American Citizens, has opened its membership to non-Hispanic chapters.

The vote at LULAC's national convention Sunday in Albuquerque enabled Las Vegas, Nev., businessman Jose Velez, to upset LULAC president Jose Garcia De Lara's bid for re-election. Velez was supported by newly admitted Filipino chapters that he helped recruit.

After a week of trading barbs and accusations with Velez, De Lara withdrew from the race. He said the vote to admit 24 Filipino chapters from California among the 53 councils considered for new membership indicates it is obvious the organization wants to open its doors to new members.

Former national chief of staff Cruz Chavira said admitting the Filipinos would detract from the pursuit of Hispanic concerns, because the U.S. Census Bureaus considers Filipinos as Asian or Pacific Islanders.

Velez said one of his first priorities as LULAC president is to establish a Washington, D.C., office. The organization's national headquarters currently is De Lara's home in San Antonio. Velez said it is imperative the organization be close to decision-makers in the nation's capital.

#90176u1599 06/25/1990 ~United Press International

SHADYSIDE, OHIO (JUNE 25) UPI - The search for bodies claimed by the Shadyside flood is virtually over, as work crews concentrate on cleaning up debris in the aftermath of what has been called Ohio's worst weather disaster in 21 years.

The confirmed death count from the June 14 flooding stood Monday at 23. Heavy rains created a giant wall of water that roared through tiny eastern Ohio creeks, destroying homes, tearing up trees and smashing cars like toys.

Entire families living along the creek beds were killed.

Ten names remain on the list of missing people, but Charles Vogt, an investigator for the Belmont County coroner, believes only three people on the list are actually unaccounted for.

Vogt said he cannot find any information linking the seven other names to the area. The U.S. Postal Service and utility companies have no records of them, he said.

''People thought they were giving good information (about missing people), but maybe they made a mistake,'' Vogt said.

Shadyside Fire Chief Mark Badia said the official search for flood victims has ended but cleanup crews will continue to look for bodies as they remove a huge pile of debris at an Ohio River dam in Hannibal, 27 miles south of Shadyside.

''Everything's been covered 10 times over,'' he said. ''We turned over every pebble, every log. We've checked everything time and time again. ... We have exhausted all of our efforts.''

Steve Wright, a spokesman for the U.S. Army Corps of Engineers, said that if there are any bodies in the debris at the dam, workers will find them.

''I don't think it's possible we'd miss anybody,'' he said.

Wright also said it is unlikely that any bodies slipped through the dam because ''we were able to catch the debris.''

Vogt says the Hannibal dam is the last place to find the bodies.

Ray Ponzo, Shadyside's crisis center coordinator, said it is important for flood survivors to know finally if their family members and friends are still alive.

''They just want to know one way or another and make their peace,'' Ponzo said. ''I really feel bad for those who are left.''

#90176u1613 06/25/1990 ~United Press International

WASHINGTON (JUNE 25) UPI - Timothy Ryan, the nation's top thrift regulator, said Monday the nation's savings and loan crisis is too big and too important to "waste our time" trying to assess blame for the industry's collapse.

"I will not discuss today or any time during my tenure as director 'who is to blame' - Congress, the administration, Democrats, Republicans, regulators, thrift lobbyists or the thrift industry," Ryan said in a speech before the United States League of Savings Institutions.

"The problem is just too big and too important to the country to waste our time 'armchair quarterbacking' or dealing with it on a political basis," Ryan said in his first major speech since being named director of the Office of Thrift Supervision three months ago.

Last week, the White House and Congress became embroiled in a finger-pointing contest with each placing the blame on the other for the thrift crisis. Rescuing the thrift industry is estimated to cost between $132 billion and $500 billion.

Ryan outlined four challenges facing today's thrift industry, the first of which is moving beyond the perception that the entire industry is in a state of decay.

Saying the thrift industry is "the victim of its own success and subsequent misfortunes, Ryan blamed the media for "inadequate" coverage of the "large, healthy segment of the industry." "The American public, assailed by a vigorous press, has tarred an entire industry with a broad brush," he said.

Ryan urged aggressive criminal and civil enforcment of thrift wrongdoers as the best remedy to restore the public's confidence in the industry, which in turn could help thrifts attract new capital.

To help give thrifts greater financial flexibility, Ryan introduced a new regulation to set up a uniform supervisory approach to monitoring the capital distributions a thrift can make.

"Well-capitalized associations will have maximum flexibility to make capital distributions," he said. "Poorly capitalized institutions, on the other hand, will generally be prohibited from paying dividends out of

their existing capital."

He also showed sympathy for thrifts trying to operate under the more stringent regulatory requirements of last year's Financial Reform, Recovery and Enforcement Act.

One of the law's toughest provisions, the so-called loans-to-one-borrower provision, will be modified slightly later this week to allow for a transition period.

The provision limits the amount one institution can loan to a single borrower. The housing industry has complained that the regulation forced thrifts to cut off funding vital to projects under construction. The final hurdle facing the industry, higher insurance premiums required by FIRREA, will be re-examined "at the earliest opportunity," Ryan said.

In other thrift developments, James G. Richmond, the U.S. attorney for northern Indiana who was named head of a new financial fraud unit to oversee the government's thrift enforcement efforts, declined declined to estimate how much money the government might eventually recover from looted savings and loans. "What you have here is a major catastrophe," Richmond said.

Asked about sometimes-conflicting thrift fraud statistics that seem to change almost daily, Richmond acknowledged, "We have problems in our ability to track cases within the department."

Part of his job, Richmond said, is to establish an accurate system to track allegations - known as "referrals" - that may lead to future criminal prosecutions.

#90176u1626 06/25/1990 ~United Press International

KUWAIT (JUNE 25) UPI - Kuwait, whose overproduction has helped create the current world glut of crude oil, needs to have its OPEC output limit raised to meet the needs of its refineries in Europe, Kuwaiti oil minister Rashid Salem al-Ameeri says.

Al-Ameeri made his call Sunday night during a meeting with Algerian Oil Minister Sadek Boussena, president of the 13-nation Organization of Petroleum Exporting Countries that pumps more than a third of the world's crude oil.

OPEC attempts to support higher world prices by limiting the output of its members. The cartel's recent failure has depressed world prices. "We discussed the recent turmoil on the oil market which brought the prices down," al-Ameeri said following his talks with Boussena.

"Kuwait wants its OPEC quota production to be increased so it can meet its economic development requirements in the coming stage," al-Ameeri was quoted as telling Boussena.

Al-Ameeri, who replaced Sheikh Ali Khalifa al-Sabah as oil minister in a major Kuwaiti cabinet reshuffle Wednesday, did not mention any specific increase. The official KUNA Kuwaiti News Agency quoted al-Ameeri as saying that Boussena supported Kuwait's demand for a higher quota.

Boussena also was quoted by OPEC's separate Opecna news agency as saying Saturday that it was necessary for the cartel's unity to bring the United Arab Emirates back under the OPEC quota system at the cartel's next regularly scheduled meeting on July 25.

"It has become necessary that the UAE return to OPEC quota agreements to strengthen the organization's unity," Boussena said after talks with UAE oil minister Mana Saeed Otaiba. "We have exchanged views on the size of the quota which is a sensitive and difficult issue," he said.

Kuwait and the UAE have been the two main contributors to OPEC overproduction that had led to the current world glut of crude oil and the depressed state of prices.

The UAE refused to accept a quota at the November meeting. As a result, cartel oil ministers assigned it a daily quota of 1.09 million barrels, virtually the same as its prior June quota of 1.04 million barrels. Kuwait accepted a new daily quota of 1.5 million barrels in November, a hefty increase from its prior June quota of 1.09 million barrels.

Prior to an emergency May 5 meeting in Geneva that agreed on a cartel cutback of 1.4 million barrels daily, Kuwait was pumping about 1.9 million barrels daily and the UAE about 2.1 million barrels. Neither country substantially reduced their output in May.

The Kuwaiti news agency also quoted al-Ameeri as saying that he, Bouseena and Indonesian oil minister Ginaanjar Kartasasmita agreed to meet next month in the Algerian capital of Algiers.

Al-Ameeri said the aim of the meeting was to persuade other members of the 13-nation cartel that Kuwait's current quota of 1.5 million barrels-a-day should be increased.

"The Algerian-Indonesian efforts will concentrate on trying to persuade the (OPEC members who have demanded) ... that Kuwait should reduce its production to amend their position and acknowledge Kuwait's right for a higher quota," al-Ameeri said.

Boussena arrived in Kuwait Sunday from the Iranian capital of Tehran on the fourth leg of his current tour of a number of OPEC member states, for consultations on ways of restoring stability to the world oil market and bolstering prices. On arrival, he told reporters the cartel's regular July 25 Geneva meeting "would be extremely important."

Boussena's tour so far has covered Iraq, the United Arab Emirates, Iran, and Kuwait. He will fly to Saudi Arabia later in the day for similar talks with Saudi oil minister Hisham Nazer at the conclusion of his five-nation tour.

The state-owned Kuwait Petroleum Corp. (KPC) owns three refineries in Italy, the Netherlands, and Denmark with a total capacity of 220,000 barrels a day, in addition to more than 5,000 European gasoline filling stations.

#90176u1661 06/25/1990 ~United Press International

WASHINGTON (JUNE 25) UPI - Abortion rights advocates said Monday the Supreme Court's decisions upholding parental notification for minors whittle away at girls' constitutional right to an abortion.

In a 6-3 ruling by Justice Anthony Kennedy, the court upheld an Ohio parental notification law. In a second ruling by Justice John Paul Stevens the court upheld portions of a similar law from Minnesota.

The court sanctioned requirements that include a 48-hour waiting period and that both parents be notified as long as there is a legal system in place for minors to bypass their parents.

Such a system could allow, for example, a judge to decide if a girl is mature enough to make the abortion decision herself.

''It appears that when you read the two rulings together, the court is continuing the course it set in Webster (vs. Reproductive Health Service), which is, by fractured opinions, steadily eroding the constitutional protections accorded women who might choose abortion. Today's victims are minors,'' said Roger Evans, who argued the Ohio case for Planned Parenthood Federation of America.

Anti-abortion officials praised the rulings for expanding a parent's role when a girl is considering an abortion.

''Today, the court indicated it is sympathetic to parental interests. It is still not clear how far they'll go, but it is clear that they favor parental involvement. These parental decisions are life and death issues in the lives of children and families,'' said Susan Smith, a lobbyist for

the National Right to Life.

And Olivia Gans, director of American Victims of Abortion, said the decisions reflect public opinion on minors' right to abortions.

Evans said Monday's decisions take the right of states to require parental involvement too far.

''What they've done here is that they've allowed the states to whittle away at the protections minors have in those circumstances,'' he said.

Janet Benshoof, who argued the Minnesota case for the American Civil Liberties Union, said legal bypass systems traditionally have ensured ''survival of the fittest.''

''The cheerleaders and the class valedictorians all got to court and had their abortions. The Indian kids, the minority kids and the poor kids all had babies,'' Benshoof said. ''Teenagers have died because of these kinds of laws. Teenagers have had late abortions because of these kinds of laws. Teenagers have had unwanted pregnancies because of these kinds of laws.''

Rep. Don Edwards, D-Calif., said the court's ''unfortunate'' decision emphasizes the need to enact his Freedom of Choice Act, which would write into law the landmark 1973 Supreme Court decision, Roe vs. Wade, which guarantees a woman's right to an abortion.

Molly Yard, president of the National Organization for Women, said the Supreme Court is giving state lawmakers ''the green light to restrict the choices of pregnant teens whose desperation the politicians can never comprehend.''

And Sharon Schuster, president of the American Association of University Women, said those states laws ''delay access to medically safe abortions and force terrified teenagers to resort to back-alley abortions.''

Yard said NOW will take its Freedom Caravan for Women's Lives to college campuses and organize youth in key states to fight rollbacks in abortion rights.

Evans said the future of a constitutional right to an abortion appears to rest heavily with Justice Sandra O'Connor, who wrote in the Minnesota case that two-parent notification is constitutional if there is judicial bypass.

''The handwriting on the wall is that ... Justice O'Connor is the swing vote on what flies and what doesn't fly. She certainly doesn't support the right to choice to the extent the court has supported it in the past, but she is not as crazed about getting rid of it as Justice (Antonin) Scalia '' Evans said.

Scalia chastized his colleagues for failing to strike down Roe vs. Wade.

Kate Michelman, executive director of the National Abortion Rights Action League, also expressed fear about the court's line-up on abortion rights.

''Certainly, one more Supreme Court appointment by an anti-choice administration and the right to choose safe, legal abortion will be history for American women. Because a majority of justices now seem poised to overturn Roe vs. Wade, a chill wind still blows from our highest court '' she said.

#90176u1691 06/25/1990 ~United Press International

WIMBLEDON, England (JUNE 25) UPI - Boris Becker and Ivan Lendl, co-favorites whose play fell short of their status Monday, overcame unexpected challenges from obscure opponents to win first-day matches at Wimbledon.

Becker, the defending champion, struggled with his service and his footing in opening play on Centre Court. The best he could manage was a 7-6 (7-2), 7-6 (7-4), 7-5 triumph over Mexican qualifier Luis Herrera, who is ranked 199th in the world.

Lendl, the top seed, is seeking to become only the fifth man to win all four Grand Slam tournaments. He began his 11th attempt for a Wimbledon crown with a 3-6, 6-4, 6-3, 6-4 victory over Christian Miniussi of Argentina, ranked No. 116 and playing his first grass-court tournament of the year.

Becker and Lendl, each listed by a London top bookmaker as an 11-8 favorite, had trouble adapting to conditions at the All England Club. The 22-year-old West German fell to his knees four times in the first set.

''It almost seems like there is too much grass on it,'' he said. ''It is almost too good of a court.''

At the French Open, where Becker was also the second seed, he failed to advance to the second round. Mindful of that disappointment, he would not express displeasure with his erratic play Monday, saying, ''I'm content to go through.''

In the first set, Becker had 10 double-faults and faced a set point on Herrera's serve at 6-5, 40-30. But the three-time champion, known for his competitive heart, blasted a backhand service return winner, broke Herrerra two points later and finished the tie-breaker with a pair of aces.

Lendl, who skipped the French Open to give himself two months of uninterrupted grass-court practice, did not play up to the form which he showed two weeks ago at the Queens Club tournament, where he downed John McEnroe and Becker in straight sets.

Lendl, who played the first match on Court No. 1, was tentative in his opening set against Miniussi.

''I had trouble for a time with my timing, the ball bounced much lower,'' he said. ''I knew (the court) was going to be softer than Queens, but it was softer than the (Wimbledon) practice courts.''

But against Miniussi, the top-ranked player was able to rely on his powerful serve and service return to rescue him after he dropped the first set.

Lendl, Wimbledon's top seed for the fourth time, could not break Miniussi's serve in the opening set, but the two-time finalist improved his return and broke his opponent twice in the second set, the second time in the 10th game to even the match.

Yannick Noah of France and Barbara Paulus of Austria, the 16th seeds in the men's and women's draws, were the tournament's first upsets. Noah, the former French Open champion, lost to 18-year-old qualifier Wayne Ferreira 6-4, 6-3, 6-2, a South African whose No. 176 ranking is 149 notches below Noah's.

''I couldn't move to the ball, I couldn't read the return,'' Noah said. ''I just didn't do anything, basically. As far as improving, I think I could improve everything - my return ... my move, my volleys, my serve, my head, I guess.''

Paulus was dispatched 6-2, 3-6, 6-4 by 19-year-old Sarah Loosemore of Britain, to the delight of the Wimbledon fans.

Pat Cash, the 1987 Wimbledon champion who needed a wild-card invitation to return to the scene of his finest hour, fought his way back from a 2-1 deficit in sets to overcome Soviet qualifier Dimitri Poliakov 4-6, 7-6 (7-1), 5-7, 6-4, 6-1.

Also advancing was No. 7 Brad Gilbert, who survived a rugged 6-1, 3-6, 4-6 6-1, 6-2 test from Yugoslavia's Bruno Oresar. No. 10 Jonas Svensson, who reached the French Open semifinals, outplayed France's Fabrice Santoro 6-4 6-3, 6-2.

On the women's side, two-time finalist Hana Mandlikova, in her last pro tournament as a singles player, barely avoided a first-round departure, fighting off four match points and outlasting Italy's Laura Lapi 6-3, 3-6,

-30- 4165
#90176u1713 06/25/1990 ~United Press International
KANSAS CITY, MO (JUNE 25) UPI - President Mikhail Gorbachev's chief economist said Monday the Soviet economy is "in a very dangerous situation" as it is moves toward a market orientation.

Abel Abanbegyan said the transition to a market-based economy in the Soviet Union must come quickly to ease social tension and avoid the possibility of extended strikes and other actions that could destroy the country's economy.

Abanbegyan, rector of the Academy of National Economy under the Soviet Council of Ministers, said at a news conference Soviet officials fear the economy could experience problems similar to Poland's if the movement toward a market economy fails.

Abanbegyan, a longtime advocate of reduced powers for central planners in Moscow, is considered the originator of perestroika and has been called Gorbachev's guru of economic reform.

"My own view is that the key problem is improving the finance and money situation," he said, adding the Soviet government must encourage savings at banks and then extend loans for housing and other needs.

He said the inflation rate, placed by the government at 7.5 percent, actually is about ten percent, while the interest rate at savings banks is only two percent to three percent.

Another crucial need, he said, is to "organize a stock market, sell securities, and organize shareholdings." "We need first more independence for our enterprises," he added.

To attract participants, the proposed Soviet market system needs to be structured around not only goods but money, investment, securities, labor force, currency, and so on," Abanbegyan said.

The most important role the United States can play in Soviet economic reform is granting the country most favored nation trading status, a move that he said would foster "economic relations" between the two countries.

Decreased Soviet military spending resulting from an improved political relationship with the United States also is beneficial for the Soviet economy, he said.

Abanbegyan said that after a transition to a market economy is achieved -

a process that could take two to three years - the Soviet government must tackle other difficult problems, including inflation, unemployment, and the disparity between rich and poor citizens.

#90176u1727 06/25/1990 ~United Press International

WASHINGTON (JUNE 25) UPI - Excerpts from Monday's Supreme Court decision in the so-called right-to-die opinion:

''The choice between life and death is a deeply personal decision of obvious and overwhelming finality. We believe Missouri may legitimately seek to safeguard the personal element of this choice through the imposition of heightened evidentiary requirements.

''It cannot be disputed that the due process clause protects an interest in life as well as an interest in refusing life-sustaining medical treatment. Not all incompetent patients will have loved ones available to serve as surrogate deision makers. And even where family members are present, there will ... be some unfortunate situations in which family members will not act to protect a patient. A state is entitled to guard against potential abuses in such situations. Similarly, a state is entitled to consider that a judicial proceeding to make a determination regarding an incompetent's wishes may very well not be an adversarial one. ...

''In sum, we conclude that a state may apply a clear and convincing evidence standard in proceedings where a guardian seeks to discontinue nutrition and hydration of a person diagnosed to be in a persistent vegetative state.

''No doubt is ... in this record but that Nancy Cruzan's mother and father are loving and caring parents. But there is no automatic assurance that the view of close family members will necessarily be the same as the patient's would have been had she been confronted with the prospect of her situation while competent.''

Justice Sandra Day O'Connor concurred, saying:

''I also write separately to emphasize that the court does not today decide the issue whether a state must also give effect to the decision of a surrogate decision maker. In my view, such a duty may well be constitutionally required to protect the patient's liberty interest in refusing medical treatment.

''Few individuals provide explicit oral or written instructions regarding their intent to refuse medical treatment should they become incompetent. States which decline to consider any evidence other than such instruction

may frequently fail to honor a patient's intent. Such failures might be avoided if the state considered an equally probative source of evidence: the patient's appointment of a proxy to make health care decisions on her behalf.''

Justice John Paul Stevens, in his dissent, said:

''The portion of this court's opinion that considers the merits of this case is similarly unsatisfactory. It, too, fails to respect the best interests of the patient.

''An innocent person's constitutional right to be free from unwanted medical treatment is thereby categorically limited to those patients who had the foresight to make an unambiguous statement of their wishes while competent.

''Because Nancy Beth Cruzan did not have the foresight to preserve her constitutional right in a living will, or some comparable 'clear and convincing' alternative, her right is gone forever and her fate is in the hands of the state Legislature instead of in those of her family.''

WASHINGTON (JUNE 25) UPI - The Supreme Court refused Monday to intervene in a dispute in which representatives of the mining industry charged the Environmental Protection Agency with regulating treatment and cleanup of

hazardous wastes without following a set of requirements set forth by Congress.

The justices rejected arguments by the American Mining Congress, an industry trade association, and Solite Corp. in a challenge to an appellate court's ruling.

The lower court upheld an EPA interpretation of an amendment to the Resource Conservation and Recovery Act of 1976, which regulates releases of toxic substances from mining, utility and cement kiln wastes at facilities that treat, store or dispose of hazardous waste.

At issue is whether the EPA correctly interpreted a 1984 amendment to the Recovery Act that made the three industries subject to corrective action when release of toxic substances occur at facilities that manage hazardous waste.

The American Mining Congress contended that waste from the mining industry should not be subject to such regulation under the Bevill Amendment because it produces a lower environmental risk than hazardous waste. It further accused the EPA of requiring corrective action without following the proper legal steps such as conducting a study on the health and environmental effects.

The Recovery Act requires owners and operators of hazardous waste treatment and storage facilities to obtain permits from EPA. Moreover, it gives the EPA authority to force operators to take action when releases of certain toxic substances occur.

The Bevill Amendment to the Act exempts particular mining industry wastes from EPA controls pending further study by the EPA on their risks and effects. It also requires the EPA to determine whether to apply the corrective action to wastes that may have been exempt.

Lawyers for the mining trade argued the amendment was created because waste from the mining industry produces a lower environmental risk. Further, they said the EPA's interpretation of the amendment will force the three industries - mining, utility and cement kiln - to comply ''with the most costly and burdensome aspect'' of the Recovery Act without the EPA ever having made a determination that such corrective action was warranted due to environmental risks.

The lawyers said the EPA should be prohibited from imposing corrective action until it determines through a formal process whether such requirements, and the costs associated with it, are necessary.

The U.S. Circuit Court of Appeals for the District of Columbia in 1989 held that the EPA may impose corrective action requirements even though

those wastes are exempt from regulation as hazardous waste under the Recovery Act.

In arguing against high court review, lawyers for the EPA said the agency requires corrective action ''only where necessary to protect human health and the environment.'' They said such action ''is determined on a case-by-case basis'' and that economic hardship on the part of the mining industry should not be considered in light of the threat posed by actual releases of toxic substances.

#90176u1772 06/25/1990 ~United Press International

AUSTIN, TX (JUNE 25) UPI - In the wake of the Mega Borg oil spill, Texas Land Commissioner Garry Mauro proposed new regulations Monday to prepare the state for offshore oil spills.

The proposals cover the transfer of oil from tankers to smaller vessels; periodic oil-spill drills; audits of the private sector's spill-response plans, and support for the double-hull tanker requirements being considered by Congress.

Mauro called for increased funding for the "woefully underfunded" Coast Guard to enforce tanker safety regulations, and for the setting up of a single Texas state agency to be responsible for all facets of oil-spill prevention and response. The responsibilities are currently shared by several agencies, including the General Land Office, Texas Water Commission and the Texas Department of Parks and Wildlife.

On the offshore transfer of oil, a process called lightering, Mauro said it should be covered by the same standards required by the federal Deep Water Port Act. The standards would cover the tanker's equipment on board, designation of special lightering areas in the Gulf of Mexico and strict guidelines for the transfer of oil in rough waters.

An estimated 3.9 million gallons of light crude escaped into the Gulf off Galveston, Texas after an explosion in the Norwegian tanker Mega Borg's pump room on June 8.

The Coast Guard said most of the spilled oil either burned in a fire that followed the blast, evaporated in the summer heat or was recovered through skimming operations. But Mauro said the Coast Guard predicts that by August, lightering operations off the Texas coast "may occur up to 90 times a month in the Gulf."

"So we are looking at three potential Mega Borg disasters in our Gulf waters every single day," he said. "Prevention must be the major component of any oil-spill plan."

While the state generally does an excellent job of handling spills up to 1,000 gallons, Mauro said it was "obviously unprepared" for the Mega Borg accident.

Mauro said the state program would not replace private-sector efforts, but furnish a "safety net" for the environmentally sensitive areas along the Texas coast.

"In 1989, Florida earmarked $2.3 million to initiate three major oil spill response programs to protect coastal resources," he said. "These innovative programs included purchasing response equipment, setting up four regional response units and developing a comprehensive training program. Texas needs to follow Florida's lead."

Another recommendation by Mauro calls for testing and improving contingency plans through oil spill drills and training sessions. "The lead state agency should have the authority to conduct scheduled and unannounced readiness drills for all industry, state and local units charged with cleanup responsibilities," he said. "These drills should be full-scale exercises, checking the training of personnel and involving all levels of organization and all equipment."

#90176u1776 06/25/1990 ~United Press International

(JUNE 25) UPI - China's leading dissident Fang Lizhi and his wife are reportedly on their way to Great Britain. The couple had been living in the U-S Embassy in Beijing ever since last year's bloody crackdown on pro-democracy demonstrators in China. The official Chinese news agency says the couple was allowed to leave to seek medical treatment.

U-S Forest Service firefighters today extinguished the second brushfire to erupt within a week in the Texas Panhandle. A Forest Service spokesman says the blaze consumed about 19-hundred acres some 30 miles from Amarillo. Two crews will remain in the area to guard against further outbreaks of fire through the July 4th weekend.

The London Times reports today that Romanian President Ion Iliescu is NOT sorry for the bloody June 13th vigilante crackdown by miners on anti-government demonstrators. But the president reportedly says he may ask Britain for help in creating a new riot control force.

A poll published today in the official Soviet newspaper Pravda says most Soviet citizens NO longer perceive the Communist Party as the leading force in the country. Only 18 percent of those surveyed believe the communists are still on top. Pravda attributes the disillusionment with the party to what it called the ''crisis of power.''

#90176u1781 06/25/1990 ~United Press International
WASHINGTON (JUNE 25) UPI - The Supreme Court refused Monday to review a lower court ruling that denied an award of nearly $1.4 million in attorney's fees to Royal Crown Cola for their role in fighting acquisitions by Coca-Cola and Pepsi.

The court refused to hear the case brought by Royal Crown seeking review of a ruling by the 11th U.S. Circuit Court of Appeals.

The case stems from plans in 1986 by Pepsi to acquire Seven-Up and Coca-Cola to acquire Dr Pepper.

Royal Crown challeged the plans in federal court. The two cola giants, however, eventually abandoned the efforts and Royal Crown asked for an award of attorney's fees as provided by federal antitrust laws that award such fees to prevailing parties.

A federal court awarded nearly $1.4 million in fees to Royal Crown, but in November 1989 the appeals court reversed.

Royal Crown then appealed to the Supreme Court.

89-1756 Royal Crown Cola Co., vs. The Coca-Cola Co., Dr Pepper Co., and Pepsico Inc.

#90176u1787 06/25/1990 ~United Press International
CHICAGO (JUNE 25) UPI - Corn and soybeans rallied to sharply higher levels Monday on the Chicago Board of Trade on forecasts for hot weather in the western Corn Belt by the weekend.

Professionals were aggressive buyers of both corn and beans.

Although favorable growing weather early this week would be beneficial, traders were concerned about the prediction for extreme heat and the effect it could have on the young plants.

Soybeans were at their highest levels in about one month. The November contract reached a high of $6.38 1/2 per bushel and closed at $6.35 1/2 for a gain of 16 1/2 cents on the day.

Sharp gains in soybean oil and meal provided underlying support for soybeans.

Steady to firm basis levels and the lack of country movement contributed to the gains in corn and soybeans.

Wheat futures were mixed at the final bell. Wheat was pressured by the prospect of an increase in harvest activity as weather conditions improve.

At the close, corn was up 2 1/2 to 8, soybeans up 13 1/4 to 18, wheat up 1/2 to down 4 1/4 and oats up 3 3/4 to 4 1/2.

#90176u1811 06/25/1990 ~United Press International

TEHRAN, IRAN (JUNE 25) UPI - An Iranian official said Monday last week's devastating earthquake killed at least 50,000 people, but a swift rescue operation enabled 100,000 other victims to be pulled to safety from the rubble.

Meanwhile, search and rescue operations to find more survivors neared an end Monday, and authorities worried that hundreds or even thousands of bodies were still hidden in what was left of some 1,500 towns and villages hit by the disaster.

Some remained covered by landslides.

''This horrifying incident killed more than 50,000 people,'' Iranian Ambassador to the U.N. Kamal Kharrazi said at a news briefing in New York.

He said the figure ''is an estimation'' because some areas are still cut off. The ambassador said he received his information from government officials in Iran by telephone.

Iran's Central Relief Headquarters earlier put the official death toll at 36,907, the official Islamic Republic News Agency reported.

IRNA said total casualties stood at 80,000 as of early Monday.

The stench of death hung heavy over flattened villages between the Caspian Sea and Zanjan, 175 miles northwest of Tehran. Official reports said at least 500,000 people were homeless.

A rescue worker in the region told United Press International the stench of decomposing bodies in the most severely hit areas was so bad that workers were beginning to consider it unsafe to handle the dead.

Another volunteer back in Tehran from the quake-hit area said the number of people killed outstripped the number of injured survivors.

French surgeons who flew to Iran to help victims of the quake, which

registered 7.7 on the Richter scale, prepared to fly home Monday, saying they found few survivors to treat.

Surgeons from Medecins du Monde (Doctors of the World), a Paris-based volunteer group, returned to Tehran from the quake-stricken areas of northwestern Iran.

IRNA said scores of military and civilian aircraft carrying relief supplies continued to land at Mehrabad airport.

Relief flew in or was sent from 86 countries, including France, West Germany, Japan and several other European, Asian and African countries. IRNA said a planeload of relief supplies from the United States was sent to Tehran through the United Nations.

Other countries which do not have diplomatic relations with Iran but sent planeloads of help included Britain and Egypt.

Deputy Foreign Minister Mohammad Ali Besharati said Iran would accept help from all countries except Israel and South Africa.

Ambassador Kharrazi declared Monday the amount of aid received ''has no link (to) the question of hostages'' held in Iran.

Aftershocks continued to be felt Monday, four days after the original trembler. IRNA said the latest quake measured 4.5 on the Richter scale. Another shock, put at 5.7 Sunday, spread panic and fear among survivors and people in nearby areas.

Nearly 400 aftershocks have been felt since the original quake struck.

An official at the Tehran University Geophysical Center said the aftershocks could continue for two months before gradually ending.

Bahram Akkasheh, who heads the Geophysical Center, said the quake was caused by a fault in the Alborz Mountain range that has been active on and off for the last 2,000 years at least.

He said the fault runs from Rasht, on the Caspian coast, through Qazvin and on to Zanjan; quake records in Iranian history showed that particular region had suffered similar disasters in the past.

The United Nations Relief Organization (UNDRO) reported Monday that 90 percent of the buildings in the city of Manjil had collapsed, 70 percent in Rudbar and 60 percent in Loushan. UNRD officials said rescue operations in those localities also were nearing an end.

Hojatolislam Asadollah Bayat, a deputy speaker in the Iranian Majlis, or

Parliament, said 114 villages in Zanjan province had been completely devastated by the quake and its aftershocks.

''The extent of damage and loss of life in these villages is so vast that the government forces, though doing their best, can do little to rescue the injured and help the survivors,'' Bayat said. ''People must join in to help the victims.''

The epicenter of Sunday's tremor, which struck at 1:15 p.m., was near the same spot as Thursday's quake.

Bodies were still being dug out by the score from under the rubble at Roudbar, Manjil and other villages on the Alborz Mountain slopes between the Caspian Sea and Zanjan.

Roudbar, Manjil and Loushan, towns bunched together in the Alborz, emerged as the worst-hit in the disaster.

Manjil and Roudbar, with a combined population of some 200,000, have tens of thousands of people still unaccounted for. A large dam nearby on the Safid Rud, or White River, appeared to have withstood the tremors.

Rocks and dirt were still sliding down the mountain slopes in the area, blocking roads and making access to the stricken area difficult.

A road between Rounbar and Rasht that had just been cleared was buried by a landslide again after Sunday's aftershock, the official Iranian news service IRNA reported.

The Tehran newspaper Kayhan said deep cracks have appeared in the mountainsides and ''getting aid to the victims is almost impossible.'' At Roudbar, it reported, corpses ''are still lying on the ground.''

#90176u1819 06/25/1990 ~United Press International

MINNEAPOLIS (JUNE 25) UPI - About 850 Marshall Field & Co. central organization employees will receive termination notices within the next six months, the Department Store Division of Dayton Hudson Corp. said Monday.

Dayton, which is consolidating Field's administrative and buying functions with its own, said the terminated workers will receive severance pay and help in finding new jobs.

None of Field's 13,000 store and supporting services employees will be affected by the firings, Dayton said. Dayton's purchase of Field's was completed Friday.

#90176u1820 06/25/1990 ~United Press International
NEW YORK (JUNE 25) UPI - Three young defendants showed no emotion as a prosecutor told a jury Monday how they gang raped and beat a woman jogger in Central Park and then left her ''to die naked and stripped in the dark and empty woods.''

The violent and random crime spree through the moonlit park on April 19, 1989, will come to life for the jury through the confessions of Antron McCray, 16, and Raymond Santana, 15, said the prosecutor in her opening statement in state Supreme Court.

The third defendant, Yusef Salaam, 16, also made statements to police and told them the attack ''was fun.''

Each youth is charged with 13 criminal counts, including rape and attempted murder. If convicted, each faces a maximum sentence of 5 to 10 years imprisonment. All three were juveniles at the time of the attack.

Coupled with photographs of the 29-year-old woman's injuries, the defendants' own words paint a horrifying picture of the ''wilding'' rampage, Assistant District Attorney Elizabeth Lederer said.

As Lederer began, the defendants' families stormed out of the courtroom.

''I submit to you that if you use common sense, you will find the defendants guilty of the savage attempted murder, rape and sodomy,'' she told the jury.

The youths' statements tell how the woman was charged by a gang while jogging in the park at about 9:30 p.m., Lederer said. They describe how she was struck repeatedly in the head with a metal pipe and a rock and then gang-raped.

Quoting from the defendants' statements, Lederer told the jury that McCray recalled ''after she lay there bleeding and not moving and unconscious, that somebody still took a pipe and struck her in the head.''

The statements also show that after the youths left the woman jogger ''to die naked and stripped in the dark and empty woods, they continued south, looking for still other victims,'' Lederer said.

Four hours after the attack, two men passing through the moonlit park at 1:30 a.m. on April 20 heard moaning and discovered the unconscious victime a Wall Street investment banker.

''They saw a young woman whose hair was matted with mud and blood,''

Lederer told the 10-man, two-woman jury.

''She was naked but for her jogging bra, tied up with a blood-soaked shirt that went around her neck, mouth and wrists. She lay there, thrashing in the mud, groaning,'' Lederer said.

''Her left eye was swollen shut. Her right eye open and staring blankly... Her right eye could not respond to light, which indicated brain damage. She was still bleeding. She was cold to the touch. Her pulse was 40. (She) was dying,'' Lederer said.

''She had lost three-quarters of her blood. Every bone supporting her left eye was broken. She was in shock.''

Just a short distance south, the gang began attacking male joggers running around a reservoir. Davis Lewis, a 31-year-old investment banker, was struck in the arm but was able to outrun the group.

But John Loughlin, a 41-year-old teacher, was bashed in the head several times and knocked unconscious.

#90176u1841 06/25/1990 ~United Press International

WASHINGTON (JUNE 25) UPI - The Senate Monday opened debate on a constitutional amendment to ban flag desecration, a ''futile exercise'' that will culminate in a vote meaningless except for its impact in the fall elections.

Because the House last week refused to approve an amendment to the Constitution on the flag issue, both the debate and the vote amounted to going through the motions, with the vote of significance only in Senate races where challengers or incumbents choose to make it an issue.

The Senate vote was set for Tuesday. Indications were that the proposed amendment would fail just as it did in the House, which voted to approve it but only by a margin of 254-177. That was 34 votes shy of the two-thirds necessary for passage of a constitutional amendment.

A Senate headcount by Assistant Democratic leader Alan Cranston of California showed 54 in favor, 29 against and 17 who had not declared themselves or who were undecided. If every member of the Senate voted, it would take just 34 votes to block the amendment. The Senate last year failed to adopt a flag-protection constitutional amendment in a 51-48 vote.

The amendment - which declares that ''Congress and the states shall have power to prohibit the physical desecration of the flag of the United States'' - is being promoted by President Bush and the Republican

leadership in Congress.

Senate Judiciary Committee Chairman Joseph Biden, D-Del., opened the debate Monday by stating the obvious:

''Here we are, engaged in what I suspect we all know, and know full well, will be a futile exercise.''

He said that, although the flag legislation is dead for the year, ''flag politics is just begining.''

''Now instead of trying to protect the flag from politics,'' Biden said, ''today's effort is to push the flag amendment in an attempt to enmesh the flag in politics, the November elections of 1990.''

Immediately after last week's House vote, Republican operatives began sending out press releases denouncing Democrats who had opposed the amendment.

''Where does it end? If we nibble around the edges of the First Amendment, what about the others?'' asked an amendment opponent, Sen. Tom Daschle, D-S.C.

Opening debate for amendment supporters, Strom Thurmond, R-S.C., said, ''Send it back to the House so it can atone for its earlier decision.''

''Now is the time to act. If we truly and sincerely want to protect the flag, the opportunity is still there. Vote for this amendment and give the American people the right to decide this important decision. This issue is not about politics. This is not a First Amendment issue. This is an issue whether flag ... is worthy of protection.''

''Why shouldn't Congress mess around with the First Amendment? The Supreme Court has been doing it for the past several decades,'' said Jesse Helms, R-N.C., quoting from a letter he received from a constituent.

''Now it's up to the vast majority of American people to send a response to the court, a 'We the people' sort of response, a declaration by the American people that there should be no tolerance for those that deliberately dishonor the American flag and the republic for which it stands,'' said Helms.

On both sides of the issue, flag burners were decried in the debate as ''kooks'', ''irresponsible outcasts,'' ''malcontents'' and ''loonies.''

The Senate will take five votes on the issue: a final vote on the amendment itself, with preliminary votes on a Biden proposal, on a substitute by Thurmond, on an anti-flag burning statute being written by

Sen. Dale Bumpers, D-Ark., and on a proposal by Helms to remove the flag burning issue from the jurisdiction of the Supreme Court.

It was 5-4 high court rulings a year ago and again two weeks ago that thrust the amendment question before Congress, and Republicans both in Congess and in the party campaign organizations were quick to seize upon it as a political issue, declaring that it would make an excellent political litmus test that could feed campaign advertisements in the fall.

#90176u1856 06/25/1990 ~United Press International

CAPE CANAVERAL, Fla. (JUNE 25) UPI - Exhaustive weekend tests failed to find a leak in a fuel line fitting taken from the grounded shuttle Columbia's external tank, focusing attention on hardware aboard the orbiter itself, officials said Monday.

Shuttle program director Robert Crippen ordered engineers to remove the 17-inch-wide ''disconnect'' fitting from Columbia and to replace it with hardware currently installed aboard the new space shuttle Endeavour.

While Columbia remains officially targeted for launch in mid-August, sources said the decision to remove the 17-inch umbilical fitting from Columbia could delay the flight to later in the month.

The shuttle Atlantis, meanwhile, is on track for launch the morning of July 15 on a secret military flight.

In a crucial test, engineers plan to pump supercold liquid hydrogen rocket fuel aboard Atlantis Thursday to make sure there are no leaks like the one that grounded Columbia.

Atlantis's flight readiness review, a major review of launch processing, also is scheduled to begin Thursday at the Kennedy Space Center. An official launch target date is expected to be announced at the conclusion of the meeting Friday, assuming no problems crop up during the fueling

test.

Columbia's launch on a 10-day astronomy mission, originally planned for May 30, was put on hold indefinitely when hydrogen gas began spewing into the ship's engine room the night before blastoff as the ship's external tank was being loaded with fuel.

Despite a battery of tests, engineers were unable to pinpoint the source of the leak, although it clearly involved the 17-inch disconnect fitting, which allows the shuttle to separate from its tank once in orbit.

Giant valves on either side of the point where the fuel line enters the belly of the orbiter are open during launch, allowing liquid oxygen and liquid hydrogen rocket fuel to flow from the external tank into the ship's three main engines.

Once the engines shut down, the valves rotate shut to prevent any fuel that might be trapped in the lines from spewing out. The tank is then jettisoned.

The 17-inch disconnect hardware mounted on Columbia's fuel tank was removed and shipped to a Rockwell International facility in Downey, Calif. for extensive tests, but engineers were unable to get the valve assembly to leak, even in the presence of liquid hydrogen.

As a result, Crippen had no choice but to order the removal of the disconnect valve fitting mounted in Columbia's belly.

''They spent the weekend trying to test the external tank side of the disconnect ... and no leak resembling what we saw during the tanking operation (May 29) on pad 39A appeared,'' said NASA spokesman Ed Campion.

''So Crippen has given the go ahead for the removal of the disconnect out of Endeavour and to have that shipped down to the Kennedy Space Center.''

The unit currently installed aboard Columbia will be removed and flown to Rockwell's Downey facility for tests.

Campion said engineers planned to connect the shuttle hardware to the external tank assembly to recreate the conditions present when the leak first showed up. Engineers are hopeful such testing, under precisely controlled conditions, will allow them to finally pinpoint the pesky leak.

It is not clear what NASA management will elect to do if the leak continues to elude detection.

#90176u1859 06/25/1990 ~United Press International

MOSCOW (JUNE 25) UPI - Workers at a gun plant northeast of Moscow have been converting simple firearms into more dangerous automatic weapons and trading them on the black market, sometimes for only a bottle of vodka, official Soviet television reported Monday.

The nightly television news show ''Vremya'' showed a cache of weapons and ammunition seized by the KGB in the Vladimir region, about 150 miles northeast of Moscow, and said they had been made at the nearby Kovrov firearms plant.

A KGB official said workers at the plant had been converting hunting weapons into machine guns and making pistols from signal guns.

''Vremya'' said workers at the plant were selling the converted weapons outside the plant, and managers of the facility had failed to guard against theft or account for the weapons it produced.

Pointing to a pistol, the KGB official said it was sold for a liter of vodka.

''The workers can even drink it in the shop and neither the foreman nor the head of the shop or director of the plant paid any attention,'' the official said. ''Blood is shed and here for a bottle of vodka they are ready to give formidable fighting arms to the first person they meet.''

#90176u1860 06/25/1990 ~United Press International

WASHINGTON (JUNE 25) UPI - Home resales declined 1.2 percent in May to an annual rate of 3.29 million, but the National Association of Realtors said Monday the drop was eased by falling mortage rates. The association said the May resale rate was 1.2 percent higher than that of a year earlier.

Norman Flynn, the association's president, said lower interest rates and a slight drop in the median price for existing homes helped bring buyers - particularly first-timers - back into the housing market.

Flynn noted the "psychological impact" from interest rate hikes earlier in the year and tighter credit practices adopted by many bankers appear to have spooked some potential home buyers.

But Flynn downplayed fears of a "credit crunch," which he said has primarily hit home builders and should not be associated with single-family mortgage loans.

"It's time for people to quit straddling the fence," Flynn said. "Conditions are ripe for buying. The home supply is up and mortgage rates

are down. No one should cast aside their purchase plans because they're afraid of being turned down for a home."

Last month's median price for an existing home dipped slightly to $94,800, a decline of $800 from the previous month but a 2.4 percent increase from the year-earlier median.

The rate for 30-year, fixed-rate conventional mortgages dropped last month to 10.33 percent from 10.67 percent. These rates have since fallen even more, standing at 10.16 percent last Friday, and the association said it expects rates to drift downward through the summer.

Regionally, resales of existing homes gained in the South and West, declined in the Midwest and remained unchanged in the already soft northeastern market.

John Tuccillo, the association's chief economist, said real estate in the Northeast has shown signs of stabilizing. Existing home resales remained unchanged at 520,000 units last month, while the median price slipped 1.4 percent to $141,300 from year-earlier prices. "Buyers are looking for bargains, and, in a buyers' market, they aren't hard to find," he said.

In the South, the resale rate gained 0.8 percent last month to an annualized rate of 1.31 million units. The median price for the region increased 1.2 percent to $85,200.

The resale rate in the West gained 1.7 percent to an annual rate of 590,000 units, while the median price slipped 4.8 percent from year-ago levels to $135,300.

Tuccillo said the rapid appreciation of western housing prices appears to have slowed as more buyers became priced out of the market. "No market can withstand price surges indefinitly," he said.

In the Midwest, resales were down 4.4 percent last month to an annual rate of 880,000 units. The region's median price rose in May by four percent to $73,100. The association said there were 2.7 million existing single-family homes for sale at the end of May, representing nearly a ten-month supply.

#90176u1887 06/25/1990 ~United Press International

PENSACOLA, Fla. (JUNE 25) UPI - A woman who claims she contracted a lethal monkey virus from a worker at a Navy laboratory has settled a multimillion-dollar lawsuit she filed against the government, a lawyer said Monday.

Ross Goodman, who represented Cynthia Ann Woodson in the federal suit, said the case was settled around June 1, but declined to disclose terms of the settlement.

Mrs. Woodson, of Gulf Breeze, filed suit in November 1988 against the government, claiming she contracted the usually lethal virus while caring for her husband during his month-long illness.

Her husband, Steven M. Woodson, 37, an animal handler at the Naval Aerospace Medical Research Laboratory at Pensacola Naval Air Station, was one of two men who died after catching Simian B virus from lab monkeys.

The disease is a herpes virus benign in primates but often lethal to humans.

Woodson and co-worker Larry D. Smith, 31, of Pensacola, both had been bitten or scratched in late March 1987 by one of the monkeys used at the lab.

Woodson died April 28, 1987 from encephalitis, a complication associated with the disease. Smith died in September 1987 after being in a coma for six months.

In February 1988, Mrs. Woodson filed an administrative claim seeking $2

million in damages. When a settlement was not reached she filed suit for an unspecified amount. By law it could not be more than the amount of the claim.

Late last year U.S. District Judge Winston Arnow agreed to dismiss the case when the two sides neared on a proposed agreement. Arnow gave the two sides 90 days to seal an agreement.

A document filed in federal court in March seeking a 30-day extension said a settlement had been reached and was awaiting approval by the Secretary of the Navy.

In a related case, Darlene Boyette Caum continues to pursue an administrative claim she filed with the federal government in April 1989 seeking $2 million for medical costs, lost income, pain and suffering.

Caum contends she visited Smith at the lab and handled monkeys. Caum, who is not certain she has the virus, said she ''may'' have contracted it from the monkeys or from scratching herself on a cage.

#90176u1895 06/25/1990 ~United Press International

CHICAGO (JUNE 25) UPI - Jurors in the racketeering and fraud trial of three Chicago Mercantile Exchange Swiss franc traders settled in Monday for the first full day of what are expected to be lengthy and extensive deliberations.

Jurors were presented with the 6,000-page transcript of the nearly seven-week-long trial when they convened Monday. The case went to the jury Friday, and the panel of nine women and three men spent about two hours in deliberations before being sent home for the weekend.

They requested the transcript late Friday, and U.S. District Judge Williams ordered a special copy - with minutes of proceedings held outside the presence of the jury excised - prepared and provided to jurors Monday morning.

Jurors also had requested an index showing how each of the more than 130 audio tapes introduced by prosecutors in the case related to the charges against defendants Robert Mosky, Danny Scheck and David Zatz.

Williams sent word to the jury Monday that no such index was available. Prosecution and defense lawyers said it would be impossible to prepare an index because some tapes relate to more than one charge and more than one trade, while others relate to dealings by other traders who are not on trial or to trades not charged in the indictment.

The request for the transcript - which Assistant U.S.. Attorney Dan Gilogly described as "unusual but not unheard of" - and for a tape index indicated jurors planned to spend some time reviewing the evidence, lawyers said. Williams has predicted lengthy deliberations, saying it was her "optimistic" hope that a verdict could be reached by the end of this week.

The pivotal issue in the case was the credibility of the government's three primary witnesses - FBI agent Randy Jannett, who spent nearly a year posing as a trader in the Swiss franc pit, and traders William Walsh and Mark Fuhrman, who have pleaded guilty and agreed to cooperate with prosecutors in the hope they will receive probation.

The defense said Jannett was inadequately trained in commodities trading and his observations were inaccurat. What the FBI agent said were illegal prearranged trades, the defense argued, were actually confirmations of previous trades, required by exchange rules. The defense also has called Walsh and Fuhrman admitted liars and thieves whose testimony has been contrived to help them escape jail terms.

The government charges the defendants were part of a fraud scheme that allowed brokers, who buy and sell for customers, to avoid having to reimburse customers for mistakes they make in handling customer orders.

Rules require that, if a customer order specifies a price and the broker fails to execute the order when the market reaches that price, he must fill it at whatever price he can, and pay the customer the difference.

The government contends Mosky, Walsh, and other members of their broker group, instead filled those orders at the specified prices in illegal, prearranged trades with so-called local traders such as Scheck and Zatz, who trade mostly for their own accounts.

In exchange for accepting the losing trades, the government charged, brokers would give the local traders winning, prearranged trades at off-market prices from their stack of customer orders.

Because the orders would be filled at or around the prices specified, Assistant U.S. Attorney James Fleissner said, brokers got "complaint-proof fills for their customers."

But while customers orders were filled at or near the specified prices, he said, customers were defrauded out of their right to get the best possible price.

Mosky , 34, of Chicago, was charged with racketeering conspiracy, and multiple counts of fraud and violating commodities laws. If convicted, he could be sentenced to up to 395 years in prison and fined nearly $12 million.

Scheck, 28, of Skokie, and Zatz, 43, of Chicago, both were charged with multiple counts of fraud and violating commodities laws. If convicted, Scheck could face up to 90 years in jail, and fines of up to $3 million. Zatz could face up to 70 years in prison, and fines of up to $2.1 million, if convicted.

#90176u1913 06/25/1990 ~United Press International

WASHINGTON (JUNE 25) UPI - Nelson Mandela sought money and political recognition from President Bush on Monday for his fight against apartheid, but refused to go as far as U.S. officials urged in renouncing violence in South Africa.

Grateful for American support of his cause but unapologetic for his tactics, Mandela sounded no retreat in his decades-long fight against white-minority rule.

After three hours of talks at the White House, one of the high points of a 12-day, eight-cuty U.S. tour, Mandela said he and Bush ''reached a broad agreement'' on most issues and ''narrowed the gaps that previously existed'' on others.

''We regard our visit to the White House as having been successful,'' he added.

However, the talks failed to produce firm agreement on how long U.S. economic sanctions should remain in place against South Africa, with Mandela pressing Bush to keep the pressure on even after negotiations begin.

Mandela asked for financial aid for his African National Congress, only to

be told there would be none. His request that any change in U.S. policy toward South Africa be done only in ''full consultation with the ANC'' went unanswered.

On matters ranging from the roots of racial violence to Angola and Mandela's support of Libya, Cuba and the Palestine Liberation Organization he and Bush simply ''agreed to disagree,'' Assistant Secretary of State Herman Cohen told reporters.

On balance, Cohen said Mandela painted an optimistic picture of the outlook for negotiations on South Africa's future, indicating final obstacles could be removed shortly after his return from what has been an exhausting foreign trip.

In a move welcomed by U.S. officials, Mandela promised to announce a cessation of hostilities once those hurdles are cleared. He was non-committal, however, when urged by Bush to go take the larger step of renouncing all violence.

''Any effort to suspend violence is fine,'' Cohen said. ''We'd like him to go all the way and renounce the armed struggle.''

Before meeting with Bush, Mandela asserted no organization in South Africa could rival the ANC ''in its total commitment to peace'' but said, ''If we are forced to resort to violence, it is because we have no other alternative whatsoever.''

As expected, Mandela sought and received assurances from Bush that U.S. economic sanctions would remain in place against South Africa until additional political reforms - spelled out in U.S. law - are carried out.

Left unstated was whether Bush would move to relax the sanctions as soon as those conditions are met, which could come soon with a full release of political prisoners and lifting of the state of emergency in Natal province.

''Our sanctions have been designed to support change,'' Bush said, ''and when the conditions laid down in our law have been met, then, and only then, with the Congress, whether a change in course will promote further progress through peaceful negotiations.''

Mandela received VIP treatment normally reserved for heads of governments as he made the rounds of official Washington, pressing his case for sustained international pressure on the South African government.

Bush applauded the recent steps toward liberalization by South African President F.W. de Klerk, most dramatically illustrated by Mandela's release in February after 27 years of imprisonment, and urged ''a clear

commitment to change'' from all parties.

His call for all parties ''to renounce the use of violence and armed struggle,'' directed as much at the ANC as others, brought a pointed rebuttal from Mandela, who suggested Bush lacked a full understanding of the situation.

''As long as the government is prepared to talk, to maintain channels of communication between itself and the governed, there can be no question of violence whatsoever,'' Mandela said.

''But when a government decides to ban political organizations of the oppressed, intensifies oppression and does not allow any free political activity, no matter how peaceful and non-violent, then the people have no alternative but to resort to violence.''

Bush has opposed sanctions as counterproductive to the cause of economic opportunity for black South Africans. Nevertheless, he acknowledged last week they may have contributed to ''the evolution towards democracy in South Africa.''

Bush said at the time that de Klerk had ''come a long, long way'' in moving toward negotiations on South Africa's future and said he would like to ''find a way to show our appreciation'' for those steps toward liberalization.

However, he also made clear that South Africa had not yet met the conditions of the Comprehensive Anti-Apartheid Act of 1986, which was enacted by Congress in October 1986 over a veto by President Reagan.

The law requires South Africa to meet four of five conditions for removal or relaxation of trade and investment restrictions designed to weaken South Africa's export economy and deny it access to high technology, military hardware and other strategic materials.

#90176u1943 06/25/1990 ~United Press International

GENOA, ITALY (JUNE 25) UPI - Ireland, appearing in its first World Cup, beat Romania 5-4 on penalty kicks Monday to advance to the quarterfinals of soccer's showcase tournament.

After a scoreless 90 minutes of regulation and 30 minutes of overtime, the winning goal came on a penalty kick by David O'Leary, who deftly sent the ball past Romanian goalkeeper Silviu Lung. O'Leary, playing in the 52nd game for his country, scored his first goal for Ireland.

''It was a great occasion for David,'' Ireland's Manager Jack Charlton said. ''He is an Irish lad born and bred, I am delighted for him. We are all very grateful to him. Given all the responsibilty of the occasion, it was tremendous of him to take the last penalty.''

O'Leary entered as a substitute three minutes into overtime. His goal came immediately after Ireland goalkeeper Pat Bonner saved a penalty kick on an attempt by Daniel Timofte. Bonner anticipated the play, diving to his right and knocking the ball away. Eight straight penalty kicks were made before Timofte failed.

The miss sent Luigi Ferraris Stadium rocking to the sound of Irish fans who have seen their team advance to the quarterfinals despite drawing all four games they have played in this World Cup.

''It doesn't matter that we have not won a game,'' Charlton said. ''We might win the Cup without winning a game. I don't care.''

Ireland next plays in Rome Saturday against the winner of Monday's Italy-Uruguay second-round game.

This was the fifth game in World Cup history decided on penalty kicks, following the 1982 semifinal between France and West Germany and three of the four quarterfinals in 1986.

The drama of the shootout was in stark contrast to a game that started

brightly but produced few real scoring chances in a disappointing 120 minutes.

''Romania had the same difficulty as Brazil yesterday,'' said Emerich Jenei, Romania's coach. ''We had five or six good chances and they had one chance - the penalty - and scored.''

Before O'Leary struck, four other teammates converted: Kevin Sheedy, Ray Houghton, Andy Townsend and Tony Cascarino. Scoring for Romania were: Gheorghe Hagi, Danut Lupu, Iosif Rotariu and Ionut Lupescu.

Charlton said his players decided who would take the penalty kicks.

''If you are confident enough to do it, you should do it,'' he said.

#90176u1952 06/25/1990 ~United Press International

WASHINGTON (JUNE 25) UPI - About 3,800 non-smoking Americans die each year from lung cancer caused by ''secondhand'' cigarette smoke, says a preliminary study issued by the Environmental Protection Agency Monday for public comment.

The study, which does not constitute a formal EPA position on passive smoking, also said scientific evidence ''strongly indicates'' that smoking by parents - particularly the mother - is associated with increased respiratory illness in infants.

The Tobacco Institute criticized the study as ''speculation without an adequate scientific foundation.'' It said the findings were not supported by previous research on passive smoking and probably would not hold up under scrutiny by EPA's Scientific Advisory Board, which will review the study for technical accuracy in preparation for any final EPA findings.

Anti-smoking advocates hailed the study for providing the first specific ''body count'' attributable to passive smoking. But they said the estimate of 3,800 lung cancer deaths represented only a fraction of the total death toll caused by inhalation of tobacco smoke from other people's cigarettes.

In particular, the groups pointed to studies suggesting ''involuntary smoking'' is responsible for 50,000 deaths a year from heart disease and all cancers.

John Banzhaf, executive director of Action on Smoking and Health, an anti-smoking group, said that broader health impact of passive smoking would be reflected in a ''technical compendium'' of passive smoking studies now being put together by several federal agencies, including the EPA.

In particular, Banzhaf said the compendium would include a study by Stanton Glantz, a researcher at the University of California at San Francisco, that estimates total passive smoking deaths at 50,000. Glantz's study estimates 32,000 heart-related deaths and 18,000 deaths from all cancers, including lung cancer, Banzhaf said.

EPA officials denied the 50,000 estimate would be included in the technical compendium, saying the estimate was largely based on heart disease studies that had not been reviewed by federal officials.

''EPA has not evaluated the possible links between passive smoking and heart disease,'' said Bob Axelrad, director of EPA's indoor air division. ''There may not even be a chapter on heart disease (in the compendium).''

Axelrad said the evidence linking passive smoking to heart disease was weak compared with more substantial data associating secondhand smoke with lung cancer.

The estimate of 3,800 lung cancer deaths caused by passive smoking is based on 24 studies done by different research teams in eight countries.

The key studies compare lung cancer rates among women who live with husbands who smoke to those women who have non-smoker spouses. Eighteen studies found wives of smokers had higher cancer rates than women living with non-smokers.

The Tobacco Institute charged the studies did not not account for other factors that might cause lung cancer, such as occupation and lifestyle.

But the EPA report said at least one study from Japan explicitly sought - but did not find - other explanations for higher cancer rates among wives of smokers. It also said no other factor could account for the similar findings from several different countries.

''No alternative explanatory variables for the observed association between environmental tobacco smoke and lung cancer have been indicated that would be broadly applicable across studies,'' the report said.

The Tobacco Institute claimed 19 of the 24 studies reported relative risks that were not statistically significant.

WASHINGTON (JUNE 25) UPI - Yields increased on 13-week and 26-week T-bills Monday at the government's weekly auction.

The Treasury Department auctioned $8.6 billion of 13-week bills at an average discount of 7.78 percent, up from 7.74 percent last week and the highest since May 29 when the auction yielded 7.80 percent.

The government also sold $8.6 billion of 26-week bills at an average discount of 7.67 percent, up from 7.64 percent last week and the highest since May 29, when the rate stood at 7.74 percent.

The investment rate was 8.05 percent on the 13-week bills at an average price of $9,803.30 per $10,000 face value. The rate on the 26-week bill was 8.09 percent at an average of $9,612.20 per $10,000.

#90176u1957 06/25/1990 ~United Press International

(JUNE 25) UPI - The Supreme Court rules on abortion and right-to-die cases... Nelson Mandela meets with President Bush at the White House... and China's leading dissident is exiled to Great Britain. Details of those major stories and more, next, from the wires of U-P-I.

Two Supreme Court rulings on abortion today drew applause and criticism from people on opposing sides of the issue.

The rulings uphold Ohio and Minnesota laws requiring that both parents be notified if their daughter is a minor who is seeking an abortion. Today's decisions also approve a 48-hour wait after parental notification.

But the court added the condition that there be a legal system in place for minors to bypass their parents. For instance, a judge might cancel notification if the parents are abusive.

Planned Parenthood lawyer Roger Evans says the court is eroding constitutional protections for women who might choose abortion. Evans said ''today's victims are minors.''

National Right to Life officials say the court's decisions will provide additional encouragement to its cause. A lobbyist for the group said the justices ''favor parental involvement.''

In another case, the Supreme Court limited the ability of families to end life support for comatose relatives.

The case involved Nancy Cruzan of Missouri, who has been in a coma for more than seven years. Her parents asked that life support be ended, because Cruzan previously told a friend she would NOT want to live as what she termed a ''vegetable.''

The court ruled 5-4 that the state may seek more extensive evidence of her

wish to die. The decision did NOT say there is a constitutional right to die, but it suggests such a right might exist for those who have made their intentions clear.

-30- 1937

#90176u1962 06/25/1990 ~United Press International

WASHINGTON (JUNE 25) UPI - Thirty-three states have enacted laws requiring some form of parental consent or notification before minors are permitted to obtain an abortion, according to the American Civil Liberties Union.

These statutes are enforced in 11 states: Alabama, Arkansas, Indiana, Louisiana, Massachusetts, Missouri, North Dakota, Rhode Island, South Carolina, West Virginia and Wyoming.

They generally are not enforced in eight others: Alaska, Delaware, Idaho, Maryland, Montana, New Mexico, South Dakota and Utah.

Parental consent and notification laws are under court injunction in 14 states. Besides Minnesota and Ohio, they are: Arizona, California, Florida Georgia, Illinois, Kentucky, Mississippi, Nebraska, Nevada, Pennsylvania, Tennessee and Washington state.

#90176u1982 06/25/1990 ~United Press International

WASHINGTON (JUNE 25) UPI - Agricultural officials said Monday they were cooperating in a national survey to make sure that "mad cow" disease, which has afflicted British cattle, does not exist in the United States.

An upsurge of the fatal disease created public concern in Great Britain last month and temporarily disrupted agricultural trade in Europe. The disease, officially named bovine spongiform encephalopathy, was first diagnosed in Great Britain in 1986.

The Agriculture Department has prohibited importation of live cattle from Britain since July 1989. Restrictions have been in place for several years against importing British meat or bone meal, which has been suspected as a method of transmitting the disease. There is no evidence to suggest the disease is a human health hazard, the Animal and Plant Health Inspection Service said.

The service said veterinary diagnostic laboratories in 16 major dairy cattle states were taking part in a national surveillance program against the disease. The program calls for examining brain tissue from cattle over two years of age that show signs of neurological diseases. Iowa State University and the inspection service will work together in examining the

tissue samples.

Labs in California, Illinois, Iowa, Indiana, Kentucky, Maryland, Michigan, Minnesota, Missouri, New York, Ohio, Pennsylvania, Tennessee, Virginia, Washington state, and Wisconsin have agreed to take part in the program, officials said. Other states have requested inclusion in the program.

"Mad cow" disease, a fatal degenerative disorder that attacks the central nervous system of cattle, can cause change in temperament, loss of coordination and loss of weight before death. The cause of the disease is unknown.

#90176u1986 06/25/1990 ~United Press International

LOS ANGELES (JUNE 25) UPI - A federal judge has awarded $4.1 million in damages to the families of three men killed in the 1986 collision of an Aeromexico jetliner and a small plane over Cerritos, attorneys said Monday.

The largest single award, $1.8 million, went to the widow and three children of Manuel Guzman, 59, a construction company foreman, attorney James McCarthy said.

The wife and the three children of a second victim - Gregorio John Huerta, 46, an accountant who lived in Los Angeles - received $1.3 million, while the wife and two children of Tom Basye, a truck driver who lived in Hesperia, received $1 million, McCarthy said.

U.S. District Judge Manuel Real granted the awards late Friday following a two-day hearing.

Earlier this year, a San Jose man received $1.3 million in damages for the death of his wife and son in the crash, and the family of a Norwalk truck driver received $2.7 million - the largest single award yet to arise from the disaster.

A federal jury determined in April 1989 that the Federal Aviation Administration and the pilot of the small plane were equally responsible for the crash.

As a result of that decision, the federal government is expected to pay out between $50 million and $100 million in damages to survivors of victims.

The estate of William K. Kramer, 53, the pilot of the aircraft that clipped the tail section of the jetliner triggering the crash, is liable for remaining damages. However, since Kramer's $1.2-million estate is expected to be rapidly depleted, outstanding ''economic damage'' claims

will be paid by taxpayers, attorneys said.

McCarthy said that as a result, the families in the three cases decided Friday can expect to receive $2.4 million, the amount the government is required to pay. In addition to that sum, the funeral expenses of the three victims will also be paid by the government.

The three men were part of a larger party returning home from a fishing trip in Mexico when they died in the crash. The Guzman and Basye families were neighbors in Hesperia, McCarthy said.

The crash was the worst aviation disaster in Los Angeles history. It occurred when Kramer's Piper Archer collided with the tail of the Aeromexico DC-9, which was on final approach to Los Angeles International Airport on Aug. 31, 1986.

Eighty-two people died - all 64 people aboard the jet; Kramer, his wife and daughter in the plane with him; and 15 people on the ground.

#90176u2010 06/25/1990 ~United Press International

(JUNE 25) UPI - President Bush had some kind words and some mild criticism for Nelson Mandela today.

At a White House welcoming ceremony, Bush said the South African black nationalist is- ''a man who embodies the hopes of Millions.'' But Bush called on Mandela to ''renounce the use of violence'' against Pretoria's white minority government.

Mandela said his African National Congress is committed to peace, but he refused to renounce the armed struggle against apartheid . He said if the A-N-C resorts to violence, it's because they ''have NO other alternative.''

After a three-hour session, Mandela said he and Bush ''reached broad agreement'' on most issues.

The talks failed to produce firm agreement on how long U-S sanctions should remain in place against South Africa.

U-S officials say Mandela also asked for financial aid for the A-N-C, but was told there would be NONE.

Assistant Secretary of State Herman Cohen says Bush and Mandela ''agreed to disagree'' on other matters such as Mandela's support of Libya, Cuba and the P-L-O.

#90176u2014 06/25/1990 ~United Press International

MOSCOW (JUNE 25) UPI - The Lithuanian Parliament will consider Tuesday whether to declare a moratorium on its March 11 declaration of independence to clear the way for negotiations with Moscow and a partial lifting of the Soviet Union's economic blockade, a spokeswoman said Monday.

Lithuanian government spokeswoman Rita Dapkus said by telephone from Vilnius the Parliament would take up the moratorium, proposed by Prime Minister Kazimiera Prunskiene and her government more than a week ago, at its afternoon session Tuesday.

A moratorium would suspend the effect of Lithuania's March 11 declaration of independence from the Soviet Union in order to meet Soviet President

Mikhail Gorbachev's conditions for talks on secession.

Soviet officials have also promised to end a partial economic blockade of the republic if it suspends its declaration of independence.

The official Soviet television news show ''Vremya'' said Monday night a majority of the Lithuanian Supreme Soviet, or parliament, opposed the moratorium and felt the declaration of independence should stay in effect. It did not give a source for the conclusion.

Lithuanian President Vytautas Landsbergis has also hinted he may oppose the moratorium, and nationalist groups have organized rallies outside the government building urging legislators not to suspend the declaration.

But a poll by the Lithuanian Academy of Sciences, cited by the independent news agency Interfax, Monday showed that more Lithuanians support Prunskiene than either Landsbergis or the Parliament.

Sixty-one percent of those polled said they supported Prunskiene while Landsbergis's popularity rating fell to 28 percent from 45 percent in a previous poll by the same organization on an unspecified date.

Prunskiene proposed the moratorium after the possibility of a compromise emerged from a June 11 meeting between Gorbachev and the presidents of the Baltic republics of Lithuania, Latvia and Estonia.

Gorbachev originally had demanded Lithuania rescind its declaration of independence before he would lift the blockade or agree to any talks. But at the meeting two weeks ago he softened his stand and said suspension of the proclamation would be sufficient.

The moratorium proposed June 16 by the Council of Ministers, the equivalent of a Cabinet, would remain in effect for the duration of talks with Soviet officials on full independence for Lithuania, which was annexed by the Soviet Union along with Latvia and Estonia in 1940.

While Gorbachev has offered the Baltic republics ''special status'' in a new,looser Soviet federation of republics, Lithuanian officials have said any negotiations will focus on the process of secession and not a new confederation.

Earlier this year new nationalist-controlled parliaments chosen in free elections in each of the three Baltic republics declared independence from Moscow. The Lithuanian proclamation was the most radical.

Moscow cut off oil, most natural gas and other raw materials to Lithuania two months ago in an effort to force it to back off independence.

The partial blockade forced many Lithuanian businesses to close and an estimated 40,000 people were unemployed. Lithuanian Finance Minister Romualdas Sikorskis said last week the blockade cost the republic more than $160 million.

WASHINGTON (JUNE 25) UPI - The following is the text of a statement reportedly written by Chinese dissident Fang Lizhi and released Monday by the State Department:

''1. I am opposed to the four cardinal principles (the tenets underpinning the Chinese communist system) which are contained in the preamble to the Chinese Constitution, because their purpose is to uphold a political system of 'class struggle.' I take note that the political view violates the preamble of the constitution.

''2. In order to visit relatives and friends abroad and to obtain necessary medical treatment, I apply to leave the country and travel abroad. I hope that the Chinese government will give this humanitarian consideration.

''3. The purpose in going abroad is focused on scholarly exchange and research. We will appreciate and welcome all activities which accord with the progressive interests of Chinese society, and moreover refuse to participate in all contrary activities whose motive lies in opposing China.''

#90176u2036 06/25/1990 ~United Press International

(JUNE 25) UPI - A possible breakthrough in U-S-Chinese relations.

China's leading dissident Fang Lizhi and his wife have been allowed to leave the country after more than one year in hiding.

The couple reportedly are en route to Great Britain.

They had been holed up in the U-S Embassy in Beijing ever since last year's pro-democracy demonstrations... in which Chinese authorities believed Fang played a hand.

The official Chinese news agency Xinhua says Fang and his wife were allowed to leave for medical reasons... after showing ''signs of repentance'' regarding admitted ''political errors.''

White House spokesman Marlin Fitzwater says the pair were flown out of China on a U-S military plane and are due to arrive in Britain late today or early tomorrow.

He said the U-S government ''welcomes'' the move as a- quote- ''significant step that will improve the atmosphere for progress in bilateral relations.''

A man who killed 14 members of his family and two other people is on death row at a prison near Pine Bluff, Arkansas, awaiting an execution tonight that he says he deserves.

Ronald Simmons refuses to appeal his case... saying he wants the ''torture and suffering'' in him to end. He could prevent his lethal injection by simply asking for an appeal.

Prosecutors say Simmons went on a murder rampage at Christmas time in 1987 because his daughter ended their incestuous relationship.

In Texas, a former Hare Krishna follower also welcomes his pending execution.

James Smith says he is looking forward to reincarnation, and more prison time would be cruel and UNusual punishment.

Smith's mother told lawyers to file an appeal today to halt the execution. But a psychologist re-examined Simmons and found him mentally competent to make his own decision.

Smith is due to die by lethal injection tomorrow in Huntsville for killing a man during a robbery.

#90176u2037 06/25/1990 ~United Press International

NEW YORK (JUNE 25) UPI - The City University of New York has among its graduates more corporate executives than any other school in the country, topping even prestigious Yale and Harvard universities, a survey reported Monday.

The Standard & Poor's Executive-College Survey found that CUNY leads the list of colleges and universities that have granted undergraduate degrees to business leaders, beating out Yale, which had been first since the poll's inception in 1976.

Harvard was third, followed by the University of Wisconsin, the University of California, Princeton University, the University of Pennsylvania, the University of Michigan, the University of Illinois and New York University.

In 1987, the last time the survey was taken, Yale was the leader, followed by CUNY, Harvard, Princeton and Wisconsin.

The survey results were based on data contributed to S&P's Register of Corporations, Directors and Executives by some 70,000 business officers.

The survey contained information on 54,909 executives with undergraduate degrees and 27,436 with graduate degrees. A total of 542 colleges and universities were represented in the study.

The survey's results were based upon raw data, and did not take into consideration the size of each school.

CUNY, composed of nine colleges and other smaller units, is the third-largest university system in the country.

In the survey of executives with graduate degrees, Harvard led, followed by NYU, Columbia University, Pennsylvania, Michigan, University of Chicago Northwestern University, Stanford University, Massachusetts Institute of Technology and California.

From the results of the survey, S&P compiled a composite of the average executive.

The composite business leader was born in New York State in 1942. After receiving his education at CUNY or Harvard, he moved up the executive ranks to become president of his company, which is located in New York.

He finds that most of his responsibility now is administrative. He now lives in New York City and is a member of a Masonic order.

The survey questionnaire did not elicit the sex of respondents, but by name, most seem to be male.

The survey found that the largest number of executives, 10,589, were born in New York. Pennsylvania was second, followed by Illinois, Ohio, Massachusetts and New Jersey.

(JUNE 25) UPI - The prosecution continues to build its case against Washington, D-C, Mayor Marion Barry.

Two women testified today that they saw Barry smoke marijuana in the Virgin Islands... once on a yacht in 1986 and again in a hotel on the resort island of St. Thomas in 1988.

Jonetta Vincent... a Washington native who works in the Virgin Islands... says she was on a boat when she saw Barry and another man, Charles Lewis, smoke marijuana.

Dixie Hendrington, a friend of Lewis', testified by audio-tape that she saw them smoking marijuana as well. Hendrington also says Barry and Lewis went into a hotel bathroom and she saw smoke and smelled what she thought was crack cocaine.

Barry is charged with smoking crack... NOT marijuana. NEITHER woman said she actually witnessed Barry either possessing or using cocaine.

But their testimony does corroborate what Lewis has said about Barry's drug use.

Lewis last week testified that the 1986 excursion was the first of many times he and Barry used drugs together.

JERUSALEM (JUNE 25) UPI - U.N. Undersecretary-General Jean Claude Aimee Monday gave Prime Minister Yitzhak Shamir a letter from U.N.

Secretary-General Javier Perez de Cuellar offering his help to ease tension in the region, Israel Radio reported.

Shamir did not accept or reject the offer, but said Israel's May 1989 peace initiative was aimed at lowering tension in the Middle East, the radio reported.

Official sources told the radio that the letter was brief and did not give details how the U.N. chief planned to assist. Shamir has not yet decided how he will respond to the letter, the radio said.

Aimee met Monday with Foreign Ministry officials and was scheduled to see Defense Minister Moshe Arens and Foreign Minister David Levy Tuesday. He also will visit the occupied West Bank and Gaza Strip.

#90176u2065 06/25/1990 ~United Press International

LOS ANGELES (JUNE 25) UPI - Actor Marlon Brando's daughter, whose Tahitian boyfriend was allegedly shot and killed by her half-brother, has returned to the South Pacific island and will apparently not testify at his trial, attorneys said Monday.

Defense attorney Robert L. Shapiro, who represents Christian Brando, said Cheyenne Brando returned to Tahiti last week to give birth to a baby.

''My understanding is that she wanted to have her baby born in Tahiti as a Tahitian,'' Shapiro said following a brief hearing in West Los Angeles Municipal Court at which a preliminary hearing in the case was scheduled for July 23.

Shapiro also said he understood Cheyenne does not intend to come back to California to testify at her half-brother's trial.

''She always intended to return (to Tahiti). She came to Los Angeles just to visit with her family,'' he said.

Shapiro said that before leaving Califonia, Cheyenne Brando gave authorities a new account of the shooting that contradicted her statements

shortly after the slaying.

Shapiro said part of the new statement is consistent with Christian Brando's claim that the shooting was an accident.

The prosecutor in the case, Deputy District Attorney Steve Barshop, was not immediately available to comment on Cheyenne Brando's return to Tahiti.

However, the prosecutor is expected to introduce Cheyenne Brando's statements as evidence at the preliminary hearing.

Christian Brando, 32, allegedly shot and killed Dag Drollet, 26, in Marlon Brando's 12-room estate in the Santa Monica Mountains May 16. Drollet, a Tahitian native, was the boyfriend of Cheyenne Brando.

Barshop earlier Monday said that attempts to strike a plea bargain, in which Christian Brando would plead guilty or no-contest to lesser charges, have failed.

''I believe there will be no settlement,'' Barshop said. ''I believe this case will go to trial.''

Barshop said he and Shapiro met last week to discuss a possible plea bargain, but that no deal was struck. The prosecutor would not comment on why a settlement was not agreed upon.

But Shapiro said a plea bargain in the case is still a possibility.

Police said the shooting occurred after Christian Brando accused Drollet of beating Cheyenne. Prosecutors said that Drollet was shot in the back of the head while watching television.

Christian Brando has admitted shooting Drollet, but said it was an accident that occurred while he and Drollet were wrestling for the weapon, a .45-caliber handgun.

Along with murder, Christian Brando, who remains in custody without bail, is also charged with illegally possessing a machine gun and a silencer. He has pleaded innocent to all the charges.

If convicted of first-degree murder, he could be sentenced to 25 years to life in state prison. Prosecutors are not seeking the death penalty.

(JUNE 25) UPI - A charity started and chaired by hostage Terry Waite launched an appeal today for aid to the victims of Iran's earthquake.

A spokesman for Y-Care International says the group bears in mind that Waite is still in captivity... but bases the appeal on humanitarian grounds.

He said there are NO political motivations behind the action.

Waite is still the chairman of the development agency that's linked to the Young Men's Christian Association.

He negotiated the release of some hostages in Lebanon before his 1987 disappearance. Waite is now believed to be held by the pro-Iranian Hezbollah group in west Beirut.

In Iran, a government official today said Thursday's earthquake killed at least 50-thousand people.

The official added that a swift rescue operation enabled 100-thousand other victims to be pulled to safety from the rubble.

European Community leaders are debating a proposal to give emergency aid to the Soviet Union to buy time for economic reforms.

France and West Germany introduced the proposal today at the start of a two-day European Community summit in Dublin, Ireland. They say the Soviet economy is in critical condition.

Britain opposes the proposal, saying there's NO evidence to suggest Soviet President Gorbachev needs bailing out.

The United States also insists Western economic aid to the Soviets will be wasted unless free-market reforms are implemented first.

The showdown over Soviet aid overshadows debate on a proposal to relax sanctions against South Africa... and the E-C's plans to forge closer ''political union,'' including a common foreign policy.

ABIDJAN, IVORY COAST (JUNE 25) UPI - Liberian rebels Monday refused to attend peace talks aimed at ending the country's six-month civil war, and instead promised to march this week on the capital Monrovia in an all-out push to topple President Samuel Doe.

In Freetown, the capital of neighboring Sierra Leone, a delegation of five senior Liberian officials waited in vain for the arrival of a rebel delegation, which had been scheduled to reconvene peace talks that broke down nine days ago.

Tom Woewiyu, chairman of the National Patriotic Front of Liberia and leader of the rebel delegates, said the only solution was for Doe and his Cabinet to immediately resign.

''It's a waste of time to try to talk to Doe and we do not think that the government delegation at the talks has a mandate to discuss our demand that Doe resigns,'' Woewiyu said in an interview with United Press International in the Ivory Coast capital of Abidjan.

''Doe is not aware of the reality of the situation, and we feel that any more time wasted is not in our favor,'' Woewiyu said. ''Our people are suffering and it is to our benefit that we end this thing as soon as possible and there is now no other option but the use of force.''

The rebel official said fighters would this week start a push against the Liberian capital. Guerrillas have pressed on to Monrovia, despite pledging in last week's talks to restrain their operations, and were reported to have captured last Wednesday Careysburg town, 20 miles north of Monrovia.

In Monrovia, the Liberian People's Party, one of the most influential political groupings in the West African nation, also called Monday for Doe'sresignation.

The immediate stepping down of Doe and his government would mark the beginning of the resolution of the civil war, the party said in a statement.

The government recently lifted a five-year ban on the LPP. It called for the creation of a negotiated interim government of national unity representing the various socio-political groupings of the country.

The party shrugged off the ''belated'' lifting of the ban against it, saying it was a response to the demands of the Liberian people that now are being ''articulated at the level of an armed struggle led by the National Patriotic Front rebels.''

''If Doe wants to leave, then he should leave,'' Woewiyu said. ''We aren't making him any more offers. We were offering him a safe exit, but we are no longer talking about those things. There's nothing left for us to talk about unless Doe makes a significant offer now.''

Rebel leader Charles Taylor met delegates Sunday of the Liberian Council of Churches, which organized the peace talks, and told them of his decision to break off talks.

The churchmen arrived in Freetown Monday and have met with the Liberian Government delegation.

Woewiyu said the rebels have finalized plans for an interim government, which would include members of their own organization, representatives from Liberia's 13 counties, some members of the current government, and Liberians living abroad.

He said the new government will be known as the National Patriotic Reconstruction Assembly, and Taylor will be its president. The vice chairman of the NPFL would be vice-president, but his identity cannot be disclosed, he said.

Woewiyu said the rebel force will be in a majority in the proposed new Cabinet, holding five of the 11 seats, with control of the presidency and vice-presidency giving it a one-place majority.

Woewiyu would not disclose which members of the Doe administration would be given government posts but he promised a general election within six months.

''If anything it will be before six months, as it will be necessary to get a mandate from the people,'' Woewiyu said.

LUSAKA, ZAMBIA (JUNE 25) UPI - Police clashed Monday with protesters demonstrating against food price increases, leaving at least two policemen and one child dead in Zambia's worst civil unrest since 1986, witnesses and hospital sources said.

Hospitals reported the three died of head wounds and said at least 20 people were injured - one reportedly by a policeman using a bayonet - and 50 were treated for tear-gas inhalation during the battles in the capital.

More than 1,000 protesters were estimated to be involved in the unrest.

Students in and around the University of Zambia campus stoned dozens of cars, flung other missiles at police, looted stores and, with scores of sympathetic residents, were blocked by riot squads in an attempt to march on the State House. They were dispersed by tear gas and helicopters.

''This is the blood of one of the looters,'' one journalist in a stained skirt told colleagues, saying the man was struck by a policeman using a bayonet.

''They beat our mother. ... We will kill one of them,'' shouted a woman who said her aged mother was beaten by police.

''It's an anti-Kaunda demo,'' a student told reporters, referring to President Kenneth Kaunda and the one-party state he has run since independence from Britain in 1964.

The pitched battles tapered away late in the afternoon, but sporadic gunfire rattled across Lusaka into Monday night. Both sides remained tense and prepared for further confrontation.

In 1986 security forces killed 15 people in the northern copperbelt region during similar riots sparked by food price rises.

Students began the protest early Monday, accusing Kaunda of balking on introduction of a multi-party democracy. They also said he reneged on promises to feed all the people after a 100 percent hike this month in the price of corn meal, a staple, and related products.

The cornmeal increase was in line with International Monetary Fund prescriptions that called for cutting subsidies to achieve a stable economy.

Kaunda was quoted in a newspaper Sunday as saying that in 25 years he would like to see all Zambians wearing suits.

The government is ''forgetting that 25 years ago we were promised that Zambians would be eating an egg a day,'' one student said. He noted that many of the country's 10 million citizens are starving as the copper-based economy struggles against decades of mismanagement and experiments.

Secretary of State for Defense and Security Alex Shapi refused to comment on the rioting and went into a meeting with officials on the crisis.

Security sources said privately the government would not tolerate any form of violent dissent.

Kaunda had left town Monday morning for a working holiday in a game park, apparently to discuss the failing economy with advisers.

Zambia in May 1987 turned its back on IMF prescriptions for a sound economy. But in March, as a result of a deepening recession and a falling copper price, it secured IMF approval for a new economic blueprint aimed at freezing prices, cutting subsidies and introducing business incentives.

#90176u2141 06/25/1990 ~United Press International

DUBLIN, IRELAND (JUNE 25) UPI - A summit of 12 European Community leaders came to a standstill Monday for the pressure-packed finale of I World Cup soccer game against Romania, won 5-4 by the Irish on penalty kicks after regulation play ended.

''I think all the heads of state are as excited as I am,'' a beaming Irish Prime Minister Charles Haughey, the EC president, said moments after the game ended.

Haughey interrupted a briefing on European monetary issues to watch the game's cliff-hanging final scenes.

Government officials and journalists from throughout Europe huddled around television sets to watch the thrilling end of the second-round World Cup game from Genoa, Italy, which was won on penalty kicks by Ireland after there was no score through regulation time and two 15-minute overtime periods.

Ireland made all five of its penalty kicks, while Romania made its first four but missed the final attempt.

Policemen assigned to guard medieval Dublin Castle, site of the summit, threw their arms up in jubilation as all of Dublin erupted in a roar after the decisive kick.

''This town's going to be hopping tonight, and you can imagine what it's going to look like if we win the World Cup,'' said one of the police officers.

The summit of European leaders was hardly noticed by soccer-mad Dubliners, whose team is in the World Cup Finals for the first time.

Factories and stores closed down early as everyone flocked to television sets to watch their heroes.

''I'll stop working at half one (1:30 p.m.) and I'll be at the pub, The Stone Boat, by 2 o'clock,'' taxi driver Jim Buckley said early in the day. ''Got to get in the mood before the game starts.''

By kickoff, at 4 p.m. Dublin time, usually bustling streets were deserted.

''I feel sorry for the policemen assigned to the summit,'' the cabbie said. ''I can stop anytime I want to but they can't.''

Patrolman Tom Flanagan worked the overnight shift near Dublin Castle on Sunday night, and was due back on duty just two hours before kickoff time.

''I'll watch the tape later tonight, but it would be much better to watch it live with other people, to build up a bit of an atmosphere,'' he said.

ALBANY, NY (JUNE 25) UPI - Under pressure from the New York attorney general's office, the Fisher-Price Toys agreed Monday to warn parents its

''Little People'' figures can choke children who put them in their mouths.

Under the agreement, Fisher-Price will place stickers on ''Little People'' boxes, stating, ''Caution: The figures could present a choking hazard to children, regardless of age, who may put things in their mouths.''

Attorney General Robert Abrams said the company will print the warning label directly onto the package beginning next year.

The company will also pay New York state $25,000 as compensation for its costs in reaching the agreement.

The brightly colored plastic figures are hollow and often less than one-inch in diameter. They are marketed for children ages two to six.

Although the product meets federal standards for children under three years old, the figures have been linked to at least five deaths of children and one case of severe brain damage.

Abrams' spokeswoman, Nancy Connell, said several New York children have been injured by swallowing the figures, but none have died.

Abrams petitioned the Consumer Product Safety Commission in 1987 to change those federal standards, but the petition was denied.

''Toys that may look cute can cause serious injury to children. Adults should be made aware of potential dangers before they purchase 'Little People' for their own little people at home,'' said Abrams, the father of two girls.

Fisher-Price, of East Aurora, N.Y., was owned until recently by Quaker Oats Co., the Chicago-based food processing concern. Quaker spun the toy company off in a stock distribution to its individual shareholders.

#90176u2152 06/25/1990 ~United Press International

WASHINGTON (JUNE 25) UPI - President Bush, hoping to jump-start stalled budget talks with Congress, met with Republican negotiators Monday and scheduled a breakfast meeting Tuesday with Democratic and GOP congressional leaders.

"I think that the purpose (of Tuesday's bipartisan meeting) is to discuss how serious the president feels about these discussions," said one GOP congressional aide. "I don't know if it's another feeling-out exercise."

White House spokesman Marlin Fitzwater said Bush's meeting Monday with Republicans was "just a little review of the budget negotiations to this

point."

Sen. Robert Packwood, R-Ore., described the meeting with Bush as "a roundtable discussion, each of us putting forth some ideas of how you might come together in a package, and we realize it has to be acceptable to the House, the Senate, the Republicans, the Democrats, and the president."

Sen. Phil Gramm, R-Texas, said Republicans "are very perplexed" with the talks. "We don't understand what the Democrats expect and we don't understand why we are not proceeding with negotiations," Gramm said. "We are ready. Everything that has to be done, has been done."

"I think our request is for the Democrats to come forth with a plan," said Packwood, adding: "If we don't reach some conclusion, significant conclusion, by the end of this week, I think getting any serious, substantative conclusion (before the month-long August congressional recess) is unlikely." Democratic negotiators arranged to meet later Monday.

After five weeks of preliminary talks about the deficit problem, Bush kicked off the negotiating phase last week by presenting a budget plan that cut $51 billion from the deficit in fiscal 1991 and $444 billion over five years.

The Bush proposal got most of its savings from additional cuts in domestic programs and entitlements, such as Medicare and farm programs whose payments are determined by formulas.

Disappointed Democrats, who had demanded that Bush present his solutions to the budget summit before Democrats did, attacked the plan as completely inadequate. Sen. James Sasser, D-Tenn., said it "stinks."

One aide to a Republican budget summit participant expressed pessimism that the talks would succeed in the less than 40 days Congress will work before it is scheduled to adjourn in early October.

"I just don't see how this is going to work out," the GOP aide said. "Obviously, we're having a little train wreck (in the talks). ... They ought to kick the staff out and get to work."

The Republican aide said Richard Darman, head of the administration's Office of Management and Budget, keeps hoping a compromise plan will simply materialize.

"I think that Darman is still hoping for the immaculate conception where we can all sit in the room together and come up with a joint document," the aide said. Asked what kind of plan that would be, the aide said: "It'll be awful."

One negotiator who might offer an alternative plan is Sen. Pete Domenici, R-N.M., ranking Republican on the Senate Budget Committee and a former chairman of that panel.

Sources familiar with Domenici's plan said the proposal would cut the deficit by about $50 billion in the first year and by about $475 billion over five years and would include tax increases Bush has opposed.

"We're obviously looking at environmental, energy and sin (alcohol and tobacco) taxes in a way that maybe the president hasn't looked at them," said the source. "We're staying away from personal income taxes."

The source said that Domenici would first clear his plan with other GOP negotiators but that "he may never offer it." "He's not going to be a lone ranger on this," the source said. "He will not look necessarily for an endorsement from the administration, and I don't think he'll get one."

#90176u2156 06/25/1990 ~United Press International

DUBLIN, IRELAND (JUNE 25) UPI - A new European Energy Community linking

economically rich Western Europe with the energy-abundant Soviet Union was proposed Monday by Holland's prime minister at the European Community summit.

The plan, described by Dutch journalists as ''something totally out of the blue,'' surfaced as EC leaders debated a Franco-German proposal for urgent economic assistance to the Soviet Union.
